

H. P. Lovecraft

At the Mountains of Madness

HERE at last is the definitive Lovecraft—the second in a three-volume set of the collected macabre fiction that embodies the author's own final thoughts and stylistic preferences. Based upon S. T. Joshi's extensive and painstaking collation of extant manuscript materials, this new Lovecraft edition from Arkham House is the only completely authoritative text and supersedes all previous editions.

Of the three short novels included in the present volume, "At the Mountains of Madness" remains one of the few works of American science fiction from the 1930s that can be read today for genuine literary pleasure rather than dutiful historical interest, while "The Case of Charles Dexter Ward" is perhaps Lovecraft's most precisely wrought masterpiece of demonic horror. The third short novel, "The Dream-Quest of Unknown Kadath," presents an odyssey through the byways of dreamland and is one of the several narratives featuring Lovecraft's alter ego, Randolph Carter.

In the whole range of fantastic literature, Lovecraft created a new form that is neither pure fancy nor pure science fiction. He combined a factual and accurate scientific knowledge with its extension to the absolute limit in supernatural bizarerie. His work defies classification, for it is as much myth as reality—both lore and legend at their haunting, haunted best, and at the same time science at its most provocative. His tales have been termed the finest weird fantasy ever written, and yet also the most superbly literate science fiction. Lovecraft's work has achieved an honored eminence among the great visionary fiction of the ages precisely because, while betraying no trace of the commonplace, his stories are based convincingly in the world of everyday reality, yet lure the mind into the farthest reaches of the imagination, the star-flung spaces of the universe, the cosmic realm of a master mythmaker.

A Note on *the* Texts

This is the first edition of Lovecraft to be based upon thorough consultation of original manuscripts and early publications. We are fortunate that R. H. Barlow preserved manuscripts for many of Lovecraft's important stories.

For "The Case of Charles Dexter Ward," "The Dreams in the Witch House," "The Dream-Quest of Unknown Kadath," and "Through the Gates of the Silver Key" the surviving autograph manuscript has served as the foundation of the text. In the last-named story many of Lovecraft's phrases that were changed by his collaborator E. Hoffmann Price when the latter prepared the typescript have been restored; although words and phrases that seem to have been altered by mutual decision of the collaborators have been preserved. For "The Silver Key" the text has been based upon the surviving typescript (prepared by Lovecraft). For "The Statement of Randolph Carter" the typescript (prepared by Lovecraft) has been used; the recently discovered autograph manuscript appears to pre-date the typescript and does not seem to embody Lovecraft's final wishes for the tale. For "The Shunned House" no manuscript is available, hence the text is based upon what appears to be a

relatively accurate printing of the tale by W. Paul Cook in his still-born Recluse Press booklet of 1928.

The textual history of "At the Mountains of Madness" is very confused and cannot be explored in detail here. Previous Arkham House editions have followed Lovecraft's corrected copies of *Astounding Stories* (February–March–April 1936), now in the John Hay Library of Brown University; but there is evidence that Lovecraft did not restore all the editorial alterations made in the tale. Our text is accordingly an eclectic one, based largely upon Lovecraft's typescript but also employing his autograph manuscript and the corrected copies of *Astounding Stories*. For further light on this matter see my article "Textual Problems in Lovecraft," *Lovecraft Studies* 2 (Spring 1982): 28–31.

Internal inconsistencies of spelling, punctuation, and syntax have been eliminated in accordance with standard editorial practice, although Lovecraft's many orthographical and syntactic idiosyncrasies (archaisms, British spelling variants, and the like) have been scrupulously maintained.

For assistance in the preparation of this edition I should like to thank Donald R. Burleson, Robert M. Price, David E. Schultz, and John H. Stanley of the John Hay Library. Especial thanks go to James Turner of Arkham House, whose valuable support and perceptiveness have eliminated many errors.

S. T. JOSHI

A Mythos in His Own Image

The life of Howard Phillips Lovecraft (1890–1937) is a study in progressive humanization. Even though the man had lived a relatively uneventful first thirty years as a sickly recluse and then had died at the early age of forty-six, the evolution of personality that occurred in his final decade was so profound that the mature Lovecraft was disposed to regard his earlier self with a commingling of astonishment and dismay. Here are his comments, a few weeks before his death, upon rereading a letter he had written in 1924 to the editor of *Weird Tales*: “Was I that much of a dub at thirty-three . . . only thirteen years ago? There was no getting out of it—I really *had* thrown all that haughty, complacent, snobbish, self-centred, intolerant bull, and at a mature age when anybody but a perfect damned fool would have known better! That earlier illness had kept me in seclusion, limited my knowledge of the world, and given me something of the fatuous effusiveness of a belated adolescent when I finally *was* able to get about more around 1920, is hardly much of an excuse. . . .”

The central fact of Lovecraft's early years was his birth into a proud aristocratic New England family that was entering an era of

financial decline and disintegration. Lovecraft's childhood was perhaps the happiest period in his life, however; after his father's breakdown in 1893, he and his mother returned to the home of grandfather Whipple Phillips on Angell Street in Providence, where the young Lovecraft was raised amidst surroundings of true baronial splendor. Here, too, he began to acquire his amazing erudition, as Lovecraft related in one of his stories: "He was the most phenomenal child scholar I have ever known, and at seven was writing verse of a sombre, fantastic, almost morbid cast which astonished the tutors surrounding him. Perhaps his private education and coddled seclusion had something to do with his premature flowering. . . . He was never allowed out without his nurse, and seldom had a chance to play unconstrainedly with other children. All this doubtless fostered a strange, secretive inner life in the boy, with imagination as his one avenue of freedom."

It all came to an end in 1904 when the death of Whipple Phillips left the family in a state of genteel impoverishment. The stately ancestral mansion on Angell Street was sold, and in an excess of near-suicidal despair the adolescent Lovecraft moved with his mother into rented quarters. That same year he entered Hope Street High School but became a high-school dropout in 1908; over the following six years H. P. Lovecraft would drop out of the world as well, as the young man gradually assumed the role of an outsider in his own century. "I shunned all human society, deeming myself too much of a failure in life to be seen socially by those who had known me in youth," he recalled; during this crepuscular period of 1908-1914 Lovecraft lived in virtual isolation with his neurasthenic mother, performing no remunerative work and subsisting amidst reminiscences of the vanished glories of his ancestral tradition. In his 1921 story "The Outsider" Lovecraft portrayed his eponymous protagonist as "a stranger in this century" who inhabits a surreal subterranean edifice appointed with bones, skeletons, and "odious oblong boxes." The man abandons his sepulchral haunts, travels to his former home where he is revealed as an abhorred monster, and resignedly returns to his shadowy realm of catacombs and ghouls. As in Richard Jefferies's poem in which "we are murdered by our ancestors . . . their dead hands stretch forth from the tomb and drag us down," H. P. Lovecraft had failed to make the transition into the twentieth century and was now in thrall to his

ancestral past. He had been snatched up by the dead and appropriated unto their own.

Had Lovecraft continued to languish within this bedlamite environment, he very probably would have died in complete obscurity, perhaps as mentally defective as his two parents. Two momentous occurrences instead would alter the course of his life:

In 1914 Edward F. Daas, editor of the United Amateur Press Association, noticed Lovecraft's name in the letter column of *The Argosy* and invited him to join the organization. Amateur journalism during this era was a voluntary social movement in which hopeful belletrists took delight in inflicting their effusions upon each other. For Lovecraft, of course, amateur journalism became a holy crusade for the nurture of "eternal truths of literary art"; in his own contributions thereto, Lovecraft emerged as a strident and psittaceous spokesman for the old aristocracy, for its political conservatism, reactionary outlook, and racial intolerance. Today such writings are of academic interest only, but amateur journalism did initiate the long and painful reemergence of H. P. Lovecraft into the world: meaning and direction had been imparted to his daily existence, as Lovecraft maintained a voluminous correspondence with his amateur colleagues, received visitors at his home in Providence, and, finally, emerged from that home to attend meetings in other cities. Certainly Lovecraft himself understood what had happened to him; when asked to deliver an address at a 1921 Boston gathering on the topic "What Amateurdome and I Have Done for Each Other," Lovecraft concluded simply, "What amateur journalism has given me is—life itself."

Later that same year, and again at an amateur journalists' meeting in Boston, Lovecraft was introduced to Sonia H. Greene, a beautiful and dynamic New York businesswoman who had a predilection for intellectual men. "I admired his personality but, frankly, at first not his person," Mrs. Greene admitted afterward. She nonetheless courted Lovecraft with single-minded persistence until the two were married in March 1924. The marriage did not endure, but the two-year period during which Lovecraft lived in New York City was probably the most significant learning experience of his entire adult lifetime. During this sojourn within an alien milieu Lovecraft sustained almost unimaginable mental and

emotional anguish, from his humiliating failure to find employment to the degrading theft of his wardrobe. "Do you not see how necessary a world of pains and troubles is," asked Keats in his letters, "to school an intelligence and make it a soul?" Perhaps it was only through such intense personal suffering that Lovecraft was able to temper his formidable intellectual gifts with a sensitivity and concern for other human beings. Not until his return to Providence in April 1926, at least, did Lovecraft finally become the man whom his friends recalled so fondly. "He came back to Providence a human being—and *what* a human being!" wrote Lovecraft's old amateur colleague W. Paul Cook. "He had been tried in the fire and came out pure gold."

During the final decade of his life, in the years following his New York "exile," Lovecraft was to emerge as a legend in his own time, both for the stories he would write and for the man he had become. The final years of his life also coincided, more or less, with the Great Depression, and Lovecraft's keen interest in the structure of contemporary American society testifies to his belated reentry into the twentieth century. "With me," he observed in a 1936 letter, "objects [in life] are (1) the creation of something of intrinsic excellence if possible, and (2) the supplying of genuine needs. If my own survival cannot be ensured as an incidental to the pursuit of these objects, then I feel that something is wrong." This conviction that "something is wrong" had led Lovecraft to a complete reversal of his earlier conservative beliefs. Again, from a 1936 letter: "I used to be a hide-bound Tory simply for traditional and antiquarian reasons—and because I had never done any real *thinking* on civics and industry and the future. The depression—and its concomitant publicisation of industrial, financial, and governmental problems—jolted me out of my lethargy and led me to reexamine the facts of history in the light of unsentimental scientific analysis; and it was not long before I realised what an ass I had been. The liberals at whom I used to laugh were the ones who were right—for they were living in the present while I had been living in the past." Of all Lovecraft's epistolary writings toward the end of his life, his economic and social theorizing is the most significant, for this body of work represents the man's own intellectual resolution to the out-

sider complex that had confounded him since the turn of the century.

In his debates with various correspondents Lovecraft presented a comprehensive state socialism entailing government ownership of industry, artificially allocated employment, regulated salaries and old age pensions, and similar measures. "The only decent government," he explained in a 1936 letter, "is that which keeps economic affairs within its control; assuring a livelihood to all, and preventing the waste and duplication of competitive effort. It ought to be administered by a small board of highly trained executives with centralised power . . . and chosen by the vote of such citizens as can pass a certain reasonable set of mental, scholastic, and cultural examinations." This "small board of highly trained executives" is the key to Lovecraft's socialistic thinking, the means through which he sought to restore the aristocratic values of his old family by placing authority once again into the hands of the "better" people. The era of Whipple Phillips had passed, but now an aristocracy of intellect would replace the aristocracy of wealth and the consequent redistribution of resources would permit "the security and leisure necessary for the maximum flowering of the human spirit." Nebulous and visionary though his paternalistic utopia may seem, H. P. Lovecraft at the end of his life was filled with hope, his eyes upon the future of American society. The outsider at last had become reconciled to the twentieth century.

If indeed Lovecraft had become a more positive, socially minded man after his New York experience, evidence of this emergent humanization should be apparent in the macabre fiction. His imaginative tales had never been an idle *divertissement* for Lovecraft but rather arose from an inner compulsion: "Art is not what one resolves to say, but what insists on saying itself through one," he explained in a 1934 letter. "The only elements concerned are the artist and the emotions working within him. . . . Real literary composition is the only thing . . . I take seriously in life."

The central element in Lovecraft's "real literary composition" is his cosmicism; this term defines the very essence of Lovecraft and is more integral to an understanding of his fiction than any other factor. Cosmicism for Lovecraft denoted a sense of wonder and awe in

the presence of the unknown; the rigid and sanity-preserving laws of Nature (always with a capital N) are assaulted by inconceivable ultradimensional forces, and finite man crouches in fear at this glimpse of the otherworldly. Lovecraft's animating aesthetic already was clearly formulated in this 1922 letter: "My own view toward aesthetic things has always been one of awe at the mystery of the cosmos. The dominant sensation has been a kind of ecstatic wonder at the unfathomed reaches of nighted space. . . . The only poignant sensation in life is that of wonder, fascination, and terror at the unknown." During this early period Lovecraft had embraced a simplistic and outmoded Haeckelian monism, or "mechanistic materialism," which he used to justify a sense of the "ridiculous insignificance and futility of all human actions" and which essentially signified his own feelings of worthlessness and failure at this stage in his life; from his "contemptuous indifference toward mankind in the aggregate," Lovecraft employed the cosmic impulse as a means of imaginative escape into realms of Dunsanian pinnacles or Poesque crypts.

During the final decade of his life Lovecraft's cosmicism became far more complex and profound as he began to incorporate the contemporary scientific thinking of his age into his macabre fiction. The first major story after his return from New York was the 1926 nouvelle "The Call of Cthulhu," which also inaugurated the body of mature work that would become Lovecraft's crowning achievement and to which has been applied posthumously the term "Cthulhu Mythos." The opening paragraph of "The Call of Cthulhu" serves as a virtual prolegomenon for the Mythos tales that would follow:

The most merciful thing in the world, I think, is the inability of the human mind to correlate all its contents. We live on a placid island of ignorance in the midst of black seas of infinity, and it was not meant that we should voyage far. The sciences, each straining in its own direction, have hitherto harmed us little; but some day the piecing together of dissociated knowledge will open up such terrifying vistas of reality, and of our frightful position therein, that we shall either go mad from the revelation or flee from the deadly light into the peace and safety of a new dark age.

Although Lovecraft often is designated as a founding father of the modern American horror movement, the preceding scientifically

formulated statement will serve to suggest the essential apartness of Lovecraft's cosmic Cthulhu Mythos from the supernatural occultism, urban paranoia, and abattoir extravagances of present-day horror fiction. In these Mythos tales Lovecraft typically would take an element from the old Gothic tradition—perhaps an authentic New England setting or some aspect of New England lore or legendry—and reinterpret this element in terms of the scientific theories (Einstein, Heisenberg, Planck, et al.) of his day. Through a fanciful extension of contemporary scientific thinking Lovecraft ultimately would resolve his narrative upon a supernatural—or, more accurately, supramundane—level of reality, thus revivifying the trappings and appurtenances of old-time Gothicism through an expressly scientific approach. Here is Lovecraft's own explanation of the technique, from a 1930 letter: "My big kick comes from *taking reality just as it is*—accepting all the limitations of the most orthodox science—and then permitting my symbolising faculty to *build outward* from the existing facts; rearing a structure of *infinite promise and possibility* whose topless towers are in no cosmos or dimension penetrable by the contradicting-power of the tyrannous and inexorable intellect." An example of this technique is the 1932 story "The Dreams in the Witch House," in which Lovecraft presented figures of New England legendry—the old Salem witch Keziah Mason, her evil ratlike familiar, and the infamous Black Man of the witch cult—and reinterpreted these figures as emissaries from a fourth-dimensional space-time continuum; the narrative itself is then resolved into a sequence of oneiric episodes in which this fourth dimension impinges upon the present world. If "The Dreams in the Witch House" is far from being a completely satisfying reading experience, one can only marvel at Lovecraft's audacity in attempting so formidable a synthesis of New England black magic and Einsteinian physics!

Throughout these works conceived during the last decade of his life, Lovecraft thus was according a cosmic treatment to the old Gothic horror tale; but by the 1930s—when America was deeply entrenched in the Great Depression and Lovecraft himself had become a dramatically different human being—a new element entered several of the Cthulhu Mythos stories. Early in 1931 Lovecraft had begun an extended narrative, set within the Antarctic region, in which an exploration party discovers the ruins of a massive stone

city constructed in millennia-removed prehistory by the extraterrestrial Old Ones. Initially "At the Mountains of Madness" proceeds as one might expect from previous Mythos tales, with the auctorial promise of "a hideously amplified world of lurking horrors," but when two members of the scientific party finally enter the Old Ones' abandoned city, something extraordinary happens: instead of contriving an immediate climactic confrontation with one of the creatures, Lovecraft chooses to *linger* over the Old Ones' civilization. Inferences from the murals that span the walls of this awesome metropolis provide detailed information on the history, technology, social organization, and culture of the Old Ones. After many pages of patiently reconstructed pseudohistory, the author has presented a civilization of true epic grandeur; so immersed has Lovecraft become in his imaginary milieu, elaborated from some inner compulsion, that the narrative attains a point of fundamental reorientation when the Old Ones no longer can be perceived as objects of terror: "Poor devils! After all, they were not evil things of their kind. They were men of another age and another order of being. . . . Scientists to the last—what had they done that we would not have done in their place? God, what intelligence and persistence! What a facing of the incredible, just as those carven kinsmen and forbears had faced things only a little less incredible! Radiates, vegetables, monstrosities, star-spawn—whatever they had been, they were men!" Yes, they were men; or rather men such as Lovecraft wished his own contemporary American society might foster.

None of the three Mythos stories that followed "At the Mountains of Madness" were directly concerned with interstellar entities, but in the 1934 nouvelle "The Shadow Out of Time" Lovecraft again explored an alien civilization from the prehistory of our planet, the Great Race of Yith. During the three years that separate "At the Mountains of Madness" from "The Shadow Out of Time" Lovecraft had continued to develop his economic and social theories, and thus while in his earlier narrative we were apprised that the Old Ones' government was "evidently complex and probably socialistic," Lovecraft now presents the social and political institutions of the Great Race in carefully considered detail: "The Great Race seemed to form a single, loosely knit nation or league, with major institutions in common, though there were four definite divisions. The political and economic system of each unit was a sort of

fascistic socialism, with major resources rationally distributed, and power delegated to a small governing board elected by the votes of all able to pass certain educational and psychological tests." As I have demonstrated in the preface to *Selected Letters V*, passages such as the preceding have direct counterparts in the various reformist letters that Lovecraft was writing to correspondents during this period. The author was not merely endowing his stories with such pseudohistoric detail to impart a sense of narrative verisimilitude; he rather was re-forming the Mythos creatures in terms of his developing criteria for human excellence, his own idealized conception of man at his most humane and profound. The members of the Great Race were the greatest scientists of all time, exemplars of a mighty socialized civilization of technology and art, entities that had apprehended the secret of survival in a nihilistic Lovecraftian cosmos. Throughout his life Lovecraft had professed that man's capacity to be a seeker after truth represented our species at its noblest; it is no coincidence that in "The Shadow Out of Time" the scholars among the Great Race have become the saviors of society.

After "The Shadow Out of Time" Lovecraft made one final contribution to the Mythos in response to a story written by his young friend Robert Bloch, and then the rest is silence. Ernest A. Edkins, an old Chicago correspondent, reported that Lovecraft at the end of his life was planning an extended dynastic chronicle of an ancient New England family, to which he would bring his lifelong researches into the folklore and legendry of his native region. How he might have treated the Cthulhu Mythos in later years, one can only speculate; his more positive, humanized personality already was creating procedural difficulties in preserving the horror element in these mature stories. Certainly Lovecraft would not have perpetrated the type of Mythos pastiche that proliferated after his death, in which generations of imitators have attempted to substitute witless catalogs of mythic deities and forbidden tomes for genuine artistic inspiration. While such pasticheurs were shambling down the adjective-riven road of epigonic disaster, Howard Phillips Lovecraft during his lifetime had been restructuring the Mythos in terms of his emergent idealism and presenting to the world his own true measure of a man.

*At the Mountains
of Madness
and Other Novels*

At the Mountains of Madness

I.

I am forced into speech because men of science have refused to follow my advice without knowing why. It is altogether against my will that I tell my reasons for opposing this contemplated invasion of the antarctic—with its vast fossil-hunt and its wholesale boring and melting of the ancient ice-cap—and I am the more reluctant because my warning may be in vain. Doubt of the real facts, as I must reveal them, is inevitable; yet if I suppressed what will seem extravagant and incredible there would be nothing left. The hitherto withheld photographs, both ordinary and aërial, will count in my favour; for they are damnably vivid and graphic. Still, they will be doubted because of the great lengths to which clever fakery can be carried. The ink drawings, of course, will be jeered at as obvious impostures; notwithstanding a strangeness of technique which art experts ought to remark and puzzle over.

In the end I must rely on the judgment and standing of the few scientific leaders who have, on the one hand, sufficient independence of thought to weigh my data on its own hideously convincing

merits or in the light of certain primordial and highly baffling myth-cycles; and on the other hand, sufficient influence to deter the exploring world in general from any rash and overambitious programme in the region of those mountains of madness. It is an unfortunate fact that relatively obscure men like myself and my associates, connected only with a small university, have little chance of making an impression where matters of a wildly bizarre or highly controversial nature are concerned.

It is further against us that we are not, in the strictest sense, specialists in the fields which came primarily to be concerned. As a geologist my object in leading the Miskatonic University Expedition was wholly that of securing deep-level specimens of rock and soil from various parts of the antarctic continent, aided by the remarkable drill devised by Prof. Frank H. Pabodie of our engineering department. I had no wish to be a pioneer in any other field than this; but I did hope that the use of this new mechanical appliance at different points along previously explored paths would bring to light materials of a sort hitherto unreached by the ordinary methods of collection. Pabodie's drilling apparatus, as the public already knows from our reports, was unique and radical in its lightness, portability, and capacity to combine the ordinary artesian drill principle with the principle of the small circular rock drill in such a way as to cope quickly with strata of varying hardness. Steel head, jointed rods, gasoline motor, collapsible wooden derrick, dynamiting paraphernalia, cording, rubbish-removal auger, and sectional piping for bores five inches wide and up to 1000 feet deep all formed, with needed accessories, no greater load than three seven-dog sledges could carry; this being made possible by the clever aluminum alloy of which most of the metal objects were fashioned. Four large Dornier aeroplanes, designed especially for the tremendous altitude flying necessary on the antarctic plateau and with added fuel-warming and quick-starting devices worked out by Pabodie, could transport our entire expedition from a base at the edge of the great ice barrier to various suitable inland points, and from these points a sufficient quota of dogs would serve us.

We planned to cover as great an area as one antarctic season—or longer, if absolutely necessary—would permit, operating mostly in the mountain-ranges and on the plateau south of Ross Sea; regions

explored in varying degree by Shackleton, Amundsen, Scott, and Byrd. With frequent changes of camp, made by aeroplane and involving distances great enough to be of geological significance, we expected to unearth a quite unprecedented amount of material; especially in the pre-Cambrian strata of which so narrow a range of antarctic specimens had previously been secured. We wished also to obtain as great as possible a variety of the upper fossiliferous rocks, since the primal life-history of this bleak realm of ice and death is of the highest importance to our knowledge of the earth's past. That the antarctic continent was once temperate and even tropical, with a teeming vegetable and animal life of which the lichens, marine fauna, arachnida, and penguins of the northern edge are the only survivals, is a matter of common information; and we hoped to expand that information in variety, accuracy, and detail. When a simple boring revealed fossiliferous signs, we would enlarge the aperture by blasting in order to get specimens of suitable size and condition.

Our borings, of varying depth according to the promise held out by the upper soil or rock, were to be confined to exposed or nearly exposed land surfaces—these inevitably being slopes and ridges because of the mile or two-mile thickness of solid ice overlying the lower levels. We could not afford to waste drilling depth on any considerable amount of mere glaciation, though Pabodie had worked out a plan for sinking copper electrodes in thick clusters of borings and melting off limited areas of ice with current from a gasoline-driven dynamo. It is this plan—which we could not put into effect except experimentally on an expedition such as ours—that the coming Starkweather-Moore Expedition proposes to follow despite the warnings I have issued since our return from the antarctic.

The public knows of the Miskatonic Expedition through our frequent wireless reports to the *Arkham Advertiser* and Associated Press, and through the later articles of Pabodie and myself. We consisted of four men from the University—Pabodie, Lake of the biology department, Atwood of the physics department (also a meteorologist), and I representing geology and having nominal command—besides sixteen assistants; seven graduate students from Miskatonic and nine skilled mechanics. Of these sixteen, twelve

were qualified aëroplane pilots, all but two of whom were competent wireless operators. Eight of them understood navigation with compass and sextant, as did Pabodie, Atwood, and I. In addition, of course, our two ships—wooden ex-whalers, reinforced for ice conditions and having auxiliary steam—were fully manned. The Nathaniel Derby Pickman Foundation, aided by a few special contributions, financed the expedition; hence our preparations were extremely thorough despite the absence of great publicity. The dogs, sledges, machines, camp materials, and unassembled parts of our five planes were delivered in Boston, and there our ships were loaded. We were marvellously well-equipped for our specific purposes, and in all matters pertaining to supplies, regimen, transportation, and camp construction we profited by the excellent example of our many recent and exceptionally brilliant predecessors. It was the unusual number and fame of these predecessors which made our own expedition—ample though it was—so little noticed by the world at large.

As the newspapers told, we sailed from Boston Harbour on September 2, 1930; taking a leisurely course down the coast and through the Panama Canal, and stopping at Samoa and Hobart, Tasmania, at which latter place we took on final supplies. None of our exploring party had ever been in the polar regions before, hence we all relied greatly on our ship captains—J. B. Douglas, commanding the brig *Arkham*, and serving as commander of the sea party, and Georg Thorfinnsen, commanding the barque *Miskatonic*—both veteran whalers in antarctic waters. As we left the inhabited world behind the sun sank lower and lower in the north, and stayed longer and longer above the horizon each day. At about 62° South Latitude we sighted our first icebergs—table-like objects with vertical sides—and just before reaching the Antarctic Circle, which we crossed on October 20 with appropriately quaint ceremonies, we were considerably troubled with field ice. The falling temperature bothered me considerably after our long voyage through the tropics, but I tried to brace up for the worse rigours to come. On many occasions the curious atmospheric effects enchanted me vastly; these including a strikingly vivid mirage—the first I had ever seen—in which distant bergs became the battlements of unimaginable cosmic castles.

Pushing through the ice, which was fortunately neither extensive nor thickly packed, we regained open water at South Latitude 67° , East Longitude 175° . On the morning of October 26 a strong "land blink" appeared on the south, and before noon we all felt a thrill of excitement at beholding a vast, lofty, and snow-clad mountain chain which opened out and covered the whole vista ahead. At last we had encountered an outpost of the great unknown continent and its cryptic world of frozen death. These peaks were obviously the Admiralty Range discovered by Ross, and it would now be our task to round Cape Adare and sail down the east coast of Victoria Land to our contemplated base on the shore of McMurdo Sound at the foot of the volcano Erebus in South Latitude $77^{\circ} 9'$.

The last lap of the voyage was vivid and fancy-stirring, great barren peaks of mystery looming up constantly against the west as the low northern sun of noon or the still lower horizon-grazing southern sun of midnight poured its hazy reddish rays over the white snow, bluish ice and water lanes, and black bits of exposed granite slope. Through the desolate summits swept raging intermittent gusts of the terrible antarctic wind; whose cadences sometimes held vague suggestions of a wild and half-sentient musical piping, with notes extending over a wide range, and which for some subconscious mnemonic reason seemed to me disquieting and even dimly terrible. Something about the scene reminded me of the strange and disturbing Asian paintings of Nicholas Roerich, and of the still stranger and more disturbing descriptions of the evilly fabled plateau of Leng which occur in the dreaded *Necronomicon* of the mad Arab Abdul Alhazred. I was rather sorry, later on, that I had ever looked into that monstrous book at the college library.

On the seventh of November, sight of the westward range having been temporarily lost, we passed Franklin Island; and the next day descried the cones of Mts. Erebus and Terror on Ross Island ahead, with the long line of the Parry Mountains beyond. There now stretched off to the east the low, white line of the great ice barrier; rising perpendicularly to a height of 200 feet like the rocky cliffs of Quebec, and marking the end of southward navigation. In the afternoon we entered McMurdo Sound and stood off the coast in the lee of smoking Mt. Erebus. The scoriac peak towered up some 12,700 feet against the eastern sky, like a Japanese print of

the sacred Fujiyama; while beyond it rose the white, ghost-like height of Mt. Terror, 10,900 feet in altitude, and now extinct as a volcano. Puffs of smoke from Erebus came intermittently, and one of the graduate assistants—a brilliant young fellow named Danforth—pointed out what looked like lava on the snowy slope; remarking that this mountain, discovered in 1840, had undoubtedly been the source of Poe's image when he wrote seven years later of

“—the lavas that restlessly roll
Their sulphurous currents down Yaanek
In the ultimate climes of the pole—
That groan as they roll down Mount Yaanek
In the realms of the boreal pole.”

Danforth was a great reader of bizarre material, and had talked a good deal of Poe. I was interested myself because of the antarctic scene of Poe's only long story—the disturbing and enigmatical *Arthur Gordon Pym*. On the barren shore, and on the lofty ice barrier in the background, myriads of grotesque penguins squawked and flapped their fins; while many fat seals were visible on the water, swimming or sprawling across large cakes of slowly drifting ice.

Using small boats, we effected a difficult landing on Ross Island shortly after midnight on the morning of the 9th, carrying a line of cable from each of the ships and preparing to unload supplies by means of a breeches-buoy arrangement. Our sensations on first treading antarctic soil were poignant and complex, even though at this particular point the Scott and Shackleton expeditions had preceded us. Our camp on the frozen shore below the volcano's slope was only a provisional one; headquarters being kept aboard the *Arkham*. We landed all our drilling apparatus, dogs, sledges, tents, provisions, gasoline tanks, experimental ice-melting outfit, cameras both ordinary and aerial, aeroplane parts, and other accessories, including three small portable wireless outfits (besides those in the planes) capable of communicating with the *Arkham's* large outfit from any part of the antarctic continent that we would be likely to visit. The ship's outfit, communicating with the outside world, was to convey press reports to the *Arkham Advertiser's* powerful wireless station on Kingsport Head, Mass. We hoped to complete our work during a single antarctic summer; but if this

proved impossible we would winter on the *Arkham*, sending the *Miskatonic* north before the freezing of the ice for another summer's supplies.

I need not repeat what the newspapers have already published about our early work: of our ascent of Mt. Erebus; our successful mineral borings at several points on Ross Island and the singular speed with which Pabodie's apparatus accomplished them, even through solid rock layers; our provisional test of the small ice-melting equipment; our perilous ascent of the great barrier with sledges and supplies; and our final assembling of five huge aëroplanes at the camp atop the barrier. The health of our land party—twenty men and 55 Alaskan sledge dogs—was remarkable, though of course we had so far encountered no really destructive temperatures or windstorms. For the most part, the thermometer varied between zero and 20° or 25° above, and our experience with New England winters had accustomed us to rigours of this sort. The barrier camp was semi-permanent, and destined to be a storage cache for gasoline, provisions, dynamite, and other supplies. Only four of our planes were needed to carry the actual exploring material, the fifth being left with a pilot and two men from the ships at the storage cache to form a means of reaching us from the *Arkham* in case all our exploring planes were lost. Later, when not using all the other planes for moving apparatus, we would employ one or two in a shuttle transportation service between this cache and another permanent base on the great plateau from 600 to 700 miles southward, beyond Beardmore Glacier. Despite the almost unanimous accounts of appalling winds and tempests that pour down from the plateau, we determined to dispense with intermediate bases; taking our chances in the interest of economy and probable efficiency.

Wireless reports have spoken of the breath-taking four-hour non-stop flight of our squadron on November 21 over the lofty shelf ice, with vast peaks rising on the west, and the unfathomed silences echoing to the sound of our engines. Wind troubled us only moderately, and our radio compasses helped us through the one opaque fog we encountered. When the vast rise loomed ahead, between Latitudes 83° and 84°, we knew we had reached Beardmore Glacier, the largest valley glacier in the world, and that the frozen

sea was now giving place to a frowning and mountainous coastline. At last we were truly entering the white, aeon-dead world of the ultimate south, and even as we realised it we saw the peak of Mt. Nansen in the eastern distance, towering up to its height of almost 15,000 feet.

The successful establishment of the southern base above the glacier in Latitude $86^{\circ} 7'$, East Longitude $174^{\circ} 23'$, and the phenomenally rapid and effective borings and blastings made at various points reached by our sledge trips and short aeroplane flights, are matters of history; as is the arduous and triumphant ascent of Mt. Nansen by Pabodie and two of the graduate students—Gedney and Carroll—on December 13–15. We were some 8500 feet above sea-level, and when experimental drillings revealed solid ground only twelve feet down through the snow and ice at certain points, we made considerable use of the small melting apparatus and sunk bores and performed dynamiting at many places where no previous explorer had ever thought of securing mineral specimens. The pre-Cambrian granites and beacon sandstones thus obtained confirmed our belief that this plateau was homogeneous with the great bulk of the continent to the west, but somewhat different from the parts lying eastward below South America—which we then thought to form a separate and smaller continent divided from the larger one by a frozen junction of Ross and Weddell Seas, though Byrd has since disproved the hypothesis.

In certain of the sandstones, dynamited and chiselled after boring revealed their nature, we found some highly interesting fossil markings and fragments—notably ferns, seaweeds, trilobites, crinoids, and such molluscs as lingulellae and gasteropods—all of which seemed of real significance in connexion with the region's primordial history. There was also a queer triangular, striated marking about a foot in greatest diameter which Iake pieced together from three fragments of slate brought up from a deep-blasted aperture. These fragments came from a point to the westward, near the Queen Alexandra Range; and Iake, as a biologist, seemed to find their curious marking unusually puzzling and provocative, though to my geological eye it looked not unlike some of the ripple effects reasonably common in the sedimentary rocks. Since slate is no more than a metamorphic formation into which a sedimentary stratum is pressed, and since the pressure itself pro-

duces odd distorting effects on any markings which may exist, I saw no reason for extreme wonder over the striated depression.

On January 6, 1931, Lake, Pabodie, Daniels, all six of the students, four mechanics, and I flew directly over the south pole in two of the great planes, being forced down once by a sudden high wind which fortunately did not develop into a typical storm. This was, as the papers have stated, one of several observation flights; during others of which we tried to discern new topographical features in areas unreached by previous explorers. Our early flights were disappointing in this latter respect; though they afforded us some magnificent examples of the richly fantastic and deceptive mirages of the polar regions, of which our sea voyage had given us some brief foretastes. Distant mountains floated in the sky as enchanted cities, and often the whole white world would dissolve into a gold, silver, and scarlet land of Dunsanian dreams and adventurous expectancy under the magic of the low midnight sun. On cloudy days we had considerable trouble in flying, owing to the tendency of snowy earth and sky to merge into one mystical opalescent void with no visible horizon to mark the junction of the two.

At length we resolved to carry out our original plan of flying 500 miles eastward with all four exploring planes and establishing a fresh sub-base at a point which would probably be on the smaller continental division, as we mistakenly conceived it. Geological specimens obtained there would be desirable for purposes of comparison. Our health so far had remained excellent; lime-juice well offsetting the steady diet of tinned and salted food, and temperatures generally above zero enabling us to do without our thickest furs. It was now midsummer, and with haste and care we might be able to conclude work by March and avoid a tedious wintering through the long antarctic night. Several savage windstorms had burst upon us from the west, but we had escaped damage through the skill of Atwood in devising rudimentary aëroplane shelters and windbreaks of heavy snow blocks, and reinforcing the principal camp buildings with snow. Our good luck and efficiency had indeed been almost uncanny.

The outside world knew, of course, of our programme, and was told also of Lake's strange and dogged insistence on a westward—or rather, northwestward—prospecting trip before our radical shift to the new base. It seems he had pondered a great

deal, and with alarmingly radical daring, over that triangular striated marking in the slate; reading into it certain contradictions in Nature and geological period which whetted his curiosity to the utmost, and made him avid to sink more borings and blastings in the west-stretching formation to which the exhumed fragments evidently belonged. He was strangely convinced that the marking was the print of some bulky, unknown, and radically unclassifiable organism of considerably advanced evolution, notwithstanding that the rock which bore it was of so vastly ancient a date—Cambrian if not actually pre-Cambrian—as to preclude the probable existence not only of all highly evolved life, but of any life at all above the unicellular or at most the trilobite stage. These fragments, with their odd marking, must have been 500 million to a thousand million years old.

II.

Popular imagination, I judge, responded actively to our wireless bulletins of Lake's start northwestward into regions never trodden by human foot or penetrated by human imagination; though we did not mention his wild hopes of revolutionising the entire sciences of biology and geology. His preliminary sledging and boring journey of January 11–18 with Pabodie and five others—marred by the loss of two dogs in an upset when crossing one of the great pressure-ridges in the ice—had brought up more and more of the Archaean slate; and even I was interested by the singular profusion of evident fossil markings in that unbelievably ancient stratum. These markings, however, were of very primitive life-forms involving no great paradox except that any life-forms should occur in rock as definitely pre-Cambrian as this seemed to be; hence I still failed to see the good sense of Lake's demand for an interlude in our time-saving programme—an interlude requiring the use of all four planes, many men, and the whole of the expedition's mechanical apparatus. I did not, in the end, veto the plan; though I decided not to accompany the northwestward party despite Lake's plea for my geological advice. While they were gone, I would remain at the base with Pabodie and five men and work out final plans for the eastward shift. In preparation for this transfer one of the planes had begun to move up a good gasoline supply from McMurdo Sound; but this

could wait temporarily. I kept with me one sledge and nine dogs, since it is unwise to be at any time without possible transportation in an utterly tenantless world of aeon-long death.

Lake's sub-expedition into the unknown, as everyone will recall, sent out its own reports from the short-wave transmitters on the planes; these being simultaneously picked up by our apparatus at the southern base and by the *Arkham* at McMurdo Sound, whence they were relayed to the outside world on wave-lengths up to fifty metres. The start was made January 22 at 4 a.m.; and the first wireless message we received came only two hours later, when Lake spoke of descending and starting a small-scale ice-melting and bore at a point some 300 miles away from us. Six hours after that a second and very excited message told of the frantic, beaver-like work whereby a shallow shaft had been sunk and blasted; culminating in the discovery of slate fragments with several markings approximately like the one which had caused the original puzzlement.

Three hours later a brief bulletin announced the resumption of the flight in the teeth of a raw and piercing gale; and when I despatched a message of protest against further hazards, Lake replied curtly that his new specimens made any hazard worth taking. I saw that his excitement had reached the point of mutiny, and that I could do nothing to check this headlong risk of the whole expedition's success; but it was appalling to think of his plunging deeper and deeper into that treacherous and sinister white immensity of tempests and unfathomed mysteries which stretched off for some 1500 miles to the half-known, half-suspected coast-line of Queen Mary and Knox Lands.

Then, in about an hour and a half more, came that doubly excited message from Lake's moving plane which almost reversed my sentiments and made me wish I had accompanied the party.

"10:05 p.m. On the wing. After snowstorm, have spied mountain-range ahead higher than any hitherto seen. May equal Himalayas allowing for height of plateau. Probable Latitude $76^{\circ} 15'$, Longitude $113^{\circ} 10' E$. Reaches far as can see to right and left. Suspicion of two smoking cones. All peaks black and bare of snow. Gale blowing off them impedes navigation."

After that Pabodie, the men, and I hung breathlessly over the receiver. Thought of this titanic mountain rampart 700 miles away inflamed our deepest sense of adventure; and we rejoiced that our

expedition, if not ourselves personally, had been its discoverers. In half an hour Lake called us again.

"Moulton's plane forced down on plateau in foothills, but nobody hurt and perhaps can repair. Shall transfer essentials to other three for return or further moves if necessary, but no more heavy plane travel needed just now. Mountains surpass anything in imagination. Am going up scouting in Carroll's plane, with all weight out. You can't imagine anything like this. Highest peaks must go over 35,000 feet. Everest out of the running. Atwood to work out height with theodolite while Carroll and I go up. Probably wrong about cones, for formations look stratified. Possibly pre-Cambrian slate with other strata mixed in. Queer skyline effects—regular sections of cubes clinging to highest peaks. Whole thing marvellous in red-gold light of low sun. Like land of mystery in a dream or gateway to forbidden world of untrodden wonder. Wish you were here to study."

Though it was technically sleeping-time, not one of us listeners thought for a moment of retiring. It must have been a good deal the same at McMurdo Sound, where the supply cache and the *Arkham* were also getting the messages; for Capt. Douglas gave out a call congratulating everybody on the important find, and Sherman, the cache operator, seconded his sentiments. We were sorry, of course, about the damaged aeroplane; but hoped it could be easily mended. Then, at 11 p.m., came another call from Lake.

"Up with Carroll over highest foothills. Don't dare try really tall peaks in present weather, but shall later. Frightful work climbing, and hard going at this altitude, but worth it. Great range fairly solid, hence can't get any glimpses beyond. Main summits exceed Himalayas, and very queer. Range looks like pre-Cambrian slate, with plain signs of many other upheaved strata. Was wrong about volcanism. Goes farther in either direction than we can see. Swept clear of snow above about 21,000 feet. Odd formations on slopes of highest mountains. Great low square blocks with exactly vertical sides, and rectangular lines of low vertical ramparts, like the old Asian castles clinging to steep mountains in Roerich's paintings. Impressive from distance. Flew close to some, and Carroll thought they were formed of smaller separate pieces, but that is probably weathering. Most edges crumbled and rounded off as if exposed to storms and climate changes for millions of years. Parts, especially upper parts, seem to be of lighter-coloured rock than any visible strata on slopes proper, hence an evidently crystalline origin. Close flying shews many cave-mouths, some unusually regular in outline, square or semicircular. You must

come and investigate. Think I saw rampart squarely on top of one peak. Height seems about 30,000 to 35,000 feet. Am up 21,500 myself, in devilish gnawing cold. Wind whistles and pipes through passes and in and out of caves, but no flying danger so far."

From then on for another half-hour Lake kept up a running fire of comment, and expressed his intention of climbing some of the peaks on foot. I replied that I would join him as soon as he could send a plane, and that Pabodie and I would work out the best gaso-line plan—just where and how to concentrate our supply in view of the expedition's altered character. Obviously, Lake's boring operations, as well as his aeroplane activities, would need a great deal delivered for the new base which he was to establish at the foot of the mountains; and it was possible that the eastward flight might not be made after all this season. In connexion with this business I called Capt. Douglas and asked him to get as much as possible out of the ships and up the barrier with the single dog-team we had left there. A direct route across the unknown region between Lake and McMurdo Sound was what we really ought to establish.

Lake called me later to say that he had decided to let the camp stay where Moulton's plane had been forced down, and where repairs had already progressed somewhat. The ice-sheet was very thin, with dark ground here and there visible, and he would sink some borings and blasts at that very point before making any sledge trips or climbing expeditions. He spoke of the ineffable majesty of the whole scene, and the queer state of his sensations at being in the lee of vast silent pinnacles whose ranks shot up like a wall reaching the sky at the world's rim. Atwood's theodolite observations had placed the height of the five tallest peaks at from 30,000 to 34,000 feet. The windswept nature of the terrain clearly disturbed Lake, for it argued the occasional existence of prodigious gales violent beyond anything we had so far encountered. His camp lay a little more than five miles from where the higher foothills abruptly rose. I could almost trace a note of subconscious alarm in his words—flashed across a glacial void of 700 miles—as he urged that we all hasten with the matter and get the strange new region disposed of as soon as possible. He was about to rest now, after a continuous day's work of almost unparalleled speed, strenuousness, and results.

In the morning I had a three-cornered wireless talk with Lake and Capt. Douglas at their widely separated bases; and it was agreed that one of Lake's planes would come to my base for Pabodie, the five men, and myself, as well as for all the fuel it could carry. The rest of the fuel question, depending on our decision about an easterly trip, could wait for a few days; since Lake had enough for immediate camp heat and borings. Eventually the old southern base ought to be restocked; but if we postponed the easterly trip we would not use it till the next summer, and meanwhile Lake must send a plane to explore a direct route between his new mountains and McMurdo Sound.

Pabodie and I prepared to close our base for a short or long period, as the case might be. If we wintered in the antarctic we would probably fly straight from Lake's base to the *Arkham* without returning to this spot. Some of our conical tents had already been reinforced by blocks of hard snow, and now we decided to complete the job of making a permanent Esquimau village. Owing to a very liberal tent supply, Lake had with him all that his base would need even after our arrival. I wirelessly that Pabodie and I would be ready for the northwestward move after one day's work and one night's rest.

Our labours, however, were not very steady after 4 p.m.; for about that time Lake began sending in the most extraordinary and excited messages. His working day had started unpropitiously; since an aeroplane survey of the nearly exposed rock surfaces shewed an entire absence of those Archaean and primordial strata for which he was looking, and which formed so great a part of the colossal peaks that loomed up at a tantalising distance from the camp. Most of the rocks glimpsed were apparently Jurassic and Comanchian sandstones and Permian and Triassic schists, with now and then a glossy black outcropping suggesting a hard and slaty coal. This rather discouraged Lake, whose plans all hinged on unearthing specimens more than 500 million years older. It was clear to him that in order to recover the Archaean slate vein in which he had found the odd markings, he would have to make a long sledge trip from these foothills to the steep slopes of the gigantic mountains themselves.

He had resolved, nevertheless, to do some local boring as part of

the expedition's general programme; hence set up the drill and put five men to work with it while the rest finished settling the camp and repairing the damaged *aëroplane*. The softest visible rock—a sandstone about a quarter of a mile from the camp—had been chosen for the first sampling; and the drill made excellent progress without much supplementary blasting. It was about three hours afterward, following the first really heavy blast of the operation, that the shouting of the drill crew was heard; and that young Gedney—the acting foreman—rushed into the camp with the startling news.

They had struck a cave. Early in the boring the sandstone had given place to a vein of Comanchian limestone full of minute fossil cephalopods, corals, echini, and spirifera, and with occasional suggestions of siliceous sponges and marine vertebrate bones—the latter probably of teliosts, sharks, and ganoids. This in itself was important enough, as affording the first vertebrate fossils the expedition had yet secured; but when shortly afterward the drill-head dropped through the stratum into apparent vacancy, a wholly new and doubly intense wave of excitement spread among the excavators. A good-sized blast had laid open the subterrene secret; and now, through a jagged aperture perhaps five feet across and three feet thick, there yawned before the avid searchers a section of shallow limestone hollowing worn more than fifty million years ago by the trickling ground waters of a bygone tropic world.

The hollowed layer was not more than seven or eight feet deep, but extended off indefinitely in all directions and had a fresh, slightly moving air which suggested its membership in an extensive subterranean system. Its roof and floor were abundantly equipped with large stalactites and stalagmites, some of which met in columnar form; but important above all else was the vast deposit of shells and bones which in places nearly choked the passage. Washed down from unknown jungles of Mesozoic tree-ferns and fungi, and forests of Tertiary cycads, fan-palms, and primitive angiosperms, this osseous medley contained representatives of more Cretaceous, Eocene, and other animal species than the greatest palaeontologist could have counted or classified in a year. Molluscs, crustacean armour, fishes, amphibians, reptiles, birds, and early mammals—great and small, known and unknown. No won-

der Gedney ran back to the camp shouting, and no wonder everyone else dropped work and rushed headlong through the biting cold to where the tall derrick marked a new-found gateway to secrets of inner earth and vanished aeons.

When Lake had satisfied the first keen edge of his curiosity he scribbled a message in his notebook and had young Moulton run back to the camp to despatch it by wireless. This was my first word of the discovery, and it told of the identification of early shells, bones of ganoids and placoderms, remnants of labyrinthodonts and thecodonts, great mososaur skull fragments, dinosaur vertebrae and armour-plates, pterodactyl teeth and wing-bones, archaeopteryx debris, Miocene sharks' teeth, primitive bird-skulls, and skulls, vertebrae, and other bones of archaic mammals such as palaeotheres, xiphodonts, dinocerases, eohippi, oreodonts, and titanotheres. There was nothing as recent as a mastodon, elephant, true camel, deer, or bovine animal; hence Lake concluded that the last deposits had occurred during the Oligocene age, and that the hollowed stratum had lain in its present dried, dead, and inaccessible state for at least thirty million years.

On the other hand, the prevalence of very early life-forms was singular in the highest degree. Though the limestone formation was, on the evidence of such typical imbedded fossils as ventriculites, positively and unmistakably Comanchian and not a particle earlier; the free fragments in the hollow space included a surprising proportion from organisms hitherto considered as peculiar to far older periods—even rudimentary fishes, molluscs, and corals as remote as the Silurian or Ordovician. The inevitable inference was that in this part of the world there had been a remarkable and unique degree of continuity between the life of over 300 million years ago and that of only thirty million years ago. How far this continuity had extended beyond the Oligocene age when the cavern was closed, was of course past all speculation. In any event, the coming of the frightful ice in the Pleistocene some 500,000 years ago—a mere yesterday as compared with the age of this cavity—must have put an end to any of the primal forms which had locally managed to outlive their common terms.

Lake was not content to let his first message stand, but had another bulletin written and despatched across the snow to the

camp before Moulton could get back. After that Moulton stayed at the wireless in one of the planes; transmitting to me—and to the *Arkham* for relaying to the outside world—the frequent postscripts which Lake sent him by a succession of messengers. Those who followed the newspapers will remember the excitement created among men of science by that afternoon's reports—reports which have finally led, after all these years, to the organisation of that very Starkweather-Moore Expedition which I am so anxious to dissuade from its purposes. I had better give the messages literally as Lake sent them, and as our base operator McTighe translated them from his pencil shorthand.

"Fowler makes discovery of highest importance in sandstone and limestone fragments from blasts. Several distinct triangular striated prints like those in Archaean slate, proving that source survived from over 600 million years ago to Comanchian times without more than moderate morphological changes and decrease in average size. Comanchian prints apparently more primitive or decadent, if anything, than older ones. Emphasise importance of discovery in press. Will mean to biology what Einstein has meant to mathematics and physics. Joins up with my previous work and amplifies conclusions. Appears to indicate, as I suspected, that earth has seen whole cycle or cycles of organic life before known one that begins with Archaeozoic cells. Was evolved and specialised not later than thousand million years ago, when planet was young and recently uninhabitable for any life-forms or normal protoplasmic structure. Question arises when, where, and how development took place."

"Later. Examining certain skeletal fragments of large land and marine saurians and primitive mammals, find singular local wounds or injuries to bony structure not attributable to any known predatory or carnivorous animal of any period. Of two sorts—straight, penetrant bores, and apparently hacking incisions. One or two cases of cleanly severed bone. Not many specimens affected. Am sending to camp for electric torches. Will extend search area underground by hacking away stalactites."

"Still later. Have found peculiar soapstone fragment about six inches across and an inch and a half thick, wholly unlike any visible local formation. Greenish, but no evidences to place its period. Has curious smoothness and regularity. Shaped like five-pointed star with

tips broken off, and signs of other cleavage at inward angles and in centre of surface. Small, smooth depression in centre of unbroken surface. Arouses much curiosity as to source and weathering. Probably some freak of water action. Carroll, with magnifier, thinks he can make out additional markings of geologic significance. Groups of tiny dots in regular patterns. Dogs growing uneasy as we work, and seem to hate this soapstone. Must see if it has any peculiar odour. Will report again when Mills gets back with light and we start on underground area."

"10:15 p.m. Important discovery. Orrendorf and Watkins, working underground at 9:45 with light, found monstrous barrel-shaped fossil of wholly unknown nature; probably vegetable unless overgrown specimen of unknown marine radiata. Tissue evidently preserved by mineral salts. Tough as leather, but astonishing flexibility retained in places. Marks of broken-off parts at ends and around sides. Six feet end to end, 3.5 feet central diameter, tapering to 1 foot at each end. Like a barrel with five bulging ridges in place of staves. Lateral breakages, as of thinnish stalks, are at equator in middle of these ridges. In furrows between ridges are curious growths. Combs or wings that fold up and spread out like fans. All greatly damaged but one, which gives almost seven-foot wing spread. Arrangement reminds one of certain monsters of primal myth, especially fabled Elder Things in *Necronomicon*. These wings seem to be membranous, stretched on framework of glandular tubing. Apparent minute orifices in frame tubing at wing tips. Ends of body shrivelled, giving no clue to interior or to what has been broken off there. Must dissect when we get back to camp. Can't decide whether vegetable or animal. Many features obviously of almost incredible primitiveness. Have set all hands cutting stalactites and looking for further specimens. Additional scarred bones found, but these must wait. Having trouble with dogs. They can't endure the new specimen, and would probably tear it to pieces if we didn't keep it at a distance from them."

"11:30 p.m. Attention, Dyer, Pabodie, Douglas. Matter of highest—I might say transcendent—importance. *Arkham* must relay to Kingsport Head Station at once. Strange barrel growth is the Archaean thing that left prints in rocks. Mills, Boudreau, and Fowler discover cluster of thirteen more at underground point forty feet from aperture. Mixed with curiously rounded and configured soapstone fragments smaller than one previously found—star-shaped but no marks of breakage except at some of the points. Of organic specimens, eight apparently perfect, with all appendages. Have brought

all to surface, leading off dogs to distance. They cannot stand the things. Give close attention to description and repeat back for accuracy. Papers must get this right.

"Objects are eight feet long all over. Six-foot five-ridged barrel torso 3.5 feet central diameter, 1 foot end diameters. Dark grey, flexible, and infinitely tough. Seven-foot membraneous wings of same colour, found folded, spread out of furrows between ridges. Wing framework tubular or glandular, of lighter grey, with orifices at wing tips. Spread wings have serrated edge. Around equator, one at central apex of each of the five vertical, stave-like ridges, are five systems of light grey flexible arms or tentacles found tightly folded to torso but expandible to maximum length of over 3 feet. Like arms of primitive crinoid. Single stalks 3 inches diameter branch after 6 inches into five sub-stalks, each of which branches after 8 inches into five small, tapering tentacles or tendrils, giving each stalk a total of 25 tentacles.

"At top of torso blunt bulbous neck of lighter grey with gill-like suggestions holds yellowish five-pointed starfish-shaped apparent head covered with three-inch wiry cilia of various prismatic colours. Head thick and puffy, about 2 feet point to point, with three-inch flexible yellowish tubes projecting from each point. Slit in exact centre of top probably breathing aperture. At end of each tube is spherical expansion where yellowish membrane rolls back on handling to reveal glassy, red-irised globe, evidently an eye. Five slightly longer reddish tubes start from inner angles of starfish-shaped head and end in sac-like swellings of same colour which upon pressure open to bell-shaped orifices 2 inches maximum diameter and lined with sharp white tooth-like projections. Probable mouths. All these tubes, cilia, and points of starfish-head found folded tightly down; tubes and points clinging to bulbous neck and torso. Flexibility surprising despite vast toughness.

"At bottom of torso rough but dissimilarly functioning counterparts of head arrangements exist. Bulbous light-grey pseudo-neck, without gill suggestions, holds greenish five-pointed starfish-arrangement. Tough, muscular arms 4 feet long and tapering from 7 inches diameter at base to about 2.5 at point. To each point is attached small end of a greenish five-veined membraneous triangle 8 inches long and 6 wide at farther end. This is the paddle, fin, or pseudo-foot which has made prints in rocks from a thousand million to fifty or sixty million years old. From inner angles of starfish-arrangement project two-foot reddish tubes tapering from 3 inches diameter at base to 1 at tip. Orifices at tips. All these parts infinitely tough and leathery, but extremely flexible. Four-foot arms with paddles undoubtedly used for locomotion of some sort, marine or otherwise. When moved, display suggestions of exaggerated muscularity. As found, all these projections tightly folded over pseudo-neck and end of torso, corresponding to projections at other end.

"Cannot yet assign positively to animal or vegetable kingdom, but odds now favour animal. Probably represents incredibly advanced evolution of radiata without loss of certain primitive features. Echinoderm resemblances unmistakable despite local contradictory evidences. Wing structure puzzles in view of probable marine habitat, but may have use in water navigation. Symmetry is curiously vegetable-like, suggesting vegetable's essentially up-and-down structure rather than animal's fore-and-aft structure. Fabulously early date of evolution, preceding even simplest Archaean protozoa hitherto known, baffles all conjecture as to origin.

"Complete specimens have such uncanny resemblance to certain creatures of primal myth that suggestion of ancient existence outside antarctic becomes inevitable. Dyer and Pabodie have read *Necronomicon* and seen Clark Ashton Smith's nightmare paintings based on text, and will understand when I speak of Elder Things supposed to have created all earth-life as jest or mistake. Students have always thought conception formed from morbid imaginative treatment of very ancient tropical radiata. Also like prehistoric folklore things Wilmarth has spoken of—Cthulhu cult appendages, etc.

"Vast field of study opened. Deposits probably of late Cretaceous or early Eocene period, judging from associated specimens. Massive stalagmites deposited above them. Hard work hewing out, but toughness prevented damage. State of preservation miraculous, evidently owing to limestone action. No more found so far, but will resume search later. Job now to get fourteen huge specimens to camp without dogs, which bark furiously and can't be trusted near them. With nine men—three left to guard the dogs—we ought to manage the three sledges fairly well, though wind is bad. Must establish plane communication with McMurdo Sound and begin shipping material. But I've got to dissect one of these things before we take any rest. Wish I had a real laboratory here. Dyer better kick himself for having tried to stop my westward trip. First the world's greatest mountains, and then this. If this last isn't the high spot of the expedition, I don't know what is. We're made scientifically. Congrats, Pabodie, on the drill that opened up the cave. Now will *Arkham* please repeat description?"

The sensations of Pabodie and myself at receipt of this report were almost beyond description, nor were our companions much behind us in enthusiasm. McTighe, who had hastily translated a few high spots as they came from the droning receiving set, wrote out the entire message from his shorthand version as soon as Lake's operator signed off. All appreciated the epoch-making significance of the discovery, and I sent Lake congratulations as

soon as the *Arkham's* operator had repeated back the descriptive parts as requested; and my example was followed by Sherman from his station at the McMurdo Sound supply cache, as well as by Capt. Douglas of the *Arkham*. Later, as head of the expedition, I added some remarks to be relayed through the *Arkham* to the outside world. Of course, rest was an absurd thought amidst this excitement; and my only wish was to get to Lake's camp as quickly as I could. It disappointed me when he sent word that a rising mountain gale made early aerial travel impossible.

But within an hour and a half interest again rose to banish disappointment. Lake was sending more messages, and told of the completely successful transportation of the fourteen great specimens to the camp. It had been a hard pull, for the things were surprisingly heavy; but nine men had accomplished it very neatly. Now some of the party were hurriedly building a snow corral at a safe distance from the camp, to which the dogs could be brought for greater convenience in feeding. The specimens were laid out on the hard snow near the camp, save for one on which Lake was making crude attempts at dissection.

This dissection seemed to be a greater task than had been expected; for despite the heat of a gasoline stove in the newly raised laboratory tent, the deceptively flexible tissues of the chosen specimen—a powerful and intact one—lost nothing of their more than leathery toughness. Lake was puzzled as to how he might make the requisite incisions without violence destructive enough to upset all the structural niceties he was looking for. He had, it is true, seven more perfect specimens; but these were too few to use up recklessly unless the cave might later yield an unlimited supply. Accordingly he removed the specimen and dragged in one which, though having remnants of the starfish-arrangements at both ends, was badly crushed and partly disrupted along one of the great torso furrows.

Results, quickly reported over the wireless, were baffling and provocative indeed. Nothing like delicacy or accuracy was possible with instruments hardly able to cut the anomalous tissue, but the little that was achieved left us all awed and bewildered. Existing biology would have to be wholly revised, for this thing was no product of any cell-growth science knows about. There had been

scarcely any mineral replacement, and despite an age of perhaps forty million years the internal organs were wholly intact. The leathery, undeteriorative, and almost indestructible quality was an inherent attribute of the thing's form of organisation; and pertained to some palaeogean cycle of invertebrate evolution utterly beyond our powers of speculation. At first all that Lake found was dry, but as the heated tent produced its thawing effect, organic moisture of pungent and offensive odour was encountered toward the thing's uninjured side. It was not blood, but a thick, dark-green fluid apparently answering the same purpose. By the time Lake reached this stage all 37 dogs had been brought to the still uncompleted corral near the camp; and even at that distance set up a savage barking and show of restlessness at the acrid, diffusive smell.

Far from helping to place the strange entity, this provisional dissection merely deepened its mystery. All guesses about its external members had been correct, and on the evidence of these one could hardly hesitate to call the thing animal; but internal inspection brought up so many vegetable evidences that Lake was left hopelessly at sea. It had digestion and circulation, and eliminated waste matter through the reddish tubes of its starfish-shaped base. Cursorily, one would say that its respiratory apparatus handled oxygen rather than carbon dioxide; and there were odd evidences of air-storage chambers and methods of shifting respiration from the external orifice to at least two other fully developed breathing-systems—gills and pores. Clearly, it was amphibian and probably adapted to long airless hibernation-periods as well. Vocal organs seemed present in connexion with the main respiratory system, but they presented anomalies beyond immediate solution. Articulate speech, in the sense of syllable-utterance, seemed barely conceivable; but musical piping notes covering a wide range were highly probable. The muscular system was almost preternaturally developed.

The nervous system was so complex and highly developed as to leave Lake aghast. Though excessively primitive and archaic in some respects, the thing had a set of ganglial centres and connectives arguing the very extremes of specialised development. Its five-lobed brain was surprisingly advanced; and there were signs of a sensory equipment, served in part through the wiry cilia of the

head, involving factors alien to any other terrestrial organism. Probably it had more than five senses, so that its habits could not be predicted from any existing analogy. It must, Lake thought, have been a creature of keen sensitiveness and delicately differentiated functions in its primal world; much like the ants and bees of today. It reproduced like the vegetable cryptogams, especially the pteridophytes; having spore-cases at the tips of the wings and evidently developing from a thallus or prothallus.

But to give it a name at this stage was mere folly. It looked like a radiate, but was clearly something more. It was partly vegetable, but had three-fourths of the essentials of animal structure. That it was marine in origin, its symmetrical contour and certain other attributes clearly indicated; yet one could not be exact as to the limit of its later adaptations. The wings, after all, held a persistent suggestion of the aërial. How it could have undergone its tremendously complex evolution on a new-born earth in time to leave prints in Archaean rocks was so far beyond conception as to make Lake whimsically recall the primal myths about Great Old Ones who filtered down from the stars and concocted earth-life as a joke or mistake; and the wild tales of cosmic hill things from Outside told by a folklorist colleague in Miskatonic's English department.

Naturally, he considered the possibility of the pre-Cambrian prints' having been made by a less evolved ancestor of the present specimens; but quickly rejected this too facile theory upon considering the advanced structural qualities of the older fossils. If anything, the later contours shewed decadence rather than higher evolution. The size of the pseudo-feet had decreased, and the whole morphology seemed coarsened and simplified. Moreover, the nerves and organs just examined held singular suggestions of retrogression from forms still more complex. Atrophied and vestigial parts were surprisingly prevalent. Altogether, little could be said to have been solved; and Lake fell back on mythology for a provisional name—jocosely dubbing his finds "The Elder Ones".

At about 2:30 a.m., having decided to postpone further work and get a little rest, he covered the dissected organism with a tarpaulin, emerged from the laboratory tent, and studied the intact specimens with renewed interest. The ceaseless antarctic sun had begun to limber up their tissues a trifle, so that the head-points and

tubes of two or three shewed signs of unfolding; but Lake did not believe there was any danger of immediate decomposition in the almost sub-zero air. He did, however, move all the undissected specimens closer together and throw a spare tent over them in order to keep off the direct solar rays. That would also help to keep their possible scent away from the dogs, whose hostile unrest was really becoming a problem even at their substantial distance and behind the higher and higher snow walls which an increased quota of the men were hastening to raise around their quarters. He had to weight down the corners of the tent-cloth with heavy blocks of snow to hold it in place amidst the rising gale, for the titan mountains seemed about to deliver some gravely severe blasts. Early apprehensions about sudden antarctic winds were revived, and under Atwood's supervision precautions were taken to bank the tents, new dog-corral, and crude aeroplane shelters with snow on the mountainward side. These latter shelters, begun with hard snow blocks during odd moments, were by no means as high as they should have been; and Lake finally detached all hands from other tasks to work on them.

It was after four when Lake at last prepared to sign off and advised us all to share the rest period his outfit would take when the shelter walls were a little higher. He held some friendly chat with Pabodie over the ether, and repeated his praise of the really marvelous drills that had helped him make his discovery. Atwood also sent greetings and praises. I gave Lake a warm word of congratulation, owning up that he was right about the western trip; and we all agreed to get in touch by wireless at ten in the morning. If the gale was then over, Lake would send a plane for the party at my base. Just before retiring I despatched a final message to the *Arkham* with instructions about toning down the day's news for the outside world, since the full details seemed radical enough to rouse a wave of incredulity until further substantiated.

III.

None of us, I imagine, slept very heavily or continuously that morning; for both the excitement of Lake's discovery and the mounting fury of the wind were against such a thing. So savage was

the blast, even where we were, that we could not help wondering how much worse it was at Lake's camp, directly under the vast unknown peaks that bred and delivered it. McTighe was awake at ten o'clock and tried to get Lake on the wireless, as agreed, but some electrical condition in the disturbed air to the westward seemed to prevent communication. We did, however, get the *Arkham*, and Douglas told me that he had likewise been vainly trying to reach Lake. He had not known about the wind, for very little was blowing at McMurdo Sound despite its persistent rage where we were.

Throughout the day we all listened anxiously and tried to get Lake at intervals, but invariably without results. About noon a positive frenzy of wind stampeded out of the west, causing us to fear for the safety of our camp; but it eventually died down, with only a moderate relapse at 2 p.m. After three o'clock it was very quiet, and we redoubled our efforts to get Lake. Reflecting that he had four planes, each provided with an excellent short-wave outfit, we could not imagine any ordinary accident capable of crippling all his wireless equipment at once. Nevertheless the stony silence continued; and when we thought of the delirious force the wind must have had in his locality we could not help making the most direful conjectures.

By six o'clock our fears had become intense and definite, and after a wireless consultation with Douglas and Thorfinnssen I resolved to take steps toward investigation. The fifth *aéroplane*, which we had left at the McMurdo Sound supply cache with Sherman and two sailors, was in good shape and ready for instant use; and it seemed that the very emergency for which it had been saved was now upon us. I got Sherman by wireless and ordered him to join me with the plane and the two sailors at the southern base as quickly as possible; the air conditions being apparently highly favourable. We then talked over the personnel of the coming investigation party; and decided that we would include all hands, together with the sledge and dogs which I had kept with me. Even so great a load would not be too much for one of the huge planes built to our especial orders for heavy machinery transportation. At intervals I still tried to reach Lake with the wireless, but all to no purpose.

Sherman, with the sailors Gunnarsson and Larsen, took off at 7:30; and reported a quiet flight from several points on the wing.

They arrived at our base at midnight, and all hands at once discussed the next move. It was risky business sailing over the antarctic in a single *aéroplane* without any line of bases, but no one drew back from what seemed like the plainest necessity. We turned in at two o'clock for a brief rest after some preliminary loading of the plane, but were up again in four hours to finish the loading and packing.

At 7:15 a.m., January 25th, we started flying northwestward under McTighe's pilotage with ten men, seven dogs, a sledge, a fuel and food supply, and other items including the plane's wireless outfit. The atmosphere was clear, fairly quiet, and relatively mild in temperature; and we anticipated very little trouble in reaching the latitude and longitude designated by Lake as the site of his camp. Our apprehensions were over what we might find, or fail to find, at the end of our journey; for silence continued to answer all calls despatched to the camp.

Every incident of that four-and-a-half-hour flight is burned into my recollection because of its crucial position in my life. It marked my loss, at the age of fifty-four, of all that peace and balance which the normal mind possesses through its accustomed conception of external Nature and Nature's laws. Thenceforward the ten of us—but the student Danforth and myself above all others—were to face a hideously amplified world of lurking horrors which nothing can erase from our emotions, and which we would refrain from sharing with mankind in general if we could. The newspapers have printed the bulletins we sent from the moving plane; telling of our non-stop course, our two battles with treacherous upper-air gales, our glimpse of the broken surface where Lake had sunk his mid-journey shaft three days before, and our sight of a group of those strange fluffy snow-cylinders noted by Amundsen and Byrd as rolling in the wind across the endless leagues of frozen plateau. There came a point, though, when our sensations could not be conveyed in any words the press would understand; and a later point when we had to adopt an actual rule of strict censorship.

The sailor Larsen was first to spy the jagged line of witch-like cones and pinnacles ahead, and his shouts sent everyone to the windows of the great cabined plane. Despite our speed, they were very slow in gaining prominence; hence we knew that they must be

infinitely far off, and visible only because of their abnormal height. Little by little, however, they rose grimly into the western sky; allowing us to distinguish various bare, bleak, blackish summits, and to catch the curious sense of phantasy which they inspired as seen in the reddish antarctic light against the provocative background of iridescent ice-dust clouds. In the whole spectacle there was a persistent, pervasive hint of stupendous secrecy and potential revelation; as if these stark, nightmare spires marked the pylons of a frightful gateway into forbidden spheres of dream, and complex gulfs of remote time, space, and ultra-dimensionality. I could not help feeling that they were evil things—mountains of madness whose farther slopes looked out over some accursed ultimate abyss. That seething, half-luminous cloud-background held ineffable suggestions of a vague, ethereal *beyondness* far more than terrestrially spatial; and gave appalling reminders of the utter remoteness, separateness, desolation, and aeon-long death of this untrodden and unfathomed austral world.

It was young Danforth who drew our notice to the curious regularities of the higher mountain skyline—regularities like clinging fragments of perfect cubes, which Lake had mentioned in his messages, and which indeed justified his comparison with the dream-like suggestions of primordial temple-ruins on cloudy Asian mountain-tops so subtly and strangely painted by Roerich. There was indeed something hauntingly Roerich-like about this whole unearthly continent of mountainous mystery. I had felt it in October when we first caught sight of Victoria Land, and I felt it afresh now. I felt, too, another wave of uneasy consciousness of Archaean mythical resemblances; of how disturbingly this lethal realm corresponded to the evilly famed plateau of Leng in the primal writings. Mythologists have placed Leng in Central Asia; but the racial memory of man—or of his predecessors—is long, and it may well be that certain tales have come down from lands and mountains and temples of horror earlier than Asia and earlier than any human world we know. A few daring mystics have hinted at a pre-Pleistocene origin for the fragmentary Pnakotic Manuscripts, and have suggested that the devotees of Tsathoggua were as alien to mankind as Tsathoggua itself. Leng, wherever in space or time it might brood, was not a region I would care to be in or near; nor did

I relish the proximity of a world that had ever bred such ambiguous and Archaean monstrosities as those Lake had just mentioned. At the moment I felt sorry that I had ever read the abhorred *Necronomicon*, or talked so much with that unpleasantly erudite folklorist Wilmarth at the university.

This mood undoubtedly served to aggravate my reaction to the bizarre mirage which burst upon us from the increasingly opalescent zenith as we drew near the mountains and began to make out the cumulative undulations of the foothills. I had seen dozens of polar mirages during the preceding weeks, some of them quite as uncanny and fantastically vivid as the present sample; but this one had a wholly novel and obscure quality of menacing symbolism, and I shuddered as the seething labyrinth of fabulous walls and towers and minarets loomed out of the troubled ice-vapours above our heads.

The effect was that of a Cyclopean city of no architecture known to man or to human imagination, with vast aggregations of night-black masonry embodying monstrous perversions of geometrical laws and attaining the most grotesque extremes of sinister bizarerie. There were truncated cones, sometimes terraced or fluted, surmounted by tall cylindrical shafts here and there bulbously enlarged and often capped with tiers of thinnish scalloped discs; and strange, beetling, table-like constructions suggesting piles of multitudinous rectangular slabs or circular plates or five-pointed stars with each one overlapping the one beneath. There were composite cones and pyramids either alone or surmounting cylinders or cubes or flatter truncated cones and pyramids, and occasional needle-like spires in curious clusters of five. All of these febrile structures seemed knit together by tubular bridges crossing from one to the other at various dizzy heights, and the implied scale of the whole as terrifying and oppressive in its sheer giganticism. The general type of mirage was not unlike some of the wilder forms observed and drawn by the Arctic whaler Scoresby in 1820; but at this time and place, with those dark, unknown mountain peaks soaring stupendously ahead, that anomalous elder-world discovery in our minds, and the pall of probable disaster enveloping the greater part of our expedition, we all seemed to find in it a taint of latent malignity and infinitely evil portent.

I was glad when the mirage began to break up, though in the process the various nightmare turrets and cones assumed distorted temporary forms of even vaster hideousness. As the whole illusion dissolved to churning opalescence we began to look earthward again, and saw that our journey's end was not far off. The unknown mountains ahead rose dizzily up like a fearsome rampart of giants, their curious regularities shewing with startling clearness even without a field-glass. We were over the lowest foothills now, and could see amidst the snow, ice, and bare patches of their main plateau a couple of darkish spots which we took to be Lake's camp and boring. The higher foothills shot up between five and six miles away, forming a range almost distinct from the terrifying line of more than Himalayan peaks beyond them. At length Ropes—the student who had relieved McTighe at the controls—began to head downward toward the left-hand dark spot whose size marked it as the camp. As he did so, McTighe sent out the last uncensored wireless message the world was to receive from our expedition.

Everyone, of course, has read the brief and unsatisfying bulletins of the rest of our antarctic sojourn. Some hours after our landing we sent a guarded report of the tragedy we found, and reluctantly announced the wiping out of the whole Lake party by the frightful wind of the preceding day, or of the night before that. Eleven known dead, young Gedney missing. People pardoned our hazy lack of details through realisation of the shock the sad event must have caused us, and believed us when we explained that the mangling action of the wind had rendered all eleven bodies unsuitable for transportation outside. Indeed, I flatter myself that even in the midst of our distress, utter bewilderment, and soul-clutching horror, we scarcely went beyond the truth in any specific instance. The tremendous significance lies in what we dared not tell—what I would not tell now but for the need of warning others off from nameless terrors.

It is a fact that the wind had wrought dreadful havoc. Whether all could have lived through it, even without the other thing, is gravely open to doubt. The storm, with its fury of madly driven ice-particles, must have been beyond anything our expedition had encountered before. One aëroplane shelter—all, it seems, had been left in a far too flimsy and inadequate state—was nearly pulverised;

and the derrick at the distant boring was entirely shaken to pieces. The exposed metal of the grounded planes and drilling machinery was bruised into a high polish, and two of the small tents were flattened despite their snow banking. Wooden surfaces left out in the blast were pitted and denuded of paint, and all signs of tracks in the snow were completely obliterated. It is also true that we found none of the Archaean biological objects in a condition to take outside as a whole. We did gather some minerals from a vast tumbled pile, including several of the greenish soapstone fragments whose odd five-pointed rounding and faint patterns of grouped dots caused so many doubtful comparisons; and some fossil bones, among which were the most typical of the curiously injured specimens.

None of the dogs survived, their hurriedly built snow enclosure near the camp being almost wholly destroyed. The wind may have done that, though the greater breakage on the side next the camp, which was not the windward one, suggests an outward leap or break of the frantic beasts themselves. All three sledges were gone, and we have tried to explain that the wind may have blown them off into the unknown. The drill and ice-melting machinery at the boring were too badly damaged to warrant salvage, so we used them to choke up that subtly disturbing gateway to the past which Lake had blasted. We likewise left at the camp the two most shaken-up of the planes; since our surviving party had only four real pilots—Sherman, Danforth, McTighe, and Ropes—in all, with Danforth in a poor nervous shape to navigate. We brought back all the books, scientific equipment, and other incidentals we could find, though much was rather unaccountably blown away. Spare tents and furs were either missing or badly out of condition.

It was approximately 4 p.m., after wide plane cruising had forced us to give Gedney up for lost, that we sent our guarded message to the *Arkham* for relaying; and I think we did well to keep it as calm and non-committal as we succeeded in doing. The most we said about agitation concerned our dogs, whose frantic uneasiness near the biological specimens was to be expected from poor Lake's accounts. We did not mention, I think, their display of the same uneasiness when sniffing around the queer greenish soapstones and certain other objects in the disordered region; objects

including scientific instruments, aëroplanes, and machinery both at the camp and at the boring, whose parts had been loosened, moved, or otherwise tampered with by winds that must have harboured singular curiosity and investigativeness.

About the fourteen biological specimens we were pardonably indefinite. We said that the only ones we discovered were damaged, but that enough was left of them to prove Lake's description wholly and impressively accurate. It was hard work keeping our personal emotions out of this matter—and we did not mention numbers or say exactly how we had found those which we did find. We had by that time agreed not to transmit anything suggesting madness on the part of Lake's men, and it surely looked like madness to find six imperfect monstrosities carefully buried upright in nine-foot snow graves under five-pointed mounds punched over with groups of dots in patterns exactly like those on the queer greenish soapstones dug up from Mesozoic or Tertiary times. The eight perfect specimens mentioned by Lake seemed to have been completely blown away.

We were careful, too, about the public's general peace of mind; hence Danforth and I said little about that frightful trip over the mountains the next day. It was the fact that only a radically lightened plane could possibly cross a range of such height which mercifully limited that scouting tour to the two of us. On our return at 1 a.m. Danforth was close to hysterics, but kept an admirably stiff upper lip. It took no persuasion to make him promise not to shew our sketches and the other things we brought away in our pockets, not to say anything more to the others than what we had agreed to relay outside, and to hide our camera films for private development later on; so that part of my present story will be as new to Pabodie, McTighe, Ropes, Sherman, and the rest as it will be to the world in general. Indeed—Danforth is closer mouthed than I; for he saw—or thinks he saw—one thing he will not tell even me.

As all know, our report included a tale of a hard ascent; a confirmation of Lake's opinion that the great peaks are of Archaean slate and other very primal crumpled strata unchanged since at least middle Comanchian times; a conventional comment on the regularity of the clinging cube and rampart formations; a decision that the cave-mouths indicate dissolved calcareous veins; a conjecture that

certain slopes and passes would permit of the scaling and crossing of the entire range by seasoned mountaineers; and a remark that the mysterious other side holds a lofty and immense super-plateau as ancient and unchanging as the mountains themselves—20,000 feet in elevation, with grotesque rock formations protruding through a thin glacial layer and with low gradual foothills between the general plateau surface and the sheer precipices of the highest peaks.

This body of data is in every respect true so far as it goes, and it completely satisfied the men at the camp. We laid our absence of sixteen hours—a longer time than our announced flying, landing, reconnoitring, and rock-collecting programme called for—to a long mythical spell of adverse wind conditions; and told truly of our landing on the farther foothills. Fortunately our tale sounded realistic and prosaic enough not to tempt any of the others into emulating our flight. Had any tried to do that, I would have used every ounce of my persuasion to stop them—and I do not know what Danforth would have done. While we were gone, Pabodie, Sherman, Ropes, McTighe, and Williamson had worked like beavers over Lake's two best planes; fitting them again for use despite the altogether unaccountable juggling of their operative mechanism.

We decided to load all the planes the next morning and start back for our old base as soon as possible. Even though indirect, that was the safest way to work toward McMurdo Sound; for a straight-line flight across the most utterly unknown stretches of the aeon-dead continent would involve many additional hazards. Further exploration was hardly feasible in view of our tragic decimation and the ruin of our drilling machinery; and the doubts and horrors around us—which we did not reveal—made us wish only to escape from this austral world of desolation and brooding madness as swiftly as we could.

As the public knows, our return to the world was accomplished without further disasters. All planes reached the old base on the evening of the next day—January 27th—after a swift non-stop flight; and on the 28th we made McMurdo Sound in two laps, the one pause being very brief, and occasioned by a faulty rudder in the furious wind over the ice-shelf after we had cleared the great plateau. In five days more the *Arkham* and *Miskatonic*, with all

hands and equipment on board, were shaking clear of the thickening field ice and working up Ross Sea with the mocking mountains of Victoria Land looming westward against a troubled antarctic sky and twisting the wind's wails into a wide-ranged musical piping which chilled my soul to the quick. Less than a fortnight later we left the last hint of polar land behind us, and thanked heaven that we were clear of a haunted, accursed realm where life and death, space and time, have made black and blasphemous alliances in the unknown epochs since matter first writhed and swam on the planet's scarce-cooled crust.

Since our return we have all constantly worked to discourage antarctic exploration, and have kept certain doubts and guesses to ourselves with splendid unity and faithfulness. Even young Danforth, with his nervous breakdown, has not flinched or babbled to his doctors—indeed, as I have said, there is one thing he thinks he alone saw which he will not tell even me, though I think it would help his psychological state if he would consent to do so. It might explain and relieve much, though perhaps the thing was no more than the delusive aftermath of an earlier shock. That is the impression I gather after those rare irresponsible moments when he whispers disjointed things to me—things which he repudiates vehemently as soon as he gets a grip on himself again.

It will be hard work deterring others from the great white south, and some of our efforts may directly harm our cause by drawing inquiring notice. We might have known from the first that human curiosity is undying, and that the results we announced would be enough to spur others ahead on the same age-long pursuit of the unknown. Lake's reports of those biological monstrosities had aroused naturalists and palaeontologists to the highest pitch; though we were sensible enough not to shew the detached parts we had taken from the actual buried specimens, or our photographs of those specimens as they were found. We also refrained from shewing the more puzzling of the scarred bones and greenish soapstones; while Danforth and I have closely guarded the pictures we took or drew on the super-plateau across the range, and the crumpled things we smoothed, studied in terror, and brought away in our pockets. But now that Starkweather-Moore party is organising, and with a thoroughness far beyond anything our outfit attempted.

If not dissuaded, they will get to the innermost nucleus of the antarctic and melt and bore till they bring up that which may end the world we know. So I must break through all reticences at last—even about that ultimate nameless thing beyond the mountains of madness.

IV.

It is only with vast hesitancy and repugnance that I let my mind go back to Lake's camp and what we really found there—and to that other thing beyond the frightful mountain wall. I am constantly tempted to shirk the details, and to let hints stand for actual facts and ineluctable deductions. I hope I have said enough already to let me glide briefly over the rest; the rest, that is, of the horror at the camp. I have told of the wind-ravaged terrain, the damaged shelters, the disarranged machinery, the varied uneasinesses of our dogs, the missing sledges and other items, the deaths of men and dogs, the absence of Gedney, and the six insanely buried biological specimens, strangely sound in texture for all their structural injuries, from a world forty million years dead. I do not recall whether I mentioned that upon checking up the canine bodies we found one dog missing. We did not think much about that till later—indeed, only Danforth and I have thought of it at all.

The principal things I have been keeping back relate to the bodies, and to certain subtle points which may or may not lend a hideous and incredible kind of rationale to the apparent chaos. At the time I tried to keep the men's minds off those points; for it was so much simpler—so much more normal—to lay everything to an outbreak of madness on the part of some of Lake's party. From the look of things, that daemon mountain wind must have been enough to drive any man mad in the midst of this centre of all earthly mystery and desolation.

The crowning abnormality, of course, was the condition of the bodies—men and dogs alike. They had all been in some terrible kind of conflict, and were torn and mangled in fiendish and altogether inexplicable ways. Death, so far as we could judge, had in each case come from strangulation or laceration. The dogs had evi-

dently started the trouble, for the state of their ill-built corral bore witness to its forcible breakage from within. It had been set some distance from the camp because of the hatred of the animals for those hellish Archaean organisms, but the precaution seemed to have been taken in vain. When left alone in that monstrous wind behind flimsy walls of insufficient height they must have stampeded—whether from the wind itself, or from some subtle, increasing odour emitted by the nightmare specimens, one could not say. Those specimens, of course, had been covered with a tent-cloth; yet the low antarctic sun had beat steadily upon that cloth, and Lake had mentioned that solar heat tended to make the strangely sound and tough tissues of the things relax and expand. Perhaps the wind had whipped the cloth from over them, and jostled them about in such a way that their more pungent olfactory qualities became manifest despite their unbelievable antiquity.

But whatever had happened, it was hideous and revolting enough. Perhaps I had better put squeamishness aside and tell the worst at last—though with a categorical statement of opinion, based on the first-hand observations and most rigid deductions of both Danforth and myself, that the then missing Gedney was in no way responsible for the loathsome horrors we found. I have said that the bodies were frightfully mangled. Now I must add that some were incised and subtracted from in the most curious, cold-blooded, and inhuman fashion. It was the same with dogs and men. All the healthier, fatter bodies, quadrupedal or bipedal, had had their most solid masses of tissue cut out and removed, as by a careful butcher; and around them was a strange sprinkling of salt—taken from the ravaged provision-chests on the planes—which conjured up the most horrible associations. The thing had occurred in one of the crude *aéroplane* shelters from which the plane had been dragged out, and subsequent winds had effaced all tracks which could have supplied any plausible theory. Scattered bits of clothing, roughly slashed from the human incision-subjects, hinted no clues. It is useless to bring up the half-impression of certain faint snow-prints in one shielded corner of the ruined enclosure—because that impression did not concern human prints at all, but was clearly mixed up with all the talk of fossil prints which poor Lake had been giving

throughout the preceding weeks. One had to be careful of one's imagination in the lee of those overshadowing mountains of madness.

As I have indicated, Gedney and one dog turned out to be missing in the end. When we came on that terrible shelter we had missed two dogs and two men; but the fairly unharmed dissecting tent, which we entered after investigating the monstrous graves, had something to reveal. It was not as Lake had left it, for the covered parts of the primal monstrosity had been removed from the improvised table. Indeed, we had already realised that one of the six imperfect and insanely buried things we had found—the one with the trace of a peculiarly hateful odour—must represent the collected sections of the entity which Lake had tried to analyse. On and around that laboratory table were strown other things, and it did not take long for us to guess that those things were the carefully though oddly and inexpertly dissected parts of one man and one dog. I shall spare the feelings of survivors by omitting mention of the man's identity. Lake's anatomical instruments were missing, but there were evidences of their careful cleansing. The gasoline stove was also gone, though around it we found a curious litter of matches. We buried the human parts beside the other ten men, and the canine parts with the other 35 dogs. Concerning the bizarre smudges on the laboratory table, and on the jumble of roughly handled illustrated books scattered near it, we were much too bewildered to speculate.

This formed the worst of the camp horror, but other things were equally perplexing. The disappearance of Gedney, the one dog, the eight uninjured biological specimens, the three sledges, and certain instruments, illustrated technical and scientific books, writing materials, electric torches and batteries, food and fuel, heating apparatus, spare tents, fur suits, and the like, was utterly beyond sane conjecture; as were likewise the spatter-fringed ink-blots on certain pieces of paper, and the evidences of curious alien fumbling and experimentation around the planes and all other mechanical devices both at the camp and at the boring. The dogs seemed to abhor this oddly disordered machinery. Then, too, there was the upsetting of the larder, the disappearance of certain staples, and the jarringly comical heap of tin cans pried open in the most unlikely

ways and at the most unlikely places. The profusion of scattered matches, intact, broken, or spent, formed another minor enigma; as did the two or three tent-cloths and fur suits which we found lying about with peculiar and unorthodox slashings conceivably due to clumsy efforts at unimaginable adaptations. The maltreatment of the human and canine bodies, and the crazy burial of the damaged Archaean specimens, were all of a piece with this apparent disintegrative madness. In view of just such an eventuality as the present one, we carefully photographed all the main evidences of insane disorder at the camp; and shall use the prints to buttress our pleas against the departure of the proposed Starkweather-Moore Expedition.

Our first act after finding the bodies in the shelter was to photograph and open the row of insane graves with the five-pointed snow mounds. We could not help noticing the resemblance of these monstrous mounds, with their clusters of grouped dots, to poor Lake's descriptions of the strange greenish soapstones; and when we came on some of the soapstones themselves in the great mineral pile we found the likeness very close indeed. The whole general formation, it must be made clear, seemed abominably suggestive of the starfish-head of the Archaean entities; and we agreed that the suggestion must have worked potently upon the sensitised minds of Lake's overwrought party. Our own first sight of the actual buried entities formed a horrible moment, and sent the imaginations of Pabodie and myself back to some of the shocking primal myths we had read and heard. We all agreed that the mere sight and continued presence of the things must have coöperated with the oppressive polar solitude and daemon mountain wind in driving Lake's party mad.

For madness—centring in Gedney as the only possible surviving agent—was the explanation spontaneously adopted by everybody so far as spoken utterance was concerned; though I will not be so naive as to deny that each of us may have harboured wild guesses which sanity forbade him to formulate completely. Sherman, Pabodie, and McTighe made an exhaustive aëroplane cruise over all the surrounding territory in the afternoon, sweeping the horizon with field-glasses in quest of Gedney and of the various missing things; but nothing came to light. The party reported that the titan

barrier range extended endlessly to right and left alike, without any diminution in height or essential structure. On some of the peaks, though, the regular cube and rampart formations were bolder and plainer; having doubly fantastic similitudes to Roerich-painted Asian hill ruins. The distribution of cryptical cave-mouths on the black snow-denuded summits seemed roughly even as far as the range could be traced.

In spite of all the prevailing horrors we were left with enough sheer scientific zeal and adventurousness to wonder about the unknown realm beyond those mysterious mountains. As our guarded messages stated, we rested at midnight after our day of terror and bafflement; but not without a tentative plan for one or more range-crossing altitude flights in a lightened plane with aerial camera and geologist's outfit, beginning the following morning. It was decided that Danforth and I try it first, and we awaked at 7 a.m. intending an early trip; though heavy winds—mentioned in our brief bulletin to the outside world—delayed our start till nearly nine o'clock.

I have already repeated the non-committal story we told the men at camp—and relayed outside—after our return sixteen hours later. It is now my terrible duty to amplify this account by filling in the merciful blanks with hints of what we really saw in the hidden trans-montane world—hints of the revelations which have finally driven Danforth to a nervous collapse. I wish he would add a really frank word about the thing which he thinks he alone saw—even though it was probably a nervous delusion—and which was perhaps the last straw that put him where he is; but he is firm against that. All I can do is to repeat his later disjointed whispers about what set him shrieking as the plane soared back through the wind-tortured mountain pass after that real and tangible shock which I shared. This will form my last word. If the plain signs of surviving elder horrors in what I disclose be not enough to keep others from meddling with the inner antarctic—or at least from prying too deeply beneath the surface of that ultimate waste of forbidden secrets and unhuman, aeon-cursed desolation—the responsibility for unnamable and perhaps immensurable evils will not be mine.

Danforth and I, studying the notes made by Pabodie in his afternoon flight and checking up with a sextant, had calculated that the

lowest available pass in the range lay somewhat to the right of us, within sight of camp, and about 23,000 or 24,000 feet above sea-level. For this point, then, we first headed in the lightened plane as we embarked on our flight of discovery. The camp itself, on foothills which sprang from a high continental plateau, was some 12,000 feet in altitude; hence the actual height increase necessary was not so vast as it might seem. Nevertheless we were acutely conscious of the rarefied air and intense cold as we rose; for on account of visibility conditions we had to leave the cabin windows open. We were dressed, of course, in our heaviest furs.

As we drew near the forbidding peaks, dark and sinister above the line of crevasse-riven snow and interstitial glaciers, we noticed more and more the curiously regular formations clinging to the slopes; and thought again of the strange Asian paintings of Nicholas Roerich. The ancient and wind-weathered rock strata fully verified all of Lake's bulletins, and proved that these hoary pinnacles had been towering up in exactly the same way since a surprisingly early time in earth's history—perhaps over fifty million years. How much higher they had once been, it was futile to guess; but everything about this strange region pointed to obscure atmospheric influences unfavourable to change, and calculated to retard the usual climatic processes of rock disintegration.

But it was the mountainside tangle of regular cubes, ramparts, and cave-mouths which fascinated and disturbed us most. I studied them with a field-glass and took aërial photographs whilst Danforth drove; and at times relieved him at the controls—though my aviation knowledge was purely an amateur's—in order to let him use the binoculars. We could easily see that much of the material of the things was a lightish Archaean quartzite, unlike any formation visible over broad areas of the general surface; and that their regularity was extreme and uncanny to an extent which poor Lake had scarcely hinted.

As he had said, their edges were crumbled and rounded from untold aeons of savage weathering; but their preternatural solidity and tough material had saved them from obliteration. Many parts, especially those closest to the slopes, seemed identical in substance with the surrounding rock surface. The whole arrangement looked like the ruins of Machu Picchu in the Andes, or the primal founda-

tion-walls of Kish as dug up by the Oxford-Field Museum Expedition in 1929; and both Danforth and I obtained that occasional impression of *separate Cyclopean blocks* which Lake had attributed to his flight-companion Carroll. How to account for such things in this place was frankly beyond me, and I felt queerly humbled as a geologist. Igneous formations often have strange regularities—like the famous Giants' Causeway in Ireland—but this stupendous range, despite Lake's original suspicion of smoking cones, was above all else non-volcanic in evident structure.

The curious cave-mouths, near which the odd formations seemed most abundant, presented another albeit a lesser puzzle because of their regularity of outline. They were, as Lake's bulletin had said, often approximately square or semicircular; as if the natural orifices had been shaped to greater symmetry by some magic hand. Their numerousness and wide distribution were remarkable, and suggested that the whole region was honeycombed with tunnels dissolved out of limestone strata. Such glimpses as we secured did not extend far within the caverns, but we saw that they were apparently clear of stalactites and stalagmites. Outside, those parts of the mountain slopes adjoining the apertures seemed invariably smooth and regular; and Danforth thought that the slight cracks and pittings of the weathering tended toward unusual patterns. Filled as he was with the horrors and strangenesses discovered at the camp, he hinted that the pittings vaguely resembled those batfling groups of dots sprinkled over the primeval greenish soapstones, so hideously duplicated on the madly conceived snow mounds above those six buried monstrosities.

We had risen gradually in flying over the higher foothills and along toward the relatively low pass we had selected. As we advanced we occasionally looked down at the snow and ice of the land route, wondering whether we could have attempted the trip with the simpler equipment of earlier days. Somewhat to our surprise we saw that the terrain was far from difficult as such things go; and that despite the crevasses and other bad spots it would not have been likely to deter the sledges of a Scott, a Shackleton, or an Amundsen. Some of the glaciers appeared to lead up to wind-bared passes with unusual continuity, and upon reaching our chosen pass we found that its case formed no exception.

Our sensations of tense expectancy as we prepared to round the crest and peer out over an untrodden world can hardly be described on paper; even though we had no cause to think the regions beyond the range essentially different from those already seen and traversed. The touch of evil mystery in these barrier mountains, and in the beckoning sea of opalescent sky glimpsed betwixt their summits, was a highly subtle and attenuated matter not to be explained in literal words. Rather was it an affair of vague psychological symbolism and aesthetic association—a thing mixed up with exotic poetry and paintings, and with archaic myths lurking in shunned and forbidden volumes. Even the wind's burden held a peculiar strain of conscious malignity; and for a second it seemed that the composite sound included a bizarre musical whistling or piping over a wide range as the blast swept in and out of the omnipresent and resonant cave-mouths. There was a cloudy note of reminiscent repulsion in this sound, as complex and unplaceable as any of the other dark impressions.

We were now, after a slow ascent, at a height of 23,570 feet according to the aneroid; and had left the region of clinging snow definitely below us. Up here were only dark, bare rock slopes and the start of rough-ribbed glaciers—but with those provocative cubes, ramparts, and echoing cave-mouths to add a portent of the unnatural, the fantastic, and the dream-like. Looking along the line of high peaks, I thought I could see the one mentioned by poor Lake, with a rampart exactly on top. It seemed to be half-lost in a queer antarctic haze; such a haze, perhaps, as had been responsible for Lake's early notion of volcanism. The pass loomed directly before us, smooth and windswept between its jagged and malignly frowning pylons. Beyond it was a sky fretted with swirling vapours and lighted by the low polar sun—the sky of that mysterious farther realm upon which we felt no human eye had ever gazed.

A few more feet of altitude and we would behold that realm. Danforth and I, unable to speak except in shouts amidst the howling, piping wind that raced through the pass and added to the noise of the unmuffled engines, exchanged eloquent glances. And then, having gained those last few feet, we did indeed stare across the momentous divide and over the unsampled secrets of an elder and utterly alien earth.

V.

I think that both of us simultaneously cried out in mixed awe, wonder, terror, and disbelief in our own senses as we finally cleared the pass and saw what lay beyond. Of course we must have had some natural theory in the back of our heads to steady our faculties for the moment. Probably we thought of such things as the grotesquely weathered stones of the Garden of the Gods in Colorado, or the fantastically symmetrical wind-carved rocks of the Arizona desert. Perhaps we even half thought the sight a mirage like that we had seen the morning before on first approaching those mountains of madness. We must have had some such normal notions to fall back upon as our eyes swept that limitless, tempest-scarred plateau and grasped the almost endless labyrinth of colossal, regular, and geometrically eurhythmic stone masses which reared their crumbled and pitted crests above a glacial sheet not more than forty or fifty feet deep at its thickest, and in places obviously thinner.

The effect of the monstrous sight was indescribable, for some fiendish violation of known natural law seemed certain at the outset. Here, on a hellishly ancient table-land fully 20,000 feet high, and in a climate deadly to habitation since a pre-human age not less than 500,000 years ago, there stretched nearly to the vision's limit a tangle of orderly stone which only the desperation of mental self-defence could possibly attribute to any but a conscious and artificial cause. We had previously dismissed, so far as serious thought was concerned, any theory that the cubes and ramparts of the mountainsides were other than natural in origin. How could they be otherwise, when man himself could scarcely have been differentiated from the great apes at the time when this region succumbed to the present unbroken reign of glacial death?

Yet now the sway of reason seemed irrefutably shaken, for this Cyclopean maze of squared, curved, and angled blocks had features which cut off all comfortable refuge. It was, very clearly, the blasphemous city of the mirage in stark, objective, and ineluctable reality. That damnable portent had had a material basis after all—there had been some horizontal stratum of ice-dust in the upper air, and this shocking stone survival had projected its image across

the mountains according to the simple laws of reflection. Of course the phantom had been twisted and exaggerated, and had contained things which the real source did not contain; yet now, as we saw that real source, we thought it even more hideous and menacing than its distant image.

Only the incredible, unhuman massiveness of these vast stone towers and ramparts had saved the frightful thing from utter annihilation in the hundreds of thousands—perhaps millions—of years it had brooded there amidst the blasts of a bleak upland. "Corona Mundi . . . Roof of the World . . ." All sorts of fantastic phrases sprang to our lips as we looked dizzily down at the unbelievable spectacle. I thought again of the eldritch primal myths that had so persistently haunted me since my first sight of this dead antarctic world—of the daemonic plateau of Leng, of the Mi-Go, or Abominable Snow-Men of the Himalayas, of the Pnakotic Manuscripts with their pre-human implications, of the Cthulhu cult, of the *Necronomicon*, and of the Hyperborean legends of formless Tsathoggua and the worse than formless star-spawn associated with that semi-entity.

For boundless miles in every direction the thing stretched off with very little thinning; indeed, as our eyes followed it to the right and left along the base of the low, gradual foothills which separated it from the actual mountain rim, we decided that we could see no thinning at all except for an interruption at the left of the pass through which we had come. We had merely struck, at random, a limited part of something of incalculable extent. The foothills were more sparsely sprinkled with grotesque stone structures, linking the terrible city to the already familiar cubes and ramparts which evidently formed its mountain outposts. These latter, as well as the queer cave-mouths, were as thick on the inner as on the outer sides of the mountains.

The nameless stone labyrinth consisted, for the most part, of walls from 10 to 150 feet in ice-clear height, and of a thickness varying from five to ten feet. It was composed mostly of prodigious blocks of dark primordial slate, schist, and sandstone—blocks in many cases as large as $4 \times 6 \times 8$ feet—though in several places it seemed to be carved out of a solid, uneven bed-rock of pre-Cambrian slate. The buildings were far from equal in size; there being

innumerable honeycomb-arrangements of enormous extent as well as smaller separate structures. The general shape of these things tended to be conical, pyramidal, or terraced; though there were many perfect cylinders, perfect cubes, clusters of cubes, and other rectangular forms, and a peculiar sprinkling of angled edifices whose five-pointed ground plan roughly suggested modern fortifications. The builders had made constant and expert use of the principle of the arch, and domes had probably existed in the city's heyday.

The whole tangle was monstrously weathered, and the glacial surface from which the towers projected was strown with fallen blocks and immemorial debris. Where the glaciation was transparent we could see the lower parts of the gigantic piles, and noticed the ice-preserved stone bridges which connected the different towers at varying distances above the ground. On the exposed walls we could detect the scarred places where other and higher bridges of the same sort had existed. Closer inspection revealed countless largish windows; some of which were closed with shutters of a petrified material originally wood, though most gaped open in a sinister and menacing fashion. Many of the ruins, of course, were roofless, and with uneven though wind-rounded upper edges; whilst others, of a more sharply conical or pyramidal model or else protected by higher surrounding structures, preserved intact outlines despite the omnipresent crumbling and pitting. With the field-glass we could barely make out what seemed to be sculptural decorations in horizontal bands—decorations including those curious groups of dots whose presence on the ancient soapstones now assumed a vastly larger significance.

In many places the buildings were totally ruined and the ice-sheet deeply riven from various geologic causes. In other places the stonework was worn down to the very level of the glaciation. One broad swath, extending from the plateau's interior to a cleft in the foothills about a mile to the left of the pass we had traversed, was wholly free from buildings; and probably represented, we concluded, the course of some great river which in Tertiary times—millions of years ago—had poured through the city and into some prodigious subterranean abyss of the great barrier range. Certainly,

this was above all a region of caves, gulfs, and underground secrets beyond human penetration.

Looking back to our sensations, and recalling our dazedness at viewing this monstrous survival from aeons we had thought pre-human, I can only wonder that we preserved the semblance of equilibrium which we did. Of course we knew that something—chronology, scientific theory, or our own consciousness—was woefully awry; yet we kept enough poise to guide the plane, observe many things quite minutely, and take a careful series of photographs which may yet serve both us and the world in good stead. In my case, ingrained scientific habit may have helped; for above all my bewilderment and sense of menace there burned a dominant curiosity to fathom more of this age-old secret—to know what sort of beings had built and lived in this incalculably gigantic place, and what relation to the general world of its time or of other times so unique a concentration of life could have had.

For this place could be no ordinary city. It must have formed the primary nucleus and centre of some archaic and unbelievable chapter of earth's history whose outward ramifications, recalled only dimly in the most obscure and distorted myths, had vanished utterly amidst the chaos of terrene convulsions long before any human race we know had shambled out of apedom. Here sprawled a palaeogean megalopolis compared with which the fabled Atlantis and Lemuria, Commorion and Uzuldaroum, and Olathoë in the land of Lomar are recent things of today—not even of yesterday; a megalopolis ranking with such whispered pre-human blasphemies as Valusia, R'yeh, Ib in the land of Mnar, and the Nameless City of Arabia Deserta. As we flew above that tangle of stark titan towers my imagination sometimes escaped all bounds and roved aimlessly in realms of fantastic associations—even weaving links betwixt this lost world and some of my own wildest dreams concerning the mad horror at the camp.

The plane's fuel-tank, in the interest of greater lightness, had been only partly filled; hence we now had to exert caution in our explorations. Even so, however, we covered an enormous extent of ground—or rather, air—after swooping down to a level where the wind became virtually negligible. There seemed to be no limit to the

mountain-range, or to the length of the frightful stone city which bordered its inner foothills. Fifty miles of flight in each direction shewed no major change in the labyrinth of rock and masonry that clawed up corpse-like through the eternal ice. There were, though, some highly absorbing diversifications; such as the carvings on the canyon where that broad river had once pierced the foothills and approached its sinking-place in the great range. The headlands at the stream's entrance had been boldly carved into Cyclopean pylons; and something about the ridgy, barrel-shaped designs stirred up oddly vague, hateful, and confusing semi-remembrances in both Danforth and me.

We also came upon several star-shaped open spaces, evidently public squares; and noted various undulations in the terrain. Where a sharp hill rose, it was generally hollowed out into some sort of rambling stone edifice; but there were at least two exceptions. Of these latter, one was too badly weathered to disclose what had been on the jutting eminence, while the other still bore a fantastic conical monument carved out of the solid rock and roughly resembling such things as the well-known Snake Tomb in the ancient valley of Petra.

Flying inland from the mountains, we discovered that the city was not of infinite width, even though its length along the foothills seemed endless. After about thirty miles the grotesque stone buildings began to thin out, and in ten more miles we came to an unbroken waste virtually without signs of sentient artifice. The course of the river beyond the city seemed marked by a broad depressed line; while the land assumed a somewhat greater ruggedness, seeming to slope slightly upward as it receded in the mist-hazed west.

So far we had made no landing, yet to leave the plateau without an attempt at entering some of the monstrous structures would have been inconceivable. Accordingly we decided to find a smooth place on the foothills near our navigable pass, there grounding the plane and preparing to do some exploration on foot. Though these gradual slopes were partly covered with a scattering of ruins, low flying soon disclosed an ample number of possible landing-places. Selecting that nearest to the pass, since our next flight would be across the great range and back to camp, we succeeded about 12:30 p.m. in coming down on a smooth, hard snowfield wholly devoid

of obstacles and well adapted to a swift and favourable takeoff later on.

It did not seem necessary to protect the plane with a snow banking for so brief a time and in so comfortable an absence of high winds at this level; hence we merely saw that the landing skis were safely lodged, and that the vital parts of the mechanism were guarded against the cold. For our foot journey we discarded the heaviest of our flying furs, and took with us a small outfit consisting of pocket compass, hand camera, light provisions, voluminous notebooks and paper, geologist's hammer and chisel, specimen-bags, coil of climbing rope, and powerful electric torches with extra batteries; this equipment having been carried in the plane on the chance that we might be able to effect a landing, take ground pictures, make drawings and topographical sketches, and obtain rock specimens from some bare slope, outcropping, or mountain cave. Fortunately we had a supply of extra paper to tear up, place in a spare specimen-bag, and use on the ancient principle of hare-and-hounds for marking our course in any interior mazes we might be able to penetrate. This had been brought in case we found some cave system with air quiet enough to allow such a rapid and easy method in place of the usual rock-chipping method of trail-blazing.

Walking cautiously downhill over the crusted snow toward the stupendous stone labyrinth that loomed against the opalescent west, we felt almost as keen a sense of imminent marvels as we had felt on approaching the unfathomed mountain pass four hours previously. True, we had become visually familiar with the incredible secret concealed by the barrier peaks; yet the prospect of actually entering primordial walls reared by conscious beings perhaps millions of years ago—before any known race of men could have existed—was none the less awesome and potentially terrible in its implications of cosmic abnormality. Though the thinness of the air at this prodigious altitude made exertion somewhat more difficult than usual; both Danforth and I found ourselves bearing up very well, and felt equal to almost any task which might fall to our lot. It took only a few steps to bring us to a shapeless ruin worn level with the snow, while ten or fifteen rods farther on there was a huge roofless rampart still complete in its gigantic five-pointed outline and rising to

an irregular height of ten or eleven feet. For this latter we headed; and when at last we were able actually to touch its weathered Cyclopean blocks, we felt that we had established an unprecedented and almost blasphemous link with forgotten aeons normally closed to our species.

This rampart, shaped like a star and perhaps 300 feet from point to point, was built of Jurassic sandstone blocks of irregular size, averaging 6×8 feet in surface. There was a row of arched loopholes or windows about four feet wide and five feet high; spaced quite symmetrically along the points of the star and at its inner angles, and with the bottoms about four feet from the glaciated surface. Looking through these, we could see that the masonry was fully five feet thick, that there were no partitions remaining within, and that there were traces of banded carvings or bas-reliefs on the interior walls; facts we had indeed guessed before, when flying low over this rampart and others like it. Though lower parts must have originally existed, all traces of such things were now wholly obscured by the deep layer of ice and snow at this point.

We crawled through one of the windows and vainly tried to decipher the nearly effaced mural designs, but did not attempt to disturb the glaciated floor. Our orientation flights had indicated that many buildings in the city proper were less ice-choked, and that we might perhaps find wholly clear interiors leading down to the true ground level if we entered those structures still roofed at the top. Before we left the rampart we photographed it carefully, and studied its mortarless Cyclopean masonry with complete bewilderment. We wished that Pabodie were present, for his engineering knowledge might have helped us guess how such titanic blocks could have been handled in that unbelievably remote age when the city and its outskirts were built up.

The half-mile walk downhill to the actual city, with the upper wind shrieking vainly and savagely through the skyward peaks in the background, was something whose smallest details will always remain engraved on my mind. Only in fantastic nightmares could any human beings but Danforth and me conceive such optical effects. Between us and the churning vapours of the west lay that monstrous tangle of dark stone towers; its outre and incredible

forms impressing us afresh at every new angle of vision. It was a mirage in solid stone, and were it not for the photographs I would still doubt that such a thing could be. The general type of masonry was identical with that of the rampart we had examined; but the extravagant shapes which this masonry took in its urban manifestations were past all description.

Even the pictures illustrate only one or two phases of its infinite bizarrerie, endless variety, preternatural massiveness, and utterly alien exoticism. There were geometrical forms for which an Euclid could scarcely find a name—cones of all degrees of irregularity and truncation; terraces of every sort of provocative disproportion; shafts with odd bulbous enlargements; broken columns in curious groups; and five-pointed or five-ridged arrangements of mad grotesqueness. As we drew nearer we could see beneath certain transparent parts of the ice-sheet, and detect some of the tubular stone bridges that connected the crazily sprinkled structures at various heights. Of orderly streets there seemed to be none, the only broad open swath being a mile to the left, where the ancient river had doubtless flowed through the town into the mountains.

Our field-glasses shewed the external horizontal bands of nearly effaced sculptures and dot-groups to be very prevalent, and we could half imagine what the city must once have looked like—even though most of the roofs and tower-tops had necessarily perished. As a whole, it had been a complex tangle of twisted lanes and alleys; all of them deep canyons, and some little better than tunnels because of the overhanging masonry or overarching bridges. Now, outspread below us, it loomed like a dream-phantasy against a westward mist through whose northern end the low, reddish antarctic sun of early afternoon was struggling to shine; and when for a moment that sun encountered a denser obstruction and plunged the scene into temporary shadow, the effect was subtly menacing in a way I can never hope to depict. Even the faint howling and piping of the unfelt wind in the great mountain passes behind us took on a wilder note of purposeful malignity. The last stage of our descent to the town was unusually steep and abrupt, and a rock outcropping at the edge where the grade changed led us to think that an artificial terrace had once existed there. Under the glaciation, we believed, there must be a flight of steps or its equivalent.

When at last we plunged into the labyrinthine town itself, clambering over fallen masonry and shrinking from the oppressive nearness and dwarfing height of omnipresent crumbling and pitted walls, our sensations again became such that I marvel at the amount of self-control we retained. Danforth was frankly jumpy, and began making some offensively irrelevant speculations about the horror at the camp—which I resented all the more because I could not help sharing certain conclusions forced upon us by many features of this morbid survival from nightmare antiquity. The speculations worked on his imagination, too; for in one place—where a debris-littered alley turned a sharp corner—he insisted that he saw faint traces of ground markings which he did not like; whilst elsewhere he stopped to listen to a subtle imaginary sound from some undefined point—a muffled musical piping, he said, not unlike that of the wind in the mountain caves yet somehow disturbingly different. The ceaseless *five-pointedness* of the surrounding architecture and of the few distinguishable mural arabesques had a dimly sinister suggestiveness we could not escape; and gave us a touch of terrible subconscious certainty concerning the primal entities which had reared and dwelt in this unhallowed place.

Nevertheless our scientific and adventurous souls were not wholly dead; and we mechanically carried out our programme of chipping specimens from all the different rock types represented in the masonry. We wished a rather full set in order to draw better conclusions regarding the age of the place. Nothing in the great outer walls seemed to date from later than the Jurassic and Comanchian periods, nor was any piece of stone in the entire place of a greater recency than the Pliocene age. In stark certainty, we were wandering amidst a death which had reigned at least 500,000 years, and in all probability even longer.

As we proceeded through this maze of stone-shadowed twilight we stopped at all available apertures to study interiors and investigate entrance possibilities. Some were above our reach, whilst others led only into ice-choked ruins as unroofed and barren as the rampart on the hill. One, though spacious and inviting, opened on a seemingly bottomless abyss without visible means of descent. Now and then we had a chance to study the petrified wood of a surviving shutter, and were impressed by the fabulous antiquity im-

plied in the still discernible grain. These things had come from Mesozoic gymnosperms and conifers—especially Cretaceous cycads—and from fan-palms and early angiosperms of plainly Tertiary date. Nothing definitely later than the Pliocene could be discovered. In the placing of these shutters—whose edges shewed the former presence of queer and long-vanished hinges—usage seemed to be varied; some being on the outer and some on the inner side of the deep embrasures. They seemed to have become wedged in place, thus surviving the rusting of their former and probably metallic fixtures and fastenings.

After a time we came across a row of windows—in the bulges of a colossal five-ridged cone of undamaged apex—which led into a vast, well-preserved room with stone flooring; but these were too high in the room to permit of descent without a rope. We had a rope with us, but did not wish to bother with this twenty-foot drop unless obliged to—especially in this thin plateau air where great demands were made upon the heart action. This enormous room was probably a hall or concourse of some sort, and our electric torches shewed bold, distinct, and potentially startling sculptures arranged round the walls in broad, horizontal bands separated by equally broad strips of conventional arabesques. We took careful note of this spot, planning to enter here unless a more easily gained interior were encountered.

Finally, though, we did encounter exactly the opening we wished; an archway about six feet wide and ten feet high, marking the former end of an aerial bridge which had spanned an alley about five feet above the present level of glaciation. These archways, of course, were flush with upper-story floors; and in this case one of the floors still existed. The building thus accessible was a series of rectangular terraces on our left facing westward. That across the alley, where the other archway yawned, was a decrepit cylinder with no windows and with a curious bulge about ten feet above the aperture. It was totally dark inside, and the archway seemed to open on a well of illimitable emptiness.

Heaped debris made the entrance to the vast left-hand building doubly easy, yet for a moment we hesitated before taking advantage of the long-wished chance. For though we had penetrated into this tangle of archaic mystery, it required fresh resolution to carry

us actually inside a complete and surviving building of a fabulous elder world whose nature was becoming more and more hideously plain to us. In the end, however, we made the plunge; and scrambled up over the rubble into the gaping embrasure. The floor beyond was of great slate slabs, and seemed to form the outlet of a long, high corridor with sculptured walls.

Observing the many inner archways which led off from it, and realising the probable complexity of the nest of apartments within, we decided that we must begin our system of hare-and-hound trail-blazing. Hitherto our compasses, together with frequent glimpses of the vast mountain-range between the towers in our rear, had been enough to prevent our losing our way; but from now on, the artificial substitute would be necessary. Accordingly we reduced our extra paper to shreds of suitable size, placed these in a bag to be carried by Danforth, and prepared to use them as economically as safety would allow. This method would probably gain us immunity from straying, since there did not appear to be any strong air-currents inside the primordial masonry. If such should develop, or if our paper supply should give out, we could of course fall back on the more secure though more tedious and retarding method of rock-chipping.

Just how extensive a territory we had opened up, it was impossible to guess without a trial. The close and frequent connexion of the different buildings made it likely that we might cross from one to another on bridges underneath the ice except where impeded by local collapses and geologic rifts, for very little glaciation seemed to have entered the massive constructions. Almost all the areas of transparent ice had revealed the submerged windows as tightly shuttered, as if the town had been left in that uniform state until the glacial sheet came to crystallise the lower part for all succeeding time. Indeed, one gained a curious impression that this place had been deliberately closed and deserted in some dim, bygone aeon, rather than overwhelmed by any sudden calamity or even gradual decay. Had the coming of the ice been foreseen, and had a nameless population left en masse to seek a less doomed abode? The precise physiographic conditions attending the formation of the ice-sheet at this point would have to wait for later solution. It had not, very plainly, been a grinding drive. Perhaps the pressure of accumulated

snows had been responsible; and perhaps some flood from the river, or from the bursting of some ancient glacial dam in the great range, had helped to create the special state now observable. Imagination could conceive almost anything in connexion with this place.

VI.

It would be cumbrous to give a detailed, consecutive account of our wanderings inside that cavernous, aeon-dead honeycomb of primal masonry; that monstrous lair of elder secrets which now echoed for the first time, after uncounted epochs, to the tread of human feet. This is especially true because so much of the horrible drama and revelation came from a mere study of the omnipresent mural carvings. Our flashlight photographs of those carvings will do much toward proving the truth of what we are now disclosing, and it is lamentable that we had not a larger film supply with us. As it was, we made crude notebook sketches of certain salient features after all our films were used up.

The building which we had entered was one of great size and elaborateness, and gave us an impressive notion of the architecture of that nameless geologic past. The inner partitions were less massive than the outer walls, but on the lower levels were excellently preserved. Labyrinthine complexity, involving curiously irregular differences in floor levels, characterised the entire arrangement; and we should certainly have been lost at the very outset but for the trail of torn paper left behind us. We decided to explore the more decrepit upper parts first of all, hence climbed aloft in the maze for a distance of some 100 feet, to where the topmost tier of chambers yawned snowily and ruinously open to the polar sky. Ascent was effected over the steep, transversely ribbed stone ramps or inclined planes which everywhere served in lieu of stairs. The rooms we encountered were of all imaginable shapes and proportions, ranging from five-pointed stars to triangles and perfect cubes. It might be safe to say that their general average was about 30×30 feet in floor area, and 20 feet in height; though many larger apartments existed. After thoroughly examining the upper regions and the glacial level we descended story by story into the sub-

merged part, where indeed we soon saw we were in a continuous maze of connected chambers and passages probably leading over unlimited areas outside this particular building. The Cyclopean massiveness and gigantism of everything about us became curiously oppressive; and there was something vaguely but deeply unhuman in all the contours, dimensions, proportions, decorations, and constructional nuances of the blasphemously archaic stonework. We soon realised from what the carvings revealed that this monstrous city was many million years old.

We cannot yet explain the engineering principles used in the anomalous balancing and adjustment of the vast rock masses, though the function of the arch was clearly much relied on. The rooms we visited were wholly bare of all portable contents, a circumstance which sustained our belief in the city's deliberate desertion. The prime decorative feature was the almost universal system of mural sculpture; which tended to run in continuous horizontal bands three feet wide and arranged from floor to ceiling in alternation with bands of equal width given over to geometrical arabesques. There were exceptions to this rule of arrangement, but its preponderance was overwhelming. Often, however, a series of smooth cartouches containing oddly patterned groups of dots would be sunk along one of the arabesque bands.

The technique, we soon saw, was mature, accomplished, and aesthetically evolved to the highest degree of civilised mastery; though utterly alien in every detail to any known art tradition of the human race. In delicacy of execution no sculpture I have ever seen could approach it. The minutest details of elaborate vegetation, or of animal life, were rendered with astonishing vividness despite the bold scale of the carvings; whilst the conventional designs were marvels of skilful intricacy. The arabesques displayed a profound use of mathematical principles, and were made up of obscurely symmetrical curves and angles based on the quantity of five. The pictorial bands followed a highly formalised tradition, and involved a peculiar treatment of perspective; but had an artistic force that moved us profoundly notwithstanding the intervening gulf of vast geologic periods. Their method of design hinged on a singular juxtaposition of the cross-section with the two-dimensional silhouette, and embodied an analytical psychology beyond that of

any known race of antiquity. It is useless to try to compare this art with any represented in our museums. Those who see our photographs will probably find its closest analogue in certain grotesque conceptions of the most daring futurists.

The arabesque tracery consisted altogether of depressed lines whose depth on unweathered walls varied from one to two inches. When cartouches with dot-groups appeared—evidently as inscriptions in some unknown and primordial language and alphabet—the depression of the smooth surface was perhaps an inch and a half, and of the dots perhaps a half-inch more. The pictorial bands were in counter-sunk low relief, their background being depressed about two inches from the original wall surface. In some specimens marks of a former colouration could be detected, though for the most part the untold aeons had disintegrated and banished any pigments which may have been applied. The more one studied the marvellous technique the more one admired the things. Beneath their strict conventionalisation one could grasp the minute and accurate observation and graphic skill of the artists; and indeed, the very conventions themselves served to symbolise and accentuate the real essence or vital differentiation of every object delineated. We felt, too, that besides these recognisable excellences there were others lurking beyond the reach of our perceptions. Certain touches here and there gave vague hints of latent symbols and stimuli which another mental and emotional background, and a fuller or different sensory equipment, might have made of profound and poignant significance to us.

The subject-matter of the sculptures obviously came from the life of the vanished epoch of their creation, and contained a large proportion of evident history. It is this abnormal historic-mindedness of the primal race—a chance circumstance operating, through coincidence, miraculously in our favour—which made the carvings so awesomely informative to us, and which caused us to place their photography and transcription above all other considerations. In certain rooms the dominant arrangement was varied by the presence of maps, astronomical charts, and other scientific designs on an enlarged scale—these things giving a naive and terrible corroboration to what we gathered from the pictorial friezes and dadoes. In hinting at what the whole revealed, I can only hope that

my account will not arouse a curiosity greater than sane caution on the part of those who believe me at all. It would be tragic if any were to be allured to that realm of death and horror by the very warning meant to discourage them.

Interrupting these sculptured walls were high windows and massive twelve-foot doorways; both now and then retaining the petrified wooden planks—elaborately carved and polished—of the actual shutters and doors. All metal fixtures had long ago vanished, but some of the doors remained in place and had to be forced aside as we progressed from room to room. Window-frames with odd transparent panes—mostly elliptical—survived here and there, though in no considerable quantity. There were also frequent niches of great magnitude, generally empty, but once in a while containing some bizarre object carved from green soapstone which was either broken or perhaps held too inferior to warrant removal. Other apertures were undoubtedly connected with bygone mechanical facilities—heating, lighting, and the like—of a sort suggested in many of the carvings. Ceilings tended to be plain, but had sometimes been inlaid with green soapstone or other tiles, mostly fallen now. Floors were also paved with such tiles, though plain stonework predominated.

As I have said, all furniture and other moveables were absent; but the sculptures gave a clear idea of the strange devices which had once filled these tomb-like, echoing rooms. Above the glacial sheet the floors were generally thick with detritus, litter, and debris; but farther down this condition decreased. In some of the lower chambers and corridors there was little more than gritty dust or ancient incrustations, while occasional areas had an uncanny air of newly swept immaculateness. Of course, where rifts or collapses had occurred, the lower levels were as littered as the upper ones. A central court—as in other structures we had seen from the air—saved the inner regions from total darkness; so that we seldom had to use our electric torches in the upper rooms except when studying sculptured details. Below the ice-cap, however, the twilight deepened; and in many parts of the tangled ground level there was an approach to absolute blackness.

To form even a rudimentary idea of our thoughts and feelings as we penetrated this aeon-silent maze of unhuman masonry one must

correlate a hopelessly bewildering chaos of fugitive moods, memories, and impressions. The sheer appalling antiquity and lethal desolation of the place were enough to overwhelm almost any sensitive person, but added to these elements were the recent unexplained horror at the camp, and the revelations all too soon effected by the terrible mural sculptures around us. The moment we came upon a perfect section of carving, where no ambiguity of interpretation could exist, it took only a brief study to give us the hideous truth—a truth which it would be naive to claim Danforth and I had not independently suspected before, though we had carefully refrained from even hinting it to each other. There could now be no further merciful doubt about the nature of the beings which had built and inhabited this monstrous dead city millions of years ago, when man's ancestors were primitive archaic mammals, and vast dinosaurs roamed the tropical steppes of Europe and Asia.

We had previously clung to a desperate alternative and insisted—each to himself—that the omnipresence of the five-pointed motif meant only some cultural or religious exaltation of the Archaean natural object which had so patently embodied the quality of five-pointedness; as the decorative motifs of Minoan Crete exalted the sacred bull, those of Egypt the scarabaeus, those of Rome the wolf and the eagle, and those of various savage tribes some chosen totem-animal. But this lone refuge was now stripped from us, and we were forced to face definitely the reason-shaking realisation which the reader of these pages has doubtless long ago anticipated. I can scarcely bear to write it down in black and white even now, but perhaps that will not be necessary.

The things once rearing and dwelling in this frightful masonry in the age of dinosaurs were not indeed dinosaurs, but far worse. Mere dinosaurs were new and almost brainless objects—but the builders of the city were wise and old, and had left certain traces in rocks even then laid down well-nigh a thousand million years . . . rocks laid down before the true life of earth had advanced beyond plastic groups of cells . . . rocks laid down before the true life of earth had existed at all. They were the makers and enslavers of that life, and above all doubt the originals of the fiendish elder myths which things like the Pnakotic Manuscripts and the *Necronomicon* affrightedly hint about. They were the Great Old Ones that had

filtered down from the stars when earth was young—the beings whose substance an alien evolution had shaped, and whose powers were such as this planet had never bred. And to think that only the day before Danforth and I had actually looked upon fragments of their millennially fossilised substance . . . and that poor Lake and his party had seen their complete outlines. . . .

It is of course impossible for me to relate in proper order the stages by which we picked up what we know of that monstrous chapter of pre-human life. After the first shock of the certain revelation we had to pause a while to recuperate, and it was fully three o'clock before we got started on our actual tour of systematic research. The sculptures in the building we entered were of relatively late date—perhaps two million years ago—as checked up by geological, biological, and astronomical features; and embodied an art which would be called decadent in comparison with that of specimens we found in older buildings after crossing bridges under the glacial sheet. One edifice hewn from the solid rock seemed to go back forty or possibly even fifty million years—to the lower Eocene or upper Cretaceous—and contained bas-reliefs of an artistry surpassing anything else, with one tremendous exception, that we encountered. That was, we have since agreed, the oldest domestic structure we traversed.

Were it not for the support of those snapshots soon to be made public, I would refrain from telling what I found and inferred, lest I be confined as a madman. Of course, the infinitely early parts of the patchwork tale—representing the pre-terrestrial life of the star-headed beings on other planets, in other galaxies, and in other universes—can readily be interpreted as the fantastic mythology of those beings themselves; yet such parts sometimes involved designs and diagrams so uncannily close to the latest findings of mathematics and astrophysics that I scarcely know what to think. Let others judge when they see the photographs I shall publish.

Naturally, no one set of carvings which we encountered told more than a fraction of any connected story; nor did we even begin to come upon the various stages of that story in their proper order. Some of the vast rooms were independent units so far as their designs were concerned, whilst in other cases a continuous chronicle would be carried through a series of rooms and corridors. The

best of the maps and diagrams were on the walls of a frightful abyss below even the ancient ground level—a cavern perhaps 200 feet square and sixty feet high, which had almost undoubtedly been an educational centre of some sort. There were many provoking repetitions of the same material in different rooms and buildings; since certain chapters of experience, and certain summaries or phases of racial history, had evidently been favourites with different decorators or dwellers. Sometimes, though, variant versions of the same theme proved useful in settling debatable points and filling in gaps.

I still wonder that we deduced so much in the short time at our disposal. Of course, we even now have only the barest outline; and much of that was obtained later on from a study of the photographs and sketches we made. It may be the effect of this later study—the revived memories and vague impressions acting in conjunction with his general sensitiveness and with that final supposed horror-glimpse whose essence he will not reveal even to me—which has been the immediate source of Danforth's present breakdown. But it had to be; for we could not issue our warning intelligently without the fullest possible information, and the issuance of that warning is a prime necessity. Certain lingering influences in that unknown antarctic world of disordered time and alien natural law make it imperative that further exploration be discouraged.

VII.

The full story, so far as deciphered, will shortly appear in an official bulletin of Miskatonic University. Here I shall sketch only the salient high lights in a formless, rambling way. Myth or otherwise, the sculptures told of the coming of those star-headed things to the nascent, lifeless earth out of cosmic space—their coming, and the coming of many other alien entities such as at certain times embark upon spatial pioneering. They seemed able to traverse the interstellar ether on their vast membranous wings—thus oddly confirming some curious hill folklore long ago told me by an antiquarian colleague. They had lived under the sea a good deal, building fantastic cities and fighting terrific battles with nameless adversaries by means of intricate devices employing unknown

principles of energy. Evidently their scientific and mechanical knowledge far surpassed man's today, though they made use of its more widespread and elaborate forms only when obliged to. Some of the sculptures suggested that they had passed through a stage of mechanised life on other planets, but had receded upon finding its effects emotionally unsatisfying. Their preternatural toughness of organisation and simplicity of natural wants made them peculiarly able to live on a high plane without the more specialised fruits of artificial manufacture, and even without garments except for occasional protection against the elements.

It was under the sea, at first for food and later for other purposes, that they first created earth-life—using available substances according to long-known methods. The more elaborate experiments came after the annihilation of various cosmic enemies. They had done the same thing on other planets; having manufactured not only necessary foods, but certain multicellular protoplasmic masses capable of moulding their tissues into all sorts of temporary organs under hypnotic influence and thereby forming ideal slaves to perform the heavy work of the community. These viscous masses were without doubt what Abdul Alhazred whispered about as the "shoggoths" in his frightful *Necronomicon*, though even that mad Arab had not hinted that any existed on earth except in the dreams of those who had chewed a certain alkaloidal herb. When the star-headed Old Ones on this planet had synthesised their simple food forms and bred a good supply of shoggoths, they allowed other cell-groups to develop into other forms of animal and vegetable life for sundry purposes; extirpating any whose presence became troublesome.

With the aid of the shoggoths, whose expansions could be made to lift prodigious weights, the small, low cities under the sea grew to vast and imposing labyrinths of stone not unlike those which later rose on land. Indeed, the highly adaptable Old Ones had lived much on land in other parts of the universe, and probably retained many traditions of land construction. As we studied the architecture of all these sculptured palaeogean cities, including that whose acon-dead corridors we were even then traversing, we were impressed by a curious coincidence which we have not yet tried to explain, even to ourselves. The tops of the buildings, which in the ac-

tual city around us had of course been weathered into shapeless ruins ages ago, were clearly displayed in the bas-reliefs; and shewed vast clusters of needle-like spires, delicate finials on certain cone and pyramid apexes, and tiers of thin, horizontal scalloped discs capping cylindrical shafts. This was exactly what we had seen in that monstrous and portentous mirage, cast by a dead city whence such skyline features had been absent for thousands and tens of thousands of years, which loomed on our ignorant eyes across the unfathomed mountains of madness as we first approached poor Lake's ill-fated camp.

Of the life of the Old Ones, both under the sea and after part of them migrated to land, volumes could be written. Those in shallow water had continued the fullest use of the eyes at the ends of their five main head tentacles, and had practiced the arts of sculpture and of writing in quite the usual way—the writing accomplished with a stylus on waterproof waxen surfaces. Those lower down in the ocean depths, though they used a curious phosphorescent organism to furnish light, pieced out their vision with obscure special senses operating through the prismatic cilia on their heads—senses which rendered all the Old Ones partly independent of light in emergencies. Their forms of sculpture and writing had changed curiously during the descent, embodying certain apparently chemical coating processes—probably to secure phosphorescence—which the bas-reliefs could not make clear to us. The beings moved in the sea partly by swimming—using the lateral crinoid arms—and partly by wriggling with the lower tier of tentacles containing the pseudo-feet. Occasionally they accomplished long swoops with the auxiliary use of two or more sets of their fan-like folding wings. On land they locally used the pseudo-feet, but now and then flew to great heights or over long distances with their wings. The many slender tentacles into which the crinoid arms branched were infinitely delicate, flexible, strong, and accurate in muscular-nervous coördination; ensuring the utmost skill and dexterity in all artistic and other manual operations.

The toughness of the things was almost incredible. Even the terrific pressures of the deepest sea-bottoms appeared powerless to harm them. Very few seemed to die at all except by violence, and their burial-places were very limited. The fact that they covered

their vertically inhumed dead with five-pointed inscribed mounds set up thoughts in Danforth and me which made a fresh pause and recuperation necessary after the sculptures revealed it. The beings multiplied by means of spores—like vegetable pteridophytes as Lake had suspected—but owing to their prodigious toughness and longevity, and consequent lack of replacement needs, they did not encourage the large-scale development of new prothalli except when they had new regions to colonise. The young matured swiftly, and received an education evidently beyond any standard we can imagine. The prevailing intellectual and aesthetic life was highly evolved, and produced a tenaciously enduring set of customs and institutions which I shall describe more fully in my coming monograph. These varied slightly according to sea or land residence, but had the same foundations and essentials.

Though able, like vegetables, to derive nourishment from inorganic substances; they vastly preferred organic and especially animal food. They ate uncooked marine life under the sea, but cooked their viands on land. They hunted game and raised meat herds—slaughtering with sharp weapons whose odd marks on certain fossil bones our expedition had noted. They resisted all ordinary temperatures marvellously; and in their natural state could live in water down to freezing. When the great chill of the Pleistocene drew on, however—nearly a million years ago—the land dwellers had to resort to special measures including artificial heating; until at last the deadly cold appears to have driven them back into the sea. For their prehistoric flights through cosmic space, legend said, they had absorbed certain chemicals and became almost independent of eating, breathing, or heat conditions; but by the time of the great cold they had lost track of the method. In any case they could not have prolonged the artificial state indefinitely without harm.

Being non-pairing and semi-vegetable in structure, the Old Ones had no biological basis for the family phase of mammal life; but seemed to organise large households on the principles of comfortable space-utility and—as we deduced from the pictured occupations and diversions of co-dwellers—congenial mental association. In furnishing their homes they kept everything in the centre of the huge rooms, leaving all the wall spaces free for decorative treat-

ment. Lighting, in the case of the land inhabitants, was accomplished by a device probably electro-chemical in nature. Both on land and under water they used curious tables, chairs, and couches like cylindrical frames—for they rested and slept upright with folded-down tentacles—and racks for the hinged sets of dotted surfaces forming their books.

Government was evidently complex and probably socialistic, though no certainties in this regard could be deduced from the sculptures we saw. There was extensive commerce, both local and between different cities; certain small, flat counters, five-pointed and inscribed, serving as money. Probably the smaller of the various greenish soapstones found by our expedition were pieces of such currency. Though the culture was mainly urban, some agriculture and much stock-raising existed. Mining and a limited amount of manufacturing were also practiced. Travel was very frequent, but permanent migration seemed relatively rare except for the vast colonising movements by which the race expanded. For personal locomotion no external aid was used; since in land, air, and water movement alike the Old Ones seemed to possess excessively vast capacities for speed. Loads, however, were drawn by beasts of burden—shoggoths under the sea, and a curious variety of primitive vertebrates in the later years of land existence.

These vertebrates, as well as an infinity of other life-forms—animal and vegetable, marine, terrestrial, and aerial—were the products of unguided evolution acting on life-cells made by the Old Ones but escaping beyond their radius of attention. They had been suffered to develop unchecked because they had not come in conflict with the dominant beings. Bothersome forms, of course, were mechanically exterminated. It interested us to see in some of the very last and most decadent sculptures a shambling primitive mammal, used sometimes for food and sometimes as an amusing buffoon by the land dwellers, whose vaguely simian and human foreshadowings were unmistakable. In the building of land cities the huge stone blocks of the high towers were generally lifted by vast-winged pterodactyls of a species heretofore unknown to palaeontology.

The persistence with which the Old Ones survived various geologic changes and convulsions of the earth's crust was little short of

miraculous. Though few or none of their first cities seem to have remained beyond the Archaean age, there was no interruption in their civilisation or in the transmission of their records. Their original place of advent to the planet was the Antarctic Ocean, and it is likely that they came not long after the matter forming the moon was wrenched from the neighbouring South Pacific. According to one of the sculptured maps, the whole globe was then under water, with stone cities scattered farther and farther from the antarctic as aeons passed. Another map shews a vast bulk of dry land around the south pole, where it is evident that some of the beings made experimental settlements though their main centres were transferred to the nearest sea-bottom. Later maps, which display this land mass as cracking and drifting, and sending certain detached parts northward, uphold in a striking way the theories of continental drift lately advanced by Taylor, Wegener, and Joly.

With the upheaval of new land in the South Pacific tremendous events began. Some of the marine cities were hopelessly shattered, yet that was not the worst misfortune. Another race—a land race of beings shaped like octopi and probably corresponding to the fabulous pre-human spawn of Cthulhu—soon began filtering down from cosmic infinity and precipitated a monstrous war which for a time drove the Old Ones wholly back to the sea—a colossal blow in view of the increasing land settlements. Later peace was made, and the new lands were given to the Cthulhu spawn whilst the Old Ones held the sea and the older lands. New land cities were founded—the greatest of them in the antarctic, for this region of first arrival was sacred. From then on, as before, the antarctic remained the centre of the Old Ones' civilisation, and all the discoverable cities built there by the Cthulhu spawn were blotted out. Then suddenly the lands of the Pacific sank again, taking with them the frightful stone city of R'lyeh and all the cosmic octopi, so that the Old Ones were again supreme on the planet except for one shadowy fear about which they did not like to speak. At a rather later age their cities dotted all the land and water areas of the globe—hence the recommendation in my coming monograph that some archaeologist make systematic borings with Pabodie's type of apparatus in certain widely separated regions.

The steady trend down the ages was from water to land; a move-

ment encouraged by the rise of new land masses, though the ocean was never wholly deserted. Another cause of the landward movement was the new difficulty in breeding and managing the shoggoths upon which successful sea-life depended. With the march of time, as the sculptures sadly confessed, the art of creating new life from inorganic matter had been lost; so that the Old Ones had to depend on the moulding of forms already in existence. On land the great reptiles proved highly tractable; but the shoggoths of the sea, reproducing by fission and acquiring a dangerous degree of accidental intelligence, presented for a time a formidable problem.

They had always been controlled through the hypnotic suggestion of the Old Ones, and had modelled their tough plasticity into various useful temporary limbs and organs; but now their self-modelling powers were sometimes exercised independently, and in various imitative forms implanted by past suggestion. They had, it seems, developed a semi-stable brain whose separate and occasionally stubborn volition echoed the will of the Old Ones without always obeying it. Sculptured images of these shoggoths filled Danforth and me with horror and loathing. They were normally shapeless entities composed of a viscous jelly which looked like an agglutination of bubbles; and each averaged about fifteen feet in diameter when a sphere. They had, however, a constantly shifting shape and volume; throwing out temporary developments or forming apparent organs of sight, hearing, and speech in imitation of their masters, either spontaneously or according to suggestion.

They seem to have become peculiarly intractable toward the middle of the Permian age, perhaps 150 million years ago, when a veritable war of re-subjugation was waged upon them by the marine Old Ones. Pictures of this war, and of the headless, slime-coated fashion in which the shoggoths typically left their slain victims, held a marvellously fearsome quality despite the intervening abyss of untold ages. The Old Ones had used curious weapons of molecular disturbance against the rebel entities, and in the end had achieved a complete victory. Thereafter the sculptures shewed a period in which shoggoths were tamed and broken by armed Old Ones as the wild horses of the American west were tamed by cowboys. Though during the rebellion the shoggoths had shewn an ability to live out of water, this transition was not encouraged;

since their usefulness on land would hardly have been commensurate with the trouble of their management.

During the Jurassic age the Old Ones met fresh adversity in the form of a new invasion from outer space—this time by half-fungous, half-crustacean creatures from a planet identifiable as the remote and recently discovered Pluto; creatures undoubtedly the same as those figuring in certain whispered hill legends of the north, and remembered in the Himalayas as the Mi-Go, or Abominable Snow-Men. To fight these beings the Old Ones attempted, for the first time since their terrene advent, to sally forth again into the planetary ether; but despite all traditional preparations found it no longer possible to leave the earth's atmosphere. Whatever the old secret of interstellar travel had been, it was now definitely lost to the race. In the end the Mi-Go drove the Old Ones out of all the northern lands, though they were powerless to disturb those in the sea. Little by little the slow retreat of the elder race to their original antarctic habitat was beginning.

It was curious to note from the pictured battles that both the Cthulhu spawn and the Mi-Go seem to have been composed of matter more widely different from that which we know than was the substance of the Old Ones. They were able to undergo transformations and reintegrations impossible for their adversaries, and seem therefore to have originally come from even remoter gulfs of cosmic space. The Old Ones, but for their abnormal toughness and peculiar vital properties, were strictly material, and must have had their absolute origin within the known space-time continuum; whereas the first sources of the other beings can only be guessed at with bated breath. All this, of course, assuming that the non-terrestrial linkages and the anomalies ascribed to the invading foes are not pure mythology. Conceivably, the Old Ones might have invented a cosmic framework to account for their occasional defeats; since historical interest and pride obviously formed their chief psychological element. It is significant that their annals failed to mention many advanced and potent races of beings whose mighty cultures and towering cities figure persistently in certain obscure legends.

The changing state of the world through long geologic ages appeared with startling vividness in many of the sculptured maps and

scenes. In certain cases existing science will require revision, while in other cases its bold deductions are magnificently confirmed. As I have said, the hypothesis of Taylor, Wegener, and Joly that all the continents are fragments of an original antarctic land mass which cracked from centrifugal force and drifted apart over a technically viscous lower surface—an hypothesis suggested by such things as the complementary outlines of Africa and South America, and the way the great mountain chains are rolled and shoved up—receives striking support from this uncanny source.

Maps evidently shewing the Carboniferous world of an hundred million or more years ago displayed significant rifts and chasms destined later to separate Africa from the once continuous realms of Europe (then the Valusia of hellish primal legend), Asia, the Americas, and the antarctic continent. Other charts—and most significantly one in connexion with the founding fifty million years ago of the vast dead city around us—shewed all the present continents well differentiated. And in the latest discoverable specimen—dating perhaps from the Pliocene age—the approximate world of today appeared quite clearly despite the linkage of Alaska with Siberia, of North America with Europe through Greenland, and of South America with the antarctic continent through Graham Land. In the Carboniferous map the whole globe—ocean floor and rifted land mass alike—bore symbols of the Old Ones' vast stone cities, but in the later charts the gradual recession toward the antarctic became very plain. The final Pliocene specimen shewed no land cities except on the antarctic continent and the tip of South America, nor any ocean cities north of the fiftieth parallel of South Latitude. Knowledge and interest in the northern world, save for a study of coast-lines probably made during long exploration flights on those fan-like membranous wings, had evidently declined to zero among the Old Ones.

Destruction of cities through the upthrust of mountains, the centrifugal rending of continents, the seismic convulsions of land or sea-bottom, and other natural causes was a matter of common record; and it was curious to observe how fewer and fewer replacements were made as the ages wore on. The vast dead megalopolis that yawned around us seemed to be the last general centre of the race; built early in the Cretaceous age after a titanic earth-buckling

had obliterated a still vaster predecessor not far distant. It appeared that this general region was the most sacred spot of all, where reputedly the first Old Ones had settled on a primal sea-bottom. In the new city—many of whose features we could recognise in the sculptures, but which stretched fully an hundred miles along the mountain-range in each direction beyond the farthest limits of our aerial survey—there were reputed to be preserved certain sacred stones forming part of the first sea-bottom city, which were thrust up to light after long epochs in the course of the general crumpling of strata.

VIII.

Naturally, Danforth and I studied with especial interest and a peculiarly personal sense of awe everything pertaining to the immediate district in which we were. Of this local material there was naturally a vast abundance; and on the tangled ground level of the city we were lucky enough to find a house of very late date whose walls, though somewhat damaged by a neighbouring rift, contained sculptures of decadent workmanship carrying the story of the region much beyond the period of the Pliocene map whence we derived our last general glimpse of the pre-human world. This was the last place we examined in detail, since what we found there gave us a fresh immediate objective.

Certainly, we were in one of the strangest, weirdest, and most terrible of all the corners of earth's globe. Of all existing lands it was infinitely the most ancient; and the conviction grew upon us that this hideous upland must indeed be the fabled nightmare plateau of Leng which even the mad author of the *Necronomicon* was reluctant to discuss. The great mountain chain was tremendously long—starting as a low range at Luitpold Land on the coast of Weddell Sea and virtually crossing the entire continent. The really high part stretched in a mighty arc from about Latitude 82° , E. Longitude 60° to Latitude 70° , E. Longitude 115° , with its concave side toward our camp and its seaward end in the region of that long, ice-locked coast whose hills were glimpsed by Wilkes and Mawson at the Antarctic Circle.

Yet even more monstrous exaggerations of Nature seemed dis-

turbingly close at hand. I have said that these peaks are higher than the Himalayas, but the sculptures forbid me to say that they are earth's highest. That grim honour is beyond doubt reserved for something which half the sculptures hesitated to record at all, whilst others approached it with obvious repugnance and trepidation. It seems that there was one part of the ancient land—the first part that ever rose from the waters after the earth had flung off the moon and the Old Ones had seeped down from the stars—which had come to be shunned as vaguely and namelessly evil. Cities built there had crumbled before their time, and had been found suddenly deserted. Then when the first great earth-buckling had convulsed the region in the Comanchian age, a frightful line of peaks had shot suddenly up amidst the most appalling din and chaos—and earth had received her loftiest and most terrible mountains.

If the scale of the carvings was correct, these abhorred things must have been much over 40,000 feet high—radically vaster than even the shocking mountains of madness we had crossed. They extended, it appeared, from about Latitude 77° , E. Longitude 70° to Latitude 70° , E. Longitude 100° —less than 300 miles away from the dead city, so that we would have spied their dreaded summits in the dim western distance had it not been for that vague opalescent haze. Their northern end must likewise be visible from the long Antarctic Circle coast-line at Queen Mary Land.

Some of the Old Ones, in the decadent days, had made strange prayers to those mountains; but none ever went near them or dared to guess what lay beyond. No human eye had ever seen them, and as I studied the emotions conveyed in the carvings I prayed that none ever might. There are protecting hills along the coast beyond them—Queen Mary and Kaiser Wilhelm Lands—and I thank heaven no one has been able to land and climb those hills. I am not as sceptical about old tales and fears as I used to be, and I do not laugh now at the pre-human sculptor's notion that lightning paused meaningfully now and then at each of the brooding crests, and that an unexplained glow shone from one of those terrible pinnacles all through the long polar night. There may be a very real and very monstrous meaning in the old Pnakotic whispers about Kadath in the Cold Waste.

But the terrain close at hand was hardly less strange, even if less

namelessly accursed. Soon after the founding of the city the great mountain-range became the seat of the principal temples, and many carvings shewed what grotesque and fantastic towers had pierced the sky where now we saw only the curiously clinging cubes and ramparts. In the course of ages the caves had appeared, and had been shaped into adjuncts of the temples. With the advance of still later epochs all the limestone veins of the region were hollowed out by ground waters, so that the mountains, the foothills, and the plains below them were a veritable network of connected caverns and galleries. Many graphic sculptures told of explorations deep underground, and of the final discovery of the Stygian sunless sea that lurked at earth's bowels.

This vast nighted gulf had undoubtedly been worn by the great river which flowed down from the nameless and horrible westward mountains, and which had formerly turned at the base of the Old Ones' range and flowed beside that chain into the Indian Ocean between Budd and Totten Lands on Wilkes's coast-line. Little by little it had eaten away the limestone hill base at its turning, till at last its sapping currents reached the caverns of the ground waters and joined with them in digging a deeper abyss. Finally its whole bulk emptied into the hollow hills and left the old bed toward the ocean dry. Much of the later city as we now found it had been built over that former bed. The Old Ones, understanding what had happened, and exercising their always keen artistic sense, had carved into ornate pylons those headlands of the foothills where the great stream began its descent into eternal darkness.

This river, once crossed by scores of noble stone bridges, was plainly the one whose extinct course we had seen in our aeroplane survey. Its position in different carvings of the city helped us to orient ourselves to the scene as it had been at various stages of the region's age-long, aeon-dead history; so that we were able to sketch a hasty but careful map of the salient features—squares, important buildings, and the like—for guidance in further explorations. We could soon reconstruct in fancy the whole stupendous thing as it was a million or ten million or fifty million years ago, for the sculptures told us exactly what the buildings and mountains and squares and suburbs and landscape setting and luxuriant Tertiary vegetation had looked like. It must have had a marvellous and mystic

beauty, and as I thought of it I almost forgot the clammy sense of sinister oppression with which the city's inhuman age and massiveness and deadness and remoteness and glacial twilight had choked and weighed on my spirit. Yet according to certain carvings the denizens of that city had themselves known the clutch of oppressive terror; for there was a sombre and recurrent type of scene in which the Old Ones were shewn in the act of recoiling affrightedly from some object—never allowed to appear in the design—found in the great river and indicated as having been washed down through waving, vine-draped cycad-forests from those horrible westward mountains.

It was only in the one late-built house with the decadent carvings that we obtained any foreshadowing of the final calamity leading to the city's desertion. Undoubtedly there must have been many sculptures of the same age elsewhere, even allowing for the slackened energies and aspirations of a stressful and uncertain period; indeed, very certain evidence of the existence of others came to us shortly afterward. But this was the first and only set we directly encountered. We meant to look farther later on; but as I have said, immediate conditions dictated another present objective. There would, though, have been a limit—for after all hope of a long future occupancy of the place had perished among the Old Ones, there could not but have been a complete cessation of mural decoration. The ultimate blow, of course, was the coming of the great cold which once held most of the earth in thrall, and which has never departed from the ill-fated poles—the great cold that, at the world's other extremity, put an end to the fabled lands of Lomar and Hyperborea.

Just when this tendency began in the antarctic it would be hard to say in terms of exact years. Nowadays we set the beginning of the general glacial periods at a distance of about 500,000 years from the present, but at the poles the terrible scourge must have commenced much earlier. All quantitative estimates are partly guess-work; but it is quite likely that the decadent sculptures were made considerably less than a million years ago, and that the actual desertion of the city was complete long before the conventional opening of the Pleistocene—500,000 years ago—as reckoned in terms of the earth's whole surface.

In the decadent sculptures there were signs of thinner vegetation everywhere, and of a decreased country life on the part of the Old Ones. Heating devices were shewn in the houses, and winter travellers were represented as muffled in protective fabrics. Then we saw a series of cartouches (the continuous band arrangement being frequently interrupted in these late carvings) depicting a constantly growing migration to the nearest refuges of greater warmth—some fleeing to cities under the sea off the far-away coast, and some clambering down through networks of limestone caverns in the hollow hills to the neighbouring black abyss of subterrene waters.

In the end it seems to have been the neighbouring abyss which received the greatest colonisation. This was partly due, no doubt, to the traditional sacredness of this especial region; but may have been more conclusively determined by the opportunities it gave for continuing the use of the great temples on the honeycombed mountains, and for retaining the vast land city as a place of summer residence and base of communication with various mines. The linkage of old and new abodes was made more effective by means of several gradings and improvements along the connecting routes, including the chiselling of numerous direct tunnels from the ancient metropolis to the black abyss—sharply down-pointing tunnels whose mouths we carefully drew, according to our most thoughtful estimates, on the guide map we were compiling. It was obvious that at least two of these tunnels lay within a reasonable exploring distance of where we were; both being on the mountainward edge of the city, one less than a quarter-mile toward the ancient river-course, and the other perhaps twice that distance in the opposite direction.

The abyss, it seems, had shelving shores of dry land at certain places; but the Old Ones built their new city under water—no doubt because of its greater certainty of uniform warmth. The depth of the hidden sea appears to have been very great, so that the earth's internal heat could ensure its habitability for an indefinite period. The beings seem to have had no trouble in adapting themselves to part-time—and eventually, of course, whole-time—residence under water; since they had never allowed their gill systems to atrophy. There were many sculptures which shewed how they had always frequently visited their submarine kinsfolk elsewhere, and how they had habitually bathed on the deep bottom of their

great river. The darkness of inner earth could likewise have been no deterrent to a race accustomed to long antarctic nights.

Decadent though their style undoubtedly was, these latest carvings had a truly epic quality where they told of the building of the new city in the cavern sea. The Old Ones had gone about it scientifically; quarrying insoluble rocks from the heart of the honey-combed mountains, and employing expert workers from the nearest submarine city to perform the construction according to the best methods. These workers brought with them all that was necessary to establish the new venture—shoggoth-tissue from which to breed stone-lifters and subsequent beasts of burden for the cavern city, and other protoplasmic matter to mould into phosphorescent organisms for lighting purposes.

At last a mighty metropolis rose on the bottom of that Stygian sea; its architecture much like that of the city above, and its workmanship displaying relatively little decadence because of the precise mathematical element inherent in building operations. The newly bred shoggoths grew to enormous size and singular intelligence, and were represented as taking and executing orders with marvellous quickness. They seemed to converse with the Old Ones by mimicking their voices—a sort of musical piping over a wide range, if poor Lake's dissection had indicated aright—and to work more from spoken commands than from hypnotic suggestions as in earlier times. They were, however, kept in admirable control. The phosphorescent organisms supplied light with vast effectiveness, and doubtless atoned for the loss of the familiar polar auroras of the outer-world night.

Art and decoration were pursued, though of course with a certain decadence. The Old Ones seemed to realise this falling off themselves; and in many cases anticipated the policy of Constantine the Great by transplanting especially fine blocks of ancient carving from their land city, just as the emperor, in a similar age of decline, stripped Greece and Asia of their finest art to give his new Byzantine capital greater splendours than its own people could create. That the transfer of sculptured blocks had not been more extensive, was doubtless owing to the fact that the land city was not at first wholly abandoned. By the time total abandonment did occur—and it surely must have occurred before the polar Pleistocene was

far advanced—the Old Ones had perhaps become satisfied with their decadent art—or had ceased to recognise the superior merit of the older carvings. At any rate, the aeon-silent ruins around us had certainly undergone no wholesale sculptural denudation; though all the best separate statues, like other moveables, had been taken away.

The decadent cartouches and dadoes telling this story were, as I have said, the latest we could find in our limited search. They left us with a picture of the Old Ones shuttling back and forth betwixt the land city in summer and the sea-cavern city in winter, and sometimes trading with the sea-bottom cities off the antarctic coast. By this time the ultimate doom of the land city must have been recognised, for the sculptures shewed many signs of the cold's malign encroachments. Vegetation was declining, and the terrible snows of the winter no longer melted completely even in midsummer. The saurian livestock were nearly all dead, and the mammals were standing it none too well. To keep on with the work of the upper world it had become necessary to adapt some of the amorphous and curiously cold-resistant shoggoths to land life; a thing the Old Ones had formerly been reluctant to do. The great river was now lifeless, and the upper sea had lost most of its denizens except the seals and whales. All the birds had flown away, save only the great, grotesque penguins.

What had happened afterward we could only guess. How long had the new sea-cavern city survived? Was it still down there, a stony corpse in eternal blackness? Had the subterranean waters frozen at last? To what fate had the ocean-bottom cities of the outer world been delivered? Had any of the Old Ones shifted north ahead of the creeping ice-cap? Existing geology shews no trace of their presence. Had the frightful Mi-Go been still a menace in the outer land world of the north? Could one be sure of what might or might not linger even to this day in the lightless and unplumbed abysses of earth's deepest waters? Those things had seemingly been able to withstand any amount of pressure—and men of the sea have fished up curious objects at times. And has the killer-whale theory really explained the savage and mysterious scars on antarctic seals noticed a generation ago by Borchgrevink?

The specimens found by poor Lake did not enter into these guesses, for their geologic setting proved them to have lived at what must have been a very early date in the land city's history. They were, according to their location, certainly not less than thirty million years old; and we reflected that in their day the sea-cavern city, and indeed the cavern itself, had had no existence. They would have remembered an older scene, with lush Tertiary vegetation everywhere, a younger land city of flourishing arts around them, and a great river sweeping northward along the base of the mighty mountains toward a far-away tropic ocean.

And yet we could not help thinking about these specimens—especially about the eight perfect ones that were missing from Lake's hideously ravaged camp. There was something abnormal about that whole business—the strange things we had tried so hard to lay to somebody's madness—those frightful graves—the amount *and nature* of the missing material—Gedney—the unearthly toughness of those archaic monstrosities, and the queer vital freaks the sculptures now shewed the race to have. . . . Danforth and I had seen a good deal in the last few hours, and were prepared to believe and keep silent about many appalling and incredible secrets of primal Nature.

IX.

I have said that our study of the decadent sculptures brought about a change in our immediate objective. This of course had to do with the chiselled avenues to the black inner world, of whose existence we had not known before, but which we were now eager to find and traverse. From the evident scale of the carvings we deduced that a steeply descending walk of about a mile through either of the neighbouring tunnels would bring us to the brink of the dizzy sunless cliffs above the great abyss; down whose side adequate paths, improved by the Old Ones, led to the rocky shore of the hidden and nighted ocean. To behold this fabulous gulf in stark reality was a lure which seemed impossible of resistance once we knew of the thing—yet we realised we must begin the quest at once if we expected to include it on our present flight.

It was now 8 p.m., and we had not enough battery replacements to let our torches burn on forever. We had done so much of our studying and copying below the glacial level that our battery supply had had at least five hours of nearly continuous use; and despite the special dry cell formula would obviously be good for only about four more—though by keeping one torch unused, except for especially interesting or difficult places, we might manage to eke out a safe margin beyond that. It would not do to be without a light in these Cyclopean catacombs, hence in order to make the abyss trip we must give up all further mural deciphering. Of course we intended to revisit the place for days and perhaps weeks of intensive study and photography—curiosity having long ago got the better of horror—but just now we must hasten. Our supply of trail-blazing paper was far from unlimited, and we were reluctant to sacrifice spare notebooks or sketching paper to augment it; but we did let one large notebook go. If worst came to worst, we could resort to rock-chipping—and of course it would be possible, even in case of really lost direction, to work up to full daylight by one channel or another if granted sufficient time for plentiful trial and error. So at last we set off eagerly in the indicated direction of the nearest tunnel.

According to the carvings from which we had made our map, the desired tunnel-mouth could not be much more than a quarter-mile from where we stood; the intervening space shewing solid-looking buildings quite likely to be penetrable still at a sub-glacial level. The opening itself would be in the basement—on the angle nearest the foothills—of a vast five-pointed structure of evidently public and perhaps ceremonial nature, which we tried to identify from our aerial survey of the ruins. No such structure came to our minds as we recalled our flight, hence we concluded that its upper parts had been greatly damaged, or that it had been totally shattered in an ice-rift we had noticed. In the latter case the tunnel would probably turn out to be choked, so that we would have to try the next nearest one—the one less than a mile to the north. The intervening river-course prevented our trying any of the more southerly tunnels on this trip; and indeed, if both of the neighbouring ones were choked it was doubtful whether our batteries would warrant an attempt on the next northerly one—about a mile beyond our second choice.

As we threaded our dim way through the labyrinth with the aid of map and compass—traversing rooms and corridors in every stage of ruin or preservation, clambering up ramps, crossing upper floors and bridges and clambering down again, encountering choked doorways and piles of debris, hastening now and then along finely preserved and uncannily immaculate stretches, taking false leads and retracing our way (in such cases removing the blind paper trail we had left), and once in a while striking the bottom of an open shaft through which daylight poured or trickled down—we were repeatedly tantalised by the sculptured walls along our route. Many must have told tales of immense historical importance, and only the prospect of later visits reconciled us to the need of passing them by. As it was, we slowed down once in a while and turned on our second torch. If we had had more films we would certainly have paused briefly to photograph certain bas-reliefs, but time-consuming hand copying was clearly out of the question.

I come now once more to a place where the temptation to hesitate, or to hint rather than state, is very strong. It is necessary, however, to reveal the rest in order to justify my course in discouraging further exploration. We had wormed our way very close to the computed site of the tunnel's mouth—having crossed a second-story bridge to what seemed plainly the tip of a pointed wall, and descended to a ruinous corridor especially rich in decadently elaborate and apparently ritualistic sculptures of late workmanship—when, about 8:30 p.m., Danforth's keen young nostrils gave us the first hint of something unusual. If we had had a dog with us, I suppose we would have been warned before. At first we could not precisely say what was wrong with the formerly crystal-pure air, but after a few seconds our memories reacted only too definitely. Let me try to state the thing without flinching. There was an odour—and that odour was vaguely, subtly, and unmistakably akin to what had nauseated us upon opening the insane grave of the horror poor Lake had dissected.

Of course the revelation was not as clearly cut at the time as it sounds now. There were several conceivable explanations, and we did a good deal of indecisive whispering. Most important of all, we did not retreat without further investigation; for having come this far, we were loath to be balked by anything short of certain dis-

aster. Anyway, what we must have suspected was altogether too wild to believe. Such things did not happen in any normal world. It was probably sheer irrational instinct which made us dim our single torch—tempted no longer by the decadent and sinister sculptures that leered menacingly from the oppressive walls—and which softened our progress to a cautious tiptoeing and crawling over the increasingly littered floor and heaps of debris.

Danforth's eyes as well as nose proved better than mine, for it was likewise he who first noticed the queer aspect of the debris after we had passed many half-choked arches leading to chambers and corridors on the ground level. It did not look quite as it ought after countless thousands of years of desertion, and when we cautiously turned on more light we saw that a kind of swath seemed to have been lately tracked through it. The irregular nature of the litter precluded any definite marks, but in the smoother places there were suggestions of the dragging of heavy objects. Once we thought there was a hint of parallel tracks, as if of runners. This was what made us pause again.

It was during that pause that we caught—simultaneously this time—the other odour ahead. Paradoxically, it was both a less frightful and a more frightful odour—less frightful intrinsically, but infinitely appalling in this place under the known circumstances . . . unless, of course, Gedney. . . . For the odour was the plain and familiar one of common petrol—every-day gasoline.

Our motivation after that is something I will leave to psychologists. We knew now that some terrible extension of the camp horrors must have crawled into this nighted burial-place of the aeons, hence could not doubt any longer the existence of nameless conditions—present or at least recent—just ahead. Yet in the end we did let sheer burning curiosity—or anxiety—or auto-hypnotism—or vague thoughts of responsibility toward Gedney—or what not—drive us on. Danforth whispered again of the print he thought he had seen at the alley-turning in the ruins above; and of the faint musical piping—potentially of tremendous significance in the light of Lake's dissection report despite its close resemblance to the cave-mouth echoes of the windy peaks—which he thought he had shortly afterward half heard from unknown depths below. I, in my turn, whispered of how the camp was left—of what had dis-

appeared, and of how the madness of a lone survivor might have conceived the inconceivable—a wild trip across the monstrous mountains and a descent into the unknown primal masonry—

But we could not convince each other, or even ourselves, of anything definite. We had turned off all light as we stood still, and vaguely noticed that a trace of deeply filtered upper day kept the blackness from being absolute. Having automatically begun to move ahead, we guided ourselves by occasional flashes from our torch. The disturbed debris formed an impression we could not shake off, and the smell of gasoline grew stronger. More and more ruin met our eyes and hampered our feet, until very soon we saw that the forward way was about to cease. We had been all too correct in our pessimistic guess about that rift glimpsed from the air. Our tunnel quest was a blind one, and we were not even going to be able to reach the basement out of which the abyssward aperture opened.

The torch, flashing over the grotesquely carved walls of the blocked corridor in which we stood, shewed several doorways in various states of obstruction; and from one of them the gasoline odour—quite submerging that other hint of odour—came with especial distinctness. As we looked more steadily, we saw that beyond a doubt there had been a slight and recent clearing away of debris from that particular opening. Whatever the lurking horror might be, we believed the direct avenue toward it was now plainly manifest. I do not think anyone will wonder that we waited an appreciable time before making any further motion.

And yet, when we did venture inside that black arch, our first impression was one of anticlimax. For amidst the littered expanse of that sculptured crypt—a perfect cube with sides of about twenty feet—there remained no recent object of instantly discernible size; so that we looked instinctively, though in vain, for a farther doorway. In another moment, however, Danforth's sharp vision had descried a place where the floor debris had been disturbed; and we turned on both torches full strength. Though what we saw in that light was actually simple and trifling, I am none the less reluctant to tell of it because of what it implied. It was a rough levelling of the debris, upon which several small objects lay carelessly scattered, and at one corner of which a considerable amount of gasoline must

have been spilled lately enough to leave a strong odour even at this extreme super-plateau altitude. In other words, it could not be other than a sort of camp—a camp made by questing beings who like us had been turned back by the unexpectedly choked way to the abyss.

Let me be plain. The scattered objects were, so far as substance was concerned, all from Lake's camp; and consisted of tin cans as queerly opened as those we had seen at that ravaged place, many spent matches, three illustrated books more or less curiously smudged, an empty ink bottle with its pictorial and instructional carton, a broken fountain pen, some oddly snipped fragments of fur and tent-cloth, a used electric battery with circular of directions, a folder that came with our type of tent heater, and a sprinkling of crumpled papers. It was all bad enough, but when we smoothed out the papers and looked at what was on them we felt we had come to the worst. We had found certain inexplicably blotted papers at the camp which might have prepared us, yet the effect of the sight down there in the pre-human vaults of a nightmare city was almost too much to bear.

A mad Gedney might have made the groups of dots in imitation of those found on the greenish soapstones, just as the dots on those insane five-pointed grave-mounds might have been made; and he might conceivably have prepared rough, hasty sketches—varving in their accuracy or lack of it—which outlined the neighbouring parts of the city and traced the way from a circularly represented place outside our previous route—a place we identified as a great cylindrical tower in the carvings and as a vast circular gulf glimpsed in our aerial survey—to the present five-pointed structure and the tunnel-mouth therein. He might, I repeat, have prepared such sketches; for those before us were quite obviously compiled as our own had been from late sculptures somewhere in the glacial labyrinth, though not from the ones which we had seen and used. But what this art-blind bungler could never have done was to execute those sketches in a strange and assured technique perhaps superior, despite haste and carelessness, to any of the decadent carvings from which they were taken—the characteristic and unmistakable technique of the Old Ones themselves in the dead city's heyday.

There are those who will say Danforth and I were utterly mad not to flee for our lives after that; since our conclusions were now— notwithstanding their wildness—completely fixed, and of a nature I need not even mention to those who have read my account as far as this. Perhaps we were mad—for have I not said those horrible peaks were mountains of madness? But I think I can detect something of the same spirit—albeit in a less extreme form—in the men who stalk deadly beasts through African jungles to photograph them or study their habits. Half-paralysed with terror though we were, there was nevertheless fanned within us a blazing flame of awe and curiosity which triumphed in the end.

Of course we did not mean to face that—or those—which we knew had been there, but we felt that they must be gone by now. They would by this time have found the other neighbouring entrance to the abyss, and have passed within to whatever night-black fragments of the past might await them in the ultimate gulf—the ultimate gulf they had never seen. Or if that entrance, too, was blocked, they would have gone on to the north seeking another. They were, we remembered, partly independent of light.

Looking back to that moment, I can scarcely recall just what precise form our new emotions took—just what change of immediate objective it was that so sharpened our sense of expectancy. We certainly did not mean to face what we feared—yet I will not deny that we may have had a lurking, unconscious wish to spy certain things from some hidden vantage-point. Probably we had not given up our zeal to glimpse the abyss itself, though there was interposed a new goal in the form of that great circular place shewn on the crumpled sketches we had found. We had at once recognised it as a monstrous cylindrical tower figuring in the very earliest carvings, but appearing only as a prodigious round aperture from above. Something about the impressiveness of its rendering, even in these hasty diagrams, made us think that its sub-glacial levels must still form a feature of peculiar importance. Perhaps it embodied architectural marvels as yet unencountered by us. It was certainly of incredible age according to the sculptures in which it figured—being indeed among the first things built in the city. Its carvings, if preserved, could not but be highly significant. Moreover, it might form a good present link with the upper world—a shorter route

than the one we were so carefully blazing, and probably that by which those others had descended.

At any rate, the thing we did was to study the terrible sketches—which quite perfectly confirmed our own—and start back over the indicated course to the circular place; the course which our nameless predecessors must have traversed twice before us. The other neighbouring gate to the abyss would lie beyond that. I need not speak of our journey—during which we continued to leave an economical trail of paper—for it was precisely the same in kind as that by which we had reached the cul de sac; except that it tended to adhere more closely to the ground level and even descend to basement corridors. Every now and then we could trace certain disturbing marks in the debris or litter under foot; and after we had passed outside the radius of the gasoline scent we were again faintly conscious—spasmodically—of that more hideous and more persistent scent. After the way had branched from our former course we sometimes gave the rays of our single torch a furtive sweep along the walls; noting in almost every case the well-nigh omnipresent sculptures, which indeed seem to have formed a main aesthetic outlet for the Old Ones.

About 9:30 p.m., while traversing a vaulted corridor whose increasingly glaciated floor seemed somewhat below the ground level and whose roof grew lower as we advanced, we began to see strong daylight ahead and were able to turn off our torch. It appeared that we were coming to the vast circular place, and that our distance from the upper air could not be very great. The corridor ended in an arch surprisingly low for these megalithic ruins, but we could see much through it even before we emerged. Beyond there stretched a prodigious round space—fully 200 feet in diameter—strewn with debris and containing many choked archways corresponding to the one we were about to cross. The walls were—in available spaces—boldly sculptured into a spiral band of heroic proportions; and displayed, despite the destructive weathering caused by the openness of the spot, an artistic splendour far beyond anything we had encountered before. The littered floor was quite heavily glaciated, and we fancied that the true bottom lay at a considerably lower depth.

But the salient object of the place was the titanic stone ramp

which, eluding the archways by a sharp turn outward into the open floor, wound spirally up the stupendous cylindrical wall like an inside counterpart of those once climbing outside the monstrous towers or ziggurats of antique Babylon. Only the rapidity of our flight, and the perspective which confounded the descent with the tower's inner wall, had prevented our noticing this feature from the air, and thus caused us to seek another avenue to the sub-glacial level. Pabodie might have been able to tell what sort of engineering held it in place, but Danforth and I could merely admire and marvel. We could see mighty stone corbels and pillars here and there, but what we saw seemed inadequate to the function performed. The thing was excellently preserved up to the present top of the tower—a highly remarkable circumstance in view of its exposure—and its shelter had done much to protect the bizarre and disturbing cosmic sculptures on the walls.

As we stepped out into the awesome half-daylight of this monstrous cylinder-bottom—fifty million years old, and without doubt the most primally ancient structure ever to meet our eyes—we saw that the ramp-traversed sides stretched dizzily up to a height of fully sixty feet. This, we recalled from our aerial survey, meant an outside glaciation of some forty feet; since the yawning gulf we had seen from the plane had been at the top of an approximately twenty-foot mound of crumbled masonry, somewhat sheltered for three-fourths of its circumference by the massive curving walls of a line of higher ruins. According to the sculptures the original tower had stood in the centre of an immense circular plaza; and had been perhaps 500 or 600 feet high, with tiers of horizontal discs near the top, and a row of needle-like spires along the upper rim. Most of the masonry had obviously toppled outward rather than inward—a fortunate happening, since otherwise the ramp might have been shattered and the whole interior choked. As it was, the ramp shewed sad battering; whilst the choking was such that all the archways at the bottom seemed to have been recently half-cleared.

It took us only a moment to conclude that this was indeed the route by which those others had descended, and that this would be the logical route for our own ascent despite the long trail of paper we had left elsewhere. The tower's mouth was no farther from the foothills and our waiting plane than was the great terraced building

we had entered, and any further sub-glacial exploration we might make on this trip would lie in this general region. Oddly, we were still thinking about possible later trips—even after all we had seen and guessed. Then as we picked our way cautiously over the debris of the great floor, there came a sight which for the time excluded all other matters.

It was the neatly huddled array of three sledges in that farther angle of the ramp's lower and outward-projecting course which had hitherto been screened from our view. There they were—the three sledges missing from Lake's camp—shaken by a hard usage which must have included forcible dragging along great reaches of snowless masonry and debris, as well as much hand portage over utterly unnavigable places. They were carefully and intelligently packed and strapped, and contained things memorably familiar enough—the gasoline stove, fuel cans, instrument cases, provision tins, tarpaulins obviously bulging with books, and some bulging with less obvious contents—everything derived from Lake's equipment. After what we had found in that other room, we were in a measure prepared for this encounter. The really great shock came when we stepped over and undid one tarpaulin whose outlines had peculiarly disquieted us. It seems that others as well as Lake had been interested in collecting typical specimens; for there were two here, both stiffly frozen, perfectly preserved, patched with adhesive plaster where some wounds around the neck had occurred, and wrapped with patent care to prevent further damage. They were the bodies of young Gedney and the missing dog.

X.

Many people will probably judge us callous as well as mad for thinking about the northward tunnel and the abyss so soon after our sombre discovery, and I am not prepared to say that we would have immediately revived such thoughts but for a specific circumstance which broke in upon us and set up a whole new train of speculations. We had replaced the tarpaulin over poor Gedney and were standing in a kind of mute bewilderment when the sounds finally reached our consciousness—the first sounds we had heard since descending out of the open where the mountain wind whined

faintly from its unearthly heights. Well known and mundane though they were, their presence in this remote world of death was more unexpected and unnerving than any grotesque or fabulous tones could possibly have been—since they gave a fresh upsetting to all our notions of cosmic harmony.

Had it been some trace of that bizarre musical piping over a wide range which Lake's dissection report had led us to expect in those others—and which, indeed, our overwrought fancies had been reading into every wind-howl we had heard since coming on the camp horror—it would have had a kind of hellish congruity with the aeon-dead region around us. A voice from other epochs belongs in a graveyard of other epochs. As it was, however, the noise shattered all our profoundly seated adjustments—all our tacit acceptance of the inner antarctic as a waste as utterly and irrevocably void of every vestige of normal life as the sterile disc of the moon. What we heard was not the fabulous note of any buried blasphemy of elder earth from whose supernal toughness an age-denied polar sun had evoked a monstrous response. Instead, it was a thing so mockingly normal and so unerringly familiarised by our sea days off Victoria Land and our camp days at McMurdo Sound that we shuddered to think of it here, where such things ought not to be. To be brief—it was simply the raucous squawking of a penguin.

The muffled sound floated from sub-glacial recesses nearly opposite to the corridor whence we had come—regions manifestly in the direction of that other tunnel to the vast abyss. The presence of a living water-bird in such a direction—in a world whose surface was one of age-long and uniform lifelessness—could lead to only one conclusion; hence our first thought was to verify the objective reality of the sound. It was, indeed, repeated; and seemed at times to come from more than one throat. Seeking its source, we entered an archway from which much debris had been cleared; resuming our trail-blazing—with an added paper-supply taken with curious repugnance from one of the tarpaulin bundles on the sledges—when we left daylight behind.

As the glaciated floor gave place to a litter of detritus, we plainly discerned some curious dragging tracks; and once Danforth found a distinct print of a sort whose description would be only too superfluous. The course indicated by the penguin cries was precisely

what our map and compass prescribed as an approach to the more northerly tunnel-mouth, and we were glad to find that a bridgeless thoroughfare on the ground and basement levels seemed open. The tunnel, according to the chart, ought to start from the basement of a large pyramidal structure which we seemed vaguely to recall from our aerial survey as remarkably well preserved. Along our path the single torch shewed a customary profusion of carvings, but we did not pause to examine any of these.

Suddenly a bulky white shape loomed up ahead of us, and we flashed on the second torch. It is odd how wholly this new quest had turned our minds from earlier fears of what might lurk near. Those other ones, having left their supplies in the great circular place, must have planned to return after their scouting trip toward or into the abyss; yet we had now discarded all caution concerning them as completely as if they had never existed. This white, waddling thing was fully six feet high, yet we seemed to realise at once that it was not one of those others. They were larger and dark, and according to the sculptures their motion over land surfaces was a swift, assured matter despite the queerness of their sea-born tentacle equipment. But to say that the white thing did not profoundly frighten us would be vain. We were indeed clutched for an instant by a primitive dread almost sharper than the worst of our reasoned fears regarding those others. Then came a flash of anticlimax as the white shape sidled into a lateral archway to our left to join two others of its kind which had summoned it in raucous tones. For it was only a penguin—albeit of a huge, unknown species larger than the greatest of the known king penguins, and monstrous in its combined albinism and virtual eyelessness.

When we had followed the thing into the archway and turned both our torches on the indifferent and unheeding group of three we saw that they were all eyeless albinos of the same unknown and gigantic species. Their size reminded us of some of the archaic penguins depicted in the Old Ones' sculptures, and it did not take us long to conclude that they were descended from the same stock—undoubtedly surviving through a retreat to some warmer inner region whose perpetual blackness had destroyed their pigmentation and atrophied their eyes to mere useless slits. That their present habitat was the vast abyss we sought, was not for a moment to be

doubted; and this evidence of the gulf's continued warmth and habitability filled us with the most curious and subtly perturbing fancies.

We wondered, too, what had caused these three birds to venture out of their usual domain. The state and silence of the great dead city made it clear that it had at no time been an habitual seasonal rookery, whilst the manifest indifference of the trio to our presence made it seem odd that any passing party of those others should have startled them. Was it possible that those others had taken some aggressive action or tried to increase their meat supply? We doubted whether that pungent odour which the dogs had hated could cause an equal antipathy in these penguins; since their ancestors had obviously lived on excellent terms with the Old Ones—an amicable relationship which must have survived in the abyss below as long as any of the Old Ones remained. Regretting—in a flareup of the old spirit of pure science—that we could not photograph these anomalous creatures, we shortly left them to their squawking and pushed on toward the abyss whose openness was now so positively proved to us, and whose exact direction occasional penguin tracks made clear.

Not long afterward a steep descent in a long, low, doorless, and peculiarly sculptureless corridor led us to believe that we were approaching the tunnel-mouth at last. We had passed two more penguins, and heard others immediately ahead. Then the corridor ended in a prodigious open space which made us gasp involuntarily—a perfect inverted hemisphere, obviously deep underground; fully an hundred feet in diameter and fifty feet high, with low archways opening around all parts of the circumference but one, and that one yawning cavernously with a black arched aperture which broke the symmetry of the vault to a height of nearly fifteen feet. It was the entrance to the great abyss.

In this vast hemisphere, whose concave roof was impressively though decadently carved to a likeness of the primordial celestial dome, a few albino penguins waddled—aliens there, but indifferent and unseeing. The black tunnel yawned indefinitely off at a steep descending grade, its aperture adorned with grotesquely chiselled jambs and lintel. From that cryptical mouth we fancied a current of slightly warmer air and perhaps even a suspicion of vapour pro-

ceeded; and we wondered what living entities other than penguins the limitless void below, and the contiguous honeycombings of the land and the titan mountains, might conceal. We wondered, too, whether the trace of mountain-top smoke at first suspected by poor Lake, as well as the odd haze we had ourselves perceived around the rampart-crowned peak, might not be caused by the tortuous-channelled rising of some such vapour from the unfathomed regions of earth's core.

Entering the tunnel, we saw that its outline was—at least at the start—about fifteen feet each way; sides, floor, and arched roof composed of the usual megalithic masonry. The sides were sparsely decorated with cartouches of conventional designs in a late, decadent style; and all the construction and carving were marvellously well preserved. The floor was quite clear, except for a slight detritus bearing outgoing penguin tracks and the inward tracks of those others. The farther one advanced, the warmer it became; so that we were soon unbuttoning our heavy garments. We wondered whether there were any actually igneous manifestations below, and whether the waters of that sunless sea were hot. After a short distance the masonry gave place to solid rock, though the tunnel kept the same proportions and presented the same aspect of carved regularity. Occasionally its varying grade became so steep that grooves were cut in the floor. Several times we noted the mouths of small lateral galleries not recorded in our diagrams; none of them such as to complicate the problem of our return, and all of them welcome as possible refuges in case we met unwelcome entities on their way back from the abyss. The nameless scent of such things was very distinct. Doubtless it was suicidally foolish to venture into that tunnel under the known conditions, but the lure of the unplumbed is stronger in certain persons than most suspect—indeed, it was just such a lure which had brought us to this unearthly polar waste in the first place. We saw several penguins as we passed along, and speculated on the distance we would have to traverse. The carvings had led us to expect a steep downhill walk of about a mile to the abyss, but our previous wanderings had shewn us that matters of scale were not wholly to be depended on.

After about a quarter of a mile that nameless scent became greatly accentuated, and we kept very careful track of the various lateral

openings we passed. There was no visible vapour as at the mouth, but this was doubtless due to the lack of contrasting cooler air. The temperature was rapidly ascending, and we were not surprised to come upon a careless heap of material shudderingly familiar to us. It was composed of furs and tent-cloth taken from Lake's camp, and we did not pause to study the bizarre forms into which the fabrics had been slashed. Slightly beyond this point we noticed a decided increase in the size and number of the side-galleries, and concluded that the densely honeycombed region beneath the higher foothills must now have been reached. The nameless scent was now curiously mixed with another and scarcely less offensive odour—of what nature we could not guess, though we thought of decaying organisms and perhaps unknown subterrene fungi. Then came a startling expansion of the tunnel for which the carvings had not prepared us—a broadening and rising into a lofty, natural-looking elliptical cavern with a level floor; some 75 feet long and 50 broad, and with many immense side-passages leading away into cryptical darkness.

Though this cavern was natural in appearance, an inspection with both torches suggested that it had been formed by the artificial destruction of several walls between adjacent honeycombings. The walls were rough, and the high vaulted roof was thick with stalactites; but the solid rock floor had been smoothed off, and was free from all debris, detritus, or even dust to a positively abnormal extent. Except for the avenue through which we had come, this was true of the floors of all the great galleries opening off from it; and the singularity of the condition was such as to set us vainly puzzling. The curious new foetor which had supplemented the nameless scent was excessively pungent here; so much so that it destroyed all trace of the other. Something about this whole place, with its polished and almost glistening floor, struck us as more vaguely baffling and horrible than any of the monstrous things we had previously encountered.

The regularity of the passage immediately ahead, as well as the larger proportion of penguin-droppings there, prevented all confusion as to the right course amidst this plethora of equally great cave-mouths. Nevertheless we resolved to resume our paper trail-blazing if any further complexity should develop; for dust tracks, of course, could no longer be expected. Upon resuming our direct

progress we cast a beam of torchlight over the tunnel walls—and stopped short in amazement at the supremely radical change which had come over the carvings in this part of the passage. We realised, of course, the great decadence of the Old Ones' sculpture at the time of the tunnelling; and had indeed noticed the inferior workmanship of the arabesques in the stretches behind us. But now, in this deeper section beyond the cavern, there was a sudden difference wholly transcending explanation—a difference in basic nature as well as in mere quality, and involving so profound and calamitous a degradation of skill that nothing in the hitherto observed rate of decline could have led one to expect it.

This new and degenerate work was coarse, bold, and wholly lacking in delicacy of detail. It was counter-sunk with exaggerated depth in bands following the same general line as the sparse carouches of the earlier sections, but the height of the reliefs did not reach the level of the general surface. Danforth had the idea that it was a second carving—a sort of palimpsest formed after the obliteration of a previous design. In nature it was wholly decorative and conventional; and consisted of crude spirals and angles roughly following the quintile mathematical tradition of the Old Ones, yet seeming more like a parody than a perpetuation of that tradition. We could not get it out of our minds that some subtly but profoundly alien element had been added to the aesthetic feeling behind the technique—an alien element, Danforth guessed, that was responsible for the manifestly laborious substitution. It was like, yet disturbingly unlike, what we had come to recognise as the Old Ones' art; and I was persistently reminded of such hybrid things as the ungainly Palmyrene sculptures fashioned in the Roman manner. That others had recently noticed this belt of carving was hinted by the presence of a used torch battery on the floor in front of one of the most characteristic designs.

Since we could not afford to spend any considerable time in study, we resumed our advance after a cursory look; though frequently casting beams over the walls to see if any further decorative changes developed. Nothing of the sort was perceived, though the carvings were in places rather sparse because of the numerous mouths of smooth-floored lateral tunnels. We saw and heard fewer penguins, but thought we caught a vague suspicion of an infinitely

distant chorus of them somewhere deep within the earth. The new and inexplicable odour was abominably strong, and we could detect scarcely a sign of that other nameless scent. Puffs of visible vapour ahead bespoke increasing contrasts in temperature, and the relative nearness of the sunless sea-cliffs of the great abyss. Then, quite unexpectedly, we saw certain obstructions on the polished floor ahead—obstructions which were quite definitely not penguins—and turned on our second torch after making sure that the objects were quite stationary.

XI.

Still another time have I come to a place where it is very difficult to proceed. I ought to be hardened by this stage; but there are some experiences and intimations which scar too deeply to permit of healing, and leave only such an added sensitiveness that memory re-inspires all the original horror. We saw, as I have said, certain obstructions on the polished floor ahead; and I may add that our nostrils were assailed almost simultaneously by a very curious intensification of the strange prevailing foetor, now quite plainly mixed with the nameless stench of those others which had gone before us. The light of the second torch left no doubt of what the obstructions were, and we dared approach them only because we could see, even from a distance, that they were quite as past all harming power as had been the six similar specimens unearthed from the monstrous star-mounded graves at poor Lake's camp.

They were, indeed, as lacking in completeness as most of those we had unearthed—though it grew plain from the thick, dark-green pool gathering around them that their incompleteness was of infinitely greater recency. There seemed to be only four of them, whereas Lake's bulletins would have suggested no less than eight as forming the group which had preceded us. To find them in this state was wholly unexpected, and we wondered what sort of monstrous struggle had occurred down here in the dark.

Penguins, attacked in a body, retaliate savagely with their beaks; and our ears now made certain the existence of a rookery far beyond. Had those others disturbed such a place and aroused murderous pursuit? The obstructions did not suggest it, for pen-

guin beaks against the tough tissues Lake had dissected could hardly account for the terrible damage our approaching glance was beginning to make out. Besides, the huge blind birds we had seen appeared to be singularly peaceful.

Had there, then, been a struggle among those others, and were the absent four responsible? If so, where were they? Were they close at hand and likely to form an immediate menace to us? We glanced anxiously at some of the smooth-floored lateral passages as we continued our slow and frankly reluctant approach. Whatever the conflict was, it had clearly been that which had frightened the penguins into their unaccustomed wandering. It must, then, have arisen near that faintly heard rookery in the incalculable gulf beyond, since there were no signs that any birds had normally dwelt here. Perhaps, we reflected, there had been a hideous running fight, with the weaker party seeking to get back to the cached sledges when their pursuers finished them. One could picture the daemonic fray between namelessly monstrous entities as it surged out of the black abyss with great clouds of frantic penguins squawking and scurrying ahead.

I say that we approached those sprawling and incomplete obstructions slowly and reluctantly. Would to heaven we had never approached them at all, but had run back at top speed out of that blasphemous tunnel with the greasily smooth floors and the degenerate murals aping and mocking the things they had superseded—run back, before we had seen what we did see, and before our minds were burned with something which will never let us breathe easily again!

Both of our torches were turned on the prostrate objects, so that we soon realised the dominant factor in their incompleteness. Mauled, compressed, twisted, and ruptured as they were, their chief common injury was total decapitation. From each one the tentacled starfish-head had been removed; and as we drew near we saw that the manner of removal looked more like some hellish tearing or suction than like any ordinary form of cleavage. Their noisome dark-green ichor formed a large, spreading pool; but its stench was half overshadowed by that newer and stranger stench, here more pungent than at any other point along our route. Only

when we had come very close to the sprawling obstructions could we trace that second, unexplainable foetor to any immediate source—and the instant we did so Danforth, remembering certain very vivid sculptures of the Old Ones' history in the Permian age 150 million years ago, gave vent to a nerve-tortured cry which echoed hysterically through that vaulted and archaic passage with the evil palimpsest carvings.

I came only just short of echoing his cry myself; for I had seen those primal sculptures, too, and had shudderingly admired the way the nameless artist had suggested that hideous slime-coating found on certain incomplete and prostrate Old Ones—those whom the frightful shoggoths had characteristically slain and sucked to a ghastly headlessness in the great war of re-subjugation. They were infamous, nightmare sculptures even when telling of age-old, bygone things; for shoggoths and their work ought not to be seen by human beings or portrayed by any beings. The mad author of the *Necronomicon* had nervously tried to swear that none had been bred on this planet, and that only drugged dreamers had ever conceived them. Formless protoplasm able to mock and reflect all forms and organs and processes—viscous agglutinations of bubbling cells—rubbery fifteen-foot spheroids infinitely plastic and ductile—slaves of suggestion, builders of cities—more and more sullen, more and more intelligent, more and more amphibious, more and more imitative—Great God! What madness made even those blasphemous Old Ones willing to use and to carve such things?

And now, when Danforth and I saw the freshly glistening and reflectively iridescent black slime which clung thickly to those headless bodies and stank obscenely with that new unknown odour whose cause only a diseased fancy could envisage—clung to those bodies and sparkled less voluminously on a smooth part of the accursedly re-sculptured wall *in a series of grouped dots*—we understood the quality of cosmic fear to its uttermost depths. It was not fear of those four missing others—for all too well did we suspect they would do no harm again. Poor devils! After all, they were not evil things of their kind. They were the men of another age and another order of being. Nature had played a hellish jest on

them—as it will on any others that human madness, callousness, or cruelty may hereafter drag up in that hideously dead or sleeping polar waste—and this was their tragic homecoming.

They had not been even savages—for what indeed had they done? That awful awakening in the cold of an unknown epoch—perhaps an attack by the furry, frantically barking quadrupeds, and a dazed defence against them and the equally frantic white simians with the queer wrappings and paraphernalia . . . poor Lake, poor Gedney . . . and poor Old Ones! Scientists to the last—what had they done that we would not have done in their place? God, what intelligence and persistence! What a facing of the incredible, just as those carven kinsmen and forbears had faced things only a little less incredible! Radiates, vegetables, monstrosities, star-spawn—what-ever they had been, they were men!

They had crossed the icy peaks on whose templed slopes they had once worshipped and roamed among the tree-ferns. They had found their dead city brooding under its curse, and had read its carven latter days as we had done. They had tried to reach their living fellows in fabled depths of blackness they had never seen—and what had they found? All this flashed in unison through the thoughts of Danforth and me as we looked from those headless, slime-coated shapes to the loathsome palimpsest sculptures and the diabolical dot-groups of fresh slime on the wall beside them—looked and understood what must have triumphed and survived down there in the Cyclopean water-city of that nighted, penguin-fringed abyss, whence even now a sinister curling mist had begun to belch pallidly as if in answer to Danforth's hysterical scream.

The shock of recognising that monstrous slime and headlessness had frozen us into mute, motionless statues, and it is only through later conversations that we have learned of the complete identity of our thoughts at that moment. It seemed aeons that we stood there, but actually it could not have been more than ten or fifteen seconds. That hateful, pallid mist curled forward as if veritably driven by some remoter advancing bulk—and then came a sound which upset much of what we had just decided, and in so doing broke the spell and enabled us to run like mad past squawking, confused penguins over our former trail back to the city, along ice-sunken megalithic corridors to the great open circle, and up that archaic spiral

ramp in a frenzied automatic plunge for the sane outer air and light of day.

The new sound, as I have intimated, upset much that we had decided; because it was what poor Lake's dissection had led us to attribute to those we had just judged dead. It was, Danforth later told me, precisely what he had caught in infinitely muffled form when at that spot beyond the alley-corner above the glacial level; and it certainly had a shocking resemblance to the wind-pipings we had both heard around the lofty mountain caves. At the risk of seeming puerile I will add another thing, too; if only because of the surprising way Danforth's impression chimed with mine. Of course common reading is what prepared us both to make the interpretation, though Danforth has hinted at queer notions about unsuspected and forbidden sources to which Poe may have had access when writing his *Arthur Gordon Pym* a century ago. It will be remembered that in that fantastic tale there is a word of unknown but terrible and prodigious significance connected with the antarctic and screamed eternally by the gigantic, spectrally snowy birds of that malign region's core. "*Tekeli-li! Tekeli-li!*" That, I may admit, is exactly what we thought we heard conveyed by that sudden sound behind the advancing white mist—that insidious musical piping over a singularly wide range.

We were in full flight before three notes or syllables had been uttered, though we knew that the swiftness of the Old Ones would enable any scream-roused and pursuing survivor of the slaughter to overtake us in a moment if it really wished to do so. We had a vague hope, however, that non-aggressive conduct and a display of kindred reason might cause such a being to spare us in case of capture; if only from scientific curiosity. After all, if such an one had nothing to fear for itself it would have no motive in harming us. Concealment being futile at this juncture, we used our torch for a running glance behind, and perceived that the mist was thinning. Would we see, at last, a complete and living specimen of those others? Again came that insidious musical piping—"*Tekeli-li! Tekeli-li!*"

Then, noting that we were actually gaining on our pursuer, it occurred to us that the entity might be wounded. We could take no chances, however, since it was very obviously approaching in

answer to Danforth's scream rather than in flight from any other entity. The timing was too close to admit of doubt. Of the whereabouts of that less conceivable and less mentionable nightmare—that foetid, unglimped mountain of slime-spewing protoplasm whose race had conquered the abyss and sent land pioneers to recarve and squirm through the burrows of the hills—we could form no guess; and it cost us a genuine pang to leave this probably crippled Old One—perhaps a lone survivor—to the peril of recapture and a nameless fate.

Thank heaven we did not slacken our run. The curling mist had thickened again, and was driving ahead with increased speed; whilst the straying penguins in our rear were squawking and screaming and displaying signs of a panic really surprising in view of their relatively minor confusion when we had passed them. Once more came that sinister, wide-ranged piping—"Tekeli-li! Tekeli-li!" We had been wrong. The thing was not wounded, but had merely paused on encountering the bodies of its fallen kindred and the hellish slime inscription above them. We could never know what that daemon message was—but those burials at Lake's camp had shewn how much importance the beings attached to their dead. Our recklessly used torch now revealed ahead of us the large open cavern where various ways converged, and we were glad to be leaving those morbid palimpsest sculptures—almost felt even when scarcely seen—behind.

Another thought which the advent of the cave inspired was the possibility of losing our pursuer at this bewildering focus of large galleries. There were several of the blind albino penguins in the open space, and it seemed clear that their fear of the oncoming entity was extreme to the point of unaccountability. If at that point we dimmed our torch to the very lowest limit of travelling need, keeping it strictly in front of us, the frightened squawking motions of the huge birds in the mist might muffle our footfalls, screen our true course, and somehow set up a false lead. Amidst the churning, spiralling fog the littered and unglistering floor of the main tunnel beyond this point, as differing from the other morbidly polished burrows, could hardly form a highly distinguishing feature; even, so far as we could conjecture, for those indicated special senses which made the Old Ones partly though imperfectly independent of

light in emergencies. In fact, we were somewhat apprehensive lest we go astray ourselves in our haste. For we had, of course, decided to keep straight on toward the dead city; since the consequences of loss in those unknown foothill honeycombings would be unthinkable.

The fact that we survived and emerged is sufficient proof that the thing did take a wrong gallery whilst we providentially hit on the right one. The penguins alone could not have saved us, but in conjunction with the mist they seem to have done so. Only a benign fate kept the curling vapours thick enough at the right moment, for they were constantly shifting and threatening to vanish. Indeed, they did lift for a second just before we emerged from the nauseously re-sculptured tunnel into the cave; so that we actually caught one first and only half-glimpse of the oncoming entity as we cast a final, desperately fearful glance backward before dimming the torch and mixing with the penguins in the hope of dodging pursuit. If the fate which screened us was benign, that which gave us the half-glimpse was infinitely the opposite; for to that flash of semi-vision can be traced a full half of the horror which has ever since haunted us.

Our exact motive in looking back again was perhaps no more than the immemorial instinct of the pursued to gauge the nature and course of its pursuer; or perhaps it was an automatic attempt to answer a subconscious question raised by one of our senses. In the midst of our flight, with all our faculties centred on the problem of escape, we were in no condition to observe and analyse details; yet even so our latent brain-cells must have wondered at the message brought them by our nostrils. Afterward we realised what it was—that our retreat from the foetid slime-coating on those headless obstructions, and the coincident approach of the pursuing entity, had not brought us the exchange of stench which logic called for. In the neighbourhood of the prostrate things that new and lately unexplainable foetor had been wholly dominant; but by this time it ought to have largely given place to the nameless stench associated with those others. This it had not done—for instead, the newer and less bearable smell was now virtually undiluted, and growing more and more poisonously insistent each second.

So we glanced back—simultaneously, it would appear; though

no doubt the incipient motion of one prompted the imitation of the other. As we did so we flashed both torches full strength at the momentarily thinned mist; either from sheer primitive anxiety to see all we could, or in a less primitive but equally unconscious effort to dazzle the entity before we dimmed our light and dodged among the penguins of the labyrinth-centre ahead. Unhappy act! Not Orpheus himself, or Lot's wife, paid much more dearly for a backward glance. And again came that shocking, wide-ranged piping—"Tekeli-li! Tekeli-li!"

I might as well be frank—even if I cannot bear to be quite direct—in stating what we saw; though at the time we felt that it was not to be admitted even to each other. The words reaching the reader can never even suggest the awfulness of the sight itself. It crippled our consciousness so completely that I wonder we had the residual sense to dim our torches as planned, and to strike the right tunnel toward the dead city. Instinct alone must have carried us through—perhaps better than reason could have done; though if that was what saved us, we paid a high price. Of reason we certainly had little enough left. Danforth was totally unstrung, and the first thing I remember of the rest of the journey was hearing him light-headedly chant an hysterical formula in which I alone of mankind could have found anything but insane irrelevance. It reverberated in falsetto echoes among the squawks of the penguins; reverberated through the vaultings ahead, and—thank God—through the now empty vaultings behind. He could not have begun it at once—else we would not have been alive and blindly racing. I shudder to think of what a shade of difference in his nervous reactions might have brought.

"South Station Under—Washington Under—Park Street Under—Kendall—Central—Harvard. . . ." The poor fellow was chanting the familiar stations of the Boston-Cambridge tunnel that burrowed through our peaceful native soil thousands of miles away in New England, yet to me the ritual had neither irrelevance nor home-feeling. It had only horror, because I knew unerringly the monstrous, nefarious analogy that had suggested it. We had expected, upon looking back, to see a terrible and incredibly moving entity if the mists were thin enough; but of that entity we had formed a clear idea. What we did see—for the mists were indeed all

too malignly thinned—was something altogether different, and immeasurably more hideous and detestable. It was the utter, objective embodiment of the fantastic novelist's 'thing that should not be'; and its nearest comprehensible analogue is a vast, onrushing subway train as one sees it from a station platform—the great black front looming colossally out of infinite subterraneous distance, constellated with strangely coloured lights and filling the prodigious burrow as a piston fills a cylinder.

But we were not on a station platform. We were on the track ahead as the nightmare plastic column of foetid black iridescence oozed tightly onward through its fifteen-foot sinus; gathering unholy speed and driving before it a spiral, re-thickening cloud of the pallid abyss-vapour. It was a terrible, indescribable thing vaster than any subway train—a shapeless congeries of protoplasmic bubbles, faintly self-luminous, and with myriads of temporary eyes forming and unforming as pustules of greenish light all over the tunnel-filling front that bore down upon us, crushing the frantic penguins and slithering over the glistening floor that it and its kind had swept so evilly free of all litter. Still came that eldritch, mocking cry—"Tekeli-li! Tekeli-li!" And at last we remembered that the daemoniac shoggoths—given life, thought, and plastic organ patterns solely by the Old Ones, and having no language save that which the dot-groups expressed—*had likewise no voice save the imitated accents of their bygone masters.*

XII.

Danforth and I have recollections of emerging into the great sculptured hemisphere and of threading our back trail through the Cyclopean rooms and corridors of the dead city; yet these are purely dream-fragments involving no memory of volition, details, or physical exertion. It was as if we floated in a nebulous world or dimension without time, causation, or orientation. The grey half-daylight of the vast circular space sobered us somewhat; but we did not go near those cached sledges or look again at poor Gedney and the dog. They have a strange and titanic mausoleum, and I hope the end of this planet will find them still undisturbed.

It was while struggling up the colossal spiral incline that we first

felt the terrible fatigue and short breath which our race through the thin plateau air had produced; but not even the fear of collapse could make us pause before reaching the normal outer realm of sun and sky. There was something vaguely appropriate about our departure from those buried epochs; for as we wound our panting way up the sixty-foot cylinder of primal masonry we glimpsed beside us a continuous procession of heroic sculptures in the dead race's early and undecayed technique—a farewell from the Old Ones, written fifty million years ago.

Finally scrambling out at the top, we found ourselves on a great mound of tumbled blocks; with the curved walls of higher stonework rising westward, and the brooding peaks of the great mountains shewing beyond the more crumbled structures toward the east. The low antarctic sun of midnight peered redly from the southern horizon through rifts in the jagged ruins, and the terrible age and deadness of the nightmare city seemed all the starker by contrast with such relatively known and accustomed things as the features of the polar landscape. The sky above was a churning and opalescent mass of tenuous ice-vapours, and the cold clutched at our vitals. Wearily resting the outfit-bags to which we had instinctively clung throughout our desperate flight, we rebuttoned our heavy garments for the stumbling climb down the mound and the walk through the aeon-old stone maze to the foothills where our aeroplane waited. Of what had set us fleeing from the darkness of earth's secret and archaic gulfs we said nothing at all.

In less than a quarter of an hour we had found the steep grade to the foothills—the probable ancient terrace—by which we had descended, and could see the dark bulk of our great plane amidst the sparse ruins on the rising slope ahead. Half way uphill toward our goal we paused for a momentary breathing-spell, and turned to look again at the fantastic palaeogean tangle of incredible stone shapes below us—once more outlined mystically against an unknown west. As we did so we saw that the sky beyond had lost its morning haziness; the restless ice-vapours having moved up to the zenith, where their mocking outlines seemed on the point of settling into some bizarre pattern which they feared to make quite definite or conclusive.

There now lay revealed on the ultimate white horizon behind the

grotesque city a dim, elfin line of pinnaced violet whose needle-pointed heights loomed dream-like against the beckoning rose-colour of the western sky. Up toward this shimmering rim sloped the ancient table-land, the depressed course of the bygone river traversing it as an irregular ribbon of shadow. For a second we gasped in admiration of the scene's unearthly cosmic beauty, and then vague horror began to creep into our souls. For this far violet line could be nothing else than the terrible mountains of the forbidden land—highest of earth's peaks and focus of earth's evil; harbourers of nameless horrors and Archaean secrets; shunned and prayed to by those who feared to carve their meaning; untrodden by any living thing of earth, but visited by the sinister lightnings and sending strange beams across the plains in the polar night—beyond doubt the unknown archetype of that dreaded Kadath in the Cold Waste beyond abhorrent Leng, whereof unholy primal legends hint evasively. We were the first human beings ever to see them—and I hope to God we may be the last.

If the sculptured maps and pictures in that pre-human city had told truly, these cryptic violet mountains could not be much less than 300 miles away; yet none the less sharply did their dim elfin essence jut above that remote and snowy rim, like the serrated edge of a monstrous alien planet about to rise into unaccustomed heavens. Their height, then, must have been tremendous beyond all known comparison—carrying them up into tenuous atmospheric strata peopled by such gaseous wraiths as rash flyers have barely lived to whisper of after unexplainable falls. Looking at them, I thought nervously of certain sculptured hints of what the great bygone river had washed down into the city from their accursed slopes—and wondered how much sense and how much folly had lain in the fears of those Old Ones who carved them so reticently. I recalled how their northerly end must come near the coast at Queen Mary Land, where even at that moment Sir Douglas Mawson's expedition was doubtless working less than a thousand miles away; and hoped that no evil fate would give Sir Douglas and his men a glimpse of what might lie beyond the protecting coastal range. Such thoughts formed a measure of my overwrought condition at the time—and Danforth seemed to be even worse.

Yet long before we had passed the great star-shaped ruin and

reached our plane our fears had become transferred to the lesser but vast enough range whose re-crossing lay ahead of us. From these foothills the black, ruin-crustcd slopes reared up starkly and hideously against the east, again reminding us of those strange Asian paintings of Nicholas Roerich; and when we thought of the damnable honeycombs inside them, and of the frightful amorphous entities that might have pushed their foetidly squirming way even to the topmost hollow pinnacles, we could not face without panic the prospect of again sailing by those suggestive skyward cave-mouths where the wind made sounds like an evil musical piping over a wide range. To make matters worse, we saw distinct traces of local mist around several of the summits—as poor Lake must have done when he made that early mistake about volcanism—and thought shiveringly of that kindred mist from which we had just escaped; of that, and of the blasphemous, horror-fostering abyss whence all such vapours came.

All was well with the plane, and we clumsily hauled on our heavy flying furs. Danforth got the engine started without trouble, and we made a very smooth takeoff over the nightmare city. Below us the primal Cyclopean masonry spread out as it had done when first we saw it—so short, yet infinitely long, a time ago—and we began rising and turning to test the wind for our crossing through the pass. At a very high level there must have been great disturbance, since the ice-dust clouds of the zenith were doing all sorts of fantastic things; but at 24,000 feet, the height we needed for the pass, we found navigation quite practicable. As we drew close to the jutting peaks the wind's strange piping again became manifest, and I could see Danforth's hands trembling at the controls. Rank amateur though I was, I thought at that moment that I might be a better navigator than he in effecting the dangerous crossing between pinnacles; and when I made motions to change seats and take over his duties he did not protest. I tried to keep all my skill and self-possession about me, and stared at the sector of reddish farther sky betwixt the walls of the pass—resolutely refusing to pay attention to the puffs of mountain-top vapour, and wishing that I had wax-stopped ears like Ulysses' men off the Sirens' coast to keep that disturbing wind-piping from my consciousness.

But Danforth, released from his piloting and keyed up to a dan-

gerous nervous pitch, could not keep quiet. I felt him turning and wriggling about as he looked back at the terrible receding city, ahead at the cave-riddled, cube-barnacled peaks, sidewise at the bleak sea of snowy, rampart-strown foothills, and upward at the seething, grotesquely clouded sky. It was then, just as I was trying to steer safely through the pass, that his mad shrieking brought us so close to disaster by shattering my tight hold on myself and causing me to fumble helplessly with the controls for a moment. A second afterward my resolution triumphed and we made the crossing safely—yet I am afraid that Danforth will never be the same again.

I have said that Danforth refused to tell me what final horror made him scream out so insanely—a horror which, I feel sadly sure, is mainly responsible for his present breakdown. We had snatches of shouted conversation above the wind's piping and the engine's buzzing as we reached the safe side of the range and swooped slowly down toward the camp, but that had mostly to do with the pledges of secrecy we had made as we prepared to leave the nightmare city. Certain things, we had agreed, were not for people to know and discuss lightly—and I would not speak of them now but for the need of heading off that Starkweather-Moore Expedition, and others, at any cost. It is absolutely necessary, for the peace and safety of mankind, that some of earth's dark, dead corners and unplumbed depths be let alone; lest sleeping abnormalities wake to resurgent life, and blasphemously surviving nightmares squirm and splash out of their black lairs to newer and wider conquests.

All that Danforth has ever hinted is that the final horror was a mirage. It was not, he declares, anything connected with the cubes and caves of echoing, vaporous, wormily honeycombed mountains of madness which we crossed; but a single fantastic, daemoniac glimpse, among the churning zenith-clouds, of what lay back of those other violet westward mountains which the Old Ones had shunned and feared. It is very probable that the thing was a sheer delusion born of the previous stresses we had passed through, and of the actual though unrecognised mirage of the dead transmontane city experienced near Lake's camp the day before; but it was so real to Danforth that he suffers from it still.

He has on rare occasions whispered disjointed and irresponsible

things about "the black pit", "the carven rim", "the proto-shoggoths", "the windowless solids with five dimensions", "the nameless cylinder", "the elder pharos", "Yog-Sothoth", "the primal white jelly", "the colour out of space", "the wings", "the eyes in darkness", "the moon-ladder", "the original, the eternal, the undying", and other bizarre conceptions; but when he is fully himself he repudiates all this and attributes it to his curious and macabre reading of earlier years. Danforth, indeed, is known to be among the few who have ever dared go completely through that worm-riddled copy of the *Necronomicon* kept under lock and key in the college library.

The higher sky, as we crossed the range, was surely vaporous and disturbed enough; and although I did not see the zenith I can well imagine that its swirls of ice-dust may have taken strange forms. Imagination, knowing how vividly distant scenes can sometimes be reflected, refracted, and magnified by such layers of restless cloud, might easily have supplied the rest—and of course Danforth did not hint any of those specific horrors till after his memory had had a chance to draw on his bygone reading. He could never have seen so much in one instantaneous glance.

At the time his shrieks were confined to the repetition of a single mad word of all too obvious source:

"Tekeli-li! Tekeli-li!"

The Case of Charles Dexter Ward

"The essential Saltes of Animals may be so prepared and preserved, that an ingenious Man may have the whole Ark of Noah in his own Studie, and raise the fine Shape of an Animal out of its Ashes at his Pleasure; and by the lyke Method from the essential Saltes of humane Dust, a Philosopher may, without any criminal Necromancy, call up the Shape of any dead Ancestour from the Dust whereinto his Bodie has been incinerated."

BORELLUS

I. *A Result and a Prologue*

1.

From a private hospital for the insane near Providence, Rhode Island, there recently disappeared an exceedingly singular person. He bore the name of Charles Dexter Ward, and was placed under restraint most reluctantly by the grieving father who had watched his aberration grow from a mere eccentricity to a dark mania involving both a possibility of murderous tendencies and a profound and peculiar change in the apparent contents of his mind. Doctors con-

fess themselves quite baffled by his case, since it presented oddities of a general physiological as well as psychological character.

In the first place, the patient seemed oddly older than his twenty-six years would warrant. Mental disturbance, it is true, will age one rapidly; but the face of this young man had taken on a subtle cast which only the very aged normally acquire. In the second place, his organic processes shewed a certain queerness of proportion which nothing in medical experience can parallel. Respiration and heart action had a baffling lack of symmetry; the voice was lost, so that no sounds above a whisper were possible; digestion was incredibly prolonged and minimised, and neural reactions to standard stimuli bore no relation at all to anything heretofore recorded, either normal or pathological. The skin had a morbid chill and dryness, and the cellular structure of the tissue seemed exaggeratedly coarse and loosely knit. Even a large olive birthmark on the right hip had disappeared, whilst there had formed on the chest a very peculiar mole or blackish spot of which no trace existed before. In general, all physicians agree that in Ward the processes of metabolism had become retarded to a degree beyond precedent.

Psychologically, too, Charles Ward was unique. His madness held no affinity to any sort recorded in even the latest and most exhaustive of treatises, and was conjoined to a mental force which would have made him a genius or a leader had it not been twisted into strange and grotesque forms. Dr. Willett, who was Ward's family physician, affirms that the patient's gross mental capacity, as gauged by his response to matters outside the sphere of his insanity, had actually increased since the seizure. Ward, it is true, was always a scholar and an antiquarian; but even his most brilliant early work did not shew the prodigious grasp and insight displayed during his last examinations by the alienists. It was, indeed, a difficult matter to obtain a legal commitment to the hospital, so powerful and lucid did the youth's mind seem; and only on the evidence of others, and on the strength of many abnormal gaps in his stock of information as distinguished from his intelligence, was he finally placed in confinement. To the very moment of his vanishment he was an omnivorous reader and as great a conversationalist as his poor voice permitted; and shrewd observers, failing to foresee his

escape, freely predicted that he would not be long in gaining his discharge from custody.

Only Dr. Willett, who brought Charles Ward into the world and had watched his growth of body and mind ever since, seemed frightened at the thought of his future freedom. He had had a terrible experience and had made a terrible discovery which he dared not reveal to his sceptical colleagues. Willett, indeed, presents a minor mystery all his own in his connexion with the case. He was the last to see the patient before his flight, and emerged from that final conversation in a state of mixed horror and relief which several recalled when Ward's escape became known three hours later. That escape itself is one of the unsolved wonders of Dr. Waite's hospital. A window open above a sheer drop of sixty feet could hardly explain it, yet after that talk with Willett the youth was undeniably gone. Willett himself has no public explanations to offer, though he seems strangely easier in mind than before the escape. Many, indeed, feel that he would like to say more if he thought any considerable number would believe him. He had found Ward in his room, but shortly after his departure the attendants knocked in vain. When they opened the door the patient was not there, and all they found was the open window with a chill April breeze blowing in a cloud of fine bluish-grey dust that almost choked them. True, the dogs howled some time before; but that was while Willett was still present, and they had caught nothing and shewn no disturbance later on. Ward's father was told at once over the telephone, but he seemed more saddened than surprised. By the time Dr. Waite called in person, Dr. Willett had been talking with him, and both disavowed any knowledge or complicity in the escape. Only from certain closely confidential friends of Willett and the senior Ward have any clues been gained, and even these are too wildly fantastic for general credence. The one fact which remains is that up to the present time no trace of the missing madman has been unearthed.

Charles Ward was an antiquarian from infancy, no doubt gaining his taste from the venerable town around him, and from the relics of the past which filled every corner of his parents' old mansion in Prospect Street on the crest of the hill. With the years his

devotion to ancient things increased; so that history, genealogy, and the study of colonial architecture, furniture, and craftsmanship at length crowded everything else from his sphere of interests. These tastes are important to remember in considering his madness; for although they do not form its absolute nucleus, they play a prominent part in its superficial form. The gaps of information which the alienists noticed were all related to modern matters, and were invariably offset by a correspondingly excessive though outwardly concealed knowledge of bygone matters as brought out by adroit questioning; so that one would have fancied the patient literally transferred to a former age through some obscure sort of auto-hypnosis. The odd thing was that Ward seemed no longer interested in the antiquities he knew so well. He had, it appears, lost his regard for them through sheer familiarity; and all his final efforts were obviously bent toward mastering those common facts of the modern world which had been so totally and unmistakably expunged from his brain. That this wholesale deletion had occurred, he did his best to hide; but it was clear to all who watched him that his whole programme of reading and conversation was determined by a frantic wish to imbibe such knowledge of his own life and of the ordinary practical and cultural background of the twentieth century as ought to have been his by virtue of his birth in 1902 and his education in the schools of our own time. Alienists are now wondering how, in view of his vitally impaired range of data, the escaped patient manages to cope with the complicated world of today; the dominant opinion being that he is 'lying low' in some humble and unexacting position till his stock of modern information can be brought up to the normal.

The beginning of Ward's madness is a matter of dispute among alienists. Dr. Lyman, the eminent Boston authority, places it in 1919 or 1920, during the boy's last year at the Moses Brown School, when he suddenly turned from the study of the past to the study of the occult, and refused to qualify for college on the ground that he had individual researches of much greater importance to make. This is certainly borne out by Ward's altered habits at the time, especially by his continual search through town records and among old burying-grounds for a certain grave dug in 1771; the grave of an ancestor named Joseph Curwen, some of whose papers

he professed to have found behind the panelling of a very old house in Olney Court, on Stampers' Hill, which Curwen was known to have built and occupied. It is, broadly speaking, undeniable that the winter of 1919-20 saw a great change in Ward; whereby he abruptly stopped his general antiquarian pursuits and embarked on a desperate delving into occult subjects both at home and abroad, varied only by this strangely persistent search for his forefather's grave.

From this opinion, however, Dr. Willett substantially dissents; basing his verdict on his close and continuous knowledge of the patient, and on certain frightful investigations and discoveries which he made toward the last. Those investigations and discoveries have left their mark upon him; so that his voice trembles when he tells them, and his hand trembles when he tries to write of them. Willett admits that the change of 1919-20 would ordinarily appear to mark the beginning of a progressive decadence which culminated in the horrible and uncanny alienation of 1928; but believes from personal observation that a finer distinction must be made. Granting freely that the boy was always ill-balanced temperamentally, and prone to be unduly susceptible and enthusiastic in his responses to phenomena around him, he refuses to concede that the early alteration marked the actual passage from sanity to madness; crediting instead Ward's own statement that he had discovered or rediscovered something whose effect on human thought was likely to be marvellous and profound. The true madness, he is certain, came with a later change; after the Curwen portrait and the ancient papers had been unearthed; after a trip to strange foreign places had been made, and some terrible invocations chanted under strange and secret circumstances; after certain *answers* to these invocations had been plainly indicated, and a frantic letter penned under agonising and inexplicable conditions; after the wave of vampirism and the ominous Pawtuxet gossip; and after the patient's memory commenced to exclude contemporary images whilst his voice failed and his physical aspect underwent the subtle modification so many subsequently noticed.

It was only about this time, Willett points out with much acuteness, that the nightmare qualities became indubitably linked with Ward; and the doctor feels shudderingly sure that enough solid evi-

dence exists to sustain the youth's claim regarding his crucial discovery. In the first place, two workmen of high intelligence saw Joseph Curwen's ancient papers found. Secondly, the boy once shewed Dr. Willett those papers and a page of the Curwen diary, and each of the documents had every appearance of genuineness. The hole where Ward claimed to have found them was long a visible reality, and Willett had a very convincing final glimpse of them in surroundings which can scarcely be believed and can never perhaps be proved. Then there were the mysteries and coincidences of the Orne and Hutchinson letters, and the problem of the Curwen penmanship and of what the detectives brought to light about Dr. Allen; these things, and the terrible message in mediaeval minuscules found in Willett's pocket when he gained consciousness after his shocking experience.

And most conclusive of all, there are the two hideous *results* which the doctor obtained from a certain pair of formulae during his final investigations; results which virtually proved the authenticity of the papers and of their monstrous implications at the same time that those papers were borne forever from human knowledge.

2.

One must look back at Charles Ward's earlier life as at something belonging as much to the past as the antiquities he loved so keenly. In the autumn of 1918, and with a considerable show of zest in the military training of the period, he had begun his junior year at the Moses Brown School, which lies very near his home. The old main building, erected in 1819, had always charmed his youthful antiquarian sense; and the spacious park in which the academy is set appealed to his sharp eye for landscape. His social activities were few; and his hours were spent mainly at home, in rambling walks, in his classes and drills, and in pursuit of antiquarian and genealogical data at the City Hall, the State House, the Public Library, the Athenaeum, the Historical Society, the John Carter Brown and John Hay Libraries of Brown University, and the newly opened Shepley Library in Benefit Street. One may picture him yet as he was in those days; tall, slim, and blond, with studious eyes and a

slight stoop, dressed somewhat carelessly, and giving a dominant impression of harmless awkwardness rather than attractiveness.

His walks were always adventures in antiquity, during which he managed to recapture from the myriad relics of a glamorous old city a vivid and connected picture of the centuries before. His home was a great Georgian mansion atop the well-nigh precipitous hill that rises just east of the river; and from the rear windows of its rambling wings he could look dizzily out over all the clustered spires, domes, roofs, and skyscraper summits of the lower town to the purple hills of the countryside beyond. Here he was born, and from the lovely classic porch of the double-bayed brick facade his nurse had first wheeled him in his carriage; past the little white farmhouse of two hundred years before that the town had long ago overtaken, and on toward the stately colleges along the shady, sumptuous street, whose old square brick mansions and smaller wooden houses with narrow, heavy-columned Doric porches dreamed solid and exclusive amidst their generous yards and gardens.

He had been wheeled, too, along sleepy Congdon Street, one tier lower down on the steep hill, and with all its eastern homes on high terraces. The small wooden houses averaged a greater age here, for it was up this hill that the growing town had climbed; and in these rides he had imbibed something of the colour of a quaint colonial village. The nurse used to stop and sit on the benches of Prospect Terrace to chat with policemen; and one of the child's first memories was of the great westward sea of hazy roofs and domes and steeples and far hills which he saw one winter afternoon from that great railed embankment, all violet and mystic against a fevered, apocalyptic sunset of reds and golds and purples and curious greens. The vast marble dome of the State House stood out in massive silhouette, its crowning statue haloed fantastically by a break in one of the tinted stratus clouds that barred the flaming sky.

When he was larger his famous walks began; first with his impatiently dragged nurse, and then alone in dreamy meditation. Farther and farther down that almost perpendicular hill he would venture, each time reaching older and quainter levels of the ancient city. He would hesitate gingerly down vertical Jenckes Street with

its bank walls and colonial gables to the shady Benefit Street corner, where before him was a wooden antique with an Ionic-pilastered pair of doorways, and beside him a prehistoric gambrel-roofer with a bit of primal farmyard remaining, and the great Judge Durfee house with its fallen vestiges of Georgian grandeur. It was getting to be a slum here; but the titan elms cast a restoring shadow over the place, and the boy used to stroll south past the long lines of the pre-Revolutionary homes with their great central chimneys and classic portals. On the eastern side they were set high over basements with railed double flights of stone steps, and the young Charles could picture them as they were when the street was new, and red heels and periwigs set off the painted pediments whose signs of wear were now becoming so visible.

Westward the hill dropped almost as steeply as above, down to the old "Town Street" that the founders had laid out at the river's edge in 1636. Here ran innumerable little lanes with leaning, huddled houses of immense antiquity; and fascinated though he was, it was long before he dared to thread their archaic verticality for fear they would turn out a dream or a gateway to unknown terrors. He found it much less formidable to continue along Benefit Street past the iron fence of St. John's hidden churchyard and the rear of the 1761 Colony House and the mouldering bulk of the Golden Ball Inn where Washington stopped. At Meeting Street—the successive Gaol Lane and King Street of other periods—he would look upward to the east and see the arched flight of steps to which the highway had to resort in climbing the slope, and downward to the west, glimpsing the old brick colonial schoolhouse that smiles across the road at the ancient Sign of Shakespear's Head where the *Providence Gazette and Country-Journal* was printed before the Revolution. Then came the exquisite First Baptist Church of 1775, luxurious with its matchless Gibbs steeple, and the Georgian roofs and cupolas hovering by. Here and to the southward the neighbourhood became better, flowering at last into a marvellous group of early mansions; but still the little ancient lanes led off down the precipice to the west, spectral in their many-gabled archaism and dipping to a riot of iridescent decay where the wicked old waterfront recalls its proud East India days amidst polyglot vice and

squalor, rotting wharves, and blear-eyed ship-chandleries, with such surviving alley names as Packet, Bullion, Gold, Silver, Coin, Doubloon, Sovereign, Guilder, Dollar, Dime, and Cent.

Sometimes, as he grew taller and more adventurous, young Ward would venture down into this maelstrom of tottering houses, broken transoms, tumbling steps, twisted balustrades, swarthy faces, and nameless odours; winding from South Main to South Water, searching out the docks where the bay and sound steamers still touched, and returning northward at this lower level past the steep-roofed 1816 warehouses and the broad square at the Great Bridge, where the 1773 Market House still stands firm on its ancient arches. In that square he would pause to drink in the bewildering beauty of the old town as it rises on its eastward bluff, decked with its two Georgian spires and crowned by the vast new Christian Science dome as London is crowned by St. Paul's. He liked mostly to reach this point in the late afternoon, when the slanting sunlight touches the Market House and the ancient hill roofs and belfries with gold, and throws magic around the dreaming wharves where Providence Indiamen used to ride at anchor. After a long look he would grow almost dizzy with a poet's love for the sight, and then he would scale the slope homeward in the dusk past the old white church and up the narrow precipitous ways where yellow gleams would begin to peep out in small-paned windows and through fanlights set high over double flights of steps with curious wrought-iron railings.

At other times, and in later years, he would seek for vivid contrasts; spending half a walk in the crumbling colonial regions northwest of his home, where the hill drops to the lower eminence of Stampers' Hill with its ghetto and negro quarter clustering round the place where the Boston stage coach used to start before the Revolution, and the other half in the gracious southerly realm about George, Benevolent, Power, and Williams Streets, where the old slope holds unchanged the fine estates and bits of walled garden and steep green lane in which so many fragrant memories linger. These rambles, together with the diligent studies which accompanied them, certainly account for a large amount of the antiquarian lore which at last crowded the modern world from Charles

Ward's mind; and illustrate the mental soil upon which fell, in that fateful winter of 1919-20, the seeds that came to such strange and terrible fruition.

Dr. Willett is certain that, up to this ill-omened winter of first change, Charles Ward's antiquarianism was free from every trace of the morbid. Graveyards held for him no particular attraction beyond their quaintness and historic value, and of anything like violence or savage instinct he was utterly devoid. Then, by insidious degrees, there appeared to develop a curious sequel to one of his genealogical triumphs of the year before; when he had discovered among his maternal ancestors a certain very long-lived man named Joseph Curwen, who had come from Salem in March of 1692, and about whom a whispered series of highly peculiar and disquieting stories clustered.

Ward's great-great-grandfather Welcome Potter had in 1785 married a certain "Ann Tillinghast, daughter of Mrs. Eliza, daughter to Capt. James Tillinghast", of whose paternity the family had preserved no trace. Late in 1918, whilst examining a volume of original town records in manuscript, the young genealogist encountered an entry describing a legal change of name, by which in 1772 a Mrs. Eliza Curwen, widow of Joseph Curwen, resumed, along with her seven-year-old daughter Ann, her maiden name of Tillinghast; on the ground 'that her Husband's name was become a publick Reproach by Reason of what was knowne after his Decease; the which confirming an antient common Rumour, tho' not to be credited by a loyall Wife till so proven as to be wholly past Doubting'. This entry came to light upon the accidental separation of two leaves which had been carefully pasted together and treated as one by a laboured revision of the page numbers.

It was at once clear to Charles Ward that he had indeed discovered a hitherto unknown great-great-great-grandfather. The discovery doubly excited him because he had already heard vague reports and seen scattered allusions relating to this person; about whom there remained so few publicly available records, aside from those becoming public only in modern times, that it almost seemed as if a conspiracy had existed to blot him from memory. What did appear, moreover, was of such a singular and provocative nature that one could not fail to imagine curiously what it was that the

colonial recorders were so anxious to conceal and forget; or to suspect that the deletion had reasons all too valid.

Before this, Ward had been content to let his romancing about old Joseph Curwen remain in the idle stage; but having discovered his own relationship to this apparently "hushed-up" character, he proceeded to hunt out as systematically as possible whatever he might find concerning him. In this excited quest he eventually succeeded beyond his highest expectations; for old letters, diaries, and sheaves of unpublished memoirs in cobwebbed Providence garrets and elsewhere yielded many illuminating passages which their writers had not thought it worth their while to destroy. One important sidelight came from a point as remote as New York, where some Rhode Island colonial correspondence was stored in the Museum at Fraunces' Tavern. The really crucial thing, though, and what in Dr. Willett's opinion formed the definite source of Ward's undoing, was the matter found in August 1919 behind the paneling of the crumbling house in Olney Court. It was that, beyond a doubt, which opened up those black vistas whose end was deeper than the pit.

II. *An Antecedent and a Horror*

1.

Joseph Curwen, as revealed by the rambling legends embodied in what Ward heard and unearthed, was a very astonishing, enigmatic, and obscurely horrible individual. He had fled from Salem to Providence—that universal haven of the odd, the free, and the dissenting—at the beginning of the great witchcraft panic; being in fear of accusation because of his solitary ways and queer chemical or alchemical experiments. He was a colourless-looking man of about thirty, and was soon found qualified to become a freeman of Providence; thereafter buying a home lot just north of Gregory Dexter's at about the foot of Olney Street. His house was built on Stampers' Hill west of the Town Street, in what later became Olney Court; and in 1761 he replaced this with a larger one, on the same site, which is still standing.

Now the first odd thing about Joseph Curwen was that he did not seem to grow much older than he had been on his arrival. He

engaged in shipping enterprises, purchased wharfage near Mile-End Cove, helped rebuild the Great Bridge in 1713, and in 1723 was one of the founders of the Congregational Church on the hill; but always did he retain the nondescript aspect of a man not greatly over thirty or thirty-five. As decades mounted up, this singular quality began to excite wide notice; but Curwen always explained it by saying that he came of hardy forefathers, and practiced a simplicity of living which did not wear him out. How such simplicity could be reconciled with the inexplicable comings and goings of the secretive merchant, and with the queer gleaming of his windows at all hours of night, was not very clear to the townsfolk; and they were prone to assign other reasons for his continued youth and longevity. It was held, for the most part, that Curwen's incessant mixings and boilings of chemicals had much to do with his condition. Gossip spoke of the strange substances he brought from London and the Indies on his ships or purchased in Newport, Boston, and New York; and when old Dr. Jabez Bowen came from Rehoboth and opened his apothecary shop across the Great Bridge at the Sign of the Unicorn and Mortar, there was ceaseless talk of the drugs, acids, and metals that the taciturn recluse incessantly bought or ordered from him. Acting on the assumption that Curwen possessed a wondrous and secret medical skill, many sufferers of various sorts applied to him for aid; but though he appeared to encourage their belief in a non-committal way, and always gave them odd-coloured potions in response to their requests, it was observed that his ministrations to others seldom proved of benefit. At length, when over fifty years had passed since the stranger's advent, and without producing more than five years' apparent change in his face and physique, the people began to whisper more darkly; and to meet more than half way that desire for isolation which he had always shewn.

Private letters and diaries of the period reveal, too, a multitude of other reasons why Joseph Curwen was marvelled at, feared, and finally shunned like a plague. His passion for graveyards, in which he was glimpsed at all hours and under all conditions, was notorious; though no one had witnessed any deed on his part which could actually be termed ghoulish. On the Pawtuxet Road he had a farm, at which he generally lived during the summer, and to which he

would frequently be seen riding at various odd times of the day or night. Here his only visible servants, farmers, and caretakers were a sullen pair of aged Narragansett Indians; the husband dumb and curiously scarred, and the wife of a very repulsive cast of countenance, probably due to a mixture of negro blood. In the lean-to of this house was the laboratory where most of the chemical experiments were conducted. Curious porters and teamers who delivered bottles, bags, or boxes at the small rear door would exchange accounts of the fantastic flasks, crucibles, alembics, and furnaces they saw in the low shelved room; and prophesied in whispers that the close-mouthed "chymist"—by which they meant *alchemist*—would not be long in finding the Philosopher's Stone. The nearest neighbours to this farm—the Fenners, a quarter of a mile away—had still queerer things to tell of certain sounds which they insisted came from the Curwen place in the night. There were cries, they said, and sustained howlings; and they did not like the large number of livestock which thronged the pastures, for no such amount was needed to keep a lone old man and a very few servants in meat, milk, and wool. The identity of the stock seemed to change from week to week as new droves were purchased from the Kingstown farmers. Then, too, there was something very obnoxious about a certain great stone outbuilding with only high narrow slits for windows.

Great Bridge idlers likewise had much to say of Curwen's town house in Olney Court; not so much the fine new one built in 1761, when the man must have been nearly a century old, but the first low gambrel-roofed one with the windowless attic and shingled sides, whose timbers he took the peculiar precaution of burning after its demolition. Here there was less mystery, it is true; but the hours at which lights were seen, the secretiveness of the two swarthy foreigners who comprised the only menservants, the hideous indistinct mumbling of the incredibly aged French housekeeper, the large amounts of food seen to enter a door within which only four persons lived, and the *quality* of certain voices often heard in muffled conversation at highly unseasonable times, all combined with what was known of the Pawtuxet farm to give the place a bad name.

In choicer circles, too, the Curwen home was by no means undiscussed; for as the newcomer had gradually worked into the church

and trading life of the town, he had naturally made acquaintances of the better sort, whose company and conversation he was well fitted by education to enjoy. His birth was known to be good, since the Curwens or Corwins of Salem needed no introduction in New England. It developed that Joseph Curwen had travelled much in very early life, living for a time in England and making at least two voyages to the Orient; and his speech, when he deigned to use it, was that of a learned and cultivated Englishman. But for some reason or other Curwen did not care for society. Whilst never actually rebuffing a visitor, he always reared such a wall of reserve that few could think of anything to say to him which would not sound inane.

There seemed to lurk in his bearing some cryptic, sardonic arrogance, as if he had come to find all human beings dull through having moved among stranger and more potent entities. When Dr. Checkley the famous wit came from Boston in 1738 to be rector of King's Church, he did not neglect calling on one of whom he soon heard so much; but left in a very short while because of some sinister undercurrent he detected in his host's discourse. Charles Ward told his father, when they discussed Curwen one winter evening, that he would give much to learn what the mysterious old man had said to the sprightly cleric, but that all diarists agree concerning Dr. Checkley's reluctance to repeat anything he had heard. The good man had been hideously shocked, and could never recall Joseph Curwen without a visible loss of the gay urbanity for which he was famed.

More definite, however, was the reason why another man of taste and breeding avoided the haughty hermit. In 1746 Mr. John Merritt, an elderly English gentleman of literary and scientific leanings, came from Newport to the town which was so rapidly overtaking it in standing, and built a fine country seat on the Neck in what is now the heart of the best residence section. He lived in considerable style and comfort, keeping the first coach and liveried servants in town, and taking great pride in his telescope, his microscope, and his well-chosen library of English and Latin books. Hearing of Curwen as the owner of the best library in Providence, Mr. Merritt early paid him a call, and was more cordially received than most other callers at the house had been. His admiration for

his host's ample shelves, which besides the Greek, Latin, and English classics were equipped with a remarkable battery of philosophical, mathematical, and scientific works including Paracelsus, Agricola, Van Helmont, Sylvius, Glauber, Boyle, Boerhaave, Becher, and Stahl, led Curwen to suggest a visit to the farmhouse and laboratory whither he had never invited anyone before; and the two drove out at once in Mr. Merritt's coach.

Mr. Merritt always confessed to seeing nothing really horrible at the farmhouse, but maintained that the titles of the books in the special library of thaumaturgical, alchemical, and theological subjects which Curwen kept in a front room were alone sufficient to inspire him with a lasting loathing. Perhaps, however, the facial expression of the owner in exhibiting them contributed much of the prejudice. This bizarre collection, besides a host of standard works which Mr. Merritt was not too alarmed to envy, embraced nearly all the cabbalists, daemonologists, and magicians known to man; and was a treasure-house of lore in the doubtful realms of alchemy and astrology. Hermes Trismegistus in Mesnard's edition, the *Turba Philosophorum*, Geber's *Liber Investigationis*, and Artepheus' *Key of Wisdom* all were there; with the cabbalistic *Zohar*, Peter Jammy's set of Albertus Magnus, Raymond Lully's *Ars Magna et Ultima* in Zetsner's edition, Roger Bacon's *Thesaurus Chemicus*, Fludd's *Clavis Alchimiae*, and Trithemius' *De Lapide Philosophico* crowding them close. Mediaeval Jews and Arabs were represented in profusion, and Mr. Merritt turned pale when, upon taking down a fine volume conspicuously labelled as the *Qanoon-e-Islam*, he found it was in truth the forbidden *Necronomicon* of the mad Arab Abdul Alhazred, of which he had heard such monstrous things whispered some years previously after the exposure of nameless rites at the strange little fishing village of Kingsport, in the Province of the Massachusetts-Bay.

But oddly enough, the worthy gentleman owned himself most impalpably disquieted by a mere minor detail. On the huge mahogany table there lay face downward a badly worn copy of Borellus, bearing many cryptical marginalia and interlineations in Curwen's hand. The book was open at about its middle, and one paragraph displayed such thick and tremulous pen-strokes beneath the lines of mystic black-letter that the visitor could not resist scanning it

through. Whether it was the nature of the passage underscored, or the feverish heaviness of the strokes which formed the underscoring, he could not tell; but something in that combination affected him very badly and very peculiarly. He recalled it to the end of his days, writing it down from memory in his diary and once trying to recite it to his close friend Dr. Checkley till he saw how greatly it disturbed the urbane rector. It read:

"The essential Saltes of Animals may be so prepared and preserved, that an ingenious Man may have the whole Ark of Noah in his own Studie, and raise the fine Shape of an Animal out of its Ashes at his Pleasure; and by the lyke Method from the essential Saltes of humane Dust, a Philosopher may, without any criminal Necromancy, call up the Shape of any dead Ancestour from the Dust whereinto his Bodie has been incinerated."

It was near the docks along the southerly part of the Town Street, however, that the worst things were muttered about Joseph Curwen. Sailors are superstitious folk; and the seasoned salts who manned the infinite rum, slave, and molasses sloops, the rakish privateers, and the great brigs of the Browns, Crawfords, and Tillinghasts, all made strange furtive signs of protection when they saw the slim, deceptively young-looking figure with its yellow hair and slight stoop entering the Curwen warehouse in Doubloon Street or talking with captains and supercargoes on the long quay where the Curwen ships rode restlessly. Curwen's own clerks and captains hated and feared him, and all his sailors were mongrel riff-raff from Martinique, St. Eustatius, Havana, or Port Royal. It was, in a way, the frequency with which these sailors were replaced which inspired the acutest and most tangible part of the fear in which the old man was held. A crew would be turned loose in the town on shore leave, some of its members perhaps charged with this errand or that; and when reassembled it would be almost sure to lack one or more men. That many of the errands had concerned the farm on the Pawtuxet Road, and that few of the sailors had ever been seen to return from that place, was not forgotten; so that in time it became exceedingly difficult for Curwen to keep his oddly assorted hands. Almost invariably several would desert soon after hearing the gossip of the Providence wharves, and their replacement in the West Indies became an increasingly great problem to the merchant.

By 1760 Joseph Curwen was virtually an outcast, suspected of vague horrors and daemonic alliances which seemed all the more menacing because they could not be named, understood, or even proved to exist. The last straw may have come from the affair of the missing soldiers in 1758, for in March and April of that year two Royal regiments on their way to New France were quartered in Providence, and depleted by an inexplicable process far beyond the average rate of desertion. Rumour dwelt on the frequency with which Curwen was wont to be seen talking with the red-coated strangers; and as several of them began to be missed, people thought of the odd conditions among his own seamen. What would have happened if the regiments had not been ordered on, no one can tell.

Meanwhile the merchant's worldly affairs were prospering. He had a virtual monopoly of the town's trade in saltpetre, black pepper, and cinnamon, and easily led any other one shipping establishment save the Browns in his importation of brassware, indigo, cotton, woollens, salt, rigging, iron, paper, and English goods of every kind. Such shopkeepers as James Green, at the Sign of the Elephant in Cheapside, the Russells, at the Sign of the Golden Eagle across the Bridge, or Clark and Nightingale at the Frying-Pan and Fish near the New Coffee-House, depended almost wholly upon him for their stock; and his arrangements with the local distillers, the Narragansett dairymen and horse-breeders, and the Newport candle-makers, made him one of the prime exporters of the Colony.

Ostracised though he was, he did not lack for civic spirit of a sort. When the Colony House burned down, he subscribed handsomely to the lotteries by which the new brick one—still standing at the head of its parade in the old main street—was built in 1761. In that same year, too, he helped rebuild the Great Bridge after the October gale. He replaced many of the books of the public library consumed in the Colony House fire, and bought heavily in the lottery that gave the muddy Market Parade and deep-rutted Town Street their pavement of great round stones with a brick footwalk or "causey" in the middle. About this time, also, he built the plain but excellent new house whose doorway is still such a triumph of carving. When the Whitefield adherents broke off from Dr. Cotton's hill church in 1743 and founded Deacon Snow's church

across the Bridge, Curwen had gone with them; though his zeal and attendance soon abated. Now, however, he cultivated piety once more; as if to dispel the shadow which had thrown him into isolation and would soon begin to wreck his business fortunes if not sharply checked.

2.

The sight of this strange, pallid man, hardly middle-aged in aspect yet certainly not less than a full century old, seeking at last to emerge from a cloud of fright and detestation too vague to pin down or analyse, was at once a pathetic, a dramatic, and a contemptible thing. Such is the power of wealth and of surface gestures, however, that there came indeed a slight abatement in the visible aversion displayed toward him; especially after the rapid disappearances of his sailors abruptly ceased. He must likewise have begun to practice an extreme care and secrecy in his graveyard expeditions, for he was never again caught at such wanderings; whilst the rumours of uncanny sounds and manoeuvres at his Pawtuxet farm diminished in proportion. His rate of food consumption and cattle replacement remained abnormally high; but not until modern times, when Charles Ward examined a set of his accounts and invoices in the Shepley Library, did it occur to any person—save one embittered youth, perhaps—to make dark comparisons between the large number of Guinea blacks he imported until 1766, and the disturbingly small number for whom he could produce bona fide bills of sale either to slave-dealers at the Great Bridge or to the planters of the Narragansett Country. Certainly, the cunning and ingenuity of this abhorred character were uncannily profound, once the necessity for their exercise had become impressed upon him.

But of course the effect of all this belated mending was necessarily slight. Curwen continued to be avoided and distrusted, as indeed the one fact of his continued air of youth at a great age would have been enough to warrant; and he could see that in the end his fortunes would be likely to suffer. His elaborate studies and experiments, whatever they may have been, apparently required a heavy income for their maintenance; and since a change of environment would deprive him of the trading advantages he had gained, it

would not have profited him to begin anew in a different region just then. Judgment demanded that he patch up his relations with the townsfolk of Providence, so that his presence might no longer be a signal for hushed conversation, transparent excuses of errands elsewhere, and a general atmosphere of constraint and uneasiness. His clerks, being now reduced to the shiftless and impecunious residue whom no one else would employ, were giving him much worry; and he held to his sea-captains and mates only by shrewdness in gaining some kind of ascendancy over them—a mortgage, a promissory note, or a bit of information very pertinent to their welfare. In many cases, diarists have recorded with some awe, Curwen shewed almost the power of a wizard in unearthing family secrets for questionable use. During the final five years of his life it seemed as though only direct talks with the long-dead could possibly have furnished some of the data which he had so glibly at his tongue's end.

About this time the crafty scholar hit upon a last desperate expedient to regain his footing in the community. Hitherto a complete hermit, he now determined to contract an advantageous marriage; securing as a bride some lady whose unquestioned position would make all ostracism of his home impossible. It may be that he also had deeper reasons for wishing an alliance; reasons so far outside the known cosmic sphere that only papers found a century and a half after his death caused anyone to suspect them; but of this nothing certain can ever be learned. Naturally he was aware of the horror and indignation with which any ordinary courtship of his would be received, hence he looked about for some likely candidate upon whose parents he might exert a suitable pressure. Such candidates, he found, were not at all easy to discover; since he had very particular requirements in the way of beauty, accomplishments, and social security. At length his survey narrowed down to the household of one of his best and oldest ship-captains, a widower of high birth and unblemished standing named Dutee Tillinghast, whose only daughter Eliza seemed dowered with every conceivable advantage save prospects as an heiress. Capt. Tillinghast was completely under the domination of Curwen; and consented, after a terrible interview in his cupolaed house on Power's Lane hill, to sanction the blasphemous alliance.

Eliza Tillinghast was at that time eighteen years of age, and had

been reared as gently as the reduced circumstances of her father permitted. She had attended Stephen Jackson's school opposite the Court-House Parade; and had been diligently instructed by her mother, before the latter's death of smallpox in 1757, in all the arts and refinements of domestic life. A sampler of hers, worked in 1753 at the age of nine, may still be found in the rooms of the Rhode Island Historical Society. After her mother's death she had kept the house, aided only by one old black woman. Her arguments with her father concerning the proposed Curwen marriage must have been painful indeed; but of these we have no record. Certain it is that her engagement to young Ezra Weeden, second mate of the Crawford packet *Enterprise*, was dutifully broken off, and that her union with Joseph Curwen took place on the seventh of March, 1763, in the Baptist church, in the presence of one of the most distinguished assemblages which the town could boast; the ceremony being performed by the younger Samuel Winsor. The *Gazette* mentioned the event very briefly, and in most surviving copies the item in question seems to be cut or torn out. Ward found a single intact copy after much search in the archives of a private collector of note, observing with amusement the meaningless urbanity of the language:

"Monday evening last, Mr. Joseph Curwen, of this Town, Merchant, was married to Miss Eliza Tillinghast, Daughter of Capt. Dutee Tillinghast, a young Lady who has real Merit, added to a beautiful Person, to grace the connubial State and perpetuate its Felicity."

The collection of Durfee-Arnold letters, discovered by Charles Ward shortly before his first reputed madness in the private collection of Melville F. Peters, Esq., of George St., and covering this and a somewhat antecedent period, throws vivid light on the outrage done to public sentiment by this ill-assorted match. The social influence of the Tillinghasts, however, was not to be denied; and once more Joseph Curwen found his house frequented by persons whom he could never otherwise have induced to cross his threshold. His acceptance was by no means complete, and his bride was socially the sufferer through her forced venture; but at all events the wall of utter ostracism was somewhat worn down. In his treatment of his wife the strange bridegroom astonished both her and the

community by displaying an extreme graciousness and consideration. The new house in Olney Court was now wholly free from disturbing manifestations, and although Curwen was much absent at the Pawtuxet farm which his wife never visited, he seemed more like a normal citizen than at any other time in his long years of residence. Only one person remained in open enmity with him, this being the youthful ship's officer whose engagement to Eliza Tillinghast had been so abruptly broken. Ezra Weeden had frankly vowed vengeance; and though of a quiet and ordinarily mild disposition, was now gaining a hate-bred, dogged purpose which boded no good to the usurping husband.

On the seventh of May, 1765, Curwen's only child Ann was born; and was christened by the Rev. John Graves of King's Church, of which both husband and wife had become communicants shortly after their marriage, in order to compromise between their respective Congregational and Baptist affiliations. The record of this birth, as well as that of the marriage two years before, was stricken from most copies of the church and town annals where it ought to appear; and Charles Ward located both with the greatest difficulty after his discovery of the widow's change of name had apprised him of his own relationship, and engendered the feverish interest which culminated in his madness. The birth entry, indeed, was found very curiously through correspondence with the heirs of the loyalist Dr. Graves, who had taken with him a duplicate set of records when he left his pastorate at the outbreak of the Revolution. Ward had tried this source because he knew that his great-great-grandmother Ann Tillinghast Potter had been an Episcopalian.

Shortly after the birth of his daughter, an event he seemed to welcome with a fervour greatly out of keeping with his usual coldness, Curwen resolved to sit for a portrait. This he had painted by a very gifted Scotsman named Cosmo Alexander, then a resident of Newport, and since famous as the early teacher of Gilbert Stuart. The likeness was said to have been executed on a wall-panel of the library of the house in Olney Court, but neither of the two old diaries mentioning it gave any hint of its ultimate disposition. At this period the erratic scholar shewed signs of unusual abstraction, and spent as much time as he possibly could at his farm on the Pawtuxet Road.

He seemed, it was stated, in a condition of suppressed excitement or suspense; as if expecting some phenomenal thing or on the brink of some strange discovery. Chemistry or alchemy would appear to have played a great part, for he took from his house to the farm the greater number of his volumes on that subject.

His affectation of civic interest did not diminish, and he lost no opportunities for helping such leaders as Stephen Hopkins, Joseph Brown, and Benjamin West in their efforts to raise the cultural tone of the town, which was then much below the level of Newport in its patronage of the liberal arts. He had helped Daniel Jenckes found his bookshop in 1763, and was thereafter his best customer; extending aid likewise to the struggling *Gazette* that appeared each Wednesday at the Sign of Shakespear's Head. In politics he ardently supported Governor Hopkins against the Ward party whose prime strength was in Newport, and his really eloquent speech at Hacher's Hall in 1765 against the setting off of North Providence as a separate town with a pro-Ward vote in the General Assembly did more than any other one thing to wear down the prejudice against him. But Ezra Weeden, who watched him closely, sneered cynically at all this outward activity; and freely swore it was no more than a mask for some nameless traffick with the blackest gulfs of Tartarus. The revengeful youth began a systematic study of the man and his doings whenever he was in port; spending hours at night by the wharves with a dory in readiness when he saw lights in the Curwen warehouses, and following the small boat which would sometimes steal quietly off and down the bay. He also kept as close a watch as possible on the Pawtuxet farm, and was once severely bitten by the dogs the old Indian couple loosed upon him.

3.

In 1766 came the final change in Joseph Curwen. It was very sudden, and gained wide notice amongst the curious townsfolk; for the air of suspense and expectancy dropped like an old cloak, giving instant place to an ill-concealed exaltation of perfect triumph. Curwen seemed to have difficulty in restraining himself from public harangues on what he had found or learned or made; but apparently the need of secrecy was greater than the longing to share his

rejoicing, for no explanation was ever offered by him. It was after this transition, which appears to have come early in July, that the sinister scholar began to astonish people by his possession of information which only their long-dead ancestors would seem to be able to impart.

But Curwen's feverish secret activities by no means ceased with this change. On the contrary, they tended rather to increase; so that more and more of his shipping business was handled by the captains whom he now bound to him by ties of fear as potent as those of bankruptcy had been. He altogether abandoned the slave trade, alleging that its profits were constantly decreasing. Every possible moment was spent at the Pawtuxet farm; though there were rumours now and then of his presence in places which, though not actually near graveyards, were yet so situated in relation to graveyards that thoughtful people wondered just how thorough the old merchant's change of habits really was. Ezra Weeden, though his periods of espionage were necessarily brief and intermittent on account of his sea voyaging, had a vindictive persistence which the bulk of the practical townsfolk and farmers lacked; and subjected Curwen's affairs to a scrutiny such as they had never had before.

Many of the odd manoeuvres of the strange merchant's vessels had been taken for granted on account of the unrest of the times, when every colonist seemed determined to resist the provisions of the Sugar Act which hampered a prominent traffick. Smuggling and evasion were the rule in Narragansett Bay, and nocturnal landings of illicit cargoes were continuous commonplaces. But Weeden, night after night following the lighters or small sloops which he saw steal off from the Curwen warehouses at the Town Street docks, soon felt assured that it was not merely His Majesty's armed ships which the sinister skulker was anxious to avoid. Prior to the change in 1766 these boats had for the most part contained chained negroes, who were carried down and across the bay and landed at an obscure point on the shore just north of Pawtuxet; being afterward driven up the bluff and across country to the Curwen farm, where they were locked in that enormous stone outbuilding which had only high narrow slits for windows. After that change, however, the whole programme was altered. Importation of slaves ceased at once, and for a time Curwen abandoned his midnight sail-

ings. Then, about the spring of 1767, a new policy appeared. Once more the lighters grew wont to put out from the black, silent docks, and this time they would go down the bay some distance, perhaps as far as Namquit Point, where they would meet and receive cargo from strange ships of considerable size and widely varied appearance. Curwen's sailors would then deposit this cargo at the usual point on the shore, and transport it overland to the farm; locking it in the same cryptical stone building which had formerly received the negroes. The cargo consisted almost wholly of boxes and cases, of which a large proportion were oblong and heavy and disturbingly suggestive of coffins.

Weeden always watched the farm with unremitting assiduity; visiting it each night for long periods, and seldom letting a week go by without a sight except when the ground bore a footprint-revealing snow. Even then he would often walk as close as possible in the travelled road or on the ice of the neighbouring river to see what tracks others might have left. Finding his own vigils interrupted by nautical duties, he hired a tavern companion named Eleazar Smith to continue the survey during his absences; and between them the two could have set in motion some extraordinary rumours. That they did not do so was only because they knew the effect of publicity would be to warn their quarry and make further progress impossible. Instead, they wished to learn something definite before taking any action. What they did learn must have been startling indeed, and Charles Ward spoke many times to his parents of his regret at Weeden's later burning of his notebooks. All that can be told of their discoveries is what Eleazar Smith jotted down in a none too coherent diary, and what other diarists and letter-writers have timidly repeated from the statements which they finally made—and according to which the farm was only the outer shell of some vast and revolting menace, of a scope and depth too profound and intangible for more than shadowy comprehension.

It is gathered that Weeden and Smith became early convinced that a great series of tunnels and catacombs, inhabited by a very sizeable staff of persons besides the old Indian and his wife, underlay the farm. The house was an old peaked relic of the middle seventeenth century with enormous stack chimney and diamond-paned lattice windows, the laboratory being in a lean-to toward the

north, where the roof came nearly to the ground. This building stood clear of any other; yet judging by the different voices heard at odd times within, it must have been accessible through secret passages beneath. These voices, before 1766, were mere mumblings and negro whisperings and frenzied screams, coupled with curious chants or invocations. After that date, however, they assumed a very singular and terrible cast as they ran the gamut betwixt dronings of dull acquiescence and explosions of frantic pain or fury, rumblings of conversation and whines of entreaty, pantings of eagerness and shouts of protest. They appeared to be in different languages, all known to Curwen, whose rasping accents were frequently distinguishable in reply, reproof, or threatening. Sometimes it seemed that several persons must be in the house; Curwen, certain captives, and the guards of those captives. There were voices of a sort that neither Weeden nor Smith had ever heard before despite their wide knowledge of foreign parts, and many that they did seem to place as belonging to this or that nationality. The nature of the conversations seemed always a kind of catechism, as if Curwen were extorting some sort of information from terrified or rebellious prisoners.

Weeden had many verbatim reports of overheard scraps in his notebook, for English, French, and Spanish, which he knew, were frequently used; but of these nothing has survived. He did, however, say that besides a few ghoulish dialogues in which the past affairs of Providence families were concerned, most of the questions and answers he could understand were historical or scientific; occasionally pertaining to very remote places and ages. Once, for example, an alternately raging and sullen figure was questioned in French about the Black Prince's massacre at Limoges in 1370, as if there were some hidden reason which he ought to know. Curwen asked the prisoner—if prisoner it were—whether the order to slay was given because of the Sign of the Goat found on the altar in the ancient Roman crypt beneath the Cathedral, or whether the Dark Man of the Haute Vienne Coven had spoken the Three Words. Failing to obtain replies, the inquisitor had seemingly resorted to extreme means; for there was a terrific shriek followed by silence and muttering and a bumping sound.

None of these colloquies were ever ocularly witnessed, since the

windows were always heavily draped. Once, though, during a discourse in an unknown tongue, a shadow was seen on the curtain which startled Weeden exceedingly; reminding him of one of the puppets in a show he had seen in the autumn of 1764 in Hacher's Hall, when a man from Germantown, Pennsylvania, had given a clever mechanical spectacle advertised as a "View of the Famous City of Jerusalem, in which are represented Jerusalem, the Temple of Solomon, his Royal Throne, the noted Towers, and Hills, likewise the Sufferings of Our Saviour from the Garden of Gethsemane to the Cross on the Hill of Golgotha; an artful piece of Statuary, Worthy to be seen by the Curious." It was on this occasion that the listener, who had crept close to the window of the front room whence the speaking proceeded, gave a start which roused the old Indian pair and caused them to loose the dogs on him. After that no more conversations were ever heard in the house, and Weeden and Smith concluded that Curwen had transferred his field of action to regions below.

That such regions in truth existed, seemed amply clear from many things. Faint cries and groans unmistakably came up now and then from what appeared to be the solid earth in places far from any structure; whilst hidden in the bushes along the river-bank in the rear, where the high ground sloped steeply down to the valley of the Pawtuxet, there was found an arched oaken door in a frame of heavy masonry, which was obviously an entrance to caverns within the hill. When or how these catacombs could have been constructed, Weeden was unable to say; but he frequently pointed out how easily the place might have been reached by bands of unseen workmen from the river. Joseph Curwen put his mongrel seamen to diverse uses indeed! During the heavy spring rains of 1769 the two watchers kept a sharp eye on the steep river-bank to see if any subterranean secrets might be washed to light, and were rewarded by the sight of a profusion of both human and animal bones in places where deep gullies had been worn in the banks. Naturally there might be many explanations of such things in the rear of a stock farm, and in a locality where old Indian burying-grounds were common, but Weeden and Smith drew their own inferences.

It was in January 1770, whilst Weeden and Smith were still debating vainly on what, if anything, to think or do about the whole

bewildering business, that the incident of the *Fortaleza* occurred. Exasperated by the burning of the revenue sloop *Liberty* at Newport during the previous summer, the customs fleet under Admiral Wallace had adopted an increased vigilance concerning strange vessels; and on this occasion His Majesty's armed schooner *Cygnet*, under Capt. Charles Leslie, captured after a short pursuit one early morning the scow *Fortaleza* of Barcelona, Spain, under Capt. Manuel Arruda, bound according to its log from Grand Cairo, Egypt, to Providence. When searched for contraband material, this ship revealed the astonishing fact that its cargo consisted exclusively of Egyptian mummies, consigned to "Sailor A. B. C.", who would come to remove his goods in a lighter just off Namquit Point and whose identity Capt. Arruda felt himself in honour bound not to reveal. The Vice-Admiralty Court at Newport, at a loss what to do in view of the non-contraband nature of the cargo on the one hand and of the unlawful secrecy of the entry on the other hand, compromised on Collector Robinson's recommendation by freeing the ship but forbidding it a port in Rhode Island waters. There were later rumours of its having been seen in Boston Harbour, though it never openly entered the Port of Boston.

This extraordinary incident did not fail of wide remark in Providence, and there were not many who doubted the existence of some connexion between the cargo of mummies and the sinister Joseph Curwen. His exotic studies and his curious chemical importations being common knowledge, and his fondness for graveyards being common suspicion; it did not take much imagination to link him with a freakish importation which could not conceivably have been destined for anyone else in the town. As if conscious of this natural belief, Curwen took care to speak casually on several occasions of the chemical value of the balsams found in mummies; thinking perhaps that he might make the affair seem less unnatural, yet stopping just short of admitting his participation. Weeden and Smith, of course, felt no doubt whatsoever of the significance of the thing; and indulged in the wildest theories concerning Curwen and his monstrous labours.

The following spring, like that of the year before, had heavy rains; and the watchers kept careful track of the river-bank behind the Curwen farm. Large sections were washed away, and a certain

number of bones discovered; but no glimpse was afforded of any actual subterranean chambers or burrows. Something was rumoured, however, at the village of Pawtuxet about a mile below, where the river flows in falls over a rocky terrace to join the placid landlocked cove. There, where quaint old cottages climbed the hill from the rustic bridge, and fishing-smacks lay anchored at their sleepy docks, a vague report went round of things that were floating down the river and flashing into sight for a minute as they went over the falls. Of course the Pawtuxet is a long river which winds through many settled regions abounding in graveyards, and of course the spring rains had been very heavy; but the fisherfolk about the bridge did not like the wild way that one of the things stared as it shot down to the still water below, or the way that another half cried out although its condition had greatly departed from that of objects which normally cry out. That rumour sent Smith—for Weeden was just then at sea—in haste to the river-bank behind the farm; where surely enough there remained the evidences of an extensive cave-in. There was, however, no trace of a passage into the steep bank; for the miniature avalanche had left behind a solid wall of mixed earth and shrubbery from aloft. Smith went to the extent of some experimental digging, but was deterred by lack of success—or perhaps by fear of possible success. It is interesting to speculate on what the persistent and revengeful Weeden would have done had he been ashore at the time.

4.

By the autumn of 1770 Weeden decided that the time was ripe to tell others of his discoveries; for he had a large number of facts to link together, and a second eye-witness to refute the possible charge that jealousy and vindictiveness had spurred his fancy. As his first confidant he selected Capt. James Mathewson of the *Enterprise*, who on the one hand knew him well enough not to doubt his veracity, and on the other hand was sufficiently influential in the town to be heard in turn with respect. The colloquy took place in an upper room of Sabin's Tavern near the docks, with Smith present to corroborate virtually every statement; and it could be seen that Capt.

Mathewson was tremendously impressed. Like nearly everyone else in the town, he had had black suspicions of his own anent Joseph Curwen; hence it needed only this confirmation and enlargement of data to convince him absolutely. At the end of the conference he was very grave, and enjoined strict silence upon the two younger men. He would, he said, transmit the information separately to some ten or so of the most learned and prominent citizens of Providence; ascertaining their views and following whatever advice they might have to offer. Secrecy would probably be essential in any case, for this was no matter that the town constables or militia could cope with; and above all else the excitable crowd must be kept in ignorance, lest there be enacted in these already troublous times a repetition of that frightful Salem panic of less than a century before which had first brought Curwen hither.

The right persons to tell, he believed, would be Dr. Benjamin West, whose pamphlet on the late transit of Venus proved him a scholar and keen thinker; Rev. James Manning, President of the College which had just moved up from Warren and was temporarily housed in the new King Street schoolhouse awaiting the completion of its building on the hill above Presbyterian-Lane; ex-Governor Stephen Hopkins, who had been a member of the Philosophical Society at Newport, and was a man of very broad perceptions; John Carter, publisher of the *Gazette*; all four of the Brown brothers, John, Joseph, Nicholas, and Moses, who formed the recognised local magnates, and of whom Joseph was an amateur scientist of parts; old Dr. Jabez Bowen, whose erudition was considerable, and who had much first-hand knowledge of Curwen's odd purchases; and Capt. Abraham Whipple, a privateersman of phenomenal boldness and energy who could be counted on to lead in any active measures needed. These men, if favourable, might eventually be brought together for collective deliberation; and with them would rest the responsibility of deciding whether or not to inform the Governor of the Colony, Joseph Wanton of Newport, before taking action.

The mission of Capt. Mathewson prospered beyond his highest expectations; for whilst he found one or two of the chosen confidants somewhat sceptical of the possible ghastly side of Weeden's

tale, there was not one who did not think it necessary to take some sort of secret and coördinated action. Curwen, it was clear, formed a vague potential menace to the welfare of the town and Colony; and must be eliminated at any cost. Late in December 1770 a group of eminent townsmen met at the home of Stephen Hopkins and debated tentative measures. Weeden's notes, which he had given to Capt. Mathewson, were carefully read; and he and Smith were summoned to give testimony anent details. Something very like fear seized the whole assemblage before the meeting was over, though there ran through that fear a grim determination which Capt. Whipple's bluff and resonant profanity best expressed. They would not notify the Governor, because a more than legal course seemed necessary. With hidden powers of uncertain extent apparently at his disposal, Curwen was not a man who could safely be warned to leave town. Nameless reprisals might ensue, and even if the sinister creature complied, the removal would be no more than the shifting of an unclean burden to another place. The times were lawless, and men who had flouted the King's revenue forces for years were not the ones to balk at sterner things when duty impelled. Curwen must be surprised at his Pawtuxet farm by a large raiding-party of seasoned privateersmen and given one decisive chance to explain himself. If he proved a madman, amusing himself with shrieks and imaginary conversations in different voices, he would be properly confined. If something graver appeared, and if the underground horrors indeed turned out to be real, he and all with him must die. It could be done quietly, and even the widow and her father need not be told how it came about.

While these serious steps were under discussion there occurred in the town an incident so terrible and inexplicable that for a time little else was mentioned for miles around. In the middle of a moonlight January night with heavy snow underfoot there resounded over the river and up the hill a shocking series of cries which brought sleepy heads to every window; and people around Weybosset Point saw a great white thing plunging frantically along the badly cleared space in front of the Turk's Head. There was a baying of dogs in the distance, but this subsided as soon as the clamour of the awakened town became audible. Parties of men with lanterns

and muskets hurried out to see what was happening, but nothing rewarded their search. The next morning, however, a giant, muscular body, stark naked, was found on the jams of ice around the southern piers of the Great Bridge, where the Long Dock stretched out beside Abbott's distil-house, and the identity of this object became a theme for endless speculation and whispering. It was not so much the younger as the older folk who whispered, for only in the patriarchs did that rigid face with horror-bulging eyes strike any chord of memory. They, shaking as they did so, exchanged furtive murmurs of wonder and fear; for in those stiff, hideous features lay a resemblance so marvellous as to be almost an identity—and that identity was with a man who had died full fifty years before.

Ezra Weeden was present at the finding; and remembering the baying of the night before, set out along Weybosset Street and across Muddy Dock Bridge whence the sound had come. He had a curious expectancy, and was not surprised when, reaching the edge of the settled district where the street merged into the Pawtuxet Road, he came upon some very curious tracks in the snow. The naked giant had been pursued by dogs and many booted men, and the returning tracks of the hounds and their masters could be easily traced. They had given up the chase upon coming too near the town. Weeden smiled grimly, and as a perfunctory detail traced the footprints back to their source. It was the Pawtuxet farm of Joseph Curwen, as he well knew it would be; and he would have given much had the yard been less confusingly trampled. As it was, he dared not seem too interested in full daylight. Dr. Bowen, to whom Weeden went at once with his report, performed an autopsy on the strange corpse, and discovered peculiarities which baffled him utterly. The digestive tracts of the huge man seemed never to have been in use, whilst the whole skin had a coarse, loosely knit texture impossible to account for. Impressed by what the old men whispered of this body's likeness to the long-dead blacksmith Daniel Green, whose great-grandson Aaron Hoppin was a supercargo in Curwen's employ, Weeden asked casual questions till he found where Green was buried. That night a party of ten visited the old North Burying Ground opposite Herrenden's Lane and opened a grave. They found it vacant, precisely as they had expected.

Meanwhile arrangements had been made with the post riders to intercept Joseph Curwen's mail, and shortly before the incident of the naked body there was found a letter from one Jedediah Orne of Salem which made the coöperating citizens think deeply. Parts of it, copied and preserved in the private archives of the Smith family where Charles Ward found it, ran as follows:

"I delight that you continue in y^e Gett'g at Olde Matters in your Way, and doe not think better was done at Mr. Hutchinson's in Salem-Village. Certainly, there was Noth'g butt y^e liveliest Awfulness in that which H. rais'd upp from What he cou'd gather onlie a part of. What you sente, did not Worke, whether because of Any Thing miss'g, or because y^e Wordes were not Righte from my Speak'g or y^e Copy'g. I alone am at a Loss. I have not y^e Chymicall art to followe Borellus, and owne my Self confounded by y^e VII. Booke of y^e Necronomicon that you recomende. But I wou'd have you Observe what was tolde to us aboute tak'g Care whom to calle up, for you are Sensible what Mr. Mather writ in y^e Magnalia of ———, and can judge how truely that Horrendous thing is reported. I say to you againe, doe not call up Any that you can not put downe; by the Which I meane, Any that can in Turne call up somewhat against you, whereby your Powerfulest Devices may not be of use. Ask of the Lesser, lest the Greater shall not wish to Answer, and shall commande more than you. I was frighted when I read of your know'g what Ben Zariatnatmik hadde in his ebony Boxe, for I was conscious who must have tolde you. And againe I ask that you shalle write me as Jedediah and not Simon. In this Community a Man may not live too long, and you knowe my Plan by which I came back as my Son. I am desirous you will Acquaint me with what y^e Blacke Man learnt from Sylvanus Cocidius in y^e Vault, under y^e Roman Wall, and will be oblig'd for y^e lend'g of y^e MS. you speak of."

Another and unsigned letter from Philadelphia provoked equal thought, especially for the following passage:

"I will observe what you say respecting the sending of Accounts only by y^e Vessels, but can not always be certain when to expect them. In the Matter spoke of, I require onlie one more thing; but wish to be sure I apprehend you exactly. You inform me, that no Part must be missing if the finest Effects are to be had, but you can not but know how hard it is to be sure. It seems a great Hazard and Burthen to take away the whole Box, and in Town (i.e. St. Peter's, St. Paul's, St. Mary's, or Christ Church) it can scarce be done at all. But I know what Imperfections were in the one I rais'd up October last, and how many live Specimens you were forc'd to imploy before you hit upon

the right Mode in the year 1766; so will be guided by you in all Matters. I am impatient for y^r Brig, and inquire daily at Mr. Biddle's Wharf."

A third suspicious letter was in an unknown tongue and even an unknown alphabet. In the Smith diary found by Charles Ward a single oft-repeated combination of characters is clumsily copied; and authorities at Brown University have pronounced the alphabet Amharic or Abyssinian, although they do not recognise the word. None of these epistles was ever delivered to Curwen, though the disappearance of Jedediah Orne from Salem as recorded shortly afterward shewed that the Providence men took certain quiet steps. The Pennsylvania Historical Society also has some curious letters received by Dr. Shippen regarding the presence of an unwholesome character in Philadelphia. But more decisive steps were in the air, and it is in the secret assemblages of sworn and tested sailors and faithful old privateersmen in the Brown warehouses by night that we must look for the main fruits of Weeden's disclosures. Slowly and surely a plan of campaign was under development which would leave no trace of Joseph Curwen's noxious mysteries.

Curwen, despite all precautions, apparently felt that something was in the wind; for he was now remarked to wear an unusually worried look. His coach was seen at all hours in the town and on the Pawtuxet Road, and he dropped little by little the air of forced geniality with which he had latterly sought to combat the town's prejudice. The nearest neighbours to his farm, the Fenners, one night remarked a great shaft of light shooting into the sky from some aperture in the roof of that cryptical stone building with the high, excessively narrow windows; an event which they quickly communicated to John Brown in Providence. Mr. Brown had become the executive leader of the select group bent on Curwen's extirpation, and had informed the Fenners that some action was about to be taken. This he deemed needful because of the impossibility of their not witnessing the final raid; and he explained his course by saying that Curwen was known to be a spy of the customs officers at Newport, against whom the hand of every Providence shipper, merchant, and farmer was openly or clandestinely raised. Whether the ruse was wholly believed by neighbours who had seen so many queer things is not certain; but at any rate the

Fenners were willing to connect any evil with a man of such queer ways. To them Mr. Brown had entrusted the duty of watching the Curwen farmhouse, and of regularly reporting every incident which took place there.

5.

The probability that Curwen was on guard and attempting unusual things, as suggested by the odd shaft of light, precipitated at last the action so carefully devised by the band of serious citizens. According to the Smith diary a company of about 100 men met at 10 p.m. on Friday, April 12th, 1771, in the great room of Thurston's Tavern at the Sign of the Golden Lion on Weybosset Point across the Bridge. Of the guiding group of prominent men in addition to the leader John Brown there were present Dr. Bowen, with his case of surgical instruments, President Manning without the great periwig (the largest in the Colonies) for which he was noted, Governor Hopkins, wrapped in his dark cloak and accompanied by his seafaring brother Esek, whom he had initiated at the last moment with the permission of the rest, John Carter, Capt. Mathewson, and Capt. Whipple, who was to lead the actual raiding party. These chiefs conferred apart in a rear chamber, after which Capt. Whipple emerged to the great room and gave the gathered seamen their last oaths and instructions. Eleazar Smith was with the leaders as they sat in the rear apartment awaiting the arrival of Ezra Weeden, whose duty was to keep track of Curwen and report the departure of his coach for the farm.

About 10:30 a heavy rumble was heard on the Great Bridge, followed by the sound of a coach in the street outside; and at that hour there was no need of waiting for Weeden in order to know that the doomed man had set out for his last night of unhallowed wizardry. A moment later, as the receding coach clattered faintly over the Muddy Dock Bridge, Weeden appeared; and the raiders fell silently into military order in the street, shouldering the firelocks, fowling-pieces, or whaling harpoons which they had with them. Weeden and Smith were with the party, and of the deliberating citizens there were present for active service Capt. Whipple, the leader, Capt. Esek Hopkins, John Carter, President Manning, Capt. Mathew-

son, and Dr. Bowen; together with Moses Brown, who had come up at the eleventh hour though absent from the preliminary session in the tavern. All these freemen and their hundred sailors began the long march without delay, grim and a trifle apprehensive as they left the Muddy Dock behind and mounted the gentle rise of Broad Street toward the Pawtuxet Road. Just beyond Elder Snow's church some of the men turned back to take a parting look at Providence lying outspread under the early spring stars. Steeples and gables rose dark and shapely, and salt breezes swept up gently from the cove north of the Bridge. Vega was climbing above the great hill across the water, whose crest of trees was broken by the roof-line of the unfinished College edifice. At the foot of that hill, and along the narrow mounting lanes of its side, the old town dreamed; Old Providence, for whose safety and sanity so monstrous and colossal a blasphemy was about to be wiped out.

An hour and a quarter later the raiders arrived, as previously agreed, at the Fenner farmhouse; where they heard a final report on their intended victim. He had reached his farm over half an hour before, and the strange light had soon afterward shot once into the sky, but there were no lights in any visible windows. This was always the case of late. Even as this news was given another great glare arose toward the south, and the party realised that they had indeed come close to the scene of awesome and unnatural wonders. Capt. Whipple now ordered his force to separate into three divisions; one of twenty men under Eleazar Smith to strike across to the shore and guard the landing-place against possible reinforcements for Curwen until summoned by a messenger for desperate service, a second of twenty men under Capt. Esek Hopkins to steal down into the river valley behind the Curwen farm and demolish with axes or gunpowder the oaken door in the high, steep bank, and the third to close in on the house and adjacent buildings themselves. Of this division one third was to be led by Capt. Mathewson to the cryptical stone edifice with high narrow windows, another third to follow Capt. Whipple himself to the main farmhouse, and the remaining third to preserve a circle around the whole group of buildings until summoned by a final emergency signal.

The river party would break down the hillside door at the sound of a single whistle-blast, then waiting and capturing anything

which might issue from the regions within. At the sound of two whistle-blasts it would advance through the aperture to oppose the enemy or join the rest of the raiding contingent. The party at the stone building would accept these respective signals in an analogous manner; forcing an entrance at the first, and at the second descending whatever passage into the ground might be discovered, and joining the general or focal warfare expected to take place within the caverns. A third or emergency signal of three blasts would summon the immediate reserve from its general guard duty; its twenty men dividing equally and entering the unknown depths through both farmhouse and stone building. Capt. Whipple's belief in the existence of catacombs was absolute, and he took no alternative into consideration when making his plans. He had with him a whistle of great power and shrillness, and did not fear any upsetting or misunderstanding of signals. The final reserve at the landing, of course, was nearly out of the whistle's range; hence would require a special messenger if needed for help. Moses Brown and John Carter went with Capt. Hopkins to the river-bank, while President Manning was detailed with Capt. Mathewson to the stone building. Dr. Bowen, with Ezra Weeden, remained in Capt. Whipple's party which was to storm the farmhouse itself. The attack was to begin as soon as a messenger from Capt. Hopkins had joined Capt. Whipple to notify him of the river party's readiness. The leader would then deliver the loud single blast, and the various advance parties would commence their simultaneous attack on three points. Shortly before 1 a.m. the three divisions left the Finner farmhouse; one to guard the landing, another to seek the river valley and the hillside door, and the third to subdivide and attend to the actual buildings of the Curwen farm.

Eleazar Smith, who accompanied the shore-guarding party, records in his diary an uneventful march and a long wait on the bluff by the bay; broken once by what seemed to be the distant sound of the signal whistle and again by a peculiar muffled blend of roaring and crying and a powder blast which seemed to come from the same direction. Later on one man thought he caught some distant gunshots, and still later Smith himself felt the throb of titanic and thunderous words resounding in upper air. It was just before

dawn that a single haggard messenger with wild eyes and a hideous unknown odour about his clothing appeared and told the detachment to disperse quietly to their homes and never again think or speak of the night's doings or of him who had been Joseph Curwen. Something about the bearing of the messenger carried a conviction which his mere words could never have conveyed; for though he was a seaman well known to many of them, there was something obscurely lost or gained in his soul which set him for evermore apart. It was the same later on when they met other old companions who had gone into that zone of horror. Most of them had lost or gained something imponderable and indescribable. They had seen or heard or felt something which was not for human creatures, and could not forget it. From them there was never any gossip, for to even the commonest of mortal instincts there are terrible boundaries. And from that single messenger the party at the shore caught a nameless awe which almost sealed their own lips. Very few are the rumours which ever came from any of them, and Eleazar Smith's diary is the only written record which has survived from that whole expedition which set forth from the Sign of the Golden Lion under the stars.

Charles Ward, however, discovered another vague sidelight in some Fenner correspondence which he found in New London, where he knew another branch of the family had lived. It seems that the Fenners, from whose house the doomed farm was distantly visible, had watched the departing columns of raiders; and had heard very clearly the angry barking of the Curwen dogs, followed by the first shrill blast which precipitated the attack. This blast had been followed by a repetition of the great shaft of light from the stone building, and in another moment, after a quick sounding of the second signal ordering a general invasion, there had come a subdued prattle of musketry followed by a horrible roaring cry which the correspondent Luke Fenner had represented in his epistle by the characters "*Waaaahrrrrr—R'waaahrrr*". This cry, however, had possessed a quality which no mere writing could convey, and the correspondent mentions that his mother fainted completely at the sound. It was later repeated less loudly, and further but more muffled evidences of gunfire ensued; together with a loud explosion

of powder from the direction of the river. About an hour afterward all the dogs began to bark frightfully, and there were vague ground rumblings so marked that the candlesticks tottered on the mantelpiece. A strong smell of sulphur was noted; and Luke Fenner's father declared that he heard the third or emergency whistle signal, though the others failed to detect it. Muffled musketry sounded again, followed by a deep scream less piercing but even more horrible than those which had preceded it; a kind of throaty, nastily plastic cough or gurgle whose quality as a scream must have come more from its continuity and psychological import than from its actual acoustic value.

Then the flaming thing burst into sight at a point where the Curwen farm ought to lie, and the human cries of desperate and frightened men were heard. Muskets flashed and cracked, and the flaming thing fell to the ground. A second flaming thing appeared, and a shriek of human origin was plainly distinguished. Fenner wrote that he could even gather a few words belched in frenzy: "Almighty, protect thy lamb!" Then there were more shots, and the second flaming thing fell. After that came silence for about three-quarters of an hour; at the end of which time little Arthur Fenner, Luke's brother, exclaimed that he saw 'a red fog' going up to the stars from the accursed farm in the distance. No one but the child can testify to this, but Luke admits the significant coincidence implied by the panic of almost convulsive fright which at the same moment arched the backs and stiffened the fur of the three cats then within the room.

Five minutes later a chill wind blew up, and the air became suffused with such an intolerable stench that only the strong freshness of the sea could have prevented its being noticed by the shore party or by any wakeful souls in Pawtuxet village. This stench was nothing which any of the Fenners had ever encountered before, and produced a kind of clutching, amorphous fear beyond that of the tomb or the charnel-house. Close upon it came the awful voice which no hapless hearer will ever be able to forget. It thundered out of the sky like a doom, and windows rattled as its echoes died away. It was deep and musical; powerful as a bass organ, but evil as the forbidden books of the Arabs. What it said no man can tell,

for it spoke in an unknown tongue, but this is the writing Luke Fenner set down to portray the daemonic intonations: "DEESMEES-JESHET-BONE DOSEFE DUVEMA-ENITEMOSS". Not till the year 1919 did any soul link this crude transcript with anything else in mortal knowledge, but Charles Ward paled as he recognised what Mirandola had denounced in shudders as the ultimate horror among black magic's incantations.

An unmistakably human shout or deep chorused scream seemed to answer this malign wonder from the Curwen farm, after which the unknown stench grew complex with an added odour equally intolerable. A wailing distinctly different from the scream now burst out, and was protracted ululantly in rising and falling paroxysms. At times it became almost articulate, though no auditor could trace any definite words; and at one point it seemed to verge toward the confines of diabolic and hysterical laughter. Then a yell of utter, ultimate fright and stark madness wrenched from scores of human throats—a yell which came strong and clear despite the depth from which it must have burst; after which darkness and silence ruled all things. Spirals of acrid smoke ascended to blot out the stars, though no flames appeared and no buildings were observed to be gone or injured on the following day.

Toward dawn two frightened messengers with monstrous and unplaceable odours saturating their clothing knocked at the Fenner door and requested a keg of rum, for which they paid very well indeed. One of them told the family that the affair of Joseph Curwen was over, and that the events of the night were not to be mentioned again. Arrogant as the order seemed, the aspect of him who gave it took away all resentment and lent it a fearsome authority; so that only these furtive letters of Luke Fenner, which he urged his Connecticut relative to destroy, remain to tell what was seen and heard. The non-compliance of that relative, whereby the letters were saved after all, has alone kept the matter from a merciful oblivion. Charles Ward had one detail to add as a result of a long canvass of Pawtuxet residents for ancestral traditions. Old Charles Slocum of that village said that there was known to his grandfather a queer rumour concerning a charred, distorted body found in the fields a week after the death of Joseph Curwen was announced. What kept

the talk alive was the notion that this body, so far as could be seen in its burnt and twisted condition, was neither thoroughly human nor wholly allied to any animal which Pawtuxet folk had ever seen or read about.

6.

Not one man who participated in that terrible raid could ever be induced to say a word concerning it, and every fragment of the vague data which survives comes from those outside the final fighting party. There is something frightful in the care with which these actual raiders destroyed each scrap which bore the least allusion to the matter. Eight sailors had been killed, but although their bodies were not produced their families were satisfied with the statement that a clash with customs officers had occurred. The same statement also covered the numerous cases of wounds, all of which were extensively bandaged and treated only by Dr. Jabez Bowen, who had accompanied the party. Hardest to explain was the nameless odour clinging to all the raiders, a thing which was discussed for weeks. Of the citizen leaders, Capt. Whipple and Moses Brown were most severely hurt, and letters of their wives testify the bewilderment which their reticence and close guarding of their bandages produced. Psychologically every participant was aged, sobered, and shaken. It is fortunate that they were all strong men of action and simple, orthodox religionists, for with more subtle introspectiveness and mental complexity they would have fared ill indeed. President Manning was the most disturbed; but even he outgrew the darkest shadow, and smothered memories in prayers. Every man of those leaders had a stirring part to play in later years, and it is perhaps fortunate that this is so. Little more than a twelvemonth afterward Capt. Whipple led the mob who burnt the revenue ship *Gaspee*, and in this bold act we may trace one step in the blotting out of unwholesome images.

There was delivered to the widow of Joseph Curwen a sealed leaden coffin of curious design, obviously found ready on the spot when needed, in which she was told her husband's body lay. He had, it was explained, been killed in a customs battle about which it was not politic to give details. More than this no tongue ever

uttered of Joseph Curwen's end, and Charles Ward had only a single hint wherewith to construct a theory. This hint was the merest thread—a shaky underscoring of a passage in Jedediah Orne's confiscated letter to Curwen, as partly copied in Ezra Weeden's handwriting. The copy was found in the possession of Smith's descendants; and we are left to decide whether Weeden gave it to his companion after the end, as a mute clue to the abnormality which had occurred, or whether, as is more probable, Smith had it before, and added the underscoring himself from what he had managed to extract from his friend by shrewd guessing and adroit cross-questioning. The underlined passage is merely this:

"I say to you againe, doe not call up Any that you can not put downe; by the Which I meane, Any that can in Turne call up somewhat against you, whereby your Powerfullest Devices may not be of use. Ask of the Lesser, lest the Greater shall not wish to Answer, and shall commande more than you."

In the light of this passage, and reflecting on what last unmentionable allies a beaten man might try to summon in his direst extremity, Charles Ward may well have wondered whether any citizen of Providence killed Joseph Curwen.

The deliberate effacement of every memory of the dead man from Providence life and annals was vastly aided by the influence of the raiding leaders. They had not at first meant to be so thorough, and had allowed the widow and her father and child to remain in ignorance of the true conditions; but Capt. Tillinghast was an astute man, and soon uncovered enough rumours to whet his horror and cause him to demand that his daughter and granddaughter change their name, burn the library and all remaining papers, and chisel the inscription from the slate slab above Joseph Curwen's grave. He knew Capt. Whipple well, and probably extracted more hints from that bluff mariner than anyone else ever gained respecting the end of the accursed sorcerer.

From that time on the obliteration of Curwen's memory became increasingly rigid, extending at last by common consent even to the town records and files of the *Gazette*. It can be compared in spirit only to the hush that lay on Oscar Wilde's name for a decade after his disgrace, and in extent only to the fate of that sinful King of

Runazar in Lord Dunsany's tale, whom the Gods decided must not only cease to be, but must cease ever to have been.

Mrs. Tillinghast, as the widow became known after 1772, sold the house in Olney Court and resided with her father in Power's Lane till her death in 1817. The farm at Pawtuxet, shunned by every living soul, remained to moulder through the years; and seemed to decay with unaccountable rapidity. By 1780 only the stone and brickwork were standing, and by 1800 even these had fallen to shapeless heaps. None ventured to pierce the tangled shrubbery on the river-bank behind which the hillside door may have lain, nor did any try to frame a definite image of the scenes amidst which Joseph Curwen departed from the horrors he had wrought.

Only robust old Capt. Whipple was heard by alert listeners to mutter once in a while to himself, "Pox on that ——, but he had no business to laugh while he screamed. 'Twas as though the damn'd —— had some't at up his sleeve. For half a crown I'd burn his —— house."

III. *A Search and an Evocation*

1.

Charles Ward, as we have seen, first learned in 1918 of his descent from Joseph Curwen. That he at once took an intense interest in everything pertaining to the bygone mystery is not to be wondered at; for every vague rumour that he had heard of Curwen now became something vital to himself, in whom flowed Curwen's blood. No spirited and imaginative genealogist could have done otherwise than begin forthwith an avid and systematic collection of Curwen data.

In his first delvings there was not the slightest attempt at secrecy; so that even Dr. Lyman hesitates to date the youth's madness from any period before the close of 1919. He talked freely with his family—though his mother was not particularly pleased to own an ancestor like Curwen—and with the officials of the various museums and libraries he visited. In applying to private families for records thought to be in their possession he made no concealment of his object, and shared the somewhat amused scepticism with

which the accounts of the old diarists and letter-writers were regarded. He often expressed a keen wonder as to what really had taken place a century and a half before at that Pawtuxet farmhouse whose site he vainly tried to find, and what Joseph Curwen really had been.

When he came across the Smith diary and archives and encountered the letter from Jedediah Orne he decided to visit Salem and look up Curwen's early activities and connexions there, which he did during the Easter vacation of 1919. At the Essex Institute, which was well known to him from former sojourns in the glamorous old town of crumbling Puritan gables and clustered gambrel roofs, he was very kindly received, and unearthed there a considerable amount of Curwen data. He found that his ancestor was born in Salem-Village, now Danvers, seven miles from town, on the eighteenth of February (O.S.) 1662-3; and that he had run away to sea at the age of fifteen, not appearing again for nine years, when he returned with the speech, dress, and manners of a native Englishman and settled in Salem proper. At that time he had little to do with his family, but spent most of his hours with the curious books he had brought from Europe, and the strange chemicals which came for him on ships from England, France, and Holland. Certain trips of his into the country were the objects of much local inquisitiveness, and were whisperingly associated with vague rumours of fires on the hills at night.

Curwen's only close friends had been one Edward Hutchinson of Salem-Village and one Simon Orne of Salem. With these men he was often seen in conference about the Common, and visits among them were by no means infrequent. Hutchinson had a house well out toward the woods, and it was not altogether liked by sensitive people because of the sounds heard there at night. He was said to entertain strange visitors, and the lights seen from his windows were not always of the same colour. The knowledge he displayed concerning long-dead persons and long-forgotten events was considered distinctly unwholesome, and he disappeared about the time the witchcraft panic began, never to be heard from again. At that time Joseph Curwen also departed, but his settlement in Providence was soon learned of. Simon Orne lived in Salem until 1720, when his failure to grow visibly old began to excite attention. He there-

after disappeared, though thirty years later his precise counterpart and self-styled son turned up to claim his property. The claim was allowed on the strength of documents in Simon Orne's known hand, and Jedediah Orne continued to dwell in Salem till 1771, when certain letters from Providence citizens to the Rev. Thomas Barnard and others brought about his quiet removal to parts unknown.

Certain documents by and about all of these strange characters were available at the Essex Institute, the Court House, and the Registry of Deeds, and included both harmless commonplaces such as land titles and bills of sale, and furtive fragments of a more provocative nature. There were four or five unmistakable allusions to them on the witchcraft trial records; as when one Hepzibah Lawson swore on July 10, 1692, at the Court of Oyer and Terminer under Judge Hathorne, that 'fortie Witches and the Blacke Man were wont to meete in the Woodes behind Mr. Hutchinson's house', and one Amity How declared at a session of August 8th before Judge Gedney that 'Mr. G. B. (Rev. George Burroughs) on that Nighte putt y^e Divell his Marke upon Bridget S., Jonathan A., Simon O., Deliverance W., Joseph C., Susan P., Mehitable C., and Deborah B.' Then there was a catalogue of Hutchinson's uncanny library as found after his disappearance, and an unfinished manuscript in his handwriting, couched in a cipher none could read. Ward had a photostatic copy of this manuscript made, and began to work casually on the cipher as soon as it was delivered to him. After the following August his labours on the cipher became intense and feverish, and there is reason to believe from his speech and conduct that he hit upon the key before October or November. He never stated, though, whether or not he had succeeded.

But of greatest immediate interest was the Orne material. It took Ward only a short time to prove from identity of penmanship a thing he had already considered established from the text of the letter to Curwen; namely, that Simon Orne and his supposed son were one and the same person. As Orne had said to his correspondent, it was hardly safe to live too long in Salem, hence he resorted to a thirty-year sojourn abroad, and did not return to claim his lands except as a representative of a new generation. Orne had apparently been careful to destroy most of his correspondence, but the citizens who took action in 1771 found and preserved a few

letters and papers which excited their wonder. There were cryptic formulae and diagrams in his and other hands which Ward now either copied with care or had photographed, and one extremely mysterious letter in a chirography that the searcher recognised from items in the Registry of Deeds as positively Joseph Curwen's.

This Curwen letter, though undated as to the year, was evidently not the one in answer to which Orne had written the confiscated missive; and from internal evidence Ward placed it not much later than 1750. It may not be amiss to give the text in full, as a sample of the style of one whose history was so dark and terrible. The recipient is addressed as "Simon", but a line (whether drawn by Curwen or Orne Ward could not tell) is run through the word.

Prouidence, I. May (Ut. vulgo)

Brother: —

My honour'd Antient ffriende, due Respects and earnest Wishes to Him whom we serve for y^e eternall Power. I am just come upon That which you ought to knowe, concern'g the Matter of the Laste Extremitie and what to doe regard'g yt. I am not dispos'd to followe you in go'g Away on acct. of my Yeares, for Prouidence hath not y^e Sharpeness of y^e Bay in hunt'g oute uncommon Things and bringinge to Tryall. I am ty'd up in Shippes and Goodes, and cou'd not doe as you did, besides the Whiche my ffarme at Patuxet hath under it What you Knowe, that wou'd not waite for my com'g Backe as an Other.

But I am not unreadie for harde ffortunes, as I haue tolde you, and haue longe work'd upon y^e Way of get'g Backe after y^e Laste. I laste Night strucke on y^e Wordes that bringe up YOGGE-SOTHOTHE, and sawe for y^e firste Time that fface spoke of by Ibn Schacabao in y^e ———. And IT said, that y^e III Psalme in y^e Liber-Damnatus holdes y^e Clauicle. With Sunne in V House, Saturne in Trine, drawe y^e Pentagram of Fire, and saye y^e ninth Uerse thrice. This Uerse repeate eache Roodemas and Hallow's Eue; and y^e Thing will breede in y^e Outside Spheres.

And of y^e Seede of Olde shal One be borne who shal looke Backe, tho' know'g not what he seekes.

Yett will this availe Nothing if there be no Heir, and if the Saltes, or the Way to make the Saltes, bee not Readie for his Hande; and here I will owne, I have not taken needed Stepps nor founde Much.

Ye Process is plaguy harde to come neare; and it uses up such a Store of Specimens, I am harde putte to it to get Enough, notwithstanding the Sailors I have from y^e Indies. Ye People aboute are become curious, but I can stande them off. Ye Gentry are worse than the Populace, be'g more Circumstantiall in their Accts. and more believ'd in what they tell. That Parson and Mr. Merritt have talk'd some, I am fearfull, but no Thing soe far is Dangerous. Ye Chymical substances are easie of get'g, there be'g II. goode Chymists in Towne, Dr. Bowen and Sam: Carew. I am foll'g oute what Borellus saith, and haue Helpe in Abdool Al-Hazred his VII. Booke. Whatever I gette, you shal haue. And in y^e meane while, do not neglect to make use of y^e Wordes I haue here giuen. I haue them Righte, but if you Desire to see HIM, imploy the Writings on y^e Piece of ——— that I am putt'g in this Packet. Saye y^e Uerses every Roodmas and Hallow's Eue; and if y^r Line runn out not, *one shall bee in yeares to come that shal looke backe and use what Saltes or Stuff for Saltes you shal leaue him.* Job XIV. XIV.

I rejoyce you are again at Salem, and hope I may see you not longe hence. I have a goode Stallion, and am think'g of get'g a Coach, there be'g one (Mr. Merritt's) in Providence already, tho' y^e Roades are bad. If you are dispos'd to Travel, doe not pass me bye. From Boston take y^e Post Rd. thro' Dedham, Wrentham, and Attleborough, goode Taverns be'g at all these Townes. Stop at Mr. Bolcom's in Wrentham, where y^e Beddes are finer than Mr. Hatch's, but eate at y^e other House for their Cooke is better. Turne into Prou. by Patucket ffalls, and y^e Rd. past Mr. Sayles's Tavern. My House opp. Mr. Epenetus Olney's Tavern off y^e Towne Street, 1st on y^e N. side of Olney's Court. Distance from Boston Stone abt. XLIV Miles.

Sir, I am y^r olde and true ffriend and Servt. in *Almonsin-Metraton*.

Josephus C.

To Mr. Simon Orne,
William's-Lane, in Salem.

This letter, oddly enough, was what first gave Ward the exact location of Curwen's Providence home; for none of the records encountered up to that time had been at all specific. The discovery

was doubly striking because it indicated as the newer Curwen house built in 1761 on the site of the old, a dilapidated building still standing in Olney Court and well known to Ward in his antiquarian rambles over Stampers' Hill. The place was indeed only a few squares from his own home on the great hill's higher ground, and was now the abode of a negro family much esteemed for occasional washing, housecleaning, and furnace-tending services. To find, in distant Salem, such sudden proof of the significance of this familiar rookery in his own family history, was a highly impressive thing to Ward; and he resolved to explore the place immediately upon his return. The more mystical phases of the letter, which he took to be some extravagant kind of symbolism, frankly baffled him; though he noted with a thrill of curiosity that the Biblical passage referred to—Job 14, 14—was the familiar verse, "If a man die, shall he live again? All the days of my appointed time will I wait, till my change come."

2.

Young Ward came home in a state of pleasant excitement, and spent the following Saturday in a long and exhaustive study of the house in Olney Court. The place, now crumbling with age, had never been a mansion; but was a modest two-and-a-half story wooden town house of the familiar Providence colonial type, with plain peaked roof, large central chimney, and artistically carved doorway with rayed fanlight, triangular pediment, and trim Doric pilasters. It had suffered but little alteration externally, and Ward felt he was gazing on something very close to the sinister matters of his quest.

The present negro inhabitants were known to him, and he was very courteously shewn about the interior by old Asa and his stout wife Hannah. Here there was more change than the outside indicated, and Ward saw with regret that fully half of the fine scroll-and-urn overmantels and shell-carved cupboard linings were gone, whilst much of the fine wainscotting and bolection moulding was marked, hacked, and gouged, or covered up altogether with cheap wall-paper. In general, the survey did not yield as much as Ward had somehow expected; but it was at least exciting to stand within

the ancestral walls which had housed such a man of horror as Joseph Curwen. He saw with a thrill that a monogram had been very carefully effaced from the ancient brass knocker.

From then until after the close of school Ward spent his time on the photostatic copy of the Hutchinson cipher and the accumulation of local Curwen data. The former still proved unyielding; but of the latter he obtained so much, and so many clues to similar data elsewhere, that he was ready by July to make a trip to New London and New York to consult old letters whose presence in those places was indicated. This trip was very fruitful, for it brought him the Fenner letters with their terrible description of the Pawtuxet farmhouse raid, and the Nightingale-Talbot letters in which he learned of the portrait painted on a panel of the Curwen library. This matter of the portrait interested him particularly, since he would have given much to know just what Joseph Curwen looked like; and he decided to make a second search of the house in Olney Court to see if there might not be some trace of the ancient features beneath peeling coats of later paint or layers of mouldy wall-paper.

Early in August that search took place, and Ward went carefully over the walls of every room sizeable enough to have been by any possibility the library of the evil builder. He paid especial attention to the large panels of such overmantels as still remained; and was keenly excited after about an hour, when on a broad area above the fireplace in a spacious ground-floor room he became certain that the surface brought out by the peeling of several coats of paint was sensibly darker than any ordinary interior paint or the wood beneath it was likely to have been. A few more careful tests with a thin knife, and he knew that he had come upon an oil portrait of great extent. With truly scholarly restraint the youth did not risk the damage which an immediate attempt to uncover the hidden picture with the knife might have done, but just retired from the scene of his discovery to enlist expert help. In three days he returned with an artist of long experience, Mr. Walter C. Dwight, whose studio is near the foot of College Hill; and that accomplished restorer of paintings set to work at once with proper methods and chemical substances. Old Asa and his wife were duly excited over their strange visitors, and were properly reimbursed for this invasion of their domestic hearth.

As day by day the work of restoration progressed, Charles Ward looked on with growing interest at the lines and shades gradually unveiled after their long oblivion. Dwight had begun at the bottom; hence since the picture was a three-quarter-length one, the face did not come out for some time. It was meanwhile seen that the subject was a spare, well-shaped man with dark-blue coat, embroidered waistcoat, black satin small-clothes, and white silk stockings, seated in a carved chair against the background of a window with wharves and ships beyond. When the head came out it was observed to bear a neat Albemarle wig, and to possess a thin, calm, undistinguished face which seemed somehow familiar to both Ward and the artist. Only at the very last, though, did the restorer and his client begin to gasp with astonishment at the details of that lean, pallid visage, and to recognise with a touch of awe the dramatic trick which heredity had played. For it took the final bath of oil and the final stroke of the delicate scraper to bring out fully the expression which centuries had hidden; and to confront the bewildered Charles Dexter Ward, dweller in the past, with his own living features in the countenance of his horrible great-great-grandfather.

Ward brought his parents to see the marvel he had uncovered, and his father at once determined to purchase the picture despite its execution on stationary panelling. The resemblance to the boy, despite an appearance of rather greater age, was marvellous; and it could be seen that through some trick of atavism the physical contours of Joseph Curwen had found precise duplication after a century and a half. Mrs. Ward's resemblance to her ancestor was not at all marked, though she could recall relatives who had some of the facial characteristics shared by her son and by the bygone Curwen. She did not relish the discovery, and told her husband that he had better burn the picture instead of bringing it home. There was, she averred, something unwholesome about it; not only intrinsically, but in its very resemblance to Charles. Mr. Ward, however, was a practical man of power and affairs—a cotton manufacturer with extensive mills at Riverpoint in the Pawtuxet Valley—and not one to listen to feminine scruples. The picture impressed him mightily with its likeness to his son, and he believed the boy deserved it as a present. In this opinion, it is needless to say,

Charles most heartily concurred; and a few days later Mr. Ward located the owner of the house—a small rodent-featured person with a guttural accent—and obtained the whole mantel and overmantel bearing the picture at a curtly fixed price which cut short the impending torrent of unctuous haggling.

It now remained to take off the panelling and remove it to the Ward home, where provisions were made for its thorough restoration and installation with an electric mock-fireplace in Charles's third-floor study or library. To Charles was left the task of superintending this removal, and on the twenty-eighth of August he accompanied two expert workmen from the Crooker decorating firm to the house in Olney Court, where the mantel and portrait-bearing overmantel were detached with great care and precision for transportation in the company's motor truck. There was left a space of exposed brickwork marking the chimney's course, and in this young Ward observed a cubical recess about a foot square, which must have lain directly behind the head of the portrait. Curious as to what such a space might mean or contain, the youth approached and looked within; finding beneath the deep coatings of dust and soot some loose yellowed papers, a crude, thick copy-book, and a few mouldering textile shreds which may have formed the ribbon binding the rest together. Blowing away the bulk of the dirt and cinders, he took up the book and looked at the bold inscription on its cover. It was in a hand which he had learned to recognise at the Essex Institute, and proclaimed the volume as the "*Journall and Notes of Jos: Curwen, Gent., of Providence-Plantations, Late of Salem*".

Excited beyond measure by his discovery, Ward shewed the book to the two curious workmen beside him. Their testimony is absolute as to the nature and genuineness of the finding, and Dr. Willett relies on them to help establish his theory that the youth was not mad when he began his major eccentricities. All the other papers were likewise in Curwen's handwriting, and one of them seemed especially portentous because of its inscription: "*To Him Who Shal Come After, & How He May Gett Beyonde Time & ye Spheres*." Another was in a cipher; the same, Ward hoped, as the Hutchinson cipher which had hitherto baffled him. A third, and here the searcher rejoiced, seemed to be a key to the cipher; whilst

the fourth and fifth were addressed respectively to "Edw: Hutchinson, Armiger" and "Jedediah Orne, Esq.", 'or Their Heir or Heirs, or Those Represent'g Them'. The sixth and last was inscribed: "*Joseph Curwen his Life and Travells Bet'n y^e yeares 1678 and 1687: Of Whither He Voyag'd, Where He Stay'd, Whom He Sawe, and What He Learnt.*"

3.

We have now reached the point from which the more academic school of alienists date Charles Ward's madness. Upon his discovery the youth had looked immediately at a few of the inner pages of the book and manuscripts, and had evidently seen something which impressed him tremendously. Indeed, in shewing the titles to the workmen he appeared to guard the text itself with peculiar care, and to labour under a perturbation for which even the antiquarian and genealogical significance of the find could hardly account. Upon returning home he broke the news with an almost embarrassed air, as if he wished to convey an idea of its supreme importance without having to exhibit the evidence itself. He did not even shew the titles to his parents, but simply told them that he had found some documents in Joseph Curwen's handwriting, "mostly in cipher", which would have to be studied very carefully before yielding up their true meaning. It is unlikely that he would have shewn what he did to the workmen, had it not been for their unconcealed curiosity. As it was he doubtless wished to avoid any display of peculiar reticence which would increase their discussion of the matter.

That night Charles Ward sat up in his room reading the new-found book and papers, and when day came he did not desist. His meals, on his urgent request when his mother called to see what was amiss, were sent up to him; and in the afternoon he appeared only briefly when the men came to install the Curwen picture and mantelpiece in his study. The next night he slept in snatches in his clothes, meanwhile wrestling feverishly with the unravelling of the cipher manuscript. In the morning his mother saw that he was at work on the photostatic copy of the Hutchinson cipher, which he had frequently shewn her before; but in response to her query he

said that the Curwen key could not be applied to it. That afternoon he abandoned his work and watched the men fascinatedly as they finished their installation of the picture with its woodwork above a cleverly realistic electric log, setting the mock-fireplace and overmantel a little out from the north wall as if a chimney existed, and boxing in the sides with panelling to match the room's. The front panel holding the picture was sawn and hinged to allow cupboard space behind it. After the workmen went he moved his work into the study and sat down before it with his eyes half on the cipher and half on the portrait which stared back at him like a year-adding and century-recalling mirror.

His parents, subsequently recalling his conduct at this period, give interesting details anent the policy of concealment which he practiced. Before servants he seldom hid any paper which he might be studying, since he rightly assumed that Curwen's intricate and archaic chirography would be too much for them. With his parents, however, he was more circumspect; and unless the manuscript in question were a cipher, or a mere mass of cryptic symbols and unknown ideographs (as that entitled "*To Him Who Shal Come After* etc." seemed to be), he would cover it with some convenient paper until his caller had departed. At night he kept the papers under lock and key in an antique cabinet of his, where he also placed them whenever he left the room. He soon resumed fairly regular hours and habits, except that his long walks and other outside interests seemed to cease. The opening of school, where he now began his senior year, seemed a great bore to him; and he frequently asserted his determination never to bother with college. He had, he said, important special investigations to make, which would provide him with more avenues toward knowledge and the humanities than any university which the world could boast.

Naturally, only one who had always been more or less studious, eccentric, and solitary could have pursued this course for many days without attracting notice. Ward, however, was constitutionally a scholar and a hermit; hence his parents were less surprised than regretful at the close confinement and secrecy he adopted. At the same time, both his father and mother thought it odd that he would shew them no scrap of his treasure-trove, nor give any connected account of such data as he had deciphered. This reticence

he explained away as due to a wish to wait until he might announce some connected revelation, but as the weeks passed without further disclosures there began to grow up between the youth and his family a kind of constraint; intensified in his mother's case by her manifest disapproval of all Curwen delvings.

During October Ward began visiting the libraries again, but no longer for the antiquarian matter of his former days. Witchcraft and magic, occultism and daemonology, were what he sought now; and when Providence sources proved unfruitful he would take the train for Boston and tap the wealth of the great library in Copley Square, the Widener Library at Harvard, or the Zion Research Library in Brookline, where certain rare works on Biblical subjects are available. He bought extensively, and fitted up a whole additional set of shelves in his study for newly acquired works on uncanny subjects; while during the Christmas holidays he made a round of out-of-town trips including one to Salem to consult certain records at the Essex Institute.

About the middle of January, 1920, there entered Ward's bearing an element of triumph which he did not explain, and he was no more found at work upon the Hutchinson cipher. Instead, he inaugurated a dual policy of chemical research and record-scanning; fitting up for the one a laboratory in the unused attic of the house, and for the latter haunting all the sources of vital statistics in Providence. Local dealers in drugs and scientific supplies, later questioned, gave astonishingly queer and meaningless catalogues of the substances and instruments he purchased; but clerks at the State House, the City Hall, and the various libraries agree as to the definite object of his second interest. He was searching intensely and feverishly for the grave of Joseph Curwen, from whose slate slab an older generation had so wisely blotted the name.

Little by little there grew upon the Ward family the conviction that something was wrong. Charles had had freaks and changes of minor interests before, but this growing secrecy and absorption in strange pursuits was unlike even him. His school work was the merest pretence; and although he failed in no test, it could be seen that the old application had all vanished. He had other concerns now; and when not in his new laboratory with a score of obsolete alchemical books, could be found either poring over old

burial records down town or glued to his volumes of occult lore in his study, where the startlingly—one almost fancied increasingly—similar features of Joseph Curwen stared blandly at him from the great overmantel on the north wall.

Late in March Ward added to his archive-searching a ghoulish series of rambles about the various ancient cemeteries of the city. The cause appeared later, when it was learned from City Hall clerks that he had probably found an important clue. His quest had suddenly shifted from the grave of Joseph Curwen to that of one Naphthali Field; and this shift was explained when, upon going over the files that he had been over, the investigators actually found a fragmentary record of Curwen's burial which had escaped the general obliteration, and which stated that the curious leaden coffin had been interred "10 ft. S. and 5 ft. W. of Naphthali Field's grave in ye ——". The lack of a specified burying-ground in the surviving entry greatly complicated the search, and Naphthali Field's grave seemed as elusive as that of Curwen; but here no systematic effacement had existed, and one might reasonably be expected to stumble on the stone itself even if its record had perished. Hence the rambles—from which St. John's (the former King's Churchyard and the ancient Congregational burying-ground in the midst of Swan Point Cemetery were excluded, since other statistics had shewn that the only Naphthali Field (obit 1729) whose grave could have been meant had been a Baptist.

4.

It was toward May when Dr. Willett, at the request of the senior Ward, and fortified with all the Curwen data which the family had gleaned from Charles in his non-secretive days, talked with the young man. The interview was of little value or conclusiveness, for Willett felt at every moment that Charles was thoroughly master of himself and in touch with matters of real importance; but it at least forced the secretive youth to offer some rational explanation of his recent demeanour. Of a pallid, impassive type not easily shewing embarrassment, Ward seemed quite ready to discuss his pursuits, though not to reveal their object. He stated that the papers of his

ancestor had contained some remarkable secrets of early scientific knowledge, for the most part in cipher, of an apparent scope comparable only to the discoveries of Friar Bacon and perhaps surpassing even those. They were, however, meaningless except when correlated with a body of learning now wholly obsolete; so that their immediate presentation to a world equipped only with modern science would rob them of all impressiveness and dramatic significance. To take their vivid place in the history of human thought they must first be correlated by one familiar with the background out of which they evolved, and to this task of correlation Ward was now devoting himself. He was seeking to acquire as fast as possible those neglected arts of old which a true interpreter of the Curwen data must possess, and hoped in time to make a full announcement and presentation of the utmost interest to mankind and to the world of thought. Not even Einstein, he declared, could more profoundly revolutionise the current conception of things.

As to his graveyard search, whose object he freely admitted, but the details of whose progress he did not relate, he said he had reason to think that Joseph Curwen's mutilated headstone bore certain mystic symbols—carved from directions in his will and ignorantly spared by those who had effaced the name—which were absolutely essential to the final solution of his cryptic system. Curwen, he believed, had wished to guard his secret with care; and had consequently distributed the data in an exceedingly curious fashion. When Dr. Willett asked to see the mystic documents, Ward displayed much reluctance and tried to put him off with such things as photostatic copies of the Hutchinson cipher and Orne formulae and diagrams; but finally shewed him the exteriors of some of the real Curwen finds—the "*Journall and Notes*", the cipher (title in cipher also), and the formula-filled message "*To Him Who Shal Come After*"—and let him glance inside such as were in obscure characters.

He also opened the diary at a page carefully selected for its innocuousness and gave Willett a glimpse of Curwen's connected handwriting in English. The doctor noted very closely the crabbed and complicated letters, and the general aura of the seventeenth century which clung round both penmanship and style despite the

writer's survival into the eighteenth century, and became quickly certain that the document was genuine. The text itself was relatively trivial, and Willett recalled only a fragment:

"Wedn. 16 Octr. 1754. My Sloop the *Wakeful* this Day putt in from London with XX newe Men pick'd up in y^e Indies, Spaniards from Martineco and 2 Dutch Men from Surinam. Ye Dutch Men are like to Desert from have'g hearde Somewhat ill of these Ventures, but I will see to y^e Inducing of them to Staye. ffor Mr. Knight Dexter of y^e Bay and Book 120 Pieces Camblets, 100 Pieces Assrtd. Cambleteens, 20 Pieces blue Duffles, 100 Pieces Shalloons, 50 Pieces Calamancoes, 300 Pieces each, Shendsoy and Humhums. ffor Mr. Green at y^e Elephant 50 Gallon Cyttles, 20 Warm'g Pannes, 15 Bake Cyttles, 10 pr. Smoke'g Tonges. ffor Mr. Perrigo 1 Sett of Awles, ffor Mr. Nightingale 50 Reames prime Foolscap. Say'd y^e SABAOTH thrice last Nighte but None appear'd. I must heare more from Mr. H. in Transylvania, tho' it is Harde reach'g him and exceeding strange he can not give me the Use of what he hath so well us'd these hundred yeares. Simon hath not Writ these V. Weekes, but I expecte soon hear'g from him."

When upon reaching this point Dr. Willett turned the leaf he was quickly checked by Ward, who almost snatched the book from his grasp. All that the doctor had a chance to see on the newly opened page was a brief pair of sentences; but these, strangely enough, lingered tenaciously in his memory. They ran: "Ye Verse from Liber-Damnatus be'g spoke V Roodmasses and IV Hallows-Eves, I am Hopeful y^e Thing is breed'g Outside y^e Spheres. It will drawe One who is to Come, if I can make sure he shal bee, and he shall think on Past thinges and look back thro' all y^e yeares, against y^e which I must have ready y^e Saltes or That to make 'em with."

Willett saw no more, but somehow this small glimpse gave a new and vague terror to the painted features of Joseph Curwen which stared blandly down from the overmantel. Ever after that he entertained the odd fancy—which his medical skill of course assured him was only a fancy—that the eyes of the portrait had a sort of wish, if not an actual tendency, to follow young Charles Ward as he moved about the room. He stopped before leaving to study the picture closely, marvelling at its resemblance to Charles and mem-

orising every minute detail of the cryptical, colourless face, even down to a slight scar or pit in the smooth brow above the right eye. Cosmo Alexander, he decided, was a painter worthy of the Scotland that produced Raeburn, and a teacher worthy of his illustrious pupil Gilbert Stuart.

Assured by the doctor that Charles's mental health was in no danger, but that on the other hand he was engaged in researches which might prove of real importance, the Wards were more lenient than they might otherwise have been when during the following June the youth made positive his refusal to attend college. He had, he declared, studies of much more vital importance to pursue; and intimated a wish to go abroad the following year in order to avail himself of certain sources of data not existing in America. The senior Ward, while denying this latter wish as absurd for a boy of only eighteen, acquiesced regarding the university; so that after a none too brilliant graduation from the Moses Brown School there ensued for Charles a three-year period of intensive occult study and graveyard searching. He became recognised as an eccentric, and dropped even more completely from the sight of his family's friends than he had been before; keeping close to his work and only occasionally making trips to other cities to consult obscure records. Once he went south to talk with a strange old mulatto who dwelt in a swamp and about whom a newspaper had printed a curious article. Again he sought a small village in the Adirondacks whence reports of certain odd ceremonial practices had come. But still his parents forbade him the trip to the Old World which he desired.

Coming of age in April, 1923, and having previously inherited a small competence from his maternal grandfather, Ward determined at last to take the European trip hitherto denied him. Of his proposed itinerary he would say nothing save that the needs of his studies would carry him to many places, but he promised to write his parents fully and faithfully. When they saw he could not be dissuaded, they ceased all opposition and helped as best they could; so that in June the young man sailed for Liverpool with the farewell blessings of his father and mother, who accompanied him to Boston and waved him out of sight from the White Star pier in Charlestown. Letters soon told of his safe arrival, and of his securing good quarters in Great Russell Street, London; where he proposed to

stay, shunning all family friends, till he had exhausted the resources of the British Museum in a certain direction. Of his daily life he wrote but little, for there was little to write. Study and experiment consumed all his time, and he mentioned a laboratory which he had established in one of his rooms. That he said nothing of antiquarian rambles in the glamorous old city with its luring skyline of ancient domes and steeples and its tangles of roads and alleys whose mystic convolutions and sudden vistas alternately beckon and surprise, was taken by his parents as a good index of the degree to which his new interests had engrossed his mind.

In June, 1924, a brief note told of his departure for Paris, to which he had before made one or two flying trips for material in the Bibliothèque Nationale. For three months thereafter he sent only postal cards, giving an address in the Rue St. Jacques and referring to a special search among rare manuscripts in the library of an unnamed private collector. He avoided acquaintances, and no tourists brought back reports of having seen him. Then came a silence, and in October the Wards received a picture card from Prague, Czechoslovakia, stating that Charles was in that ancient town for the purpose of conferring with a certain very aged man supposed to be the last living possessor of some very curious mediaeval information. He gave an address in the Neustadt, and announced no move till the following January; when he dropped several cards from Vienna telling of his passage through that city on the way toward a more easterly region whither one of his correspondents and fellow-delvers into the occult had invited him.

The next card was from Klausenburg in Transylvania, and told of Ward's progress toward his destination. He was going to visit a Baron Ferenczy, whose estate lay in the mountains east of Rakus; and was to be addressed at Rakus in the care of that nobleman. Another card from Rakus a week later, saying that his host's carriage had met him and that he was leaving the village for the mountains, was his last message for a considerable time; indeed, he did not reply to his parents' frequent letters until May, when he wrote to discourage the plan of his mother for a meeting in London, Paris, or Rome during the summer, when the elder Wards were planning to travel in Europe. His researches, he said, were such that he could not leave his present quarters; while the situation of Baron Feren-

czy's castle did not favour visits. It was on a crag in the dark wooded mountains, and the region was so shunned by the country folk that normal people could not help feeling ill at ease. Moreover, the Baron was not a person likely to appeal to correct and conservative New England gentlefolk. His aspect and manners had idiosyncrasies, and his age was so great as to be disquieting. It would be better, Charles said, if his parents would wait for his return to Providence; which could scarcely be far distant.

That return did not, however, take place until May, 1926, when after a few heralding cards the young wanderer quietly slipped into New York on the *Homeric* and traversed the long miles to Providence by motor-coach, eagerly drinking in the green rolling hills, the fragrant, blossoming orchards, and the white steepled towns of vernal Connecticut; his first taste of ancient New England in nearly four years. When the coach crossed the Pawcatuck and entered Rhode Island amidst the faery goldenness of a late spring afternoon his heart beat with quickened force, and the entry to Providence along Reservoir and Elmwood avenues was a breathless and wonderful thing despite the depths of forbidden lore to which he had dived. At the high square where Broad, Weybosset, and Empire Streets join, he saw before and below him in the fire of sunset the pleasant, remembered houses and domes and steeples of the old town; and his head swam curiously as the vehicle rolled down to the terminal behind the Biltmore, bringing into view the great dome and soft, roof-pierced greenery of the ancient hill across the river, and the tall colonial spire of the First Baptist Church limned pink in the magic evening light against the fresh springtime verdure of its precipitous background.

Old Providence! It was this place and the mysterious forces of its long, continuous history which had brought him into being, and which had drawn him back toward marvels and secrets whose boundaries no prophet might fix. Here lay the arcana, wondrous or dreadful as the case might be, for which all his years of travel and application had been preparing him. A taxicab whirled him through Post Office Square with its glimpse of the river, the old Market House, and the head of the bay, and up the steep curved slope of Waterman Street to Prospect, where the vast gleaming dome and sunset-flushed Ionic columns of the Christian Science

Church beckoned northward. Then eight squares past the fine old estates his childish eyes had known, and the quaint brick sidewalks so often trodden by his youthful feet. And at last the little white overtaken farmhouse on the right, on the left the classic Adam porch and stately bayed facade of the great brick house where he was born. It was twilight, and Charles Dexter Ward had come home.

5.

A school of alienists slightly less academic than Dr. Lyman's assign to Ward's European trip the beginning of his true madness. Admitting that he was sane when he started, they believe that his conduct upon returning implies a disastrous change. But even to this claim Dr. Willett refuses to accede. There was, he insists, something later; and the queernesses of the youth at this stage he attributes to the practice of rituals learned abroad—odd enough things, to be sure, but by no means implying mental aberration on the part of their celebrant. Ward himself, though visibly aged and hardened, was still normal in his general reactions; and in several talks with Willett displayed a balance which no madman—even an incipient one—could feign continuously for long. What elicited the notion of insanity at this period were the *sounds* heard at all hours from Ward's attic laboratory, in which he kept himself most of the time. There were chantings and repetitions, and thunderous declamations in uncanny rhythms; and although these sounds were always in Ward's own voice, there was something in the quality of that voice, and in the accents of the formulae it pronounced, which could not but chill the blood of every hearer. It was noticed that Nig, the venerable and beloved black cat of the household, bristled and arched his back perceptibly when certain of the tones were heard.

The odours occasionally wafted from the laboratory were likewise exceedingly strange. Sometimes they were very noxious, but more often they were aromatic, with a haunting, elusive quality which seemed to have the power of inducing fantastic images. People who smelled them had a tendency to glimpse momentary mirages of enormous vistas, with strange hills or endless avenues of

sphinxes and hippogriffs stretching off into infinite distance. Ward did not resume his old-time rambles, but applied himself diligently to the strange books he had brought home, and to equally strange delvings within his quarters; explaining that European sources had greatly enlarged the possibilities of his work, and promising great revelations in the years to come. His older aspect increased to a startling degree his resemblance to the Curwen portrait in his library; and Dr. Willett would often pause by the latter after a call, marvelling at the virtual identity, and reflecting that only the small pit above the picture's right eye now remained to differentiate the long-dead wizard from the living youth. These calls of Willett's, undertaken at the request of the senior Wards, were curious affairs. Ward at no time repulsed the doctor, but the latter saw that he could never reach the young man's inner psychology. Frequently he noted peculiar things about; little wax images of grotesque design on the shelves or tables, and the half-erased remnants of circles, triangles, and pentagrams in chalk or charcoal on the cleared central space of the large room. And always in the night those rhythms and incantations thundered, till it became very difficult to keep servants or suppress furtive talk of Charles's madness.

In January, 1927, a peculiar incident occurred. One night about midnight, as Charles was chanting a ritual whose weird cadence echoed unpleasantly through the house below, there came a sudden gust of chill wind from the bay, and a faint, obscure trembling of the earth which everyone in the neighbourhood noted. At the same time the cat exhibited phenomenal traces of fright, while dogs bayed for as much as a mile around. This was the prelude to a sharp thunderstorm, anomalous for the season, which brought with it such a crash that Mr. and Mrs. Ward believed the house had been struck. They rushed upstairs to see what damage had been done, but Charles met them at the door to the attic; pale, resolute, and portentous, with an almost fearsome combination of triumph and seriousness on his face. He assured them that the house had not really been struck, and that the storm would soon be over. They paused, and looking through a window saw that he was indeed right; for the lightning flashed farther and farther off, whilst the trees ceased to bend in the strange frigid gust from the water. The thunder sank to a sort of dull mumbling chuckle and finally died

away. Stars came out, and the stamp of triumph on Charles Ward's face crystallised into a very singular expression.

For two months or more after this incident Ward was less confined than usual to his laboratory. He exhibited a curious interest in the weather, and made odd inquiries about the date of the spring thawing of the ground. One night late in March he left the house after midnight, and did not return till almost morning; when his mother, being wakeful, heard a rumbling motor draw up to the carriage entrance. Muffled oaths could be distinguished, and Mrs. Ward, rising and going to the window, saw four dark figures removing a long, heavy box from a truck at Charles's direction and carrying it within by the side door. She heard laboured breathing and ponderous footfalls on the stairs, and finally a dull thumping in the attic; after which the footfalls descended again, and the four men reappeared outside and drove off in their truck.

The next day Charles resumed his strict attic seclusion, drawing down the dark shades of his laboratory windows and appearing to be working on some metal substance. He would open the door to no one, and steadfastly refused all proffered food. About noon a wrenching sound followed by a terrible cry and a fall were heard, but when Mrs. Ward rapped at the door her son at length answered faintly, and told her that nothing had gone amiss. The hideous and indescribable stench now welling out was absolutely harmless and unfortunately necessary. Solitude was the one prime essential, and he would appear later for dinner. That afternoon, after the conclusion of some odd hissing sounds which came from behind the locked portal, he did finally appear; wearing an extremely haggard aspect and forbidding anyone to enter the laboratory upon any pretext. This, indeed, proved the beginning of a new policy of secrecy; for never afterward was any other person permitted to visit either the mysterious garret workroom or the adjacent storeroom which he cleaned out, furnished roughly, and added to his inviolably private domain as a sleeping apartment. Here he lived, with books brought up from his library beneath, till the time he purchased the Pawtuxet bungalow and moved to it all his scientific effects.

In the evening Charles secured the paper before the rest of the family and damaged part of it through an apparent accident. Later on Dr. Willett, having fixed the date from statements by various

members of the household, looked up an intact copy at the *Journal* office and found that in the destroyed section the following small item had occurred:

Nocturnal Diggers Surprised in
North Burial Ground

Robert Hart, night watchman at the North Burial Ground, this morning discovered a party of several men with a motor truck in the oldest part of the cemetery, but apparently frightened them off before they had accomplished whatever their object may have been.

The discovery took place at about four o'clock, when Hart's attention was attracted by the sound of a motor outside his shelter. Investigating, he saw a large truck on the main drive several rods away; but could not reach it before the sound of his feet on the gravel had revealed his approach. The men hastily placed a large box in the truck and drove away toward the street before they could be overtaken; and since no known grave was disturbed, Hart believes that this box was an object which they wished to bury.

The diggers must have been at work for a long while before detection, for Hart found an enormous hole dug at a considerable distance back from the roadway in the lot of Amasa Field, where most of the old stones have long ago disappeared. The hole, a place as large and deep as a grave, was empty; and did not coincide with any interment mentioned in the cemetery records.

Sergt. Riley of the Second Station viewed the spot and gave the opinion that the hole was dug by bootleggers rather gruesomely and ingeniously seeking a safe cache for liquor in a place not likely to be disturbed. In reply to questions Hart said he thought the escaping truck had headed up Rochambeau Avenue, though he could not be sure.

During the next few days Charles Ward was seldom seen by his family. Having added sleeping quarters to his attic realm, he kept closely to himself there, ordering food brought to the door and not taking it in until after the servant had gone away. The droning of monotonous formulae and the chanting of bizarre rhythms recurred at intervals, while at other times occasional listeners could detect the sound of tinkling glass, hissing chemicals, running water, or roaring gas flames. Odours of the most unplaceable quality, wholly unlike any before noted, hung at times around the door; and the air of tension observable in the young recluse whenever he did venture briefly forth was such as to excite the keenest speculation. Once he made a hasty trip to the Athenaeum for a book he re-

quired, and again he hired a messenger to fetch him a highly obscure volume from Boston. Suspense was written portentously over the whole situation, and both the family and Dr. Willett confessed themselves wholly at a loss what to do or think about it.

6.

Then on the fifteenth of April a strange development occurred. While nothing appeared to grow different in kind, there was certainly a very terrible difference in degree; and Dr. Willett somehow attaches great significance to the change. The day was Good Friday, a circumstance of which the servants made much, but which others quite naturally dismiss as an irrelevant coincidence. Late in the afternoon young Ward began repeating a certain formula in a singularly loud voice, at the same time burning some substance so pungent that its fumes escaped over the entire house. The formula was so plainly audible in the hall outside the locked door that Mrs. Ward could not help memorising it as she waited and listened anxiously, and later on she was able to write it down at Dr. Willett's request. It ran as follows, and experts have told Dr. Willett that its very close analogue can be found in the mystic writings of "Eliphas Levi", that cryptic soul who crept through a crack in the forbidden door and glimpsed the frightful vistas of the void beyond:

"Per Adonai Eloim, Adonai Jehova,
Adonai Sabaoth, Metraton On Agla Mathon,
verbum pythonicum, mysterium salamandrae,
conventus sylvorum, antra gnomorum,
daemonia Coeli God, Almonsin, Gibor, Jehosua,
Evam, Zariatnatmik, veni, veni, veni."

This had been going on for two hours without change or intermission when over all the neighbourhood a pandaemoniac howling of dogs set in. The extent of this howling can be judged from the space it received in the papers the next day, but to those in the Ward household it was overshadowed by the odour which instantly followed it; a hideous, all-pervasive odour which none of them had ever smelt before or have ever smelt since. In the midst of this mephitic flood there came a very perceptible flash like that of

lightning, which would have been blinding and impressive but for the daylight around; and then was heard *the voice* that no listener can ever forget because of its thunderous remoteness, its incredible depth, and its eldritch dissimilarity to Charles Ward's voice. It shook the house, and was clearly heard by at least two neighbours above the howling of the dogs. Mrs. Ward, who had been listening in despair outside her son's locked laboratory, shivered as she recognised its hellish import; for Charles had told her of its evil fame in dark books, and of the manner in which it had thundered, according to the Fenner letters, above the doomed Pawtuxet farmhouse on the night of Joseph Curwen's annihilation. There was no mistaking that nightmare phrase, for Charles had described it too vividly in the old days when he had talked frankly of his Curwen investigations. And yet it was only this fragment of an archaic and forgotten language: "DIES MIES JESCHET BOENE DOESEF DOUVEMA ENITEMAUS".

Close upon this thundering there came a momentary darkening of the daylight, though sunset was still an hour distant, and then a puff of added odour different from the first but equally unknown and intolerable. Charles was chanting again now and his mother could hear syllables that sounded like "Yi-nash-Yog-Sothoth-he-lgeb-fi-throdog"—ending in a "Yah!" whose maniacal force mounted in an ear-splitting crescendo. A second later all previous memories were effaced by the wailing scream which burst out with frantic explosiveness and gradually changed form to a paroxysm of diabolic and hysterical laughter. Mrs. Ward, with the mingled fear and blind courage of maternity, advanced and knocked affrightedly at the concealing panels, but obtained no sign of recognition. She knocked again, but paused nervelessly as a second shriek arose, this one unmistakably in the familiar voice of her son, *and sounding concurrently with the still bursting cachinnations of that other voice*. Presently she fainted, although she is still unable to recall the precise and immediate cause. Memory sometimes makes merciful deletions.

Mr. Ward returned from the business section at about quarter past six; and not finding his wife downstairs, was told by the frightened servants that she was probably watching at Charles's door, from which the sounds had been far stranger than ever

before. Mounting the stairs at once, he saw Mrs. Ward stretched at full length on the floor of the corridor outside the laboratory; and realising that she had fainted, hastened to fetch a glass of water from a set bowl in a neighbouring alcove. Dashing the cold fluid in her face, he was heartened to observe an immediate response on her part, and was watching the bewildered opening of her eyes when a chill shot through him and threatened to reduce him to the very state from which she was emerging. For the seemingly silent laboratory was not as silent as it had appeared to be, but held the murmurs of a tense, muffled conversation in tones too low for comprehension, yet of a quality profoundly disturbing to the soul.

It was not, of course, new for Charles to mutter formulae; but this muttering was definitely different. It was so palpably a dialogue, or imitation of a dialogue, with the regular alteration of inflections suggesting question and answer, statement and response. One voice was undisguisedly that of Charles, but the other had a depth and hollowness which the youth's best powers of ceremonial mimicry had scarcely approached before. There was something hideous, blasphemous, and abnormal about it, and but for a cry from his recovering wife which cleared his mind by arousing his protective instincts it is not likely that Theodore Howland Ward could have maintained for nearly a year more his old boast that he had never fainted. As it was, he seized his wife in his arms and bore her quickly downstairs before she could notice the voices which had so horribly disturbed him. Even so, however, he was not quick enough to escape catching something himself which caused him to stagger dangerously with his burden. For Mrs. Ward's cry had evidently been heard by others than he, and there had come in response to it from behind the locked door the first distinguishable words which that masked and terrible colloquy had yielded. They were merely an excited caution in Charles's own voice, but somehow their implications held a nameless fright for the father who overheard them. The phrase was just this: "*Sshh!—write!*"

Mr. and Mrs. Ward conferred at some length after dinner, and the former resolved to have a firm and serious talk with Charles that very night. No matter how important the object, such conduct could no longer be permitted; for these latest developments transcended every limit of sanity and formed a menace to the order and

nervous well-being of the entire household. The youth must indeed have taken complete leave of his senses, since only downright madness could have prompted the wild screams and imaginary conversations in assumed voices which the present day had brought forth. All this must be stopped, or Mrs. Ward would be made ill and the keeping of servants become an impossibility.

Mr. Ward rose at the close of the meal and started upstairs for Charles's laboratory. On the third floor, however, he paused at the sounds which he heard proceeding from the now disused library of his son. Books were apparently being flung about and papers wildly rustled, and upon stepping to the door Mr. Ward beheld the youth within, excitedly assembling a vast armful of literary matter of every size and shape. Charles's aspect was very drawn and haggard, and he dropped his entire load with a start at the sound of his father's voice. At the elder man's command he sat down, and for some time listened to the admonitions he had so long deserved. There was no scene. At the end of the lecture he agreed that his father was right, and that his noises, mutterings, incantations, and chemical odours were indeed inexcusable nuisances. He agreed to a policy of greater quiet, though insisting on a prolongation of his extreme privacy. Much of his future work, he said, was in any case purely book research; and he could obtain quarters elsewhere for any such vocal rituals as might be necessary at a later stage. For the fright and fainting of his mother he expressed the keenest contrition, and explained that the conversation later heard was part of an elaborate symbolism designed to create a certain mental atmosphere. His use of abstruse technical terms somewhat bewildered Mr. Ward, but the parting impression was one of undeniable sanity and poise despite a mysterious tension of the utmost gravity. The interview was really quite inconclusive, and as Charles picked up his armful and left the room Mr. Ward hardly knew what to make of the entire business. It was as mysterious as the death of poor old Nig, whose stiffening form had been found an hour before in the basement, with staring eyes and fear-distorted mouth.

Driven by some vague detective instinct, the bewildered parent now glanced curiously at the vacant shelves to see what his son had taken up to the attic. The youth's library was plainly and rigidly classified, so that one might tell at a glance the books or at least the

kind of books which had been withdrawn. On this occasion Mr. Ward was astonished to find that nothing of the occult or the antiquarian, beyond what had been previously removed, was missing. These new withdrawals were all modern items; histories, scientific treatises, geographies, manuals of literature, philosophic works, and certain contemporary newspapers and magazines. It was a very curious shift from Charles Ward's recent run of reading, and the father paused in a growing vortex of perplexity and an engulfing sense of strangeness. The strangeness was a very poignant sensation, and almost clawed at his chest as he strove to see just what was wrong around him. Something was indeed wrong, and tangibly as well as spiritually so. Ever since he had been in this room he had known that something was amiss, and at last it dawned upon him what it was.

On the north wall rose still the ancient carved overmantel from the house in Olney Court, but to the cracked and precariously restored oils of the large Curwen portrait disaster had come. Time and unequal heating had done their work at last, and at some time since the room's last cleaning the worst had happened. Peeling clear of the wood, curling tighter and tighter, and finally crumbling into small bits with what must have been malignly silent suddenness, the portrait of Joseph Curwen had resigned forever its staring surveillance of the youth it so strangely resembled, and now lay scattered on the floor as a thin coating of fine bluish-grey dust.

IV. *A Mutation and a Madness*

1.

In the week following that memorable Good Friday Charles Ward was seen more often than usual, and was continually carrying books between his library and the attic laboratory. His actions were quiet and rational, but he had a furtive, hunted look which his mother did not like, and developed an incredibly ravenous appetite as gauged by his demands upon the cook. Dr. Willett had been told of those Friday noises and happenings, and on the following Tuesday had a long conversation with the youth in the library where the picture stared no more. The interview was, as always, inconclusive; but Willett is still ready to swear that the youth was sane and him-

self at the time. He held out promises of an early revelation, and spoke of the need of securing a laboratory elsewhere. At the loss of the portrait he grieved singularly little considering his first enthusiasm over it, but seemed to find something of positive humour in its sudden crumbling.

About the second week Charles began to be absent from the house for long periods, and one day when good old black Hannah came to help with the spring cleaning she mentioned his frequent visits to the old house in Olney Court, where he would come with a large valise and perform curious delvings in the cellar. He was always very liberal to her and to old Asa, but seemed more worried than he used to be; which grieved her very much, since she had watched him grow up from birth. Another report of his doings came from Pawtuxet, where some friends of the family saw him at a distance a surprising number of times. He seemed to haunt the resort and canoe-house of Rhodes-on-the-Pawtuxet, and subsequent inquiries by Dr. Willett at that place brought out the fact that his purpose was always to secure access to the rather hedged-in river-bank, along which he would walk toward the north, usually not reappearing for a very long while.

Late in May came a momentary revival of ritualistic sounds in the attic laboratory which brought a stern reproof from Mr. Ward and a somewhat distracted promise of amendment from Charles. It occurred one morning, and seemed to form a resumption of the imaginary conversation noted on that turbulent Good Friday. The youth was arguing or remonstrating hotly with himself, for there suddenly burst forth a perfectly distinguishable series of clashing shouts in differentiated tones like alternate demands and denials which caused Mrs. Ward to run upstairs and listen at the door. She could hear no more than a fragment whose only plain words were "must have it red for three months", and upon her knocking all sounds ceased at once. When Charles was later questioned by his father he said that there were certain conflicts of spheres of consciousness which only great skill could avoid, but which he would try to transfer to other realms.

About the middle of June a queer nocturnal incident occurred. In the early evening there had been some noise and thumping in the laboratory upstairs, and Mr. Ward was on the point of investi-

gating when it suddenly quieted down. That midnight, after the family had retired, the butler was nightlocking the front door when according to his statement Charles appeared somewhat blunderingly and uncertainly at the foot of the stairs with a large suitcase and made signs that he wished egress. The youth spoke no word, but the worthy Yorkshireman caught one sight of his fevered eyes and trembled causelessly. He opened the door and young Ward went out, but in the morning he presented his resignation to Mrs. Ward. There was, he said, something unholy in the glance Charles had fixed on him. It was no way for a young gentleman to look at an honest person, and he could not possibly stay another night. Mrs. Ward allowed the man to depart, but she did not value his statement highly. To fancy Charles in a savage state that night was quite ridiculous, for as long as she had remained awake she had heard faint sounds from the laboratory above; sounds as if of sobbing and pacing, and of a sighing which told only of despair's profoundest depths. Mrs. Ward had grown used to listening for sounds in the night, for the mystery of her son was fast driving all else from her mind.

The next evening, much as on another evening nearly three months before, Charles Ward seized the newspaper very early and accidentally lost the main section. This matter was not recalled till later, when Dr. Willett began checking up loose ends and searching out missing links here and there. In the *Journal* office he found the section which Charles had lost, and marked two items as of possible significance. They were as follows:

More Cemetery Delving

It was this morning discovered by Robert Hart, night watchman at the North Burial Ground, that ghouls were again at work in the ancient portion of the cemetery. The grave of Ezra Weeden, who was born in 1740 and died in 1824 according to his uprooted and savagely splintered slate headstone, was found excavated and rifled, the work being evidently done with a spade stolen from an adjacent tool-shed.

Whatever the contents may have been after more than a century of burial, all was gone except a few slivers of decayed wood. There were no wheel tracks, but the police have measured a single set of footprints which they found in the vicinity, and which indicate the boots of a man of refinement.

Hart is inclined to link this incident with the digging discovered

last March, when a party in a motor truck were frightened away after making a deep excavation; but Sergt. Riley of the Second Station discounts this theory and points to vital differences in the two cases. In March the digging had been in a spot where no grave was known; but this time a well-marked and cared-for grave had been rifled with every evidence of deliberate purpose, and with a conscious malignity expressed in the splintering of the slab which had been intact up to the day before.

Members of the Weeden family, notified of the happening, expressed their astonishment and regret; and were wholly unable to think of any enemy who would care to violate the grave of their ancestor. Hazard Weeden of 598 Angell Street recalls a family legend according to which Ezra Weeden was involved in some very peculiar circumstances, not dishonourable to himself, shortly before the Revolution; but of any modern feud or mystery he is frankly ignorant. Inspector Cunningham has been assigned to the case, and hopes to uncover some valuable clues in the near future.

Dogs Noisy in Pawtuxet

Residents of Pawtuxet were aroused about 3 a.m. today by a phenomenal baying of dogs which seemed to centre near the river just north of Rhodes-on-the-Pawtuxet. The volume and quality of the howling were unusually odd, according to most who heard it; and Fred Lemdin, night watchman at Rhodes, declares it was mixed with something very like the shrieks of a man in mortal terror and agony. A sharp and very brief thunderstorm, which seemed to strike somewhere near the bank of the river, put an end to the disturbance. Strange and unpleasant odours, probably from the oil tanks along the bay, are popularly linked with this incident; and may have had their share in exciting the dogs.

The aspect of Charles now became very haggard and hunted, and all agreed in retrospect that he may have wished at this period to make some statement or confession from which sheer terror withheld him. The morbid listening of his mother in the night brought out the fact that he made frequent sallies abroad under cover of darkness, and most of the more academic alienists unite at present in charging him with the revolting cases of vampirism which the press so sensationally reported about this time, but which have not yet been definitely traced to any known perpetrator. These cases, too recent and celebrated to need detailed mention, involved victims of every age and type and seemed to cluster around two distinct localities; the residential hill and the North End, near the

Ward home, and the suburban districts across the Cranston line near Pawtuxet. Both late wayfarers and sleepers with open windows were attacked, and those who lived to tell the tale spoke unanimously of a lean, lithe, leaping monster with burning eyes which fastened its teeth in the throat or upper arm and feasted ravenously.

Dr. Willett, who refuses to date the madness of Charles Ward as far back as even this, is cautious in attempting to explain these horrors. He has, he declares, certain theories of his own; and limits his positive statements to a peculiar kind of negation. "I will not," he says, "state who or what I believe perpetrated these attacks and murders, but I will declare that Charles Ward was innocent of them. I have reason to be sure he was ignorant of the taste of blood, as indeed his continued anaemic decline and increasing pallor prove better than any verbal argument. Ward meddled with terrible things, but he has paid for it, and he was never a monster or a villain. As for now—I don't like to think. A change came, and I'm content to believe that the old Charles Ward died with it. His soul did, anyhow, for that mad flesh that vanished from Waite's hospital had another."

Willett speaks with authority, for he was often at the Ward home attending Mrs. Ward, whose nerves had begun to snap under the strain. Her nocturnal listening had bred some morbid hallucinations which she confided to the doctor with hesitancy, and which he ridiculed in talking to her, although they made him ponder deeply when alone. These delusions always concerned the faint sounds which she fancied she heard in the attic laboratory and bedroom, and emphasised the occurrence of muffled sighs and sobbings at the most impossible times. Early in July Willett ordered Mrs. Ward to Atlantic City for an indefinite recuperative sojourn, and cautioned both Mr. Ward and the haggard and elusive Charles to write her only cheering letters. It is probably to this enforced and reluctant escape that she owes her life and continued sanity.

2.

Not long after his mother's departure Charles Ward began negotiating for the Pawtuxet bungalow. It was a squalid little wooden edifice with a concrete garage, perched high on the

sparsely settled bank of the river slightly above Rhodes, but for some odd reason the youth would have nothing else. He gave the real-estate agencies no peace till one of them secured it for him at an exorbitant price from a somewhat reluctant owner, and as soon as it was vacant he took possession under cover of darkness, transporting in a great closed van the entire contents of his attic laboratory, including the books both weird and modern which he had borrowed from his study. He had this van loaded in the black small hours, and his father recalls only a drowsy realisation of stifled oaths and stamping feet on the night the goods were taken away. After that Charles moved back to his own old quarters on the third floor, and never haunted the attic again.

To the Pawtuxet bungalow Charles transferred all the secrecy with which he had surrounded his attic realm, save that he now appeared to have two sharers of his mysteries; a villainous-looking Portuguese half-caste from the South Main St. waterfront who acted as a servant, and a thin, scholarly stranger with dark glasses and a stubbly full beard of dyed aspect whose status was evidently that of a colleague. Neighbours vainly tried to engage these odd persons in conversation. The mulatto Gomes spoke very little English, and the bearded man, who gave his name as Dr. Allen, voluntarily followed his example. Ward himself tried to be more affable, but succeeded only in provoking curiosity with his rambling accounts of chemical research. Before long queer tales began to circulate regarding the all-night burning of lights; and somewhat later, after this burning had suddenly ceased, there rose still queerer tales of disproportionate orders of meat from the butcher's and of the muffled shouting, declamation, rhythmic chanting, and screaming supposed to come from some very deep cellar below the place. Most distinctly the new and strange household was bitterly disliked by the honest bourgeoisie of the vicinity, and it is not remarkable that dark hints were advanced connecting the hated establishment with the current epidemic of vampiristic attacks and murders; especially since the radius of that plague seemed now confined wholly to Pawtuxet and the adjacent streets of Edgewood.

Ward spent most of his time at the bungalow, but slept occasionally at home and was still reckoned a dweller beneath his father's roof. Twice he was absent from the city on week-long trips,

whose destinations have not yet been discovered. He grew steadily paler and more emaciated even than before, and lacked some of his former assurance when repeating to Dr. Willett his old, old story of vital research and future revelations. Willett often waylaid him at his father's house, for the elder Ward was deeply worried and perplexed, and wished his son to get as much sound oversight as could be managed in the case of so secretive and independent an adult. The doctor still insists that the youth was sane even as late as this, and adduces many a conversation to prove his point.

About September the vampirism declined, but in the following January Ward almost became involved in serious trouble. For some time the nocturnal arrival and departure of motor trucks at the Pawtuxet bungalow had been commented upon, and at this juncture an unforeseen hitch exposed the nature of at least one item of their contents. In a lonely spot near Hope Valley had occurred one of the frequent sordid waylayings of trucks by "hi-jackers" in quest of liquor shipments, but this time the robbers had been destined to receive the greater shock. For the long cases they seized proved upon opening to contain some exceedingly gruesome things; so gruesome, in fact, that the matter could not be kept quiet amongst the denizens of the underworld. The thieves had hastily buried what they discovered, but when the State Police got wind of the matter a careful search was made. A recently arrested vagrant, under promise of immunity from prosecution on any additional charge, at last consented to guide a party of troopers to the spot; and there was found in that hasty cache a very hideous and shameful thing. It would not be well for the national—or even the international—sense of decorum if the public were ever to know what was uncovered by that awestruck party. There was no mistaking it, even by these far from studious officers; and telegrams to Washington ensued with feverish rapidity.

The cases were addressed to Charles Ward at his Pawtuxet bungalow, and State and Federal officials at once paid him a very forceful and serious call. They found him pallid and worried with his two odd companions, and received from him what seemed to be a valid explanation and evidence of innocence. He had needed certain anatomical specimens as part of a programme of research whose depth and genuineness anyone who had known him in the

last decade could prove, and had ordered the required kind and number from agencies which he had thought as reasonably legitimate as such things can be. Of the *identity* of the specimens he had known absolutely nothing, and was properly shocked when the inspectors hinted at the monstrous effect on public sentiment and national dignity which a knowledge of the matter would produce. In this statement he was firmly sustained by his bearded colleague Dr. Allen, whose oddly hollow voice carried even more conviction than his own nervous tones; so that in the end the officials took no action, but carefully set down the New York name and address which Ward gave them as a basis for a search which came to nothing. It is only fair to add that the specimens were quickly and quietly restored to their proper places, and that the general public will never know of their blasphemous disturbance.

On February 9, 1928, Dr. Willett received a letter from Charles Ward which he considers of extraordinary importance, and about which he has frequently quarrelled with Dr. Lyman. Lyman believes that this note contains positive proof of a well-developed case of *dementia praecox*, but Willett on the other hand regards it as the last perfectly sane utterance of the hapless youth. He calls especial attention to the normal character of the penmanship; which though shewing traces of shattered nerves, is nevertheless distinctly Ward's own. The text in full is as follows:

"100 Prospect St.
Providence, R.I.,
February 8, 1928.

"Dear Dr. Willett:—

"I feel that at last the time has come for me to make the disclosures which I have so long promised you, and for which you have pressed me so often. The patience you have shewn in waiting, and the confidence you have shewn in my mind and integrity, are things I shall never cease to appreciate.

"And now that I am ready to speak, I must own with humiliation that no triumph such as I dreamed of can ever be mine. Instead of triumph I have found terror, and my talk with you will not be a boast of victory but a plea for help and advice in saving both myself and the world from a horror beyond all human conception or calculation. You recall what those Fenner letters said of the old raiding party at Pawtuxet. That must all be done again, and quickly. Upon us depends more than can be put into words—all civilisation, all natural law,

perhaps even the fate of the solar system and the universe. I have brought to light a monstrous abnormality, but I did it for the sake of knowledge. Now for the sake of all life and Nature you must help me thrust it back into the dark again.

"I have left that Pawtuxet place forever, and we must extirpate everything existing there, alive or dead. I shall not go there again, and you must not believe it if you ever hear that I am there. I will tell you why I say this when I see you. I have come home for good, and wish you would call on me at the very first moment that you can spare five or six hours continuously to hear what I have to say. It will take that long—and believe me when I tell you that you never had a more genuine professional duty than this. My life and reason are the very least things which hang in the balance.

"I dare not tell my father, for he could not grasp the whole thing. But I have told him of my danger, and he has four men from a detective agency watching the house. I don't know how much good they can do, for they have against them forces which even you could scarcely envisage or acknowledge. So come quickly if you wish to see me alive and hear how you may help to save the cosmos from stark hell.

"Any time will do—I shall not be out of the house. Don't telephone ahead, for there is no telling who or what may try to intercept you. And let us pray to whatever gods there be that nothing may prevent this meeting.

"In utmost gravity and desperation,

"Charles Dexter Ward."

"P.S. Shoot Dr. Allen on sight *and dissolve his body in acid*. Don't burn it."

Dr. Willett received this note about 10:30 a.m., and immediately arranged to spare the whole late afternoon and evening for the momentous talk, letting it extend on into the night as long as might be necessary. He planned to arrive about four o'clock, and through all the intervening hours was so engulfed in every sort of wild speculation that most of his tasks were very mechanically performed. Maniacal as the letter would have sounded to a stranger, Willett had seen too much of Charles Ward's oddities to dismiss it as sheer raving. That something very subtle, ancient, and horrible was hovering about he felt quite sure, and the reference to Dr. Allen could almost be comprehended in view of what Pawtuxet gossip said of Ward's enigmatical colleague. Willett had never seen the man, but had heard much of his aspect and bearing, and could not

but wonder what sort of eyes those much-discussed dark glasses might conceal.

Promptly at four Dr. Willett presented himself at the Ward residence, but found to his annoyance that Charles had not adhered to his determination to remain indoors. The guards were there, but said that the young man seemed to have lost part of his timidity. He had that morning done much apparently frightened arguing and protesting over the telephone, one of the detectives said, replying to some unknown voice with phrases such as "I am very tired and must rest a while", "I can't receive anyone for some time, you'll have to excuse me", "Please postpone decisive action till we can arrange some sort of compromise", or "I am very sorry, but I must take a complete vacation from everything; I'll talk with you later". Then, apparently gaining boldness through meditation, he had slipped out so quietly that no one had seen him depart or knew that he had gone until he returned about one o'clock and entered the house without a word. He had gone upstairs, where a bit of his fear must have surged back; for he was heard to cry out in a highly terrified fashion upon entering his library, afterward trailing off into a kind of choking gasp. When, however, the butler had gone to inquire what the trouble was, he had appeared at the door with a great show of boldness, and had silently gestured the man away in a manner that terrified him unaccountably. Then he had evidently done some rearranging of his shelves, for a great clattering and thumping and creaking ensued; after which he had reappeared and left at once. Willett inquired whether or not any message had been left, but was told that there was none. The butler seemed queerly disturbed about something in Charles's appearance and manner, and asked solicitously if there was much hope for a cure of his disordered nerves.

For almost two hours Dr. Willett waited vainly in Charles Ward's library, watching the dusty shelves with their wide gaps where books had been removed, and smiling grimly at the panelled overmantel on the north wall, whence a year before the suave features of old Joseph Curwen had looked mildly down. After a time the shadows began to gather, and the sunset cheer gave place to a vague growing terror which flew shadow-like before the night. Mr.

Ward finally arrived, and shewed much surprise and anger at his son's absence after all the pains which had been taken to guard him. He had not known of Charles's appointment, and promised to notify Willett when the youth returned. In bidding the doctor good-night he expressed his utter perplexity at his son's condition, and urged his caller to do all he could to restore the boy to normal poise. Willett was glad to escape from that library, for something frightful and unholy seemed to haunt it; as if the vanished picture had left behind a legacy of evil. He had never liked that picture; and even now, strong-nerved though he was, there lurked a quality in its vacant panel which made him feel an urgent need to get out into the pure air as soon as possible.

3.

The next morning Willett received a message from the senior Ward, saying that Charles was still absent. Mr. Ward mentioned that Dr. Allen had telephoned him to say that Charles would remain at Pawtuxet for some time, and that he must not be disturbed. This was necessary because Allen himself was suddenly called away for an indefinite period, leaving the researches in need of Charles's constant oversight. Charles sent his best wishes, and regretted any bother his abrupt change of plans might have caused. In listening to this message Mr. Ward heard Dr. Allen's voice for the first time, and it seemed to excite some vague and elusive memory which could not be actually placed, but which was disturbing to the point of fearfulness.

Faced by these baffling and contradictory reports, Dr. Willett was frankly at a loss what to do. The frantic earnestness of Charles's note was not to be denied, yet what could one think of its writer's immediate violation of his own expressed policy? Young Ward had written that his delvings had become blasphemous and menacing, that they and his bearded colleague must be extirpated at any cost, and that he himself would never return to their final scene; yet according to latest advices he had forgotten all this and was back in the thick of the mystery. Common sense bade one leave the youth alone with his freakishness, yet some deeper instinct

would not permit the impression of that frenzied letter to subside. Willett read it over again, and could not make its essence sound as empty and insane as both its bombastic verbiage and its lack of fulfilment would seem to imply. Its terror was too profound and real, and in conjunction with what the doctor already knew evoked too vivid hints of monstrosities from beyond time and space to permit of any cynical explanation. There were nameless horrors abroad; and no matter how little one might be able to get at them, one ought to stand prepared for any sort of action at any time.

For over a week Dr. Willett pondered on the dilemma which seemed thrust upon him, and became more and more inclined to pay Charles a call at the Pawtuxet bungalow. No friend of the youth had ever ventured to storm this forbidden retreat, and even his father knew of its interior only from such descriptions as he chose to give; but Willett felt that some direct conversation with his patient was necessary. Mr. Ward had been receiving brief and non-committal typed notes from his son, and said that Mrs. Ward in her Atlantic City retirement had had no better word. So at length the doctor resolved to act; and despite a curious sensation inspired by old legends of Joseph Curwen, and by more recent revelations and warnings from Charles Ward, set boldly out for the bungalow on the bluff above the river.

Willett had visited the spot before through sheer curiosity, though of course never entering the house or proclaiming his presence; hence knew exactly the route to take. Driving out Broad Street one early afternoon toward the end of February in his small motor, he thought oddly of the grim party which had taken that selfsame road a hundred and fifty-seven years before on a terrible errand which none might ever comprehend.

The ride through the city's decaying fringe was short, and trim Edgewood and sleepy Pawtuxet presently spread out ahead. Willett turned to the right down Lockwood Street and drove his car as far along that rural road as he could, then alighted and walked north to where the bluff towered above the lovely bends of the river and the sweep of misty downlands beyond. Houses were still few here, and there was no mistaking the isolated bungalow with its concrete garage on a high point of land at his left. Stepping briskly up the

neglected gravel walk he rapped at the door with a firm hand, and spoke without a tremor to the evil Portuguese mulatto who opened it to the width of a crack.

He must, he said, see Charles Ward at once on vitally important business. No excuse would be accepted, and a repulse would mean only a full report of the matter to the elder Ward. The mulatto still hesitated, and pushed against the door when Willett attempted to open it; but the doctor merely raised his voice and renewed his demands. Then there came from the dark interior a husky whisper which somehow chilled the hearer through and through though he did not know why he feared it. "Let him in, Tony," it said, "we may as well talk now as ever." But disturbing as was the whisper, the greater fear was that which immediately followed. The floor creaked and the speaker hove in sight—and the owner of those strange and resonant tones was seen to be no other than Charles Dexter Ward.

The minuteness with which Dr. Willett recalled and recorded his conversation of that afternoon is due to the importance he assigns to this particular period. For at last he concedes a vital change in Charles Dexter Ward's mentality, and believes that the youth now spoke from a brain hopelessly alien to the brain whose growth he had watched for six and twenty years. Controversy with Dr. Lyman has compelled him to be very specific, and he definitely dates the madness of Charles Ward from the time the typewritten notes began to reach his parents. Those notes are not in Ward's normal style; not even in the style of that last frantic letter to Willett. Instead, they are strange and archaic, as if the snapping of the writer's mind had released a flood of tendencies and impressions picked up unconsciously through boyhood antiquarianism. There is an obvious effort to be modern, but the spirit and occasionally the language are those of the past.

The past, too, was evident in Ward's every tone and gesture as he received the doctor in that shadowy bungalow. He bowed, motioned Willett to a seat, and began to speak abruptly in that strange whisper which he sought to explain at the very outset.

"I am grown phthisical," he began, "from this cursed river air. You must excuse my speech. I suppose you are come from my

father to see what ails me, and I hope you will say nothing to alarm him."

Willett was studying these scraping tones with extreme care, but studying even more closely the face of the speaker. Something, he felt, was wrong; and he thought of what the family had told him about the fright of that Yorkshire butler one night. He wished it were not so dark, but did not request that any blind be opened. Instead, he merely asked Ward why he had so belied the frantic note of little more than a week before.

"I was coming to that," the host replied. "You must know, I am in a very bad state of nerves, and do and say queer things I cannot account for. As I have told you often, I am on the edge of great matters; and the bigness of them has a way of making me light-headed. Any man might well be frightened of what I have found, but I am not to be put off for long. I was a dunce to have that guard and stick at home; for having gone this far, my place is here. I am not well spoke of by my prying neighbours, and perhaps I was led by weakness to believe myself what they say of me. There is no evil to any in what I do, so long as I do it rightly. Have the goodness to wait six months, and I'll shew you what will pay your patience well.

"You may as well know I have a way of learning old matters from things surer than books, and I'll leave you to judge the importance of what I can give to history, philosophy, and the arts by reason of the doors I have access to. My ancestor had all this when those witless peeping Toms came and murdered him. I now have it again, or am coming very imperfectly to have a part of it. This time nothing must happen, and least of all through any idiot fears of my own. Pray forget all I writ you, Sir, and have no fear of this place or any in it. Dr. Allen is a man of fine parts, and I owe him an apology for anything ill I have said of him. I wish I had no need to spare him, but there were things he had to do elsewhere. His zeal is equal to mine in all those matters, and I suppose that when I feared the work I feared him too as my greatest helper in it."

Ward paused, and the doctor hardly knew what to say or think. He felt almost foolish in the face of this calm repudiation of the letter; and yet there clung to him the fact that while the present dis-

course was strange and alien and indubitably mad, the note itself had been tragic in its naturalness and likeness to the Charles Ward he knew. Willett now tried to turn the talk on early matters, and recall to the youth some past events which would restore a familiar mood; but in this process he obtained only the most grotesque results. It was the same with all the alienists later on. Important sections of Charles Ward's store of mental images, mainly those touching modern times and his own personal life, had been unaccountably expunged; whilst all the massed antiquarianism of his youth had welled up from some profound subconsciousness to engulf the contemporary and the individual. The youth's intimate knowledge of elder things was abnormal and unholy, and he tried his best to hide it. When Willett would mention some favourite object of his boyhood archaistic studies he often shed by pure accident such a light as no normal mortal could conceivably be expected to possess, and the doctor shuddered as the glib allusion glided by.

It was not wholesome to know so much about the way the fat sheriff's wig fell off as he leaned over at the play in Mr. Douglass' Histrionick Academy in King Street on the eleventh of February, 1762, which fell on a Thursday; or about how the actors cut the text of Steele's *Conscious Lover* so badly that one was almost glad the Baptist-ridden legislature closed the theatre a fortnight later. That Thomas Sabin's Boston coach was "damn'd uncomfortable" old letters may well have told; but what healthy antiquarian could recall how the creaking of Epenetus Olney's new signboard (the gaudy crown he set up after he took to calling his tavern the Crown Coffee House) was exactly like the first few notes of the new jazz piece all the radios in Pawtuxet were playing?

Ward, however, would not be quizzed long in this vein. Modern and personal topics he waved aside quite summarily, whilst regarding antique affairs he soon shewed the plainest boredom. What he wished clearly enough was only to satisfy his visitor enough to make him depart without the intention of returning. To this end he offered to shew Willett the entire house, and at once proceeded to lead the doctor through every room from cellar to attic. Willett looked sharply, but noted that the visible books were far too few

and trivial ever to have filled the wide gaps on Ward's shelves at home, and that the meagre so-called "laboratory" was the flimsiest sort of a blind. Clearly, there were a library and a laboratory elsewhere; but just where, it was impossible to say. Essentially defeated in his quest for something he could not name, Willett returned to town before evening and told the senior Ward everything which had occurred. They agreed that the youth must be definitely out of his mind, but decided that nothing drastic need be done just then. Above all, Mrs. Ward must be kept in as complete an ignorance as her son's own strange typed notes would permit.

Mr. Ward now determined to call in person upon his son, making it wholly a surprise visit. Dr. Willett took him in his car one evening, guiding him to within sight of the bungalow and waiting patiently for his return. The session was a long one, and the father emerged in a very saddened and perplexed state. His reception had developed much like Willett's, save that Charles had been an excessively long time in appearing after the visitor had forced his way into the hall and sent the Portuguese away with an imperative demand; and in the bearing of the altered son there was no trace of filial affection. The lights had been dim, yet even so the youth had complained that they dazzled him outrageously. He had not spoken out loud at all, averring that his throat was in very poor condition; but in his hoarse whisper there was a quality so vaguely disturbing that Mr. Ward could not banish it from his mind.

Now definitely leagued together to do all they could toward the youth's mental salvation, Mr. Ward and Dr. Willett set about collecting every scrap of data which the case might afford. Pawtuxet gossip was the first item they studied, and this was relatively easy to glean since both had friends in that region. Dr. Willett obtained the most rumours because people talked more frankly to him than to a parent of the central figure, and from all he heard he could tell that young Ward's life had become indeed a strange one. Common tongues would not dissociate his household from the vampirism of the previous summer, while the nocturnal comings and goings of the motor trucks provided their share of dark speculation. Local tradesmen spoke of the queerness of the orders brought them by the evil-looking mulatto, and in particular of the inordinate amounts of

meat and fresh blood secured from the two butcher shops in the immediate neighbourhood. For a household of only three, these quantities were quite absurd.

Then there was the matter of the sounds beneath the earth. Reports of these things were harder to pin down, but all the vague hints tallied in certain basic essentials. Noises of a ritual nature positively existed, and at times when the bungalow was dark. They might, of course, have come from the known cellar; but rumour insisted that there were deeper and more spreading crypts. Recalling the ancient tales of Joseph Curwen's catacombs, and assuming for granted that the present bungalow had been selected because of its situation on the old Curwen site as revealed in one or another of the documents found behind the picture, Willett and Mr. Ward gave this phase of the gossip much attention; and searched many times without success for the door in the river-bank which old manuscripts mentioned. As to popular opinions of the bungalow's various inhabitants, it was soon plain that the Brava Portuguese was loathed, the bearded and spectacled Dr. Allen feared, and the pallid young scholar disliked to a profound extent. During the last week or two Ward had obviously changed much, abandoning his attempts at affability and speaking only in hoarse but oddly repellent whispers on the few occasions that he ventured forth.

Such were the shreds and fragments gathered here and there; and over these Mr. Ward and Dr. Willett held many long and serious conferences. They strove to exercise deduction, induction, and constructive imagination to their utmost extent; and to correlate every known fact of Charles's later life, including the frantic letter which the doctor now shewed the father, with the meagre documentary evidence available concerning old Joseph Curwen. They would have given much for a glimpse of the papers Charles had found, for very clearly the key to the youth's madness lay in what he had learned of the ancient wizard and his doings.

4.

And yet, after all, it was from no step of Mr. Ward's or Dr. Willett's that the next move in this singular case proceeded. The father and the physician, rebuffed and confused by a shadow too

shapeless and intangible to combat, had rested uneasily on their oars while the typed notes of young Ward to his parents grew fewer and fewer. Then came the first of the month with its customary financial adjustments, and the clerks at certain banks began a peculiar shaking of heads and telephoning from one to the other. Officials who knew Charles Ward by sight went down to the bungalow to ask why every cheque of his appearing at this juncture was a clumsy forgery, and were reassured less than they ought to have been when the youth hoarsely explained that his hand had lately been so much affected by a nervous shock as to make normal writing impossible. He could, he said, form no written characters at all except with great difficulty; and could prove it by the fact that he had been forced to type all his recent letters, even those to his father and mother, who would bear out the assertion.

What made the investigators pause in confusion was not this circumstance alone, for that was nothing unprecedented or fundamentally suspicious; nor even the Pawtuxet gossip, of which one or two of them had caught echoes. It was the muddled discourse of the young man which nonplussed them, implying as it did a virtually total loss of memory concerning important monetary matters which he had had at his fingertips only a month or two before. Something was wrong; for despite the apparent coherence and rationality of his speech, there could be no normal reason for this ill-concealed blankness on vital points. Moreover, although none of these men knew Ward well, they could not help observing the change in his language and manner. They had heard he was an antiquarian, but even the most hopeless antiquarians do not make daily use of obsolete phraseology and gestures. Altogether, this combination of hoarseness, palsied hands, bad memory, and altered speech and bearing must represent some disturbance or malady of genuine gravity, which no doubt formed the basis of the prevailing odd rumours; and after their departure the party of officials decided that a talk with the senior Ward was imperative.

So on the sixth of March, 1928, there was a long and serious conference in Mr. Ward's office, after which the utterly bewildered father summoned Dr. Willett in a kind of helpless resignation. Willett looked over the strained and awkward signatures of the cheques, and compared them in his mind with the penmanship of

that last frantic note. Certainly, the change was radical and profound, and yet there was something damnably familiar about the new writing. It had crabbed and archaic tendencies of a very curious sort, and seemed to result from a type of stroke utterly different from that which the youth had always used. It was strange—but where had he seen it before? On the whole, it was obvious that Charles was insane. Of that there could be no doubt. And since it appeared unlikely that he could handle his property or continue to deal with the outside world much longer, something must quickly be done toward his oversight and possible cure. It was then that the alienists were called in, Drs. Peck and Waite of Providence and Dr. Lyman of Boston, to whom Mr. Ward and Dr. Willett gave the most exhaustive possible history of the case, and who conferred at length in the now unused library of their young patient, examining what books and papers of his were left in order to gain some further notion of his habitual mental cast. After scanning this material and examining the ominous note to Willett they all agreed that Charles Ward's studies had been enough to unseat or at least to warp any ordinary intellect, and wished most heartily that they could see his more intimate volumes and documents; but this latter they knew they could do, if at all, only after a scene at the bungalow itself. Willett now reviewed the whole case with febrile energy; it being at this time that he obtained the statements of the workmen who had seen Charles find the Curwen documents, and that he collated the incidents of the destroyed newspaper items, looking up the latter at the *Journal* office.

On Thursday, the eighth of March, Drs. Willett, Peck, Lyman, and Waite, accompanied by Mr. Ward, paid the youth their momentous call; making no concealment of their object and questioning the now acknowledged patient with extreme minuteness. Charles, though he was inordinately long in answering the summons and was still redolent of strange and noxious laboratory odours when he did finally make his agitated appearance, proved a far from recalcitrant subject; and admitted freely that his memory and balance had suffered somewhat from close application to abstruse studies. He offered no resistance when his removal to other quarters was insisted upon; and seemed, indeed, to display a high degree of intelligence as apart from mere memory. His con-

duct would have sent his interviewers away in bafflement had not the persistently archaic trend of his speech and unmistakable replacement of modern by ancient ideas in his consciousness marked him out as one definitely removed from the normal. Of his work he would say no more to the group of doctors than he had formerly said to his family and to Dr. Willett, and his frantic note of the previous month he dismissed as mere nerves and hysteria. He insisted that this shadowy bungalow possessed no library or laboratory beyond the visible ones, and waxed abstruse in explaining the absence from the house of such odours as now saturated all his clothing. Neighbourhood gossip he attributed to nothing more than the cheap inventiveness of baffled curiosity. Of the whereabouts of Dr. Allen he said he did not feel at liberty to speak definitely, but assured his inquisitors that the bearded and spectacled man would return when needed. In paying off the stolid Brava who resisted all questioning by the visitors, and in closing the bungalow which still seemed to hold such nighted secrets, Ward shewed no sign of nervousness save a barely noticed tendency to pause as though listening for something very faint. He was apparently animated by a calmly philosophic resignation, as if his removal were the merest transient incident which would cause the least trouble if facilitated and disposed of once and for all. It was clear that he trusted to his obviously unimpaired keenness of absolute mentality to overcome all the embarrassments into which his twisted memory, his lost voice and handwriting, and his secretive and eccentric behaviour had led him. His mother, it was agreed, was not to be told of the change; his father supplying typed notes in his name. Ward was taken to the restfully and picturesquely situated private hospital maintained by Dr. Waite on Conanicut Island in the bay, and subjected to the closest scrutiny and questioning by all the physicians connected with the case. It was then that the physical oddities were noticed; the slackened metabolism, the altered skin, and the disproportionate neural reactions. Dr. Willett was the most perturbed of the various examiners, for he had attended Ward all his life and could appreciate with terrible keenness the extent of his physical disorganisation. Even the familiar olive mark on his hip was gone, while on his chest was a great black mole or cicatrice which had never been there before, and which made Willett wonder

whether the youth had ever submitted to any of the "witch markings" reputed to be inflicted at certain unwholesome nocturnal meetings in wild and lonely places. The doctor could not keep his mind off a certain transcribed witch-trial record from Salem which Charles had shewn him in the old non-secretive days, and which read: "Mr. G. B. on that Nighte putt y^e Divell his Marke upon Bridget S., Jonathan A., Simon O., Deliverance W., Joseph C., Susan P., Mehitable C., and Deborah B." Ward's face, too, troubled him horribly, till at length he suddenly discovered why he was horrified. For above the young man's right eye was something which he had never previously noticed—a small scar or pit precisely like that in the crumbled painting of old Joseph Curwen, and perhaps attesting some hideous ritualistic inoculation to which both had submitted at a certain stage of their occult careers.

While Ward himself was puzzling all the doctors at the hospital a very strict watch was kept on all mail addressed either to him or to Dr. Allen, which Mr. Ward had ordered delivered at the family home. Willett had predicted that very little would be found, since any communications of a vital nature would probably have been exchanged by messenger; but in the latter part of March there did come a letter from Prague for Dr. Allen which gave both the doctor and the father deep thought. It was in a very crabbed and archaic hand; and though clearly not the effort of a foreigner, shewed almost as singular a departure from modern English as the speech of young Ward himself. It read:

Kleinstrasse 11,
Altstadt, Prague,
11th Feby. 1928.

Brother in Almonsin-Metraton:—

I this day receiv'd y^e mention of what came up from the Salts I sent you. It was wrong, and meanes clearly that y^e Headstones had been chang'd when Barnabas gott me the Specimen. It is often so, as you must be sensible of from the Thing you gott from y^e Kings Chapell ground in 1769 and what H. gott from Olde Bury'g Point in 1690, that was like to ende him. I gott such a Thing in Aegypt 75 yeares gone, from the which came that Scar y^e Boy saw on me here in 1924. As I told you longe ago, do not calle up That which you can not put downe; either from dead Saltes or out of y^e Spheres

beyond. Have ye Wordes for laying at all times readie, and stopp not to be sure when there is any Doubte of *Whom* you have. Stones are all chang'd now in Nine groundes out of 10. You are never sure till you question. I this day heard from H., who has had Trouble with the Soldiers. He is like to be sorry Transylvania is pass'd from Hungary to Roumania, and wou'd change his Seat if the Castel weren't so fulle of What we Knowe. But of this he hath doubtless writ you. In my next Send'g there will be Somewhat from a Hill tomb from ye East that will delight you greatly. Meanwhile forget not I am desirous of B. F. if you can possibly get him for me. You know G. in Philada. better than I. Have him up firste if you will, but doe not use him soe hard he will be Difficult, for I must speake to him in ye End.

Yogg-Sothoth Neblod Zin
Simon O.

To Mr. J. C. in
Providence.

Mr. Ward and Dr. Willett paused in utter chaos before this apparent bit of unrelieved insanity. Only by degrees did they absorb what it seemed to imply. So the absent Dr. Allen, and not Charles Ward, had come to be the leading spirit at Pawtuxet? That must explain the wild reference and denunciation in the youth's last frantic letter. And what of this addressing of the bearded and spectacled stranger as "Mr. J. C."? There was no escaping the inference, but there are limits to possible monstrosity. Who was "Simon O."; the old man Ward had visited in Prague four years previously? Perhaps, but in the centuries behind there had been another Simon O.—Simon Orne, alias Jedediah, of Salem, who vanished in 1771, and *whose peculiar handwriting Dr. Willett now unmistakably recognised from the photostatic copies of the Orne formulae which Charles had once shewn him.* What horrors and mysteries, what contradictions and contraventions of Nature, had come back after a century and a half to harass Old Providence with her clustered spires and domes?

The father and the old physician, virtually at a loss what to do or think, went to see Charles at the hospital and questioned him as delicately as they could about Dr. Allen, about the Prague visit, and about what he had learned of Simon or Jedediah Orne of Salem. To

all these inquiries the youth was politely non-committal, merely barking in his hoarse whisper that he had found Dr. Allen to have a remarkable spiritual rapport with certain souls from the past, and that any correspondent the bearded man might have in Prague would probably be similarly gifted. When they left, Mr. Ward and Dr. Willett realised to their chagrin that they had really been the ones under catechism; and that without imparting anything vital himself, the confined youth had adroitly pumped them of everything the Prague letter had contained.

Drs. Peck, Waite, and Lyman were not inclined to attach much importance to the strange correspondence of young Ward's companion; for they knew the tendency of kindred eccentrics and monomaniacs to band together, and believed that Charles or Allen had merely unearthed an expatriated counterpart—perhaps one who had seen Orne's handwriting and copied it in an attempt to pose as the bygone character's reincarnation. Allen himself was perhaps a similar case, and may have persuaded the youth into accepting him as an avatar of the long-dead Curwen. Such things had been known before, and on the same basis the hard-headed doctors disposed of Willett's growing disquiet about Charles Ward's present handwriting, as studied from unpremeditated specimens obtained by various ruses. Willett thought he had placed its odd familiarity at last, and that what it vaguely resembled was the bygone penmanship of old Joseph Curwen himself; but this the other physicians regarded as a phase of imitativeness only to be expected in a mania of this sort, and refused to grant it any importance either favourable or unfavourable. Recognising this prosaic attitude in his colleagues, Willett advised Mr. Ward to keep to himself the letter which arrived for Dr. Allen on the second of April from Rakus, Transylvania, in a handwriting so intensely and fundamentally like that of the Hutchinson cipher that both father and physician paused in awe before breaking the seal. This read as follows:

Castle Ferenczy
7 March 1928.

Dear C.:—Hadd a Squad of 20 Militia up to talk about what the Country Folk say. Must digg deeper and have less Hearde. These

Roumanians plague me damnably, being officious and particular where you cou'd buy a Magyar off with a Drinke and ffood. Last monthe M. got me y^e Sarcophagus of y^e Five Sphinxes from y^e Acropolis where He whome I call'd up say'd it wou'd be, and I have hadde 3 Talkes with *What was therein inhum'd*. It will go to S. O. in Prague directly, and thence to you. It is stubborn but you know y^e Way with Such. You shew Wisdom in having lesse about than Before; for there was no Neede to keep the Guards in Shape and eat'g off their Heads, and it made Much to be founde in Case of Trouble, as you too welle knowe. *You* can now move and worke elsewhere with no Kill'g Trouble if needful, tho' I hope no Thing will soon force you to so Bothersome a Course. I rejoyce that you traffick not so much with *Those Outside*; for there was ever a Mortall Peril in it, and you are sensible what it did when you ask'd Protection of One not dispos'd to give it. You excel me in gett'g y^e fformulæ so *another* may saye them with Success, but Borellus fancy'd it wou'd be so if just y^e right Wordes were hadd. Does y^e Boy use 'em often? I regret that he growes squeamish, as I fear'd he wou'd when I hadde him here nigh 15 Monthes, but am sensible you knowe how to deal with him. You can't saye him down with y^e fformula, for that will Worke only upon such as y^e other fformula hath call'd up from Saltes; but you still have strong Handes and Knife and Pistol, and Graves are not harde to digg, nor Acids loth to burne. O. sayes you have promis'd him B. F. I must have him after. B. goes to you soone, and may he give you what you wishe of that Darke Thing belowe Memphis. Imploy care in what you calle up, and beware of y^e Boy. It will be ripe in a yeaere's time to have up y^e Legions from Underneath, and then there are no Boundes to what shal be oures. Have Confidence in what I saye, for you knowe O. and I have hadd these 150 yeaeres more than you to consulte these Matters in.

Nephren-Ka nai Hadoth

Edw: H.

For J. Curwen, Esq.
Providence.

But if Willett and Mr. Ward refrained from shewing this letter to the alienists, they did not refrain from acting upon it themselves.

No amount of learned sophistry could controvert the fact that the strangely bearded and spectacled Dr. Allen, of whom Charles's frantic letter had spoken as such a monstrous menace, was in close and sinister correspondence with two inexplicable creatures whom Ward had visited in his travels and who plainly claimed to be survivals or avatars of Curwen's old Salem colleagues; that he was regarding himself as the reincarnation of Joseph Curwen, and that he entertained—or was at least advised to entertain—murderous designs against a "boy" who could scarcely be other than Charles Ward. There was organised horror afoot; and no matter who had started it, the missing Allen was by this time at the bottom of it. Therefore, thanking heaven that Charles was now safe in the hospital, Mr. Ward lost no time in engaging detectives to learn all they could of the cryptic bearded doctor; finding whence he had come and what Pawtuxet knew of him, and if possible discovering his current whereabouts. Supplying the men with one of the bungalow keys which Charles yielded up, he urged them to explore Allen's vacant room which had been identified when the patient's belongings had been packed; obtaining what clues they could from any effects he might have left about. Mr. Ward talked with the detectives in his son's old library, and they felt a marked relief when they left it at last; for there seemed to hover about the place a vague aura of evil. Perhaps it was what they had heard of the infamous old wizard whose picture had once stared from the panelled overmantel, and perhaps it was something different and irrelevant; but in any case they all half sensed an intangible miasma which centred in that carven vestige of an older dwelling and which at times almost rose to the intensity of a material emanation.

V. *A Nightmare and a Cataclysm*

1.

And now swiftly followed that hideous experience which has left its indelible mark of fear on the soul of Marinus Bicknell Willett, and has added a decade to the visible age of one whose youth was even then far behind. Dr. Willett had conferred at length with Mr. Ward, and had come to an agreement with him on several points which both felt the alienists would ridicule. There was, they con-

ceded, a terrible movement alive in the world, whose direct connexion with a necromancy even older than the Salem witchcraft could not be doubted. That at least two living men—and one other of whom they dared not think—were in absolute possession of minds or personalities which had functioned as early as 1690 or before was likewise almost unassailably proved even in the face of all known natural laws. What these horrible creatures—and Charles Ward as well—were doing or trying to do seemed fairly clear from their letters and from every bit of light both old and new which had filtered in upon the case. They were robbing the tombs of all the ages, including those of the world's wisest and greatest men, in the hope of recovering from the bygone ashes some vestige of the consciousness and lore which had once animated and informed them.

A hideous traffick was going on among these nightmare ghouls, whereby illustrious bones were bartered with the calm calculativeness of schoolboys swapping books; and from what was extorted from this centuried dust there was anticipated a power and a wisdom beyond anything which the cosmos had ever seen concentrated in one man or group. They had found unholy ways to keep their brains alive, either in the same body or different bodies; and had evidently achieved a way of tapping the consciousness of the dead whom they gathered together. There had, it seems, been some truth in chimerical old Borellus when he wrote of preparing from even the most antique remains certain "Essential Saltes" from which the shade of a long-dead living thing might be raised up. There was a formula for evoking such a shade, and another for putting it down; and it had now been so perfected that it could be taught successfully. One must be careful about evocations, for the markers of old graves are not always accurate.

Willett and Mr. Ward shivered as they passed from conclusion to conclusion. Things—presences or voices of some sort—could be drawn down from unknown places as well as from the grave, and in this process also one must be careful. Joseph Curwen had indubitably evoked many forbidden things, and as for Charles—what might one think of him? What forces "outside the spheres" had reached him from Joseph Curwen's day and turned his mind on forgotten things? He had been led to find certain directions, and he had used them. He had talked with the man of horror in Prague and

stayed long with the creature in the mountains of Transylvania. And he must have found the grave of Joseph Curwen at last. That newspaper item and what his mother had heard in the night were too significant to overlook. Then he had summoned something, and it must have come. That mighty voice aloft on Good Friday, and those *different* tones in the locked attic laboratory. What were they like, with their depth and hollowness? Was there not here some awful foreshadowing of the dreaded stranger Dr. Allen with his spectral bass? Yes, *that* was what Mr. Ward had felt with vague horror in his single talk with the man—if man it were—over the telephone!

What hellish consciousness or voice, what morbid shade or presence, had come to answer Charles Ward's secret rites behind that locked door? Those voices heard in argument—"must have it red for three months"—Good God! Was not that just before the vampirism broke out? The rifling of Ezra Weeden's ancient grave, and the cries later at Pawtuxet—whose mind had planned the vengeance and rediscovered the shunned seat of elder blasphemies? And then the bungalow and the bearded stranger, and the gossip, and the fear. The final madness of Charles neither father nor doctor could attempt to explain, but they did feel sure that the mind of Joseph Curwen had come to earth again and was following its ancient morbidities. Was daemoniac possession in truth a possibility? Allen had something to do with it, and the detectives must find out more about one whose existence menaced the young man's life. In the meantime, since the existence of some vast crypt beneath the bungalow seemed virtually beyond dispute, some effort must be made to find it. Willett and Mr. Ward, conscious of the sceptical attitude of the alienists, resolved during their final conference to undertake a joint secret exploration of unparalleled thoroughness; and agreed to meet at the bungalow on the following morning with valises and with certain tools and accessories suited to architectural search and underground exploration.

The morning of April 6th dawned clear, and both explorers were at the bungalow by ten o'clock. Mr. Ward had the key, and an entry and cursory survey were made. From the disordered condition of Dr. Allen's room it was obvious that the detectives had been there before, and the later searchers hoped that they had found

some clue which might prove of value. Of course the main business lay in the cellar; so thither they descended without much delay, again making the circuit which each had vainly made before in the presence of the mad young owner. For a time everything seemed baffling, each inch of the earthen floor and stone walls having so solid and innocuous an aspect that the thought of a yawning aperture was scarcely to be entertained. Willett reflected that since the original cellar was dug without knowledge of any catacombs beneath, the beginning of the passage would represent the strictly modern delving of young Ward and his associates, where they had probed for the ancient vaults whose rumour could have reached them by no wholesome means.

The doctor tried to put himself in Charles's place to see how a delver would be likely to start, but could not gain much inspiration from this method. Then he decided on elimination as a policy, and went carefully over the whole subterranean surface both vertical and horizontal, trying to account for every inch separately. He was soon substantially narrowed down, and at last had nothing left but the small platform before the washtubs, which he had tried once before in vain. Now experimenting in every possible way, and exerting a double strength, he finally found that the top did indeed turn and slide horizontally on a corner pivot. Beneath it lay a trim concrete surface with an iron manhole, to which Mr. Ward at once rushed with excited zeal. The cover was not hard to lift, and the father had quite removed it when Willett noticed the queerness of his aspect. He was swaying and nodding dizzily, and in the gust of noxious air which swept up from the black pit beneath the doctor soon recognised ample cause.

In a moment Dr. Willett had his fainting companion on the floor above and was reviving him with cold water. Mr. Ward responded feebly, but it could be seen that the mephitic blast from the crypt had in some way gravely sickened him. Wishing to take no chances, Willett hastened out to Broad Street for a taxicab and had soon dispatched the sufferer home despite his weak-voiced protests; after which he produced an electric torch, covered his nostrils with a band of sterile gauze, and descended once more to peer into the new-found depths. The foul air had now slightly abated, and Willett was able to send a beam of light down the Stygian hole. For

about ten feet, he saw, it was a sheer cylindrical drop with concrete walls and an iron ladder; after which the hole appeared to strike a flight of old stone steps which must originally have emerged to earth somewhat southwest of the present building.

2.

Willetts freely admits that for a moment the memory of the old Curwen legends kept him from climbing down alone into that malodorous gulf. He could not help thinking of what Luke Fenner had reported on that last monstrous night. Then duty asserted itself and he made the plunge, carrying a great valise for the removal of whatever papers might prove of supreme importance. Slowly, as befitted one of his years, he descended the ladder and reached the slimy steps below. This was ancient masonry, his torch told him; and upon the dripping walls he saw the unwholesome moss of centuries. Down, down, ran the steps; not spirally, but in three abrupt turns; and with such narrowness that two men could have passed only with difficulty. He had counted about thirty when a sound reached him very faintly; and after that he did not feel disposed to count any more.

It was a godless sound; one of those low-keyed, insidious outrages of Nature which are not meant to be. To call it a dull wail, a doom-dragged whine, or a hopeless howl of chorused anguish and stricken flesh without mind would be to miss its most quintessential loathsomeness and soul-sickening overtones. Was it for this that Ward had seemed to listen on that day he was removed? It was the most shocking thing that Willett had ever heard, and it continued from no determinate point as the doctor reached the bottom of the steps and cast his torchlight around on lofty corridor walls surmounted by Cyclopean vaulting and pierced by numberless black archways. The hall in which he stood was perhaps fourteen feet high to the middle of the vaulting and ten or twelve feet broad. Its pavement was of large chipped flagstones, and its walls and roof were of dressed masonry. Its length he could not imagine, for it stretched ahead indefinitely into the blackness. Of the archways, some had doors of the old six-panelled colonial type, whilst others had none.

Overcoming the dread induced by the smell and the howling, Willett began to explore these archways one by one; finding beyond them rooms with groined stone ceilings, each of medium size and apparently of bizarre uses. Most of them had fireplaces, the upper courses of whose chimneys would have formed an interesting study in engineering. Never before or since had he seen such instruments or suggestions of instruments as here loomed up on every hand through the burying dust and cobwebs of a century and a half, in many cases evidently shattered as if by the ancient raiders. For many of the chambers seemed wholly untrodden by modern feet, and must have represented the earliest and most obsolete phases of Joseph Curwen's experimentation. Finally there came a room of obvious modernity, or at least of recent occupancy. There were oil heaters, bookshelves and tables, chairs and cabinets, and a desk piled high with papers of varying antiquity and contemporaneity. Candlesticks and oil lamps stood about in several places; and finding a match-safe handy, Willett lighted such as were ready for use.

In the fuller gleam it appeared that this apartment was nothing less than the latest study or library of Charles Ward. Of the books the doctor had seen many before, and a good part of the furniture had plainly come from the Prospect Street mansion. Here and there was a piece well known to Willett, and the sense of familiarity became so great that he half forgot the noisomeness and the wailing, both of which were plainer here than they had been at the foot of the steps. His first duty, as planned long ahead, was to find and seize any papers which might seem of vital importance; especially those portentous documents found by Charles so long ago behind the picture in Olney Court. As he searched he perceived how stupendous a task the final unravelling would be; for file on file was stuffed with papers in curious hands and bearing curious designs, so that months or even years might be needed for a thorough deciphering and editing. Once he found large packets of letters with Prague and Rakus postmarks, and in writing clearly recognisable as Orne's and Hutchinson's; all of which he took with him as part of the bundle to be removed in his valise.

At last, in a locked mahogany cabinet once gracing the Ward home, Willett found the batch of old Curwen papers; recognising

them from the reluctant glimpse Charles had granted him so many years ago. The youth had evidently kept them together very much as they had been when first he found them, since all the titles recalled by the workmen were present except the papers addressed to Orne and Hutchinson, and the cipher with its key. Willett placed the entire lot in his valise and continued his examination of the files. Since young Ward's immediate condition was the greatest matter at stake, the closest searching was done among the most obviously recent matter; and in this abundance of contemporary manuscript one very baffling oddity was noted. The oddity was the slight amount in Charles's normal writing, which indeed included nothing more recent than two months before. On the other hand, there were literally reams of symbols and formulae, historical notes and philosophical comment, in a crabbed penmanship absolutely identical with the ancient script of Joseph Curwen, though of undeniably modern dating. Plainly, a part of the latter-day programme had been a sedulous imitation of the old wizard's writing, which Charles seemed to have carried to a marvellous state of perfection. Of any third hand which might have been Allen's there was not a trace. If he had indeed come to be the leader, he must have forced young Ward to act as his amanuensis.

In this new material one mystic formula, or rather pair of formulae, recurred so often that Willett had it by heart before he had half finished his quest. It consisted of two parallel columns, the left-hand one surmounted by the archaic symbol called "Dragon's Head" and used in almanacks to indicate the ascending node, and the right-hand one headed by a corresponding sign of "Dragon's Tail" or descending node. The appearance of the whole was something like this, and almost unconsciously the doctor realised that the second half was no more than the first written syllabically backward with the exception of the final monosyllables and of the odd name *Yog-Sothoth*, which he had come to recognise under various spellings from other things he had seen in connexion with this horrible matter. The formulae were as follows—*exactly* so, as Willett is abundantly able to testify—and the first one struck an odd note of uncomfortable latent memory in his brain, which he recognised later when reviewing the events of that horrible Good Friday of the previous year.

Y'AI 'NG'NGAH,
YOG-SOTHOTH
H'EE—L'GEB
F'AI THRODOG
UAAAH

OGTHROD AI'F
GEB'L—EE'H
YOG-SOTHOTH
'NGAH'NG AI'Y
ZHRO

So haunting were these formulae, and so frequently did he come upon them, that before the doctor knew it he was repeating them under his breath. Eventually, however, he felt he had secured all the papers he could digest to advantage for the present; hence resolved to examine no more till he could bring the sceptical alienists en masse for an ampler and more systematic raid. He had still to find the hidden laboratory, so leaving his valise in the lighted room he emerged again into the black noisome corridor whose vaulting echoed ceaselessly with that dull and hideous whine.

The next few rooms he tried were all abandoned, or filled only with crumbling boxes and ominous-looking leaden coffins; but impressed him deeply with the magnitude of Joseph Curwen's original operations. He thought of the slaves and seamen who had disappeared, of the graves which had been violated in every part of the world, and of what that final raiding party must have seen; and then he decided it was better not to think any more. Once a great stone staircase mounted at his right, and he deduced that this must have reached to one of the Curwen outbuildings—perhaps the famous stone edifice with the high slit-like windows—provided the steps he had descended had led from the steep-roofed farmhouse. Suddenly the walls seemed to fall away ahead, and the stench and the wailing grew stronger. Willett saw that he had come upon a vast open space, so great that his torchlight would not carry across it; and as he advanced he encountered occasional stout pillars supporting the arches of the roof.

After a time he reached a circle of pillars grouped like the monoliths of Stonehenge, with a large carved altar on a base of three steps in the centre; and so curious were the carvings on that altar that he approached to study them with his electric light. But when he saw what they were he shrank away shuddering, and did

not stop to investigate the dark stains which discoloured the upper surface and had spread down the sides in occasional thin lines. Instead, he found the distant wall and traced it as it swept round in a gigantic circle perforated by occasional black doorways and indented by a myriad of shallow cells with iron gratings and wrist and ankle bonds on chains fastened to the stone of the concave rear masonry. These cells were empty, but still the horrible odour and the dismal moaning continued, more insistent now than ever, and seemingly varied at times by a sort of slippery thumping.

3.

From that frightful smell and that uncanny noise Willett's attention could no longer be diverted. Both were plainer and more hideous in the great pillared hall than anywhere else, and carried a vague impression of being far below, even in this dark nether world of subterrene mystery. Before trying any of the black archways for steps leading further down, the doctor cast his beam of light about the stone-flagged floor. It was very loosely paved, and at irregular intervals there would occur a slab curiously pierced by small holes in no definite arrangement, while at one point there lay a very long ladder carelessly flung down. To this ladder, singularly enough, appeared to cling a particularly large amount of the frightful odour which encompassed everything. As he walked slowly about it suddenly occurred to Willett that both the noise and the odour seemed strongest directly above the oddly pierced slabs, as if they might be crude trap-doors leading down to some still deeper region of horror. Kneeling by one, he worked at it with his hands, and found that with extreme difficulty he could budge it. At his touch the moaning beneath ascended to a louder key, and only with vast trepidation did he persevere in the lifting of the heavy stone. A stench unnamable now rose up from below, and the doctor's head reeled dizzily as he laid back the slab and turned his torch upon the exposed square yard of gaping blackness.

If he had expected a flight of steps to some wide gulf of ultimate abomination, Willett was destined to be disappointed; for amidst that foetor and cracked whining he discerned only the brick-faced top of a cylindrical well perhaps a yard and a half in diameter and

devoid of any ladder or other means of descent. As the light shone down, the wailing changed suddenly to a series of horrible yelps; in conjunction with which there came again that sound of blind, futile scrambling and slippery thumping. The explorer trembled, unwilling even to imagine what noxious thing might be lurking in that abyss, but in a moment mustered up the courage to peer over the rough-hewn brink; lying at full length and holding the torch downward at arm's length to see what might lie below. For a second he could distinguish nothing but the slimy, moss-grown brick walls sinking illimitably into that half-tangible miasma of murk and foulness and anguished frenzy; and then he saw that something dark was leaping clumsily and frantically up and down at the bottom of the narrow shaft, which must have been from twenty to twenty-five feet below the stone floor where he lay. The torch shook in his hand, but he looked again to see what manner of living creature might be immured there in the darkness of that unnatural well; left starving by young Ward through all the long month since the doctors had taken him away, and clearly only one of a vast number prisoned in the kindred wells whose pierced stone covers so thickly studded the floor of the great vaulted cavern. Whatever the things were, they could not lie down in their cramped spaces; but must have crouched and whined and waited and feebly leaped all those hideous weeks since their master had abandoned them unheeded.

But Marinus Bicknell Willett was sorry that he looked again; for surgeon and veteran of the dissecting-room though he was, he has not been the same since. It is hard to explain just how a single sight of a tangible object with measurable dimensions could so shake and change a man; and we may only say that there is about certain outlines and entities a power of symbolism and suggestion which acts frightfully on a sensitive thinker's perspective and whispers terrible hints of obscure cosmic relationships and unnamable realities behind the protective illusions of common vision. In that second look Willett saw such an outline or entity, for during the next few instants he was undoubtedly as stark mad as any inmate of Dr. Waite's private hospital. He dropped the electric torch from a hand drained of muscular power or nervous coördination, nor heeded the sound of crunching teeth which told of its fate at the bottom of the pit. He screamed and screamed and screamed in a voice whose

falsetto panic no acquaintance of his would ever have recognised; and though he could not rise to his feet he crawled and rolled desperately away over the damp pavement where dozens of Tartarean wells poured forth their exhausted whining and yelping to answer his own insane cries. He tore his hands on the rough, loose stones, and many times bruised his head against the frequent pillars, but still he kept on. Then at last he slowly came to himself in the utter blackness and stench, and stopped his ears against the droning wail into which the burst of yelping had subsided. He was drenched with perspiration and without means of producing a light; stricken and unnerved in the abysmal blackness and horror, and crushed with a memory he never could efface. Beneath him dozens of those things still lived, and from one of the shafts the cover was removed. He knew that what he had seen could never climb up the slippery walls, yet shuddered at the thought that some obscure foot-hold might exist.

What the thing was, he would never tell. It was like some of the carvings on the hellish altar, but it was alive. Nature had never made it in this form, for it was too palpably *unfinished*. The deficiencies were of the most surprising sort, and the abnormalities of proportion could not be described. Willett consents only to say that this type of thing must have represented entities which Ward called up from *imperfect salts*, and which he kept for servile or ritualistic purposes. If it had not had a certain significance, its image would not have been carved on that damnable stone. It was not the worst thing depicted on that stone—but Willett never opened the other pits. At the time, the first connected idea in his mind was an idle paragraph from some of the old Curwen data he had digested long before; a phrase used by Simon or Jedediah Orne in that portentous confiscated letter to the bygone sorcerer: "Certainly, there was Noth'g butt ye liveliest Awfulness in that which H. rais'd upp from **What he cou'd gather onlie a part of.**"

Then, horribly supplementing rather than displacing this image, there came a recollection of those ancient lingering rumours anent the burned, twisted thing found in the fields a week after the Curwen raid. Charles Ward had once told the doctor what old Slocum said of that object; that it was neither thoroughly human, nor

wholly allied to any animal which Pawtuxet folk had ever seen or read about.

These words hummed in the doctor's mind as he rocked to and fro, squatting on the nitrous stone floor. He tried to drive them out, and repeated the Lord's Prayer to himself; eventually trailing off into a mnemonic hodge-podge like the modernistic *Waste Land* of Mr. T. S. Eliot and finally reverting to the oft-repeated dual formula he had lately found in Ward's underground library: "Y'ai 'ng'ngah, Yog-Sothoth", and so on till the final underlined "*Zhro*". It seemed to soothe him, and he staggered to his feet after a time; lamenting bitterly his fright-lost torch and looking wildly about for any gleam of light in the clutching inkiness of the chilly air. Think he would not; but he strained his eyes in every direction for some faint glint or reflection of the bright illumination he had left in the library. After a while he thought he detected a suspicion of a glow infinitely far away, and toward this he crawled in agonised caution on hands and knees amidst the stench and howling, always feeling ahead lest he collide with the numerous great pillars or stumble into the abominable pit he had uncovered.

Once his shaking fingers touched something which he knew must be the steps leading to the hellish altar, and from this spot he recoiled in loathing. At another time he encountered the pierced slab he had removed, and here his caution became almost pitiful. But he did not come upon the dread aperture after all, nor did anything issue from that aperture to detain him. What had been down there made no sound nor stir. Evidently its crunching of the fallen electric torch had not been good for it. Each time Willett's fingers felt a perforated slab he trembled. His passage over it would sometimes increase the groaning below, but generally it would produce no effect at all, since he moved very noiselessly. Several times during his progress the glow ahead diminished perceptibly, and he realised that the various candles and lamps he had left must be expiring one by one. The thought of being lost in utter darkness without matches amidst this underground world of nightmare labyrinths impelled him to rise to his feet and run, which he could safely do now that he had passed the open pit; for he knew that once the light failed, his only hope of rescue and survival would lie in whatever

relief party Mr. Ward might send after missing him for a sufficient period. Presently, however, he emerged from the open space into the narrower corridor and definitely located the glow as coming from a door on his right. In a moment he had reached it and was standing once more in young Ward's secret library, trembling with relief, and watching the sputterings of that last lamp which had brought him to safety.

4.

In another moment he was hastily filling the burned-out lamps from an oil supply he had previously noticed, and when the room was bright again he looked about to see if he might find a lantern for further exploration. For racked though he was with horror, his sense of grim purpose was still uppermost; and he was firmly determined to leave no stone unturned in his search for the hideous facts behind Charles Ward's bizarre madness. Failing to find a lantern, he chose the smallest of the lamps to carry; also filling his pockets with candles and matches, and taking with him a gallon can of oil, which he proposed to keep for reserve use in whatever hidden laboratory he might uncover beyond the terrible open space with its unclean altar and nameless covered wells. To traverse that space again would require his utmost fortitude, but he knew it must be done. Fortunately neither the frightful altar nor the opened shaft was near the vast cell-indented wall which bounded the cavern area, and whose black mysterious archways would form the next goals of a logical search.

So Willett went back to that great pillared hall of stench and anguished howling; turning down his lamp to avoid any distant glimpse of the hellish altar, or of the uncovered pit with the pierced stone slab beside it. Most of the black doorways led merely to small chambers, some vacant and some evidently used as storerooms; and in several of the latter he saw some very curious accumulations of various objects. One was packed with rotting and dust-draped bales of spare clothing, and the explorer thrilled when he saw that it was unmistakably the clothing of a century and a half before. In another room he found numerous odds and ends of modern clothing, as if gradual provisions were being made to equip a large

body of men. But what he disliked most of all were the huge copper vats which occasionally appeared; these, and the sinister incrustations upon them. He liked them even less than the weirdly figured leaden bowls whose rims retained such obnoxious deposits and around which clung repellent odours perceptible above even the general noisomeness of the crypt. When he had completed about half the entire circuit of the wall he found another corridor like that from which he had come, and out of which many doors opened. This he proceeded to investigate; and after entering three rooms of medium size and of no significant contents, he came at last to a large oblong apartment whose business-like tanks and tables, furnaces and modern instruments, occasional books and endless shelves of jars and bottles proclaimed it indeed the long-sought laboratory of Charles Ward—and no doubt of old Joseph Curwen before him.

After lighting the three lamps which he found filled and ready, Dr. Willett examined the place and all its appurtenances with the keenest interest; noting from the relative quantities of various reagents on the shelves that young Ward's dominant concern must have been with some branch of organic chemistry. On the whole, little could be learned from the scientific ensemble, which included a gruesome-looking dissecting table; so that the room was really rather a disappointment. Among the books was a tattered old copy of Borellus in black-letter, and it was weirdly interesting to note that Ward had underlined the same passage whose marking had so perturbed good Mr. Merritt at Curwen's farmhouse more than a century and a half before. That older copy, of course, must have perished along with the rest of Curwen's occult library in the final raid. Three archways opened off the laboratory, and these the doctor proceeded to sample in turn. From his cursory survey he saw that two led merely to small storerooms; but these he canvassed with care, remarking the piles of coffins in various stages of damage and shuddering violently at two or three of the few coffin-plates he could decipher. There was much clothing also stored in these rooms, and several new and tightly nailed boxes which he did not stop to investigate. Most interesting of all, perhaps, were some odd bits which he judged to be fragments of old Joseph Curwen's laboratory appliances. These had suffered damage at the hands of the

raiders, but were still partly recognisable as the chemical paraphernalia of the Georgian period.

The third archway led to a very sizeable chamber entirely lined with shelves and having in the centre a table bearing two lamps. These lamps Willett lighted, and in their brilliant glow studied the endless shelving which surrounded him. Some of the upper levels were wholly vacant, but most of the space was filled with small odd-looking leaden jars of two general types; one tall and without handles like a Grecian lekythos or oil-jug, and the other with a single handle and proportioned like a Phaleron jug. All had metal stoppers, and were covered with peculiar-looking symbols moulded in low relief. In a moment the doctor noticed that these jugs were classified with great rigidity; all the lekythoi being on one side of the room with a large wooden sign reading "Custodes" above them, and all the Phalerons on the other, correspondingly labelled with a sign reading "Materia". Each of the jars or jugs, except some on the upper shelves that turned out to be vacant, bore a cardboard tag with a number apparently referring to a catalogue; and Willett resolved to look for the latter presently. For the moment, however, he was more interested in the nature of the array as a whole; and experimentally opened several of the lekythoi and Phalerons at random with a view to a rough generalisation. The result was invariable. Both types of jar contained a small quantity of a single kind of substance; a fine dusty powder of very light weight and of many shades of dull, neutral colour. To the colours which formed the only point of variation there was no apparent method of disposal; and no distinction between what occurred in the lekythoi and what occurred in the Phalerons. A bluish-grey powder might be by the side of a pinkish-white one, and any one in a Phaleron might have its exact counterpart in a lekythos. The most individual feature about the powders was their non-adhesiveness. Willett would pour one into his hand, and upon returning it to its jug would find that no residue whatever remained on its palm.

The meaning of the two signs puzzled him, and he wondered why this battery of chemicals was separated so radically from those in glass jars on the shelves of the laboratory proper. "Custodes", "Materia"; that was the Latin for "Guards" and "Materials",

respectively—and then there came a flash of memory as to where he had seen that word “Guards” before in connexion with this dreadful mystery. It was, of course, in the recent letter to Dr. Allen purporting to be from old Edward Hutchinson; and the phrase had read: “There was no Neede to keep the Guards in Shape and eat’g off their Heads, and it made Much to be founde in case of Trouble, as you too welle knowe.” What did this signify? But wait—was there not still *another* reference to “guards” in this matter which he had failed wholly to recall when reading the Hutchinson letter? Back in the old non-secretive days Ward had told him of the Eleazar Smith diary recording the spying of Smith and Weeden on the Curwen farm, and in that dreadful chronicle there had been a mention of conversations overheard before the old wizard betook himself wholly beneath the earth. There had been, Smith and Weeden insisted, terrible colloquies wherein figured Curwen, certain captives of his, *and the guards of those captives*. Those guards, according to Hutchinson or his avatar, had ‘eaten their heads off’, so that now Dr. Allen did not keep them *in shape*. And if not *in shape*, how save as the “salts” to which it appears this wizard band was engaged in reducing as many human bodies or skeletons as they could?

So *that* was what these lekythoi contained; the monstrous fruit of unhallowed rites and deeds, presumably won or cowed to such submission as to help, when called up by some hellish incantation, in the defence of their blasphemous master or the questioning of those who were not so willing? Willett shuddered at the thought of what he had been pouring in and out of his hands, and for a moment felt an impulse to flee in panic from that cavern of hideous shelves with their silent and perhaps watching sentinels. Then he thought of the “Materia”—in the myriad Phaleron jugs on the other side of the room. Salts too—and if not the salts of “guards”, then the salts of what? God! Could it be possible that here lay the mortal relics of half the titan thinkers of all the ages; snatched by supreme ghouls from crypts where the world thought them safe, and subject to the beck and call of madmen who sought to drain their knowledge for some still wilder end whose ultimate effect would concern, as poor Charles had hinted in his frantic note, ‘all civilisation, all natural

law, perhaps even the fate of the solar system and the universe'? And Marinus Bicknell Willett had sifted their dust through his hands!

Then he noticed a small door at the farther end of the room, and calmed himself enough to approach it and examine the crude sign chiselled above. It was only a symbol, but it filled him with vague spiritual dread; for a morbid, dreaming friend of his had once drawn it on paper and told him a few of the things it means in the dark abyss of sleep. It was the sign of Koth, that dreamers see fixed above the archway of a certain black tower standing alone in twilight—and Willett did not like what his friend Randolph Carter had said of its powers. But a moment later he forgot the sign as he recognised a new acrid odour in the stench-filled air. This was a chemical rather than animal smell, and came clearly from the room beyond the door. And it was, unmistakably, the same odour which had saturated Charles Ward's clothing on the day the doctors had taken him away. So it was here that the youth had been interrupted by the final summons? He was wiser than old Joseph Curwen, for he had not resisted. Willett, boldly determined to penetrate every wonder and nightmare this nether realm might contain, seized the small lamp and crossed the threshold. A wave of nameless fright rolled out to meet him, but he yielded to no whim and deferred to no intuition. There was nothing alive here to harm him, and he would not be stayed in his piercing of the eldritch cloud which engulfed his patient.

The room beyond the door was of medium size, and had no furniture save a table, a single chair, and two groups of curious machines with clamps and wheels, which Willett recognised after a moment as mediaeval instruments of torture. On one side of the door stood a rack of savage whips, above which were some shelves bearing empty rows of shallow pedestalled cups of lead shaped like Grecian kylikes. On the other side was the table; with a powerful Argand lamp, a pad and pencil, and two of the stoppered lekythoi from the shelves outside set down at irregular places as if temporarily or in haste. Willett lighted the lamp and looked carefully at the pad, to see what notes young Ward might have been jotting down when interrupted; but found nothing more intelligible than

the following disjointed fragments in that crabbed Curwen chirography, which shed no light on the case as a whole:

"B. dy'd not. Escap'd into walls and founde Place below.

"Saw olde V. saye y^e Sabaoth and learnt y^e Way.

"Rais'd Yog-Sothoth thrice and was y^e nexte Day deliver'd.

"F. soughte to wipe out all know'g howe to raise Those from Outside."

As the strong Argand blaze lit up the entire chamber the doctor saw that the wall opposite the door, between the two groups of torturing appliances in the corners, was covered with pegs from which hung a set of shapeless-looking robes of a rather dismal yellowish-white. But far more interesting were the two vacant walls, both of which were thickly covered with mystic symbols and formulae roughly chiselled in the smooth dressed stone. The damp floor also bore marks of carving; and with but little difficulty Willett deciphered a huge pentagram in the centre, with a plain circle about three feet wide half way between this and each corner. In one of these four circles, near where a yellowish robe had been flung carelessly down, there stood a shallow kylix of the sort found on the shelves above the whip-rack; and just outside the periphery was one of the Phaleron jugs from the shelves in the other room, its tag numbered 118. This was unstoppered, and proved upon inspection to be empty; but the explorer saw with a shiver that the kylix was not. Within its shallow area, and saved from scattering only by the absence of wind in this sequestered cavern, lay a small amount of a dry, dull-greenish efflorescent powder which must have belonged in the jug; and Willett almost reeled at the implications that came sweeping over him as he correlated little by little the several elements and antecedents of the scene. The whips and the instruments of torture, the dust or salts from the jug of "Materia", the two lekythoi from the "Custodes" shelf, the robes, the formulae on the walls, the notes on the pad, the hints from letters and legends, and the thousand glimpses, doubts, and suppositions which had come to torment the friends and parents of Charles Ward—all these engulfed the doctor in a tidal wave of horror as he looked at that dry greenish powder outspread in the pedestalled leaden kylix on the floor.

With an effort, however, Willett pulled himself together and began studying the formulae chiselled on the walls. From the stained and incrustated letters it was obvious that they were carved in Joseph Curwen's time, and their text was such as to be vaguely familiar to one who had read much Curwen material or delved extensively into the history of magic. One the doctor clearly recognised as what Mrs. Ward heard her son chanting on that ominous Good Friday a year before, and what an authority had told him was a very terrible invocation addressed to secret gods outside the normal spheres. It was not spelled here exactly as Mrs. Ward had set it down from memory, nor yet as the authority had shewn it to him in the forbidden pages of "Eliphas Levi"; but its identity was unmistakable, and such words as *Sabaoth*, *Metraton*, *Almonsin*, and *Zariatnatmik* sent a shudder of fright through the searcher who had seen and felt so much of cosmic abomination just around the corner.

This was on the left-hand wall as one entered the room. The right-hand wall was no less thickly inscribed, and Willett felt a start of recognition as he came upon the pair of formulae so frequently occurring in the recent notes in the library. They were, roughly speaking, the same; with the ancient symbols of "Dragon's Head" and "Dragon's Tail" heading them as in Ward's scribbles. But the spelling differed quite widely from that of the modern versions, as if old Curwen had had a different way of recording sound, or as if later study had evolved more powerful and perfected variants of the invocations in question. The doctor tried to reconcile the chiselled version with the one which still ran persistently in his head, and found it hard to do. Where the script he had memorised began "Y'ai 'ng'ngah, Yog-Sothoth", this epigraph started out as "Aye, engengah, Yogge-Sothotha"; which to his mind would seriously interfere with the syllabification of the second word.

Ground as the later text was into his consciousness, the discrepancy disturbed him; and he found himself chanting the first of the formulae aloud in an effort to square the sound he conceived with the letters he found carved. Weird and menacing in that abyss of antique blasphemy rang his voice; its accents keyed to a droning sing-song either through the spell of the past and the unknown, or through the hellish example of that dull, godless wail from the pits

whose inhuman cadences rose and fell rhythmically in the distance through the stench and the darkness.

“Y’AI ’NG’NGAH,
YOG-SOTHOTH
H’EE—L’GEB
F’AI THRODOG
UAAAH!”

But what was this cold wind which had sprung into life at the very outset of the chant? The lamps were sputtering woefully, and the gloom grew so dense that the letters on the wall nearly faded from sight. There was smoke, too, and an acrid odour which quite drowned out the stench from the far-away wells; an odour like that he had smelt before, yet infinitely stronger and more pungent. He turned from the inscriptions to face the room with its bizarre contents, and saw that the kylix on the floor, in which the ominous efflorescent powder had lain, was giving forth a cloud of thick, greenish-black vapour of surprising volume and opacity. That powder—Great God! it had come from the shelf of “Materia”—what was it doing now, and what had started it? The formula he had been chanting—the first of the pair—Dragon’s Head, *ascending node*—Blessed Saviour, could it be. . . .

The doctor reeled, and through his head raced wildly disjointed scraps from all he had seen, heard, and read of the frightful case of Joseph Curwen and Charles Dexter Ward. “I say to you againe, doe not call up Any that you can not putt downe. . . . Have y^e Wordes for laying at all times readie, and stopp not to be sure when there is any Doubte of *Whom* you have. . . . Three Talkes with *What* was therein inhum’d. . . .” *Mercy of Heaven, what is that shape behind the parting smoke?*

5.

Marinus Bicknell Willett has no hope that any part of his tale will be believed except by certain sympathetic friends, hence he has made no attempt to tell it beyond his most intimate circle. Only a few outsiders have ever heard it repeated, and of these the majority laugh and remark that the doctor surely is getting old. He has been

advised to take a long vacation and to shun future cases dealing with mental disturbance. But Mr. Ward knows that the veteran physician speaks only a horrible truth. Did not he himself see the noisome aperture in the bungalow cellar? Did not Willett send him home overcome and ill at eleven o'clock that portentous morning? Did he not telephone the doctor in vain that evening, and again the next day, and had he not driven to the bungalow itself on that following noon, finding his friend unconscious but unharmed on one of the beds upstairs? Willett had been breathing stertorously, and opened his eyes slowly when Mr. Ward gave him some brandy fetched from the car. Then he shuddered and screamed, crying out, "*That beard . . . those eyes. . . . God, who are you?*" A very strange thing to say to a trim, blue-eyed, clean-shaven gentleman whom he had known from the latter's boyhood.

In the bright noon sunlight the bungalow was unchanged since the previous morning. Willett's clothing bore no disarrangement beyond certain smudges and worn places at the knees, and only a faint acrid odour reminded Mr. Ward of what he had smelt on his son that day he was taken to the hospital. The doctor's flashlight was missing, but his valise was safely there, as empty as when he had brought it. Before indulging in any explanations, and obviously with great moral effort, Willett staggered dizzily down to the cellar and tried the fateful platform before the tubs. It was unyielding. Crossing to where he had left his yet unused tool satchel the day before, he obtained a chisel and began to pry up the stubborn planks one by one. Underneath the smooth concrete was still visible, but of any opening or perforation there was no longer a trace. Nothing yawned this time to sicken the mystified father who had followed the doctor downstairs; only the smooth concrete underneath the planks—no noisome well, no world of subterrene horrors, no secret library, no Curwen papers, no nightmare pits of stench and howling, no laboratory or shelves or chiselled formulae, no. . . . Dr. Willett turned pale, and clutched at the younger man. "Yesterday," he asked softly, "did you see it here . . . and smell it?" And when Mr. Ward, himself transfixed with dread and wonder, found strength to nod an affirmative, the physician gave a sound half a sigh and half a gasp, and nodded in turn. "Then I will tell you," he said.

So for an hour, in the sunniest room they could find upstairs, the physician whispered his frightful tale to the wondering father. There was nothing to relate beyond the looming up of that form when the greenish-black vapour from the kylix parted, and Willett was too tired to ask himself what had really occurred. There were futile, bewildered head-shakings from both men, and once Mr. Ward ventured a hushed suggestion, "Do you suppose it would be of any use to dig?" The doctor was silent, for it seemed hardly fitting for any human brain to answer when powers of unknown spheres had so vitally encroached on this side of the Great Abyss. Again Mr. Ward asked, "But where did it go? It brought you here, you know, and it sealed up the hole somehow." And Willett again let silence answer for him.

But after all, this was not the final phase of the matter. Reaching for his handkerchief before rising to leave, Dr. Willett's fingers closed upon a piece of paper in his pocket which had not been there before, and which was companioned by the candles and matches he had seized in the vanished vault. It was a common sheet, torn obviously from the cheap pad in that fabulous room of horror somewhere underground, and the writing upon it was that of an ordinary lead pencil—doubtless the one which had lain beside the pad. It was folded very carelessly, and beyond the faint acrid scent of the cryptic chamber bore no print or mark of any world but this. But in the text itself it did indeed reek with wonder; for here was no script of any wholesome age, but the laboured strokes of mediaeval darkness, scarcely legible to the laymen who now strained over it, yet having combinations of symbols which seemed vaguely familiar. The briefly scrawled message was this, and its mystery lent purpose to the shaken pair, who forthwith walked steadily out to the Ward car and gave orders to be driven first to a quiet dining place and then to the John Hay Library on the hill.

Շքարդար ղեւանդար Հր.
 Հաճախե՛ք ա՛յ քորշի ձիւղոսնդս
 ղեւ ալիճձ րէշնդս.
 Շաւուր քաւր.

At the library it was easy to find good manuals of palaeography, and over these the two men puzzled till the lights of evening shone out from the great chandelier. In the end they found what was needed. The letters were indeed no fantastic invention, but the normal script of a very dark period. They were the pointed Saxon minuscules of the eighth or ninth century A. D., and brought with them memories of an uncouth time when under a fresh Christian veneer ancient faiths and ancient rites stirred stealthily, and the pale moon of Britain looked sometimes on strange deeds in the Roman ruins of Caerleon and Hexham, and by the towers along Hadrian's crumbling wall. The words were in such Latin as a barbarous age might remember—"Corvinus necandus est. Cadaver aq ua forti dissolvendum, nec aliq(ui)d retinendum. Tace ut potes."—which may roughly be translated, "Curwen must be killed. The body must be dissolved in aqua fortis, nor must anything be retained. Keep silence as best you are able."

Willett and Mr. Ward were mute and baffled. They had met the unknown, and found that they lacked emotions to respond to it as they vaguely believed they ought. With Willett, especially, the capacity for receiving fresh impressions of awe was well-nigh exhausted; and both men sat still and helpless till the closing of the library forced them to leave. Then they drove listlessly to the Ward mansion in Prospect Street, and talked to no purpose into the night. The doctor rested toward morning, but did not go home. And he was still there Sunday noon when a telephone message came from the detectives who had been assigned to look up Dr. Allen.

Mr. Ward, who was pacing nervously about in a dressing-gown, answered the call in person; and told the men to come up early the next day when he heard their report was almost ready. Both Willett and he were glad that this phase of the matter was taking form, for whatever the origin of the strange minuscule message, it seemed certain that the "Curwen" who must be destroyed could be no other than the bearded and spectacled stranger. Charles had feared this man, and had said in the frantic note that he must be killed and dissolved in acid. Allen, moreover, had been receiving letters from the strange wizards in Europe under the name of Curwen, and palpably regarded himself as an avatar of the bygone necromancer. And now from a fresh and unknown source had come a message

saying that "Curwen" must be killed and dissolved in acid. The linkage was too unmistakable to be factitious; and besides, was not Allen planning to murder young Ward upon the advice of the creature called Hutchinson? Of course, the letter they had seen had never reached the bearded stranger; but from its text they could see that Allen had already formed plans for dealing with the youth if he grew too 'squeamish'. Without doubt, Allen must be apprehended; and even if the most drastic directions were not carried out, he must be placed where he could inflict no harm upon Charles Ward.

That afternoon, hoping against hope to extract some gleam of information anent the inmost mysteries from the only available one capable of giving it, the father and the doctor went down the bay and called on young Charles at the hospital. Simply and gravely Willett told him all he had found, and noticed how pale he turned as each description made certain the truth of the discovery. The physician employed as much dramatic effect as he could, and watched for a wincing on Charles's part when he approached the matter of the covered pits and the nameless hybrids within. But Ward did not wince. Willett paused, and his voice grew indignant as he spoke of how the things were starving. He taxed the youth with shocking inhumanity, and shivered when only a sardonic laugh came in reply. For Charles, having dropped as useless his pretence that the crypt did not exist, seemed to see some ghastly jest in this affair; and chuckled hoarsely at something which amused him. Then he whispered, in accents doubly terrible because of the cracked voice he used, "Damn 'em, they *do* eat, but they *don't need to!* That's the rare part! A month, you say, without food? Lud, Sir, you be modest! D'ye know, that was the joke on poor old Whipple with his virtuous bluster! Kill everything off, would he? Why, damme, he was half-deaf with the noise from Outside and never saw or heard aught from the wells! He never dreamed they were there at all! Devil take ye, *those cursed things have been howling down there ever since Curwen was done for a hundred and fifty-seven years gone!*"

But no more than this could Willett get from the youth. Horrified, yet almost convinced against his will, he went on with his tale in the hope that some incident might startle his auditor out of the mad composure he maintained. Looking at the youth's face, the

doctor could not but feel a kind of terror at the changes which recent months had wrought. Truly, the boy had drawn down nameless horrors from the skies. When the room with the formulae and the greenish dust was mentioned, Charles shewed his first sign of animation. A quizzical look overspread his face as he heard what Willett had read on the pad, and he ventured the mild statement that those notes were old ones, of no possible significance to anyone not deeply initiated in the history of magic. "But," he added, "had you but known the words to bring up that which I had out in the cup, you had not been here to tell me this. 'Twas Number 118, and I conceive you would have shook had you looked it up in my list in t'other room. 'Twas never raised by me, but I meant to have it up that day you came to invite me hither."

Then Willett told of the formula he had spoken and of the greenish-black smoke which had arisen; and as he did so he saw true fear dawn for the first time on Charles Ward's face. "It *came*, and you be here alive?" As Ward croaked the words his voice seemed almost to burst free of its trammels and sink to cavernous abysses of uncanny resonance. Willett, gifted with a flash of inspiration, believed he saw the situation, and wove into his reply a caution from a letter he remembered. "No. 118, you say? But don't forget that *stones are all changed now in nine grounds out of ten. You are never sure till you question!*" And then, without warning, he drew forth the minuscule message and flashed it before the patient's eyes. He could have wished no stronger result, for Charles Ward fainted forthwith.

All this conversation, of course, had been conducted with the greatest secrecy lest the resident alienists accuse the father and the physician of encouraging a madman in his delusions. Unaided, too, Dr. Willett and Mr. Ward picked up the stricken youth and placed him on the couch. In reviving, the patient mumbled many times of some word which he must get to Orne and Hutchinson at once; so when his consciousness seemed fully back the doctor told him that of those strange creatures at least one was his bitter enemy, and had given Dr. Allen advice for his assassination. This revelation produced no visible effect, and before it was made the visitors could see that their host had already the look of a hunted man. After that he would converse no more, so Willett and the father departed

presently; leaving behind a caution against the bearded Allen, to which the youth only replied that this individual was very safely taken care of, and could do no one any harm even if he wished. This was said with an almost evil chuckle very painful to hear. They did not worry about any communications Charles might indite to that monstrous pair in Europe, since they knew that the hospital authorities seized all outgoing mail for censorship and would pass no wild or outré-looking missive.

There is, however, a curious sequel to the matter of Orne and Hutchinson, if such indeed the exiled wizards were. Moved by some vague presentiment amidst the horrors of that period, Willett arranged with an international press-cutting bureau for accounts of notable current crimes and accidents in Prague and in eastern Transylvania; and after six months believed that he had found two very significant things amongst the multifarious items he received and had translated. One was the total wrecking of a house by night in the oldest quarter of Prague, and the disappearance of the evil old man called Josef Nadek, who had dwelt in it alone ever since anyone could remember. The other was a titan explosion in the Transylvanian mountains east of Rakus, and the utter extirpation with all its inmates of the ill-regarded Castle Ferenczy, whose master was so badly spoken of by peasants and soldiery alike that he would shortly have been summoned to Bucharest for serious questioning had not this incident cut off a career already so long as to antedate all common memory. Willett maintains that the hand which wrote those minuscules was able to wield stronger weapons as well; and that while Curwen was left to him to dispose of, the writer felt able to find and deal with Orne and Hutchinson itself. Of what their fate may have been the doctor strives sedulously not to think.

6.

The following morning Dr. Willett hastened to the Ward home to be present when the detectives arrived. Allen's destruction or imprisonment—or Curwen's, if one might regard the tacit claim to reincarnation as valid—he felt must be accomplished at any cost, and he communicated this conviction to Mr. Ward as they sat waiting for the men to come. They were downstairs this time, for

the upper parts of the house were beginning to be shunned because of a peculiar nauseousness which hung indefinitely about; a nauseousness which the older servants connected with some curse left by the vanished Curwen portrait.

At nine o'clock the three detectives presented themselves and immediately delivered all that they had to say. They had not, regretably enough, located the Brava Tony Gomes as they had wished, nor had they found the least trace of Dr. Allen's source or present whereabouts; but they had managed to unearth a considerable number of local impressions and facts concerning the reticent stranger. Allen had struck Pawtuxet people as a vaguely unnatural being, and there was an universal belief that his thick sandy beard was either dyed or false—a belief conclusively upheld by the finding of such a false beard, together with a pair of dark glasses, in his room at the fateful bungalow. His voice, Mr. Ward could well testify from his one telephone conversation, had a depth and hollowness that could not be forgotten; and his glance seemed malign even through his smoked and horn-rimmed glasses. One shopkeeper, in the course of negotiations, had seen a specimen of his handwriting and declared it was very queer and crabbed; this being confirmed by pencilled notes of no clear meaning found in his room and identified by the merchant. In connexion with the vampirism rumours of the preceding summer, a majority of the gossips believed that Allen rather than Ward was the actual vampire. Statements were also obtained from the officials who had visited the bungalow after the unpleasant incident of the motor truck robbery. They had felt less of the sinister in Dr. Allen, but had recognised him as the dominant figure in the queer shadowy cottage. The place had been too dark for them to observe him clearly, but they would know him again if they saw him. His beard had looked odd, and they thought he had some slight scar above his dark spectacled right eye. As for the detectives' search of Allen's room, it yielded nothing definite save the beard and glasses, and several pencilled notes in a crabbed writing which Willett at once saw was identical with that shared by the old Curwen manuscripts and by the voluminous recent notes of young Ward found in the vanished catacombs of horror.

Dr. Willett and Mr. Ward caught something of a profound, subtle, and insidious cosmic fear from this data as it was gradually unfolded, and almost trembled in following up the vague, mad thought which had simultaneously reached their minds. The false beard and glasses—the crabbed Curwen penmanship—the old portrait and its tiny scar—and *the altered youth in the hospital with such a scar*—that deep, hollow voice on the telephone—was it not of this that Mr. Ward was reminded when his son barked forth those pitiable tones to which he now claimed to be reduced? Who had ever seen Charles and Allen together? Yes, the officials had once, but who later on? Was it not when Allen left that Charles suddenly lost his growing fright and began to live wholly at the bungalow? Curwen—Allen—Ward—in what blasphemous and abominable fusion had two ages and two persons become involved? That damnable resemblance of the picture to Charles—had it not used to stare and stare, and follow the boy around the room with its eyes? Why, too, did both Allen and Charles copy Joseph Curwen’s handwriting, even when alone and off guard? And then the frightful work of those people—the lost crypt of horrors that had aged the doctor overnight; the starved monsters in the noisome pits; the awful formula which had yielded such nameless results; the message in minuscules found in Willett’s pocket; the papers and the letters and all the talk of graves and “salts” and discoveries—whither did everything lead? In the end Mr. Ward did the most sensible thing. Steeling himself against any realisation of why he did it, he gave the detectives an article to be shewn to such Pawtuxet shopkeepers as had seen the portentous Dr. Allen. That article was a photograph of his luckless son, on which he now carefully drew in ink the pair of heavy glasses and the black pointed beard which the men had brought from Allen’s room.

For two hours he waited with the doctor in the oppressive house where fear and miasma were slowly gathering as the empty panel in the upstairs library leered and leered and leered. Then the men returned. Yes. *The altered photograph was a very passable likeness of Dr. Allen.* Mr. Ward turned pale, and Willett wiped a suddenly dampened brow with his handkerchief. Allen—Ward—Curwen—it was becoming too hideous for coherent thought. What had the boy

called out of the void, and what had it done to him? What, really, had happened from first to last? Who was this Allen who sought to kill Charles as too 'squeamish', and why had his destined victim said in the postscript to that frantic letter that he must be so completely obliterated in acid? Why, too, had the minuscule message, of whose origin no one dared think, said that "Curwen" must be likewise obliterated? What was the *change*, and when had the final stage occurred? That day when his frantic note was received—he had been nervous all the morning, then there was an alteration. He had slipped out unseen and swaggered boldly in past the men hired to guard him. That was the time, when he was out. But no—had he not cried out in terror as he entered his study—this very room? What had he found there? Or wait—*what had found him?* That simulacrum which brushed boldly in without having been seen to go—was that an alien shadow and a horror forcing itself upon a trembling figure which had never gone out at all? Had not the butler spoken of queer noises?

Willett rang for the man and asked him some low-toned questions. It had, surely enough, been a bad business. There had been noises—a cry, a gasp, a choking, and a sort of clattering or creaking or thumping, or all of these. And Mr. Charles was not the same when he stalked out without a word. The butler shivered as he spoke, and sniffed at the heavy air that blew down from some open window upstairs. Terror had settled definitely upon the house, and only the business-like detectives failed to imbibe a full measure of it. Even they were restless, for this case had held vague elements in the background which pleased them not at all. Dr. Willett was thinking deeply and rapidly, and his thoughts were terrible ones. Now and then he would almost break into muttering as he ran over in his head a new, appalling, and increasingly conclusive chain of nightmare happenings.

Then Mr. Ward made a sign that the conference was over, and everyone save him and the doctor left the room. It was noon now, but shadows as of coming night seemed to engulf the phantom-haunted mansion. Willett began talking very seriously to his host, and urged that he leave a great deal of the future investigation to him. There would be, he predicted, certain obnoxious elements which a friend could bear better than a relative. As family physician

he must have a free hand, and the first thing he required was a period alone and undisturbed in the abandoned library upstairs, where the ancient overmantel had gathered about itself an aura of noisome horror more intense than when Joseph Curwen's features themselves glanced slyly down from the painted panel.

Mr. Ward, dazed by the flood of grotesque morbidities and unthinkable maddening suggestions that poured in upon him from every side, could only acquiesce; and half an hour later the doctor was locked in the shunned room with the panelling from Olney Court. The father, listening outside, heard fumbling sounds of moving and rummaging as the moments passed; and finally a wrench and a creak, as if a tight cupboard door were being opened. Then there was a muffled cry, a kind of snorting choke, and a hasty slamming of whatever had been opened. Almost at once the key rattled and Willett appeared in the hall, haggard and ghastly, and demanding wood for the real fireplace on the south wall of the room. The furnace was not enough, he said; and the electric log had little practical use. Longing yet not daring to ask questions, Mr. Ward gave the requisite orders and a man brought some stout pine logs, shuddering as he entered the tainted air of the library to place them in the grate. Willett meanwhile had gone up to the dismantled laboratory and brought down a few odds and ends not included in the moving of the July before. They were in a covered basket, and Mr. Ward never saw what they were.

Then the doctor locked himself in the library once more, and by the clouds of smoke which rolled down past the windows from the chimney it was known that he had lighted the fire. Later, after a great rustling of newspapers, that odd wrench and creaking were heard again; followed by a thumping which none of the eavesdroppers liked. Thereafter two suppressed cries of Willett's were heard, and hard upon these came a swishing rustle of indefinable hatefulness. Finally the smoke that the wind beat down from the chimney grew very dark and acrid, and everyone wished that the weather had spared them this choking and venomous inundation of peculiar fumes. Mr. Ward's head reeled, and the servants all clustered together in a knot to watch the horrible black smoke swoop down. After an age of waiting the vapours seemed to lighten, and half-formless sounds of scraping, sweeping, and other minor operations

were heard behind the bolted door. And at last, after the slamming of some cupboard within, Willett made his appearance—sad, pale, and haggard, and bearing the cloth-draped basket he had taken from the upstairs laboratory. He had left the window open, and into that once accursed room was pouring a wealth of pure, wholesome air to mix with a queer new smell of disinfectants. The ancient overmantel still lingered; but it seemed robbed of malignity now, and rose as calm and stately in its white panelling as if it had never borne the picture of Joseph Curwen. Night was coming on, yet this time its shadows held no latent fright, but only a gentle melancholy. Of what he had done the doctor would never speak. To Mr. Ward he said, "I can answer no questions, but I will say that there are different kinds of magic. I have made a great purgation, and those in this house will sleep the better for it."

7.

That Dr. Willett's "purgation" had been an ordeal almost as nerve-racking in its way as his hideous wandering in the vanished crypt is shewn by the fact that the elderly physician gave out completely as soon as he reached home that evening. For three days he rested constantly in his room, though servants later muttered something about having heard him after midnight on Wednesday, when the outer door softly opened and closed with phenomenal softness. Servants' imaginations, fortunately, are limited, else comment might have been excited by an item in Thursday's *Evening Bulletin* which ran as follows:

North End Ghouls
Again Active

After a lull of ten months since the dastardly vandalism in the Weeden lot at the North Burial Ground, a nocturnal prowler was glimpsed early this morning in the same cemetery by Robert Hart, the night watchman. Happening to glance for a moment from his shelter at about 2 a.m., Hart observed the glow of a lantern or pocket torch not far to the northwest, and upon opening the door detected the figure of a man with a trowel very plainly silhouetted against a nearby electric light. At once starting in pursuit, he saw the figure dart hurriedly toward the main entrance, gaining the street and losing himself among the shadows before approach or capture was possible.

Like the first of the ghouls active during the past year, this intruder had done no real damage before detection. A vacant part of the Ward lot shewed signs of a little superficial digging, but nothing even nearly the size of a grave had been attempted, and no previous grave had been disturbed.

Hart, who cannot describe the prowler except as a small man probably having a full beard, inclines to the view that all three of the digging incidents have a common source; but police from the Second Station think otherwise on account of the savage nature of the second incident, where an ancient coffin was removed and its headstone violently shattered.

The first of the incidents, in which it is thought an attempt to bury something was frustrated, occurred a year ago last March, and has been attributed to bootleggers seeking a cache. It is possible, says Sergt. Riley, that this third affair is of similar nature. Officers at the Second Station are taking especial pains to capture the gang of miscreants responsible for these repeated outrages.

All day Thursday Dr. Willett rested as if recuperating from something past or nerving himself for something to come. In the evening he wrote a note to Mr. Ward, which was delivered the next morning and which caused the half-dazed parent to ponder long and deeply. Mr. Ward had not been able to go down to business since the shock of Monday with its baffling reports and its sinister "purgation", but he found something calming about the doctor's letter in spite of the despair it seemed to promise and the fresh mysteries it seemed to evoke.

"10 Barnes St.,
Providence, R. I.,
April 12, 1928.

"Dear Theodore:—I feel that I must say a word to you before doing what I am going to do tomorrow. It will conclude the terrible business we have been going through (for I feel that no spade is ever likely to reach that monstrous place we know of), but I'm afraid it won't set your mind at rest unless I expressly assure you how very conclusive it is.

"You have known me ever since you were a small boy, so I think you will not distrust me when I hint that some matters are best left undecided and unexplored. It is better that you attempt no further

speculation as to Charles's case, and almost imperative that you tell his mother nothing more than she already suspects. When I call on you tomorrow Charles will have escaped. That is all which need remain in anyone's mind. He was mad, and he escaped. You can tell his mother gently and gradually about the mad part when you stop sending the typed notes in his name. I'd advise you to join her in Atlantic City and take a rest yourself. God knows you need one after this shock, as I do myself. I am going South for a while to calm down and brace up.

"So don't ask me any questions when I call. It may be that something will go wrong, but I'll tell you if it does. I don't think it will. There will be nothing more to worry about, for Charles will be very, very safe. He is now—safer than you dream. You need hold no fears about Allen, and who or what he is. He forms as much a part of the past as Joseph Curwen's picture, and when I ring your doorbell you may feel certain that there is no such person. And what wrote that minuscule message will never trouble you or yours.

"But you must steel yourself to melancholy, and prepare your wife to do the same. I must tell you frankly that Charles's escape will not mean his restoration to you. He has been afflicted with a peculiar disease, as you must realise from the subtle physical as well as mental changes in him, and you must not hope to see him again. Have only this consolation—that he was never a fiend or even truly a madman, but only an eager, studious, and curious boy whose love of mystery and of the past was his undoing. He stumbled on things no mortal ought ever to know, and reached back through the years as no one ever should reach; and something came out of those years to engulf him.

"And now comes the matter in which I must ask you to trust me most of all. For there will be, indeed, no uncertainty about Charles's fate. In about a year, say, you can if you wish devise a suitable account of the end; for the boy will be no more. You can put up a stone in your lot at the North Burial Ground exactly ten feet west of your father's and facing the same way, and that will mark the true resting-place of your son. Nor need you fear that it will mark any abnormality or changeling. The ashes in that grave will be those of your own unaltered bone and sinew—of the real

Charles Dexter Ward whose mind you watched from infancy—the real Charles with the olive-mark on his hip and without the black witch-mark on his chest or the pit on his forehead. The Charles who never did actual evil, and who will have paid with his life for his ‘squeamishness’.

“That is all. Charles will have escaped, and a year from now you can put up his stone. Do not question me tomorrow. And believe that the honour of your ancient family remains untainted now, as it has been at all times in the past.

“With profoundest sympathy, and exhortations to fortitude, calmness, and resignation, I am ever

Sincerely your friend,
Marinus B. Willett”

So on the morning of Friday, April 13, 1928, Marinus Bicknell Willett visited the room of Charles Dexter Ward at Dr. Waite’s private hospital on Conanicut Island. The youth, though making no attempt to evade his caller, was in a sullen mood; and seemed disinclined to open the conversation which Willett obviously desired. The doctor’s discovery of the crypt and his monstrous experience therein had of course created a new source of embarrassment, so that both hesitated perceptibly after the interchange of a few strained formalities. Then a new element of constraint crept in, as Ward seemed to read behind the doctor’s mask-like face a terrible purpose which had never been there before. The patient quailed, conscious that since the last visit there had been a change whereby the solicitous family physician had given place to the ruthless and implacable avenger.

Ward actually turned pale, and the doctor was the first to speak. “More,” he said, “has been found out, and I must warn you fairly that a reckoning is due.”

“Digging again, and coming upon more poor starving pets?” was the ironic reply. It was evident that the youth meant to shew bravado to the last.

“No,” Willett slowly rejoined, “this time I did not have to dig. We have had men looking up Dr. Allen, and they found the false beard and spectacles in the bungalow.”

"Excellent," commented the disquieted host in an effort to be wittily insulting, "and I trust they proved more becoming than the beard and glasses you now have on!"

"They would become you very well," came the even and studied response, "*as indeed they seem to have done.*"

As Willett said this, it almost seemed as though a cloud passed over the sun; though there was no change in the shadows on the floor. Then Ward ventured:

"And is this what asks so hotly for a reckoning? Suppose a man does find it now and then useful to be twofold?"

"No," said Willett gravely, "again you are wrong. It is no business of mine if any man seeks duality; *provided he has any right to exist at all, and provided he does not destroy what called him out of space.*"

Ward now started violently. "Well, Sir, what *have* ye found, and what d'ye want with me?"

The doctor let a little time elapse before replying, as if choosing his words for an effective answer.

"I have found," he finally intoned, "something in a cupboard behind an ancient overmantel where a picture once was, and I have burned it and buried the ashes where the grave of Charles Dexter Ward ought to be."

The madman choked and sprang from the chair in which he had been sitting:

"Damn ye, who did ye tell—and who'll believe it was he after these full two months, with me alive? What d'ye mean to do?"

Willett, though a small man, actually took on a kind of judicial majesty as he calmed the patient with a gesture.

"I have told no one. This is no common case—it is a madness out of time and a horror from beyond the spheres which no police or lawyers or courts or alienists could ever fathom or grapple with. Thank God some chance has left inside me the spark of imagination, that I might not go astray in thinking out this thing. *You cannot deceive me, Joseph Curwen, for I know that your accursed magic is true!*

"I know how you wove the spell that brooded outside the years and fastened on your double and descendant; I know how you drew him into the past and got him to raise you up from your

detestable grave; I know how he kept you hidden in his laboratory while you studied modern things and roved abroad as a vampire by night, and how you later shewed yourself in beard and glasses that no one might wonder at your godless likeness to him; I know what you resolved to do when he balked at your monstrous rifling of the world's tombs, *and at what you planned afterward*, and I know how you did it.

"You left off your beard and glasses and fooled the guards around the house. They thought it was he who went in, and they thought it was he who came out when you had strangled and hidden him. But you hadn't reckoned on the different contents of two minds. You were a fool, Curwen, to fancy that a mere visual identity would be enough. Why didn't you think of the speech and the voice and the handwriting? It hasn't worked, you see, after all. You know better than I who or what wrote that message in minuscules, but I will warn you it was not written in vain. There are abominations and blasphemies which must be stamped out, and I believe that the writer of those words will attend to Orne and Hutchinson. One of those creatures wrote you once, 'do not call up any that you can not put down'. You were undone once before, perhaps in that very way, and it may be that your own evil magic will undo you all again. Curwen, a man can't tamper with Nature beyond certain limits, and every horror you have woven will rise up to wipe you out."

But here the doctor was cut short by a convulsive cry from the creature before him. Hopelessly at bay, weaponless, and knowing that any show of physical violence would bring a score of attendants to the doctor's rescue, Joseph Curwen had recourse to his one ancient ally, and began a series of cabbalistic motions with his forefingers as his deep, hollow voice, now unconcealed by feigned hoarseness, bellowed out the opening words of a terrible formula.

"PER ADONAI ELOIM, ADONAI JEHOVA, ADONAI SABAOOTH, METRATON. . . ."

But Willett was too quick for him. Even as the dogs in the yard outside began to howl, and even as a chill wind sprang suddenly up from the bay, the doctor commenced the solemn and measured intonation of that which he had meant all along to recite. An eye for an eye—magic for magic—let the outcome shew how well the

lesson of the abyss had been learned! So in a clear voice Marinus Bicknell Willett began the *second* of that pair of formulae whose first had raised the writer of those minuscules—the cryptic invocation whose heading was the Dragon's Tail, sign of the *descending node*—

“OGTHROD AI’F
GEB’L—EE’H
YOG-SOTHOTH
’NGAH’NG AI’Y
ZHRO!”

At the very first word from Willett's mouth the previously commenced formula of the patient stopped short. Unable to speak, the monster made wild motions with his arms until they too were arrested. When the awful name of *Yog-Sothoth* was uttered, the hideous change began. It was not merely a *dissolution*, but rather a *transformation* or *recapitulation*; and Willett shut his eyes lest he faint before the rest of the incantation could be pronounced.

But he did not faint, and that man of unholy centuries and forbidden secrets never troubled the world again. The madness out of time had subsided, and the case of Charles Dexter Ward was closed. Opening his eyes before staggering out of that room of horror, Dr. Willett saw that what he had kept in memory had not been kept amiss. There had, as he had predicted, been no need for acids. For like his accursed picture a year before, Joseph Curwen now lay scattered on the floor as a thin coating of fine bluish-grey dust.

The Shunned House

I.

From even the greatest of horrors irony is seldom absent. Sometimes it enters directly into the composition of the events, while sometimes it relates only to their fortuitous position among persons and places. The latter sort is splendidly exemplified by a case in the ancient city of Providence, where in the late forties Edgar Allan Poe used to sojourn often during his unsuccessful wooing of the gifted poetess, Mrs. Whitman. Poe generally stopped at the Mansion House in Benefit Street—the renamed Golden Ball Inn whose roof has sheltered Washington, Jefferson, and Lafayette—and his favourite walk led northward along the same street to Mrs. Whitman's home and the neighbouring hillside churchyard of St. John's, whose hidden expanse of eighteenth-century gravestones had for him a peculiar fascination.

Now the irony is this. In this walk, so many times repeated, the world's greatest master of the terrible and the bizarre was obliged to pass a particular house on the eastern side of the street; a dingy, antiquated structure perched on the abruptly rising side-hill, with a great unkempt yard dating from a time when the region was partly

open country. It does not appear that he ever wrote or spoke of it, nor is there any evidence that he even noticed it. And yet that house, to the two persons in possession of certain information, equals or outranks in horror the wildest phantasy of the genius who so often passed it unknowingly, and stands starkly leering as a symbol of all that is unutterably hideous.

The house was—and for that matter still is—of a kind to attract the attention of the curious. Originally a farm or semi-farm building, it followed the average New England colonial lines of the middle eighteenth century—the prosperous peaked-roof sort, with two stories and dormerless attic, and with the Georgian doorway and interior panelling dictated by the progress of taste at that time. It faced south, with one gable end buried to the lower windows in the eastward rising hill, and the other exposed to the foundations toward the street. Its construction, over a century and a half ago, had followed the grading and straightening of the road in that especial vicinity; for Benefit Street—at first called Back Street—was laid out as a lane winding amongst the graveyards of the first settlers, and straightened only when the removal of the bodies to the North Burial Ground made it decently possible to cut through the old family plots.

At the start, the western wall had lain some twenty feet up a precipitous lawn from the roadway; but a widening of the street at about the time of the Revolution sheared off most of the intervening space, exposing the foundations so that a brick basement wall had to be made, giving the deep cellar a street frontage with door and two windows above ground, close to the new line of public travel. When the sidewalk was laid out a century ago the last of the intervening space was removed; and Poe in his walks must have seen only a sheer ascent of dull grey brick flush with the sidewalk and surmounted at a height of ten feet by the antique shingled bulk of the house proper.

The farm-like grounds extended back very deeply up the hill, almost to Wheaton Street. The space south of the house, abutting on Benefit Street, was of course greatly above the existing sidewalk level, forming a terrace bounded by a high bank wall of damp, mossy stone pierced by a steep flight of narrow steps which led inward between canyon-like surfaces to the upper region of mangy

lawn, rheumy brick walls, and neglected gardens whose dismantled cement urns, rusted kettles fallen from tripods of knotty sticks, and similar paraphernalia set off the weather-beaten front door with its broken fanlight, rotting Ionic pilasters, and wormy triangular pediment.

What I heard in my youth about the shunned house was merely that people died there in alarmingly great numbers. That, I was told, was why the original owners had moved out some twenty years after building the place. It was plainly unhealthy, perhaps because of the dampness and fungous growth in the cellar, the general sickish smell, the draughts of the hallways, or the quality of the well and pump water. These things were bad enough, and these were all that gained belief among the persons whom I knew. Only the notebooks of my antiquarian uncle, Dr. Elihu Whipple, revealed to me at length the darker, vaguer surmises which formed an undercurrent of folklore among old-time servants and humble folk; surmises which never travelled far, and which were largely forgotten when Providence grew to be a metropolis with a shifting modern population.

The general fact is, that the house was never regarded by the solid part of the community as in any real sense "haunted". There were no widespread tales of rattling chains, cold currents of air, extinguished lights, or faces at the window. Extremists sometimes said the house was "unlucky", but that is as far as even they went. What was really beyond dispute is that a frightful proportion of persons died there; or more accurately, *had* died there, since after some peculiar happenings over sixty years ago the building had become deserted through the sheer impossibility of renting it. These persons were not all cut off suddenly by any one cause; rather did it seem that their vitality was insidiously sapped, so that each one died the sooner from whatever tendency to weakness he may have naturally had. And those who did not die displayed in varying degree a type of anaemia or consumption, and sometimes a decline of the mental faculties, which spoke ill for the salubriousness of the building. Neighbouring houses, it must be added, seemed entirely free from the noxious quality.

This much I knew before my insistent questioning led my uncle to shew me the notes which finally embarked us both on our hide-

ous investigation. In my childhood the shunned house was vacant, with barren, gnarled, and terrible old trees, long, queerly pale grass, and nightmarishly misshapen weeds in the high terraced yard where birds never lingered. We boys used to overrun the place, and I can still recall my youthful terror not only at the morbid strangeness of this sinister vegetation, but at the eldritch atmosphere and odour of the dilapidated house, whose unlocked front door was often entered in quest of shudders. The small-paned windows were largely broken, and a nameless air of desolation hung round the precarious panelling, shaky interior shutters, peeling wall-paper, falling plaster, rickety staircases, and such fragments of battered furniture as still remained. The dust and cobwebs added their touch of the fearful; and brave indeed was the boy who would voluntarily ascend the ladder to the attic, a vast rafted length lighted only by small blinking windows in the gable ends, and filled with a massed wreckage of chests, chairs, and spinning-wheels which infinite years of deposit had shrouded and festooned into monstrous and hellish shapes.

But after all, the attic was not the most terrible part of the house. It was the dank, humid cellar which somehow exerted the strongest repulsion on us, even though it was wholly above ground on the street side, with only a thin door and window-pierced brick wall to separate it from the busy sidewalk. We scarcely knew whether to haunt it in spectral fascination, or to shun it for the sake of our souls and our sanity. For one thing, the bad odour of the house was strongest there; and for another thing, we did not like the white fungous growths which occasionally sprang up in rainy summer weather from the hard earth floor. Those fungi, grotesquely like the vegetation in the yard outside, were truly horrible in their outlines; detestable parodies of toadstools and Indian pipes, whose like we had never seen in any other situation. They rotted quickly, and at one stage became slightly phosphorescent; so that nocturnal passers-by sometimes spoke of witch-fires glowing behind the broken panes of the foetor-spreading windows.

We never—even in our wildest Hallowe'en moods—visited this cellar by night, but in some of our daytime visits could detect the phosphorescence, especially when the day was dark and wet. There was also a subtler thing we often thought we detected—a very

strange thing which was, however, merely suggestive at most. I refer to a sort of cloudy whitish pattern on the dirt floor—a vague, shifting deposit of mould or nitre which we sometimes thought we could trace amidst the sparse fungous growths near the huge fireplace of the basement kitchen. Once in a while it struck us that this patch bore an uncanny resemblance to a doubled-up human figure, though generally no such kinship existed, and often there was no whitish deposit whatever. On a certain rainy afternoon when this illusion seemed phenomenally strong, and when, in addition, I had fancied I glimpsed a kind of thin, yellowish, shimmering exhalation rising from the nitrous pattern toward the yawning fireplace, I spoke to my uncle about the matter. He smiled at this odd conceit, but it seemed that his smile was tinged with reminiscence. Later I heard that a similar notion entered into some of the wild ancient tales of the common folk—a notion likewise alluding to ghoulish, wolfish shapes taken by smoke from the great chimney, and queer contours assumed by certain of the sinuous tree-roots that thrust their way into the cellar through the loose foundation-stones.

II.

Not till my adult years did my uncle set before me the notes and data which he had collected concerning the shunned house. Dr. Whipple was a sane, conservative physician of the old school, and for all his interest in the place was not eager to encourage young thoughts toward the abnormal. His own view, postulating simply a building and location of markedly unsanitary qualities, had nothing to do with abnormality; but he realised that the very picturesqueness which aroused his own interest would in a boy's fanciful mind take on all manner of gruesome imaginative associations.

The doctor was a bachelor; a white-haired, clean-shaven, old-fashioned gentleman, and a local historian of note, who had often broken a lance with such controversial guardians of tradition as Sidney S. Rider and Thomas W. Bicknell. He lived with one manservant in a Georgian homestead with knocker and iron-railed steps, balanced eerily on a steep ascent of North Court Street beside the ancient brick court and colony house where his grandfather—a cousin of that celebrated privateersman, Capt. Whipple, who burnt

His Majesty's armed schooner *Gaspee* in 1772—had voted in the legislature on May 4, 1776, for the independence of the Rhode-Island Colony. Around him in the damp, low-ceiled library with the musty white panelling, heavy carved overmantel, and small-paned, vine-shaded windows, were the relics and records of his ancient family, among which were many dubious allusions to the shunned house in Benefit Street. That pest spot lies not far distant—for Benefit runs ledgewise just above the court-house along the precipitous hill up which the first settlement climbed.

When, in the end, my insistent pestering and maturing years evoked from my uncle the hoarded lore I sought, there lay before me a strange enough chronicle. Long-winded, statistical, and drearily genealogical as some of the matter was, there ran through it a continuous thread of brooding, tenacious horror and preternatural malevolence which impressed me even more than it had impressed the good doctor. Separate events fitted together uncannily, and seemingly irrelevant details held mines of hideous possibilities. A new and burning curiosity grew in me, compared to which my boyish curiosity was feeble and inchoate. The first revelation led to an exhaustive research, and finally to that shuddering quest which proved so disastrous to myself and mine. For at last my uncle insisted on joining the search I had commenced, and after a certain night in that house he did not come away with me. I am lonely without that gentle soul whose long years were filled only with honour, virtue, good taste, benevolence, and learning. I have reared a marble urn to his memory in St. John's churchyard—the place that Poe loved—the hidden grove of giant willows on the hill, where tombs and headstones huddle quietly between the hoary bulk of the church and the houses and bank walls of Benefit Street.

The history of the house, opening amidst a maze of dates, revealed no trace of the sinister either about its construction or about the prosperous and honourable family who built it. Yet from the first a taint of calamity, soon increased to boding significance, was apparent. My uncle's carefully compiled record began with the building of the structure in 1763, and followed the theme with an unusual amount of detail. The shunned house, it seems, was first inhabited by William Harris and his wife Rhoby Dexter, with their children, Elkanah, born in 1755, Abigail, born in 1757, William,

Jr., born in 1759, and Ruth, born in 1761. Harris was a substantial merchant and seaman in the West India trade, connected with the firm of Obadiah Brown and his nephews. After Brown's death in 1761, the new firm of Nicholas Brown & Co. made him master of the brig *Prudence*, Providence-built, of 120 tons, thus enabling him to erect the new homestead he had desired ever since his marriage.

The site he had chosen—a recently straightened part of the new and fashionable Back Street, which ran along the side of the hill above crowded Cheapside—was all that could be wished, and the building did justice to the location. It was the best that moderate means could afford, and Harris hastened to move in before the birth of a fifth child which the family expected. That child, a boy, came in December; but was still-born. Nor was any child to be born alive in that house for a century and a half.

The next April sickness occurred among the children, and Abigail and Ruth died before the month was over. Dr. Job Ives diagnosed the trouble as some infantile fever, though others declared it was more of a mere wasting-away or decline. It seemed, in any event, to be contagious; for Hannah Bowen, one of the two servants, died of it in the following June. Eli Liddeason, the other servant, constantly complained of weakness; and would have returned to his father's farm in Rehoboth but for a sudden attachment for Mehitabel Pierce, who was hired to succeed Hannah. He died the next year—a sad year indeed, since it marked the death of William Harris himself, enfeebled as he was by the climate of Martinique, where his occupation had kept him for considerable periods during the preceding decade.

The widowed Rhoby Harris never recovered from the shock of her husband's death, and the passing of her first-born Elkanah two years later was the final blow to her reason. In 1768 she fell victim to a mild form of insanity, and was thereafter confined to the upper part of the house; her elder maiden sister, Mercy Dexter, having moved in to take charge of the family. Mercy was a plain, raw-boned woman of great strength; but her health visibly declined from the time of her advent. She was greatly devoted to her unfortunate sister, and had an especial affection for her only surviving nephew William, who from a sturdy infant had become a sickly, spindling lad. In this year the servant Mehitabel died, and the other

servant, Preserved Smith, left without coherent explanation—or at least, with only some wild tales and a complaint that he disliked the smell of the place. For a time Mercy could secure no more help, since the seven deaths and case of madness, all occurring within five years' space, had begun to set in motion the body of fireside rumour which later became so bizarre. Ultimately, however, she obtained new servants from out of town; Ann White, a morose woman from that part of North Kingstown now set off as the township of Exeter, and a capable Boston man named Zenas Low.

It was Ann White who first gave definite shape to the sinister idle talk. Mercy should have known better than to hire anyone from the Nooseneck Hill country, for that remote bit of backwoods was then, as now, a seat of the most uncomfortable superstitions. As lately as 1892 an Exeter community exhumed a dead body and ceremoniously burnt its heart in order to prevent certain alleged visitations injurious to the public health and peace, and one may imagine the point of view of the same section in 1768. Ann's tongue was perniciously active, and within a few months Mercy discharged her, filling her place with a faithful and amiable Amazon from Newport, Maria Robbins.

Meanwhile poor Rhoby Harris, in her madness, gave voice to dreams and imaginings of the most hideous sort. At times her screams became insupportable, and for long periods she would utter shrieking horrors which necessitated her son's temporary residence with his cousin, Peleg Harris, in Presbyterian-Lane near the new college building. The boy would seem to improve after these visits, and had Mercy been as wise as she was well-meaning, she would have let him live permanently with Peleg. Just what Mrs. Harris cried out in her fits of violence, tradition hesitates to say; or rather, presents such extravagant accounts that they nullify themselves through sheer absurdity. Certainly it sounds absurd to hear that a woman educated only in the rudiments of French often shouted for hours in a coarse and idiomatic form of that language, or that the same person, alone and guarded, complained wildly of a staring thing which bit and chewed at her. In 1772 the servant Zenas died, and when Mrs. Harris heard of it she laughed with a shocking delight utterly foreign to her. The next year she herself

died, and was laid to rest in the North Burial Ground beside her husband.

Upon the outbreak of trouble with Great Britain in 1775, William Harris, despite his scant sixteen years and feeble constitution, managed to enlist in the Army of Observation under General Greene; and from that time on enjoyed a steady rise in health and prestige. In 1780, as a Captain in Rhode Island forces in New Jersey under Colonel Angell, he met and married Phebe Hetfield of Elizabethtown, whom he brought to Providence upon his honourable discharge in the following year.

The young soldier's return was not a thing of unmitigated happiness. The house, it is true, was still in good condition; and the street had been widened and changed in name from Back Street to Benefit Street. But Mercy Dexter's once robust frame had undergone a sad and curious decay, so that she was now a stooped and pathetic figure with hollow voice and disconcerting pallor—qualities shared to a singular degree by the one remaining servant Maria. In the autumn of 1782 Phebe Harris gave birth to a still-born daughter, and on the fifteenth of the next May Mercy Dexter took leave of a useful, austere, and virtuous life.

William Harris, at last thoroughly convinced of the radically unhealthful nature of his abode, now took steps toward quitting it and closing it forever. Securing temporary quarters for himself and his wife at the newly opened Golden Ball Inn, he arranged for the building of a new and finer house in Westminster Street, in the growing part of the town across the Great Bridge. There, in 1785, his son Dutee was born; and there the family dwelt till the encroachments of commerce drove them back across the river and over the hill to Angell Street, in the newer East Side residence district, where the late Archer Harris built his sumptuous but hideous French-roofed mansion in 1876. William and Phebe both succumbed to the yellow fever epidemic of 1797, but Dutee was brought up by his cousin Rathbone Harris, Peleg's son.

Rathbone was a practical man, and rented the Benefit Street house despite William's wish to keep it vacant. He considered it an obligation to his ward to make the most of all the boy's property, nor did he concern himself with the deaths and illnesses which

caused so many changes of tenants, or the steadily growing aversion with which the house was generally regarded. It is likely that he felt only vexation when, in 1804, the town council ordered him to fumigate the place with sulphur, tar, and gum camphor on account of the much-discussed deaths of four persons, presumably caused by the then diminishing fever epidemic. They said the place had a febrile smell.

Dutee himself thought little of the house, for he grew up to be a privateersman, and served with distinction on the *Vigilant* under Capt. Cahoone in the War of 1812. He returned unharmed, married in 1814, and became a father on that memorable night of September 23, 1815, when a great gale drove the waters of the bay over half the town, and floated a tall sloop well up Westminster Street so that its masts almost tapped the Harris windows in symbolic affirmation that the new boy, Welcome, was a seaman's son.

Welcome did not survive his father, but lived to perish gloriously at Fredericksburg in 1862. Neither he nor his son Archer knew of the shunned house as other than a nuisance almost impossible to rent—perhaps on account of the mustiness and sickly odour of unkempt old age. Indeed, it never was rented after a series of deaths culminating in 1861, which the excitement of the war tended to throw into obscurity. Carrington Harris, last of the male line, knew it only as a deserted and somewhat picturesque centre of legend until I told him my experience. He had meant to tear it down and build an apartment house on the site, but after my account decided to let it stand, install plumbing, and rent it. Nor has he yet had any difficulty in obtaining tenants. The horror has gone.

III.

It may well be imagined how powerfully I was affected by the annals of the Harrises. In this continuous record there seemed to me to brood a persistent evil beyond anything in Nature as I had known it; an evil clearly connected with the house and not with the family. This impression was confirmed by my uncle's less systematic array of miscellaneous data—legends transcribed from servant gossip, cuttings from the papers, copies of death-certificates by fellow-physicians, and the like. All of this material I cannot hope to

give, for my uncle was a tireless antiquarian and very deeply interested in the shunned house; but I may refer to several dominant points which earn notice by their recurrence through many reports from diverse sources. For example, the servant gossip was practically unanimous in attributing to the fungous and malodorous *cellar* of the house a vast supremacy in evil influence. There had been servants—Ann White especially—who would not use the cellar kitchen, and at least three well-defined legends bore upon the queer quasi-human or diabolic outlines assumed by tree-roots and patches of mould in that region. These latter narratives interested me profoundly, on account of what I had seen in my boyhood, but I felt that most of the significance had in each case been largely obscured by additions from the common stock of local ghost lore.

Ann White, with her Exeter superstition, had promulgated the most extravagant and at the same time most consistent tale; alleging that there must lie buried beneath the house one of those vampires—the dead who retain their bodily form and live on the blood or breath of the living—whose hideous legions send their preying shapes or spirits abroad by night. To destroy a vampire one must, the grandmothers say, exhume it and burn its heart, or at least drive a stake through that organ; and Ann's dogged insistence on a search under the cellar had been prominent in bringing about her discharge.

Her tales, however, commanded a wide audience, and were the more readily accepted because the house indeed stood on land once used for burial purposes. To me their interest depended less on this circumstance than on the peculiarly appropriate way in which they dovetailed with certain other things—the complaint of the departing servant Preserved Smith, who had preceded Ann and never heard of her, that something "sucked his breath" at night; the death-certificates of fever victims of 1804, issued by Dr. Chad Hopkins, and shewing the four deceased persons all unaccountably lacking in blood; and the obscure passages of poor Rhoby Harris's ravings, where she complained of the sharp teeth of a glassy-eyed, half-visible presence.

Free from unwarranted superstition though I am, these things produced in me an odd sensation, which was intensified by a pair of widely separated newspaper cuttings relating to deaths in the

shunned house—one from the *Providence Gazette and Country-Journal* of April 12, 1815, and the other from the *Daily Transcript and Chronicle* of October 27, 1845—each of which detailed an appallingly grisly circumstance whose duplication was remarkable. It seems that in both instances the dying person, in 1815 a gentle old lady named Stafford and in 1845 a school-teacher of middle age named Eleazar Durfee, became transfigured in a horrible way; glaring glassily and attempting to bite the throat of the attending physician. Even more puzzling, though, was the final case which put an end to the renting of the house—a series of anaemia deaths preceded by progressive madnesses wherein the patient would craftily attempt the lives of his relatives by incisions in the neck or wrist.

This was in 1860 and 1861, when my uncle had just begun his medical practice; and before leaving for the front he heard much of it from his elder professional colleagues. The really inexplicable thing was the way in which the victims—ignorant people, for the ill-smelling and widely shunned house could now be rented to no others—would babble maledictions in French, a language they could not possibly have studied to any extent. It made one think of poor Rhoby Harris nearly a century before, and so moved my uncle that he commenced collecting historical data on the house after listening, some time subsequent to his return from the war, to the first-hand account of Drs. Chase and Whitmarsh. Indeed, I could see that my uncle had thought deeply on the subject, and that he was glad of my own interest—an open-minded and sympathetic interest which enabled him to discuss with me matters at which others would merely have laughed. His fancy had not gone so far as mine, but he felt that the place was rare in its imaginative potentialities, and worthy of note as an inspiration in the field of the grotesque and macabre.

For my part, I was disposed to take the whole subject with profound seriousness, and began at once not only to review the evidence, but to accumulate as much more as I could. I talked with the elderly Archer Harris, then owner of the house, many times before his death in 1916; and obtained from him and his still surviving maiden sister Alice an authentic corroboration of all the family data my uncle had collected. When, however, I asked them what connexion with France or its language the house could have, they con-

fessed themselves as frankly baffled and ignorant as I. Archer knew nothing, and all that Miss Harris could say was that an old allusion her grandfather, Dutee Harris, had heard of might have shed a little light. The old seaman, who had survived his son Welcome's death in battle by two years, had not himself known the legend; but recalled that his earliest nurse, the ancient Maria Robbins, seemed darkly aware of something that might have lent a weird significance to the French ravings of Rhoby Harris, which she had so often heard during the last days of that hapless woman. Maria had been at the shunned house from 1769 till the removal of the family in 1783, and had seen Mercy Dexter die. Once she hinted to the child Dutee of a somewhat peculiar circumstance in Mercy's last moments, but he had soon forgotten all about it save that it was something peculiar. The granddaughter, moreover, recalled even this much with difficulty. She and her brother were not so much interested in the house as was Archer's son Carrington, the present owner, with whom I talked after my experience.

Having exhausted the Harris family of all the information it could furnish, I turned my attention to early town records and deeds with a zeal more penetrating than that which my uncle had occasionally shewn in the same work. What I wished was a comprehensive history of the site from its very settlement in 1636—or even before, if any Narragansett Indian legend could be unearthed to supply the data. I found, at the start, that the land had been part of the long strip of home lot granted originally to John Throckmorton; one of many similar strips beginning at the Town Street beside the river and extending up over the hill to a line roughly corresponding with the modern Hope Street. The Throckmorton lot had later, of course, been much subdivided; and I became very assiduous in tracing that section through which Back or Benefit Street was later run. It had, a rumour indeed said, been the Throckmorton graveyard; but as I examined the records more carefully, I found that the graves had all been transferred at an early date to the North Burial Ground on the Pawtucket West Road.

Then suddenly I came—by a rare piece of chance, since it was not in the main body of records and might easily have been missed—upon something which aroused my keenest eagerness, fitting in as it did with several of the queerest phases of the affair. It was the

record of a lease, in 1697, of a small tract of ground to an Etienne Roulet and wife. At last the French element had appeared—that, and another deeper element of horror which the name conjured up from the darkest recesses of my weird and heterogeneous reading—and I feverishly studied the platting of the locality as it had been before the cutting through and partial straightening of Back Street between 1747 and 1758. I found what I had half expected, that where the shunned house now stood the Roulets had laid out their graveyard behind a one-story and attic cottage, and that no record of any transfer of graves existed. The document, indeed, ended in much confusion; and I was forced to ransack both the Rhode Island Historical Society and Shepley Library before I could find a local door which the name Etienne Roulet would unlock. In the end I did find something; something of such vague but monstrous import that I set about at once to examine the cellar of the shunned house itself with a new and excited minuteness.

The Roulets, it seemed, had come in 1696 from East Greenwich, down the west shore of Narragansett Bay. They were Huguenots from Caude, and had encountered much opposition before the Providence selectmen allowed them to settle in the town. Unpopularity had dogged them in East Greenwich, whither they had come in 1686, after the revocation of the Edict of Nantes, and rumour said that the cause of dislike extended beyond mere racial and national prejudice, or the land disputes which involved other French settlers with the English in rivalries which not even Governor Andros could quell. But their ardent Protestantism—too ardent, some whispered—and their evident distress when virtually driven from the village down the bay, had moved the sympathy of the town fathers. Here the strangers had been granted a haven; and the swarthy Etienne Roulet, less apt at agriculture than at reading queer books and drawing queer diagrams, was given a clerical post in the warehouse at Pardon Tillinghast's wharf, far south in Town Street. There had, however, been a riot of some sort later on—perhaps forty years later, after old Roulet's death—and no one seemed to hear of the family after that.

For a century and more, it appeared, the Roulets had been well remembered and frequently discussed as vivid incidents in the quiet life of a New England seaport. Etienne's son Paul, a surly fellow

whose erratic conduct had probably provoked the riot which wiped out the family, was particularly a source of speculation; and though Providence never shared the witchcraft panics of her Puritan neighbours, it was freely intimated by old wives that his prayers were neither uttered at the proper time nor directed toward the proper object. All this had undoubtedly formed the basis of the legend known by old Maria Robbins. What relation it had to the French ravings of Rhoby Harris and other inhabitants of the shunned house, imagination or future discovery alone could determine. I wondered how many of those who had known the legends realised that additional link with the terrible which my wider reading had given me; that ominous item in the annals of morbid horror which tells of the creature *Jacques Roulet, of Caude*, who in 1598 was condemned to death as a daemoniac but afterward saved from the stake by the Paris parliament and shut in a madhouse. He had been found covered with blood and shreds of flesh in a wood, shortly after the killing and rending of a boy by a pair of wolves. One wolf was seen to lope away unhurt. Surely a pretty hearthside tale, with a queer significance as to name and place; but I decided that the Providence gossips could not have generally known of it. Had they known, the coincidence of names would have brought some drastic and frightened action—indeed, might not its limited whispering have precipitated the final riot which erased the Roulets from the town?

I now visited the accursed place with increased frequency; studying the unwholesome vegetation of the garden, examining all the walls of the building, and poring over every inch of the earthen cellar floor. Finally, with Carrington Harris's permission, I fitted a key to the disused door opening from the cellar directly upon Benefit Street, preferring to have a more immediate access to the outside world than the dark stairs, ground floor hall, and front door could give. There, where morbidity lurked most thickly, I searched and poked during long afternoons when the sunlight filtered in through the cobwebbed above-ground windows, and a sense of security glowed from the unlocked door which placed me only a few feet from the placid sidewalk outside. Nothing new rewarded my efforts—only the same depressing mustiness and faint suggestions of noxious odours and nitrous outlines on the floor—and I fancy

that many pedestrians must have watched me curiously through the broken panes.

At length, upon a suggestion of my uncle's, I decided to try the spot nocturnally; and one stormy midnight ran the beams of an electric torch over the mouldy floor with its uncanny shapes and distorted, half-phosphorescent fungi. The place had dispirited me curiously that evening, and I was almost prepared when I saw—or thought I saw—amidst the whitish deposits a particularly sharp definition of the "huddled form" I had suspected from boyhood. Its clearness was astonishing and unprecedented—and as I watched I seemed to see again the thin, yellowish, shimmering exhalation which had startled me on that rainy afternoon so many years before.

Above the anthropomorphic patch of mould by the fireplace it rose; a subtle, sickish, almost luminous vapour which as it hung trembling in the dampness seemed to develop vague and shocking suggestions of form, gradually trailing off into nebulous decay and passing up into the blackness of the great chimney with a foetor in its wake. It was truly horrible, and the more so to me because of what I knew of the spot. Refusing to flee, I watched it fade—and as I watched I felt that it was in turn watching me greedily with eyes more imaginable than visible. When I told my uncle about it he was greatly aroused; and after a tense hour of reflection, arrived at a definite and drastic decision. Weighing in his mind the importance of the matter, and the significance of our relation to it, he insisted that we both test—and if possible destroy—the horror of the house by a joint night or nights of aggressive vigil in that musty and fungus-cursed cellar.

IV.

On Wednesday, June 25, 1919, after a proper notification of Carrington Harris which did not include surmises as to what we expected to find, my uncle and I conveyed to the shunned house two camp chairs and a folding camp cot, together with some scientific mechanism of greater weight and intricacy. These we placed in the cellar during the day, screening the windows with paper and plan-

ning to return in the evening for our first vigil. We had locked the door from the cellar to the ground floor; and having a key to the outside cellar door, we were prepared to leave our expensive and delicate apparatus—which we had obtained secretly and at great cost—as many days as our vigils might need to be protracted. It was our design to sit up together till very late, and then watch singly till dawn in two-hour stretches, myself first and then my companion; the inactive member resting on the cot.

The natural leadership with which my uncle procured the instruments from the laboratories of Brown University and the Cranston Street Armoury, and instinctively assumed direction of our venture, was a marvellous commentary on the potential vitality and resilience of a man of eighty-one. Elihu Whipple had lived according to the hygienic laws he had preached as a physician, and but for what happened later would be here in full vigour today. Only two persons suspect what did happen—Carrington Harris and myself. I had to tell Harris because he owned the house and deserved to know what had gone out of it. Then too, we had spoken to him in advance of our quest; and I felt after my uncle's going that he would understand and assist me in some vitally necessary public explanations. He turned very pale, but agreed to help me, and decided that it would now be safe to rent the house.

To declare that we were not nervous on that rainy night of watching would be an exaggeration both gross and ridiculous. We were not, as I have said, in any sense childishly superstitious, but scientific study and reflection had taught us that the known universe of three dimensions embraces the merest fraction of the whole cosmos of substance and energy. In this case an overwhelming preponderance of evidence from numerous authentic sources pointed to the tenacious existence of certain forces of great power and, so far as the human point of view is concerned, exceptional malignancy. To say that we actually believed in vampires or werewolves would be a carelessly inclusive statement. Rather must it be said that we were not prepared to deny the possibility of certain unfamiliar and unclassified modifications of vital force and attenuated matter; existing very infrequently in three-dimensional space because of its more intimate connexion with other spatial units, yet

close enough to the boundary of our own to furnish us occasional manifestations which we, for lack of a proper vantage-point, may never hope to understand.

In short, it seemed to my uncle and me that an incontrovertible array of facts pointed to some lingering influence in the shunned house; traceable to one or another of the ill-favoured French settlers of two centuries before, and still operative through rare and unknown laws of atomic and electronic motion. That the family of Roulet had possessed an abnormal affinity for outer circles of entity—dark spheres which for normal folk hold only repulsion and terror—their recorded history seemed to prove. Had not, then, the riots of those bygone seventeen-thirties set moving certain kinetic patterns in the morbid brain of one or more of them—notably the sinister Paul Roulet—which obscurely survived the bodies murdered and buried by the mob, and continued to function in some multiple-dimensioned space along the original lines of force determined by a frantic hatred of the encroaching community?

Such a thing was surely not a physical or biochemical impossibility in the light of a newer science which includes the theories of relativity and intra-atomic action. One might easily imagine an alien nucleus of substance or energy, formless or otherwise, kept alive by imperceptible or immaterial subtractions from the life-force or bodily tissues and fluids of other and more palpably living things into which it penetrates and with whose fabric it sometimes completely merges itself. It might be actively hostile, or it might be dictated merely by blind motives of self-preservation. In any case such a monster must of necessity be in our scheme of things an anomaly and an intruder, whose extirpation forms a primary duty with every man not an enemy to the world's life, health, and sanity.

What baffled us was our utter ignorance of the aspect in which we might encounter the thing. No sane person had even seen it, and few had ever felt it definitely. It might be pure energy—a form ethereal and outside the realm of substance—or it might be partly material; some unknown and equivocal mass of plasticity, capable of changing at will to nebulous approximations of the solid, liquid, gaseous, or tenuously unparticled states. The anthropomorphic patch of mould on the floor, the form of the yellowish vapour, and

the curvature of the tree-roots in some of the old tales, all argued at least a remote and reminiscent connexion with the human shape; but how representative or permanent that similarity might be, none could say with any kind of certainty.

We had devised two weapons to fight it; a large and specially fitted Crookes tube operated by powerful storage batteries and provided with peculiar screens and reflectors, in case it proved intangible and opposable only by vigorously destructive ether radiations, and a pair of military flame-throwers of the sort used in the world-war, in case it proved partly material and susceptible of mechanical destruction—for like the superstitious Exeter rustics, we were prepared to burn the thing's heart out if heart existed to burn. All this aggressive mechanism we set in the cellar in positions carefully arranged with reference to the cot and chairs, and to the spot before the fireplace where the mould had taken strange shapes. That suggestive patch, by the way, was only faintly visible when we placed our furniture and instruments, and when we returned that evening for the actual vigil. For a moment I half doubted that I had ever seen it in the more definitely limned form—but then I thought of the legends.

Our cellar vigil began at 10 p.m., daylight saving time, and as it continued we found no promise of pertinent developments. A weak, filtered glow from the rain-harassed street-lamps outside, and a feeble phosphorescence from the detestable fungi within, shewed the dripping stone of the walls, from which all traces of whitewash had vanished; the dank, foetid, and mildew-tainted hard earth floor with its obscene fungi; the rotting remains of what had been stools, chairs, and tables, and other more shapeless furniture; the heavy planks and massive beams of the ground floor overhead; the decrepit plank door leading to bins and chambers beneath other parts of the house; the crumbling stone staircase with ruined wooden hand-rail; and the crude and cavernous fireplace of blackened brick where rusted iron fragments revealed the past presence of hooks, andirons, spit, crane, and a door to the Dutch oven—these things, and our austere cot and camp chairs, and the heavy and intricate destructive machinery we had brought.

We had, as in my own former explorations, left the door to the

street unlocked; so that a direct and practical path of escape might lie open in case of manifestations beyond our power to deal with. It was our idea that our continued nocturnal presence would call forth whatever malign entity lurked there; and that being prepared, we could dispose of the thing with one or the other of our provided means as soon as we had recognised and observed it sufficiently. How long it might require to evoke and extinguish the thing, we had no notion. It occurred to us, too, that our venture was far from safe; for in what strength the thing might appear no one could tell. But we deemed the game worth the hazard, and embarked on it alone and unhesitatingly; conscious that the seeking of outside aid would only expose us to ridicule and perhaps defeat our entire purpose. Such was our frame of mind as we talked—far into the night, till my uncle's growing drowsiness made me remind him to lie down for his two-hour sleep.

Something like fear chilled me as I sat there in the small hours alone—I say alone, for one who sits by a sleeper is indeed alone; perhaps more alone than he can realise. My uncle breathed heavily, his deep inhalations and exhalations accompanied by the rain outside, and punctuated by another nerve-racking sound of distant dripping water within—for the house was repulsively damp even in dry weather, and in this storm positively swamp-like. I studied the loose, antique masonry of the walls in the fungus-light and the feeble rays which stole in from the street through the screened windows; and once, when the noisome atmosphere of the place seemed about to sicken me, I opened the door and looked up and down the street, feasting my eyes on familiar sights and my nostrils on the wholesome air. Still nothing occurred to reward my watching; and I yawned repeatedly, fatigue getting the better of apprehension.

Then the stirring of my uncle in his sleep attracted my notice. He had turned restlessly on the cot several times during the latter half of the first hour, but now he was breathing with unusual irregularity, occasionally heaving a sigh which held more than a few of the qualities of a choking moan. I turned my electric flashlight on him and found his face averted, so rising and crossing to the other side of the cot, I again flashed the light to see if he seemed in any pain. What I saw unnerved me most surprisingly, considering its relative

triviality. It must have been merely the association of any odd circumstance with the sinister nature of our location and mission, for surely the circumstance was not in itself frightful or unnatural. It was merely that my uncle's facial expression, disturbed no doubt by the strange dreams which our situation prompted, betrayed considerable agitation, and seemed not at all characteristic of him. His habitual expression was one of kindly and well-bred calm, whereas now a variety of emotions seemed struggling within him. I think, on the whole, that it was this *variety* which chiefly disturbed me. My uncle, as he gasped and tossed in increasing perturbation and with eyes that had now started open, seemed not one but many men, and suggested a curious quality of alienage from himself.

All at once he commenced to mutter, and I did not like the look of his mouth and teeth as he spoke. The words were at first indistinguishable, and then—with a tremendous start—I recognised something about them which filled me with icy fear till I recalled the breadth of my uncle's education and the interminable translations he had made from anthropological and antiquarian articles in the *Revue des Deux Mondes*. For the venerable Elihu Whipple was muttering *in French*, and the few phrases I could distinguish seemed connected with the darkest myths he had ever adapted from the famous Paris magazine.

Suddenly a perspiration broke out on the sleeper's forehead, and he leaped abruptly up, half awake. The jumble of French changed to a cry in English, and the hoarse voice shouted excitedly, "My breath, my breath!" Then the awakening became complete, and with a subsidence of facial expression to the normal state my uncle seized my hand and began to relate a dream whose nucleus of significance I could only surmise with a kind of awe.

He had, he said, floated off from a very ordinary series of dream-pictures into a scene whose strangeness was related to nothing he had ever read. It was of this world, and yet not of it—a shadowy geometrical confusion in which could be seen elements of familiar things in most unfamiliar and perturbing combinations. There was a suggestion of queerly disordered pictures superimposed one upon another; an arrangement in which the essentials of time as well as of space seemed dissolved and mixed in the most illogical fashion.

In this kaleidoscopic vortex of phantasmal images were occasional snapshots, if one might use the term, of singular clearness but unaccountable heterogeneity.

Once my uncle thought he lay in a carelessly dug open pit, with a crowd of angry faces framed by straggling locks and three-cornered hats frowning down on him. Again he seemed to be in the interior of a house—an old house, apparently—but the details and inhabitants were constantly changing, and he could never be certain of the faces or the furniture, or even of the room itself, since doors and windows seemed in just as great a state of flux as the more presumably mobile objects. It was queer—damnable queer—and my uncle spoke almost sheepishly, as if half expecting not to be believed, when he declared that of the strange faces many had unmistakably borne the features of the Harris family. And all the while there was a personal sensation of choking, as if some pervasive presence had spread itself through his body and sought to possess itself of his vital processes. I shuddered at the thought of those vital processes, worn as they were by eighty-one years of continuous functioning, in conflict with unknown forces of which the youngest and strongest system might well be afraid; but in another moment reflected that dreams are only dreams, and that these uncomfortable visions could be, at most, no more than my uncle's reaction to the investigations and expectations which had lately filled our minds to the exclusion of all else.

Conversation, also, soon tended to dispel my sense of strangeness; and in time I yielded to my yawns and took my turn at slumber. My uncle seemed now very wakeful, and welcomed his period of watching even though the nightmare had aroused him far ahead of his allotted two hours. Sleep seized me quickly, and I was at once haunted with dreams of the most disturbing kind. I felt, in my visions, a cosmic and abysmal loneliness; with hostility surging from all sides upon some prison where I lay confined. I seemed bound and gagged, and taunted by the echoing yells of distant multitudes who thirsted for my blood. My uncle's face came to me with less pleasant associations than in waking hours, and I recall many futile struggles and attempts to scream. It was not a pleasant sleep, and for a second I was not sorry for the echoing shriek which clove

through the barriers of dream and flung me to a sharp and startled awokeness in which every actual object before my eyes stood out with more than natural clearness and reality.

V.

I had been lying with my face away from my uncle's chair, so that in this sudden flash of awakening I saw only the door to the street, the more northerly window, and the wall and floor and ceiling toward the north of the room, all photographed with morbid vividness on my brain in a light brighter than the glow of the fungi or the rays from the street outside. It was not a strong or even a fairly strong light; certainly not nearly strong enough to read an average book by. But it cast a shadow of myself and the cot on the floor, and had a yellowish, penetrating force that hinted at things more potent than luminosity. This I perceived with unhealthy sharpness despite the fact that two of my other senses were violently assailed. For on my ears rang the reverberations of that shocking scream, while my nostrils revolted at the stench which filled the place. My mind, as alert as my senses, recognised the gravely unusual; and almost automatically I leaped up and turned about to grasp the destructive instruments which we had left trained on the mouldy spot before the fireplace. As I turned, I dreaded what I was to see; for the scream had been in my uncle's voice, and I knew not against what menace I should have to defend him and myself.

Yet after all, the sight was worse than I had dreaded. There are horrors beyond horrors, and this was one of those nuclei of all dreamable hideousness which the cosmos saves to blast an accursed and unhappy few. Out of the fungus-ridden earth steamed up a vaporous corpse-light, yellow and diseased, which bubbled and lapped to a gigantic height in vague outlines half-human and half-monstrous, through which I could see the chimney and fireplace beyond. It was all eyes—wolfish and mocking—and the rugose insect-like head dissolved at the top to a thin stream of mist which curled putridly about and finally vanished up the chimney. I say that I saw this thing, but it is only in conscious retrospection that I ever definitely traced its damnable approach to form. At the time it

was to me only a seething, dimly phosphorescent cloud of fungous loathsomeness, enveloping and dissolving to an abhorrent plasticity the one object to which all my attention was focussed. That object was my uncle—the venerable Elihu Whipple—who with blackening and decaying features leered and gibbered at me, and reached out dripping claws to rend me in the fury which this horror had brought.

It was a sense of routine which kept me from going mad. I had drilled myself in preparation for the crucial moment, and blind training saved me. Recognising the bubbling evil as no substance reachable by matter or material chemistry, and therefore ignoring the flame-thrower which loomed on my left, I threw on the current of the Crookes tube apparatus, and focussed toward that scene of immortal blasphemousness the strongest ether radiations which man's art can arouse from the spaces and fluids of Nature. There was a bluish haze and a frenzied sputtering, and the yellowish phosphorescence grew dimmer to my eyes. But I saw the dimness was only that of contrast, and that the waves from the machine had no effect whatever.

Then, in the midst of that daemoniac spectacle, I saw a fresh horror which brought cries to my lips and sent me fumbling and staggering toward that unlocked door to the quiet street, careless of what abnormal terrors I loosed upon the world, or what thoughts or judgments of men I brought down upon my head. In that dim blend of blue and yellow the form of my uncle had commenced a nauseous liquefaction whose essence eludes all description, and in which there played across his vanishing face such changes of identity as only madness can conceive. He was at once a devil and a multitude, a charnel-house and a pageant. Lit by the mixed and uncertain beams, that gelatinous face assumed a dozen—a score—a hundred—aspects; grinning, as it sank to the ground on a body that melted like tallow, in the caricatured likeness of legions strange and yet not strange.

I saw the features of the Harris line, masculine and feminine, adult and infantile, and other features old and young, coarse and refined, familiar and unfamiliar. For a second there flashed a degraded counterfeit of a miniature of poor mad Rhoby Harris that I had seen in the School of Design Museum, and another time I

thought I caught the raw-boned image of Mercy Dexter as I recalled her from a painting in Carrington Harris's house. It was frightful beyond conception; toward the last, when a curious blend of servant and baby visages flickered close to the fungous floor where a pool of greenish grease was spreading, it seemed as though the shifting features fought against themselves, and strove to form contours like those of my uncle's kindly face. I like to think that he existed at that moment, and that he tried to bid me farewell. It seems to me I hiccupped a farewell from my own parched throat as I lurched out into the street; a thin stream of grease following me through the door to the rain-drenched sidewalk.

The rest is shadowy and monstrous. There was no one in the soaking street, and in all the world there was no one I dared tell. I walked aimlessly south past College Hill and the Athenaeum, down Hopkins Street, and over the bridge to the business section where tall buildings seemed to guard me as modern material things guard the world from ancient and unwholesome wonder. Then grey dawn unfolded wetly from the east, silhouetting the archaic hill and its venerable steeples, and beckoning me to the place where my terrible work was still unfinished. And in the end I went, wet, hatless, and dazed in the morning light, and entered that awful door in Benefit Street which I had left ajar, and which still swung cryptically in full sight of the early householders to whom I dared not speak.

The grease was gone, for the mouldy floor was porous. And in front of the fireplace was no vestige of the giant doubled-up form in nitre. I looked at the cot, the chairs, the instruments, my neglected hat, and the yellowed straw hat of my uncle. Dazedness was uppermost, and I could scarcely recall what was dream and what was reality. Then thought trickled back, and I knew that I had witnessed things more horrible than I had dreamed. Sitting down, I tried to conjecture as nearly as sanity would let me just what had happened, and how I might end the horror, if indeed it had been real. Matter it seemed not to be, nor ether, nor anything else conceivable by mortal mind. What, then, but some exotic *emanation*; some vampirish vapour such as Exeter rustics tell of as lurking over certain churchyards? This I felt was the clue, and again I looked at the floor before the fireplace where the mould and nitre had taken strange forms. In ten minutes my mind was made up, and taking

my hat I set out for home, where I bathed, ate, and gave by telephone an order for a pickaxe, a spade, a military gas-mask, and six carboys of sulphuric acid, all to be delivered the next morning at the cellar door of the shunned house in Benefit Street. After that I tried to sleep; and failing, passed the hours in reading and in the composition of inane verses to counteract my mood.

At 11 a.m. the next day I commenced digging. It was sunny weather, and I was glad of that. I was still alone, for as much as I feared the unknown horror I sought, there was more fear in the thought of telling anybody. Later I told Harris only through sheer necessity, and because he had heard odd tales from old people which disposed him ever so little toward belief. As I turned up the stinking black earth in front of the fireplace, my spade causing a viscous yellow ichor to ooze from the white fungi which it severed, I trembled at the dubious thoughts of what I might uncover. Some secrets of inner earth are not good for mankind, and this seemed to me one of them.

My hand shook perceptibly, but still I delved; after a while standing in the large hole I had made. With the deepening of the hole, which was about six feet square, the evil smell increased; and I lost all doubt of my imminent contact with the hellish thing whose emanations had cursed the house for over a century and a half. I wondered what it would look like—what its form and substance would be, and how big it might have waxed through long ages of life-sucking. At length I climbed out of the hole and dispersed the heaped-up dirt, then arranging the great carboys of acid around and near two sides, so that when necessary I might empty them all down the aperture in quick succession. After that I dumped earth only along the other two sides; working more slowly and donning my gas-mask as the smell grew. I was nearly unnerved at my proximity to a nameless thing at the bottom of a pit.

Suddenly my spade struck something softer than earth. I shuddered, and made a motion as if to climb out of the hole, which was now as deep as my neck. Then courage returned, and I scraped away more dirt in the light of the electric torch I had provided. The surface I uncovered was fishy and glassy—a kind of semi-putrid congealed jelly with suggestions of translucency. I scraped further, and saw that it had form. There was a rift where a part of the sub-

stance was folded over. The exposed area was huge and roughly cylindrical; like a mammoth soft blue-white stovepipe doubled in two, its largest part some two feet in diameter. Still more I scraped, and then abruptly I leaped out of the hole and away from the filthy thing; frantically unstopping and tilting the heavy carboys, and precipitating their corrosive contents one after another down that charnel gulf and upon the unthinkable abnormality whose titan *elbow* I had seen.

The blinding maelstrom of greenish-yellow vapour which surged tempestuously up from that hole as the floods of acid descended, will never leave my memory. All along the hill people tell of the yellow day, when virulent and horrible fumes arose from the factory waste dumped in the Providence River, but I know how mistaken they are as to the source. They tell, too, of the hideous roar which at the same time came from some disordered water-pipe or gas main underground—but again I could correct them if I dared. It was unspeakably shocking, and I do not see how I lived through it. I did faint after emptying the fourth carboy, which I had to handle after the fumes had begun to penetrate my mask; but when I recovered I saw that the hole was emitting no fresh vapours.

The two remaining carboys I emptied down without particular result, and after a time I felt it safe to shovel the earth back into the pit. It was twilight before I was done, but fear had gone out of the place. The dampness was less foetid, and all the strange fungi had withered to a kind of harmless greyish powder which blew ash-like along the floor. One of earth's nethermost terrors had perished forever; and if there be a hell, it had received at last the daemon soul of an unhallowed thing. And as I patted down the last spadeful of mould, I shed the first of the many tears with which I have paid unaffected tribute to my beloved uncle's memory.

The next spring no more pale grass and strange weeds came up in the shunned house's terraced garden, and shortly afterward Carington Harris rented the place. It is still spectral, but its strangeness fascinates me, and I shall find mixed with my relief a queer regret when it is torn down to make way for a tawdry shop or vulgar apartment building. The barren old trees in the yard have begun to bear small, sweet apples, and last year the birds nested in their gnarled boughs.

The Dreams in the Witch House

Whether the dreams brought on the fever or the fever brought on the dreams Walter Gilman did not know. Behind everything crouched the brooding, festering horror of the ancient town, and of the mouldy, unhallowed garret gable where he wrote and studied and wrestled with figures and formulae when he was not tossing on the meagre iron bed. His ears were growing sensitive to a preternatural and intolerable degree, and he had long ago stopped the cheap mantel clock whose ticking had come to seem like a thunder of artillery. At night the subtle stirring of the black city outside, the sinister scurrying of rats in the wormy partitions, and the creaking of hidden timbers in the centuried house, were enough to give him a sense of strident pandemonium. The darkness always teemed with unexplained sound—and yet he sometimes shook with fear lest the noises he heard should subside and allow him to hear certain other, fainter, noises which he suspected were lurking behind them.

He was in the changeless, legend-haunted city of Arkham, with its clustering gambrel roofs that sway and sag over attics where witches hid from the King's men in the dark, olden days of the Province. Nor was any spot in that city more steeped in macabre

memory than the gable room which harboured him—for it was this house and this room which had likewise harboured old Keziah Mason, whose flight from Salem Gaol at the last no one was ever able to explain. That was in 1692—the gaoler had gone mad and babbled of a small, white-fanged furry thing which scuttled out of Keziah's cell, and not even Cotton Mather could explain the curves and angles smeared on the grey stone walls with some red, sticky fluid.

Possibly Gilman ought not to have studied so hard. Non-Euclidean calculus and quantum physics are enough to stretch any brain; and when one mixes them with folklore, and tries to trace a strange background of multi-dimensional reality behind the ghoulish hints of the Gothic tales and the wild whispers of the chimney-corner, one can hardly expect to be wholly free from mental tension. Gilman came from Haverhill, but it was only after he had entered college in Arkham that he began to connect his mathematics with the fantastic legends of elder magic. Something in the air of the hoary town worked obscurely on his imagination. The professors at Miskatonic had urged him to slacken up, and had voluntarily cut down his course at several points. Moreover, they had stopped him from consulting the dubious old books on forbidden secrets that were kept under lock and key in a vault at the university library. But all these precautions came late in the day, so that Gilman had some terrible hints from the dreaded *Necronomicon* of Abdul Alhazred, the fragmentary *Book of Eibon*, and the suppressed *Unaussprechlichen Kulten* of von Junzt to correlate with his abstract formulae on the properties of space and the linkage of dimensions known and unknown.

He knew his room was in the old Witch House—that, indeed, was why he had taken it. There was much in the Essex County records about Keziah Mason's trial, and what she had admitted under pressure to the Court of Oyer and Terminer had fascinated Gilman beyond all reason. She had told Judge Hathorne of lines and curves that could be made to point out directions leading through the walls of space to other spaces beyond, and had implied that such lines and curves were frequently used at certain midnight meetings in the dark valley of the white stone beyond Meadow Hill and on the unpeopled island in the river. She had spoken also of the

Black Man, of her oath, and of her new secret name of Nahab. Then she had drawn those devices on the walls of her cell and vanished.

Gilman believed strange things about Keziah, and had felt a queer thrill on learning that her dwelling was still standing after more than 235 years. When he heard the hushed Arkham whispers about Keziah's persistent presence in the old house and the narrow streets, about the irregular human tooth-marks left on certain sleepers in that and other houses, about the childish cries heard near May-Eve, and Hallowmass, about the stench often noted in the old house's attic just after those dreaded seasons, and about the small, furry, sharp-toothed thing which haunted the mouldering structure and the town and nuzzled people curiously in the black hours before dawn, he resolved to live in the place at any cost. A room was easy to secure; for the house was unpopular, hard to rent, and long given over to cheap lodgings. Gilman could not have told what he expected to find there, but he knew he wanted to be in the building where some circumstance had more or less suddenly given a mediocre old woman of the seventeenth century an insight into mathematical depths perhaps beyond the utmost modern delvings of Planck, Heisenberg, Einstein, and de Sitter.

He studied the timber and plaster walls for traces of cryptic designs at every accessible spot where the paper had peeled, and within a week managed to get the eastern attic room where Keziah was held to have practiced her spells. It had been vacant from the first—for no one had ever been willing to stay there long—but the Polish landlord had grown wary about renting it. Yet nothing whatever happened to Gilman till about the time of the fever. No ghostly Keziah flitted through the sombre halls and chambers, no small furry thing crept into his dismal eyrie to nuzzle him, and no record of the witch's incantations rewarded his constant search. Sometimes he would take walks through shadowy tangles of unpaved musty-smelling lanes where eldritch brown houses of unknown age leaned and tottered and leered mockingly through narrow, small-paned windows. Here he knew strange things had happened once, and there was a faint suggestion behind the surface that everything of that monstrous past might not—at least in the darkest, narrowest, and most intricately crooked alleys—have ut-

terly perished. He also rowed out twice to the ill-regarded island in the river, and made a sketch of the singular angles described by the moss-grown rows of grey standing stones whose origin was so obscure and immemorial.

Gilman's room was of good size but queerly irregular shape; the north wall slanting perceptibly inward from the outer to the inner end, while the low ceiling slanted gently downward in the same direction. Aside from an obvious rat-hole and the signs of other stopped-up ones, there was no access—nor any appearance of a former avenue of access—to the space which must have existed between the slanting wall and the straight outer wall on the house's north side, though a view from the exterior shewed where a window had been boarded up at a very remote date. The loft above the ceiling—which must have had a slanting floor—was likewise inaccessible. When Gilman climbed up a ladder to the cobwebbed level loft above the rest of the attic he found vestiges of a bygone aperture tightly and heavily covered with ancient planking and secured by the stout wooden pegs common in colonial carpentry. No amount of persuasion, however, could induce the stolid landlord to let him investigate either of these two closed spaces.

As time wore along, his absorption in the irregular wall and ceiling of his room increased; for he began to read into the odd angles a mathematical significance which seemed to offer vague clues regarding their purpose. Old Keziah, he reflected, might have had excellent reasons for living in a room with peculiar angles; for was it not through certain angles that she claimed to have gone outside the boundaries of the world of space we know? His interest gradually veered away from the unplumbed voids beyond the slanting surfaces, since it now appeared that the purpose of those surfaces concerned the side he was already on.

The touch of brain-fever and the dreams began early in February. For some time, apparently, the curious angles of Gilman's room had been having a strange, almost hypnotic effect on him; and as the bleak winter advanced he had found himself staring more and more intently at the corner where the down-slanting ceiling met the inward-slanting wall. About this period his inability to concentrate on his formal studies worried him considerably, his apprehensions about the mid-year examinations being very acute. But the exag-

gerated sense of hearing was scarcely less annoying. Life had become an insistent and almost unendurable cacophony, and there was that constant, terrifying impression of *other* sounds—perhaps from regions beyond life—trembling on the very brink of audibility. So far as concrete noises went, the rats in the ancient partitions were the worst. Sometimes their scratching seemed not only furtive but deliberate. When it came from beyond the slanting north wall it was mixed with a sort of dry rattling—and when it came from the century-closed loft above the slanting ceiling Gilman always braced himself as if expecting some horror which only bided its time before descending to engulf him utterly.

The dreams were wholly beyond the pale of sanity, and Gilman felt that they must be a result, jointly, of his studies in mathematics and in folklore. He had been thinking too much about the vague regions which his formulae told him must lie beyond the three dimensions we know, and about the possibility that old Keziah Mason—guided by some influence past all conjecture—had actually found the gate to those regions. The yellowed county records containing her testimony and that of her accusers were so damnable suggestive of things beyond human experience—and the descriptions of the darting little furry object which served as her familiar were so painfully realistic despite their incredible details.

That object—no larger than a good-sized rat and quaintly called by the townspeople “Brown Jenkin”—seemed to have been the fruit of a remarkable case of sympathetic herd-delusion, for in 1692 no less than eleven persons had testified to glimpsing it. There were recent rumours, too, with a baffling and disconcerting amount of agreement. Witnesses said it had long hair and the shape of a rat, but that its sharp-toothed, bearded face was evilly human while its paws were like tiny human hands. It took messages betwixt old Keziah and the devil, and was nursed on the witch’s blood—which it sucked like a vampire. Its voice was a kind of loathsome titter, and it could speak all languages. Of all the bizarre monstrosities in Gilman’s dreams, nothing filled him with greater panic and nausea than this blasphemous and diminutive hybrid, whose image flitted across his vision in a form a thousandfold more hateful than anything his waking mind had deduced from the ancient records and the modern whispers.

Gilman's dreams consisted largely in plunges through limitless abysses of inexplicably coloured twilight and bafflingly disordered sound; abysses whose material and gravitational properties, and whose relation to his own entity, he could not even begin to explain. He did not walk or climb, fly or swim, crawl or wriggle; yet always experienced a mode of motion partly voluntary and partly involuntary. Of his own condition he could not well judge, for sight of his arms, legs, and torso seemed always cut off by some odd disarrangement of perspective; but he felt that his physical organisation and faculties were somehow marvellously transmuted and obliquely projected—though not without a certain grotesque relationship to his normal proportions and properties.

The abysses were by no means vacant, being crowded with indescribably angled masses of alien-hued substance, some of which appeared to be organic while others seemed inorganic. A few of the organic objects tended to awake vague memories in the back of his mind, though he could form no conscious idea of what they mockingly resembled or suggested. In the later dreams he began to distinguish separate categories into which the organic objects appeared to be divided, and which seemed to involve in each case a radically different species of conduct-pattern and basic motivation. Of these categories one seemed to him to include objects slightly less illogical and irrelevant in their motions than the members of the other categories.

All the objects—organic and inorganic alike—were totally beyond description or even comprehension. Gilman sometimes compared the inorganic masses to prisms, labyrinths, clusters of cubes and planes, and Cyclopean buildings; and the organic things struck him variously as groups of bubbles, octopi, centipedes, living Hindoo idols, and intricate Arabesques roused into a kind of ophidian animation. Everything he saw was unspeakably menacing and horrible; and whenever one of the organic entities appeared by its motions to be noticing him, he felt a stark, hideous fright which generally jolted him awake. Of how the organic entities moved, he could tell no more than of how he moved himself. In time he observed a further mystery—the tendency of certain entities to appear suddenly out of empty space, or to disappear totally with equal suddenness. The shrieking, roaring confusion of sound which

permeated the abysses was past all analysis as to pitch, timbre, or rhythm; but seemed to be synchronous with vague visual changes in all the indefinite objects, organic and inorganic alike. Gilman had a constant sense of dread that it might rise to some unbearable degree of intensity during one or another of its obscure, relentlessly inevitable fluctuations.

But it was not in these vortices of complete alienage that he saw Brown Jenkin. That shocking little horror was reserved for certain lighter, sharper dreams which assailed him just before he dropped into the fullest depths of sleep. He would be lying in the dark fighting to keep awake when a faint lambent glow would seem to shimmer around the centuried room, shewing in a violet mist the convergence of angled planes which had seized his brain so insidiously. The horror would appear to pop out of the rat-hole in the corner and patter toward him over the sagging, wide-planked floor with evil expectancy in its tiny, bearded human face—but mercifully, this dream always melted away before the object got close enough to nuzzle him. It had hellishly long, sharp, canine teeth. Gilman tried to stop up the rat-hole every day, but each night the real tenants of the partitions would gnaw away the obstruction, whatever it might be. Once he had the landlord nail tin over it, but the next night the rats gnawed a fresh hole—in making which they pushed or dragged out into the room a curious little fragment of bone.

Gilman did not report his fever to the doctor, for he knew he could not pass the examinations if ordered to the college infirmary when every moment was needed for cramming. As it was, he failed in Calculus D and Advanced General Psychology, though not without hope of making up lost ground before the end of the term. It was in March when the fresh element entered his lighter preliminary dreaming, and the nightmare shape of Brown Jenkin began to be companioned by the nebulous blur which grew more and more to resemble a bent old woman. This addition disturbed him more than he could account for, but finally he decided that it was like an ancient crone whom he had twice actually encountered in the dark tangle of lanes near the abandoned wharves. On those occasions the evil, sardonic, and seemingly unmotivated stare of the beldame had set him almost shivering—especially the first time, when an

overgrown rat darting across the shadowed mouth of a neighbouring alley had made him think irrationally of Brown Jenkin. Now, he reflected, those nervous fears were being mirrored in his disordered dreams.

That the influence of the old house was unwholesome, he could not deny; but traces of his early morbid interest still held him there. He argued that the fever alone was responsible for his nightly phantasies, and that when the touch abated he would be free from the monstrous visions. Those visions, however, were of abhorrent vividness and convincingness, and whenever he awaked he retained a vague sense of having undergone much more than he remembered. He was hideously sure that in unrecalled dreams he had talked with both Brown Jenkin and the old woman, and that they had been urging him to go somewhere with them and to meet a third being of greater potency.

Toward the end of March he began to pick up in his mathematics, though other studies bothered him increasingly. He was getting an intuitive knack for solving Riemannian equations, and astonished Professor Upham by his comprehension of fourth-dimensional and other problems which had floored all the rest of the class. One afternoon there was a discussion of possible freakish curvatures in space, and of theoretical points of approach or even contact between our part of the cosmos and various other regions as distant as the farthest stars or the trans-galactic gulfs themselves—or even as fabulously remote as the tentatively conceivable cosmic units beyond the whole Einsteinian space-time continuum. Gilman's handling of this theme filled everyone with admiration, even though some of his hypothetical illustrations caused an increase in the always plentiful gossip about his nervous and solitary eccentricity. What made the students shake their heads was his sober theory that a man might—given mathematical knowledge admittedly beyond all likelihood of human acquirement—step deliberately from the earth to any other celestial body which might lie at one of an infinity of specific points in the cosmic pattern.

Such a step, he said, would require only two stages; first, a passage out of the three-dimensional sphere we know, and second, a passage back to the three-dimensional sphere at another point, perhaps one of infinite remoteness. That this could be accomplished

without loss of life was in many cases conceivable. Any being from any part of three-dimensional space could probably survive in the fourth dimension; and its survival of the second stage would depend upon what alien part of three-dimensional space it might select for its re-entry. Denizens of some planets might be able to live on certain others—even planets belonging to other galaxies, or to similar-dimensional phases of other space-time continua—though of course there must be vast numbers of mutually uninhabitable even though mathematically juxtaposed bodies or zones of space.

It was also possible that the inhabitants of a given dimensional realm could survive entry to many unknown and incomprehensible realms of additional or indefinitely multiplied dimensions—be they within or outside the given space-time continuum—and that the converse would be likewise true. This was a matter for speculation, though one could be fairly certain that the type of mutation involved in a passage from any given dimensional plane to the next higher plane would not be destructive of biological integrity as we understand it. Gilman could not be very clear about his reasons for this last assumption, but his haziness here was more than overbalanced by his clearness on other complex points. Professor Upham especially liked his demonstration of the kinship of higher mathematics to certain phases of magical lore transmitted down the ages from an ineffable antiquity—human or pre-human—whose knowledge of the cosmos and its laws was greater than ours.

Around the first of April Gilman worried considerably because his slow fever did not abate. He was also troubled by what some of his fellow-lodgers said about his sleep-walking. It seemed that he was often absent from his bed, and that the creaking of his floor at certain hours of the night was remarked by the man in the room below. This fellow also spoke of hearing the tread of shod feet in the night; but Gilman was sure he must have been mistaken in this, since shoes as well as other apparel were always precisely in place in the morning. One could develop all sorts of aural delusions in this morbid old house—for did not Gilman himself, even in daylight, now feel certain that noises other than rat-scratchings came from the black voids beyond the slanting wall and above the slanting ceiling? His pathologically sensitive ears began to listen for faint foot-

falls in the immemorially sealed loft overhead, and sometimes the illusion of such things was agonisingly realistic.

However, he knew that he had actually become a somnambulist; for twice at night his room had been found vacant, though with all his clothing in place. Of this he had been assured by Frank Elwood, the one fellow-student whose poverty forced him to room in this squalid and unpopular house. Elwood had been studying in the small hours and had come up for help on a differential equation, only to find Gilman absent. It had been rather presumptuous of him to open the unlocked door after knocking had failed to rouse a response, but he had needed the help very badly and thought that his host would not mind a gentle prodding awake. On neither occasion, though, had Gilman been there—and when told of the matter he wondered where he could have been wandering, barefoot and with only his night-clothes on. He resolved to investigate the matter if reports of his sleep-walking continued, and thought of sprinkling flour on the floor of the corridor to see where his footsteps might lead. The door was the only conceivable egress, for there was no possible foothold outside the narrow window.

As April advanced Gilman's fever-sharpened ears were disturbed by the whining prayers of a superstitious loomfixer named Joe Mazurewicz, who had a room on the ground floor. Mazurewicz had told long, rambling stories about the ghost of old Keziah and the furry, sharp-fanged, nuzzling thing, and had said he was so badly haunted at times that only his silver crucifix—given him for the purpose by Father Iwanicki of St. Stanislaus' Church—could bring him relief. Now he was praying because the Witches' Sabbath was drawing near. May-Eve was Walpurgis-Night, when hell's blackest evil roamed the earth and all the slaves of Satan gathered for nameless rites and deeds. It was always a very bad time in Arkham, even though the fine folks up in Miskatonic Avenue and High and Saltonstall Streets pretended to know nothing about it. There would be bad doings—and a child or two would probably be missing. Joe knew about such things, for his grandmother in the old country had heard tales from her grandmother. It was wise to pray and count one's beads at this season. For three months Keziah and Brown Jenkin had not been near Joe's room, nor near Paul Choyne-

ski's room, nor anywhere else—and it meant no good when they held off like that. They must be up to something.

Gilman dropped in at a doctor's office on the 16th of the month, and was surprised to find his temperature was not as high as he had feared. The physician questioned him sharply, and advised him to see a nerve specialist. On reflection, he was glad he had not consulted the still more inquisitive college doctor. Old Waldron, who had curtailed his activities before, would have made him take a rest—an impossible thing now that he was so close to great results in his equations. He was certainly near the boundary between the known universe and the fourth dimension, and who could say how much farther he might go?

But even as these thoughts came to him he wondered at the source of his strange confidence. Did all of this perilous sense of imminence come from the formulae on the sheets he covered day by day? The soft, stealthy, imaginary footsteps in the sealed loft above were unnerving. And now, too, there was a growing feeling that somebody was constantly persuading him to do something terrible which he could not do. How about the somnambulism? Where did he go sometimes in the night? And what was that faint suggestion of sound which once in a while seemed to trickle through the maddening confusion of identifiable sounds even in broad daylight and full wakefulness? Its rhythm did not correspond to anything on earth, unless perhaps to the cadence of one or two unmentionable Sabbath-chants, and sometimes he feared it corresponded to certain attributes of the vague shrieking or roaring in those wholly alien abysses of dream.

The dreams were meanwhile getting to be atrocious. In the lighter preliminary phase the evil old woman was now of fiendish distinctness, and Gilman knew she was the one who had frightened him in the slums. Her bent back, long nose, and shrivelled chin were unmistakable, and her shapeless brown garments were like those he remembered. The expression on her face was one of hideous malevolence and exultation, and when he awaked he could recall a croaking voice that persuaded and threatened. He must meet the Black Man, and go with them all to the throne of Azathoth at the centre of ultimate Chaos. That was what she said. He must sign in his own blood the book of Azathoth and take a new secret name

now that his independent delvings had gone so far. What kept him from going with her and Brown Jenkin and the other to the throne of Chaos where the thin flutes pipe mindlessly was the fact that he had seen the name "Azathoth" in the *Necronomicon*, and knew it stood for a primal evil too horrible for description.

The old woman always appeared out of thin air near the corner where the downward slant met the inward slant. She seemed to crystallise at a point closer to the ceiling than to the floor, and every night she was a little nearer and more distinct before the dream shifted. Brown Jenkin, too, was always a little nearer at the last, and its yellowish-white fangs glistened shockingly in that unearthly violet phosphorescence. Its shrill loathsome tittering stuck more and more in Gilman's head, and he could remember in the morning how it had pronounced the words "Azathoth" and "Nyarlathotep".

In the deeper dreams everything was likewise more distinct, and Gilman felt that the twilight abysses around him were those of the fourth dimension. Those organic entities whose motions seemed least flagrantly irrelevant and unmotivated were probably projections of life-forms from our own planet, including human beings. What the others were in their own dimensional sphere or spheres he dared not try to think. Two of the less irrelevantly moving things—a rather large congeries of iridescent, prolately spheroidal bubbles and a very much smaller polyhedron of unknown colours and rapidly shifting surface angles—seemed to take notice of him and follow him about or float ahead as he changed position among the titan prisms, labyrinths, cube-and-plane clusters, and quasi-buildings; and all the while the vague shrieking and roaring waxed louder and louder, as if approaching some monstrous climax of utterly unendurable intensity.

During the night of April 19–20 the new development occurred. Gilman was half-involuntarily moving about in the twilight abysses with the bubble-mass and the small polyhedron floating ahead, when he noticed the peculiarly regular angles formed by the edges of some gigantic neighbouring prism-clusters. In another second he was out of the abyss and standing tremulously on a rocky hillside bathed in intense, diffused green light. He was barefooted and in his night-clothes, and when he tried to walk discovered that he could scarcely lift his feet. A swirling vapour hid everything but the

immediate sloping terrain from sight, and he shrank from the thought of the sounds that might surge out of that vapour.

Then he saw the two shapes laboriously crawling toward him—the old woman and the little furry thing. The crone strained up to her knees and managed to cross her arms in a singular fashion, while Brown Jenkin pointed in a certain direction with a horribly anthropoid fore paw which it raised with evident difficulty. Spurred by an impulse he did not originate, Gilman dragged himself forward along a course determined by the angle of the old woman's arms and the direction of the small monstrosity's paw, and before he had shuffled three steps he was back in the twilight abysses. Geometrical shapes seethed around him, and he fell dizzily and interminably. At last he woke in his bed in the crazily angled garret of the eldritch old house.

He was good for nothing that morning, and stayed away from all his classes. Some unknown attraction was pulling his eyes in a seemingly irrelevant direction, for he could not help staring at a certain vacant spot on the floor. As the day advanced the focus of his unseeing eyes changed position, and by noon he had conquered the impulse to stare at vacancy. About two o'clock he went out for lunch, and as he threaded the narrow lanes of the city he found himself turning always to the southeast. Only an effort halted him at a cafeteria in Church Street, and after the meal he felt the unknown pull still more strongly.

He would have to consult a nerve specialist after all—perhaps there was a connexion with his somnambulism—but meanwhile he might at least try to break the morbid spell himself. Undoubtedly he could still manage to walk away from the pull; so with great resolution he headed against it and dragged himself deliberately north along Garrison Street. By the time he had reached the bridge over the Miskatonic he was in a cold perspiration, and he clutched at the iron railing as he gazed upstream at the ill-regarded island whose regular lines of ancient standing stones brooded sullenly in the afternoon sunlight.

Then he gave a start. For there was a clearly visible living figure on that desolate island, and a second glance told him it was certainly the strange old woman whose sinister aspect had worked itself so disastrously into his dreams. The tall grass near her was

moving, too, as if some other living thing were crawling close to the ground. When the old woman began to turn toward him he fled precipitately off the bridge and into the shelter of the town's labyrinthine waterfront alleys. Distant though the island was, he felt that a monstrous and invincible evil could flow from the sardonic stare of that bent, ancient figure in brown.

The southeastward pull still held, and only with tremendous resolution could Gilman drag himself into the old house and up the rickety stairs. For hours he sat silent and aimless, with his eyes shifting gradually westward. About six o'clock his sharpened ears caught the whining prayers of Joe Mazurewicz two floors below, and in desperation he seized his hat and walked out into the sunset-golden streets, letting the now directly southward pull carry him where it might. An hour later darkness found him in the open fields beyond Hangman's Brook, with the glimmering spring stars shining ahead. The urge to walk was gradually changing to an urge to leap mystically into space, and suddenly he realised just where the source of the pull lay.

It was in the sky. A definite point among the stars had a claim on him and was calling him. Apparently it was a point somewhere between Hydra and Argo Navis, and he knew that he had been urged toward it ever since he had awaked soon after dawn. In the morning it had been underfoot; afternoon found it rising in the southeast, and now it was roughly south but wheeling toward the west. What was the meaning of this new thing? Was he going mad? How long would it last? Again mustering his resolution, Gilman turned and dragged himself back to the sinister old house.

Mazurewicz was waiting for him at the door, and seemed both anxious and reluctant to whisper some fresh bit of superstition. It was about the witch light. Joe had been out celebrating the night before—it was Patriots' Day in Massachusetts—and had come home after midnight. Looking up at the house from outside, he had thought at first that Gilman's window was dark; but then he had seen the faint violet glow within. He wanted to warn the gentleman about that glow, for everybody in Arkham knew it was Keziah's witch light which played near Brown Jenkin and the ghost of the old crone herself. He had not mentioned this before, but now he must tell about it because it meant that Keziah and her long-

toothed familiar were haunting the young gentleman. Sometimes he and Paul Choynski and Landlord Dombrowski thought they saw that light seeping out of cracks in the sealed loft above the young gentleman's room, but they had all agreed not to talk about that. However, it would be better for the gentleman to take another room and get a crucifix from some good priest like Father Iwanicki.

As the man rambled on Gilman felt a nameless panic clutch at his throat. He knew that Joe must have been half drunk when he came home the night before, yet this mention of a violet light in the garret window was of frightful import. It was a lambent glow of this sort which always played about the old woman and the small furry thing in those lighter, sharper dreams which prefaced his plunge into unknown abysses, and the thought that a wakeful second person could see the dream-luminance was utterly beyond sane harbourage. Yet where had the fellow got such an odd notion? Had he himself talked as well as walked around the house in his sleep? No, Joe said, he had not—but he must check up on this. Perhaps Frank Elwood could tell him something, though he hated to ask.

Fever—wild dreams—somnambulism—illusions of sounds—a pull toward a point in the sky—and now a suspicion of insane sleep-talking! He must stop studying, see a nerve specialist, and take himself in hand. When he climbed to the second story he paused at Elwood's door but saw that the other youth was out. Reluctantly he continued up to his garret room and sat down in the dark. His gaze was still pulled to the southwest, but he also found himself listening intently for some sound in the closed loft above, and half imagining that an evil violet light seeped down through an infinitesimal crack in the low, slanting ceiling.

That night as Gilman slept the violet light broke upon him with heightened intensity, and the old witch and small furry thing—getting closer than ever before—mocked him with inhuman squeals and devilish gestures. He was glad to sink into the vaguely roaring twilight abysses, though the pursuit of that iridescent bubble-congeries and that kaleidoscopic little polyhedron was menacing and irritating. Then came the shift as vast converging planes of a slippery-looking substance loomed above and below him—a shift which ended in a flash of delirium and a blaze of unknown, alien

light in which yellow, carmine, and indigo were madly and intricably blended.

He was half lying on a high, fantastically balustraded terrace above a boundless jungle of outlandish, incredible peaks, balanced planes, domes, minarets, horizontal discs poised on pinnacles, and numberless forms of still greater wildness—some of stone and some of metal—which glittered gorgeously in the mixed, almost blistering glare from a polychromatic sky. Looking upward he saw three stupendous discs of flame, each of a different hue, and at a different height above an infinitely distant curving horizon of low mountains. Behind him tiers of higher terraces towered aloft as far as he could see. The city below stretched away to the limits of vision, and he hoped that no sound would well up from it.

The pavement from which he easily raised himself was of a veined, polished stone beyond his power to identify, and the tiles were cut in bizarre-angled shapes which struck him as less asymmetrical than based on some unearthly symmetry whose laws he could not comprehend. The balustrade was chest-high, delicate, and fantastically wrought, while along the rail were ranged at short intervals little figures of grotesque design and exquisite workmanship. They, like the whole balustrade, seemed to be made of some sort of shining metal whose colour could not be guessed in this chaos of mixed effulgences; and their nature utterly defied conjecture. They represented some ridged, barrel-shaped object with thin horizontal arms radiating spoke-like from a central ring, and with vertical knobs or bulbs projecting from the head and base of the barrel. Each of these knobs was the hub of a system of five long, flat, triangularly tapering arms arranged around it like the arms of a starfish—nearly horizontal, but curving slightly away from the central barrel. The base of the bottom knob was fused to the long railing with so delicate a point of contact that several figures had been broken off and were missing. The figures were about four and a half inches in height, while the spiky arms gave them a maximum diameter of about two and a half inches.

When Gilman stood up the tiles felt hot to his bare feet. He was wholly alone, and his first act was to walk to the balustrade and look dizzily down at the endless, Cyclopean city almost two thou-

sand feet below. As he listened he thought a rhythmic confusion of faint musical pipings covering a wide tonal range welled up from the narrow streets beneath, and he wished he might discern the denizens of the place. The sight turned him giddy after a while, so that he would have fallen to the pavement had he not clutched instinctively at the lustrous balustrade. His right hand fell on one of the projecting figures, the touch seeming to steady him slightly. It was too much, however, for the exotic delicacy of the metal-work, and the spiky figure snapped off under his grasp. Still half-dazed, he continued to clutch it as his other hand seized a vacant space on the smooth railing.

But now his oversensitive ears caught something behind him, and he looked back across the level terrace. Approaching him softly though without apparent furtiveness were five figures, two of which were the sinister old woman and the fanged, furry little animal. The other three were what sent him unconscious—for they were living entities about eight feet high, shaped precisely like the spiky images on the balustrade, and propelling themselves by a spider-like wriggling of their lower set of starfish-arms.

Gilman awaked in his bed, drenched by a cold perspiration and with a smarting sensation in his face, hands, and feet. Springing to the floor, he washed and dressed in frantic haste, as if it were necessary for him to get out of the house as quickly as possible. He did not know where he wished to go, but felt that once more he would have to sacrifice his classes. The odd pull toward that spot in the sky between Hydra and Argo had abated, but another of even greater strength had taken its place. Now he felt that he must go north—infinately north. He dreaded to cross the bridge that gave a view of the desolate island in the Miskatonic, so went over the Peabody Avenue bridge. Very often he stumbled, for his eyes and ears were chained to an extremely lofty point in the blank blue sky.

After about an hour he got himself under better control, and saw that he was far from the city. All around him stretched the bleak emptiness of salt marshes, while the narrow road ahead led to Innsmouth—that ancient, half-deserted town which Arkham people were so curiously unwilling to visit. Though the northward pull had not diminished, he resisted it as he had resisted the other pull, and finally found that he could almost balance the one against the

other. Plodding back to town and getting some coffee at a soda fountain, he dragged himself into the public library and browsed aimlessly among the lighter magazines. Once he met some friends who remarked how oddly sunburned he looked, but he did not tell them of his walk. At three o'clock he took some lunch at a restaurant, noting meanwhile that the pull had either lessened or divided itself. After that he killed the time at a cheap cinema show, seeing the inane performance over and over again without paying any attention to it.

About nine at night he drifted homeward and stumbled into the ancient house. Joe Mazurewicz was whining unintelligible prayers, and Gilman hastened up to his own garret chamber without pausing to see if Elwood was in. It was when he turned on the feeble electric light that the shock came. At once he saw there was something on the table which did not belong there, and a second look left no room for doubt. Lying on its side—for it could not stand up alone—was the exotic spiky figure which in his monstrous dream he had broken off the fantastic balustrade. No detail was missing. The ridged, barrel-shaped centre, the thin, radiating arms, the knobs at each end, and the flat, slightly outward-curving starfish-arms spreading from those knobs—all were there. In the electric light the colour seemed to be a kind of iridescent grey veined with green, and Gilman could see amidst his horror and bewilderment that one of the knobs ended in a jagged break corresponding to its former point of attachment to the dream-railing.

Only his tendency toward a dazed stupor prevented him from screaming aloud. This fusion of dream and reality was too much to bear. Still dazed, he clutched at the spiky thing and staggered downstairs to Landlord Dombrowski's quarters. The whining prayers of the superstitious loomfixer were still sounding through the mouldy halls, but Gilman did not mind them now. The landlord was in, and greeted him pleasantly. No, he had not seen that thing before and did not know anything about it. But his wife had said she found a funny tin thing in one of the beds when she fixed the rooms at noon, and maybe that was it. Dombrowski called her, and she waddled in. Yes, that was the thing. She had found it in the young gentleman's bed—on the side next the wall. It had looked very queer to her, but of course the young gentleman had lots of

queer things in his room—books and curios and pictures and markings on paper. She certainly knew nothing about it.

So Gilman climbed upstairs again in a mental turmoil, convinced that he was either still dreaming or that his somnambulism had run to incredible extremes and led him to depredations in unknown places. Where had he got this outré thing? He did not recall seeing it in any museum in Arkham. It must have been somewhere, though; and the sight of it as he snatched it in his sleep must have caused the odd dream-picture of the balustraded terrace. Next day he would make some very guarded inquiries—and perhaps see the nerve specialist.

Meanwhile he would try to keep track of his somnambulism. As he went upstairs and across the garret hall he sprinkled about some flour which he had borrowed—with a frank admission as to its purpose—from the landlord. He had stopped at Elwood's door on the way, but had found all dark within. Entering his room, he placed the spiky thing on the table, and lay down in complete mental and physical exhaustion without pausing to undress. From the closed loft above the slanting ceiling he thought he heard a faint scratching and padding, but he was too disorganised even to mind it. That cryptical pull from the north was getting very strong again, though it seemed now to come from a lower place in the sky.

In the dazzling violet light of dream the old woman and the fanged, furry thing came again and with a greater distinctness than on any former occasion. This time they actually reached him, and he felt the crone's withered claws clutching at him. He was pulled out of bed and into empty space, and for a moment he heard a rhythmic roaring and saw the twilight amorphousness of the vague abysses seething around him. But that moment was very brief, for presently he was in a crude, windowless little space with rough beams and planks rising to a peak just above his head, and with a curious slanting floor underfoot. Propped level on that floor were low cases full of books of every degree of antiquity and disintegration, and in the centre were a table and bench, both apparently fastened in place. Small objects of unknown shape and nature were ranged on the tops of the cases, and in the flaming violet light Gilman thought he saw a counterpart of the spiky image which had puzzled him so horribly. On the left the floor fell abruptly away,

leaving a black triangular gulf out of which, after a second's dry rattling, there presently climbed the hateful little furry thing with the yellow fangs and bearded human face.

The evilly grinning beldame still clutched him, and beyond the table stood a figure he had never seen before—a tall, lean man of dead black colouration but without the slightest sign of negroid features; wholly devoid of either hair or beard, and wearing as his only garment a shapeless robe of some heavy black fabric. His feet were indistinguishable because of the table and bench, but he must have been shod, since there was a clicking whenever he changed position. The man did not speak, and bore no trace of expression on his small, regular features. He merely pointed to a book of prodigious size which lay open on the table, while the beldame thrust a huge grey quill into Gilman's right hand. Over everything was a pall of intensely maddening fear, and the climax was reached when the furry thing ran up the dreamer's clothing to his shoulders and then down his left arm, finally biting him sharply in the wrist just below his cuff. As the blood spurted from this wound Gilman lapsed into a faint.

He awaked on the morning of the 22nd with a pain in his left wrist, and saw that his cuff was brown with dried blood. His recollections were very confused, but the scene with the black man in the unknown space stood out vividly. The rats must have bitten him as he slept, giving rise to the climax of that frightful dream. Opening the door, he saw that the flour on the corridor floor was undisturbed except for the huge prints of the loutish fellow who roomed at the other end of the garret. So he had not been sleep-walking this time. But something would have to be done about those rats. He would speak to the landlord about them. Again he tried to stop up the hole at the base of the slanting wall, wedging in a candlestick which seemed of about the right size. His ears were ringing horribly, as if with the residual echoes of some horrible noise heard in dreams.

As he bathed and changed clothes he tried to recall what he had dreamed after the scene in the violet-litten space, but nothing definite would crystallise in his mind. That scene itself must have corresponded to the sealed loft overhead, which had begun to attack his imagination so violently, but later impressions were faint

and hazy. There were suggestions of the vague, twilight abysses, and of still vaster, blacker abysses beyond them—abysses in which all fixed suggestions of form were absent. He had been taken there by the bubble-congeries and the little polyhedron which always dogged him; but they, like himself, had changed to wisps of milky, barely luminous mist in this farther void of ultimate blackness. Something else had gone on ahead—a larger wisp which now and then condensed into nameless approximations of form—and he thought that their progress had not been in a straight line, but rather along the alien curves and spirals of some ethereal vortex which obeyed laws unknown to the physics and mathematics of any conceivable cosmos. Eventually there had been a hint of vast, leaping shadows, of a monstrous, half-acoustic pulsing, and of the thin, monotonous piping of an unseen flute—but that was all. Gilman decided he had picked up that last conception from what he had read in the *Necronomicon* about the mindless entity Azathoth, which rules all time and space from a curiously environed black throne at the centre of Chaos.

When the blood was washed away the wrist wound proved very slight, and Gilman puzzled over the location of the two tiny punctures. It occurred to him that there was no blood on the bedspread where he had lain—which was very curious in view of the amount on his skin and cuff. Had he been sleep-walking within his room, and had the rat bitten him as he sat in some chair or paused in some less rational position? He looked in every corner for brownish drops or stains, but did not find any. He had better, he thought, sprinkle flour within the room as well as outside the door—though after all no further proof of his sleep-walking was needed. He knew he did walk—and the thing to do now was to stop it. He must ask Frank Elwood for help. This morning the strange pulls from space seemed lessened, though they were replaced by another sensation even more inexplicable. It was a vague, insistent impulse to fly away from his present situation, but held not a hint of the specific direction in which he wished to fly. As he picked up the strange spiky image on the table he thought the older northward pull grew a trifle stronger; but even so, it was wholly overruled by the newer and more bewildering urge.

He took the spiky image down to Elwood's room, steeling him-

self against the whines of the loomfixer which welled up from the ground floor. Elwood was in, thank heaven, and appeared to be stirring about. There was time for a little conversation before leaving for breakfast and college, so Gilman hurriedly poured forth an account of his recent dreams and fears. His host was very sympathetic, and agreed that something ought to be done. He was shocked by his guest's drawn, haggard aspect, and noticed the queer, abnormal-looking sunburn which others had remarked during the past week. There was not much, though, that he could say. He had not seen Gilman on any sleep-walking expedition, and had no idea what the curious image could be. He had, though, heard the French-Canadian who lodged just under Gilman talking to Mazurewicz one evening. They were telling each other how badly they dreaded the coming of Walpurgis-Night, now only a few days off; and were exchanging pitying comments about the poor, doomed young gentleman. Desrochers, the fellow under Gilman's room, had spoken of nocturnal footsteps both shod and unshod, and of the violet light he saw one night when he had stolen fearfully up to peer through Gilman's keyhole. He had not dared to peer, he told Mazurewicz, after he had glimpsed that light through the cracks around the door. There had been soft talking, too—and as he began to describe it his voice had sunk to an inaudible whisper.

Elwood could not imagine what had set these superstitious creatures gossiping, but supposed their imaginations had been roused by Gilman's late hours and somnolent walking and talking on the one hand, and by the nearness of traditionally feared May-Eve on the other hand. That Gilman talked in his sleep was plain, and it was obviously from Desrochers' keyhole-listenings that the delusive notion of the violet dream-light had got abroad. These simple people were quick to imagine they had seen any odd thing they had heard about. As for a plan of action—Gilman had better move down to Elwood's room and avoid sleeping alone. Elwood would, if awake, rouse him whenever he began to talk or rise in his sleep. Very soon, too, he must see the specialist. Meanwhile they would take the spiky image around to the various museums and to certain professors; seeking identification and stating that it had been found in a public rubbish-can. Also, Dombrowski must attend to the poisoning of those rats in the walls.

Braced up by Elwood's companionship, Gilman attended classes that day. Strange urges still tugged at him, but he could sidetrack them with considerable success. During a free period he shewed the queer image to several professors, all of whom were intensely interested, though none of them could shed any light upon its nature or origin. That night he slept on a couch which Elwood had had the landlord bring to the second-story room, and for the first time in weeks was wholly free from disquieting dreams. But the feverishness still hung on, and the whines of the loomfixer were an unnerving influence.

During the next few days Gilman enjoyed an almost perfect immunity from morbid manifestations. He had, Elwood said, shewed no tendency to talk or rise in his sleep; and meanwhile the landlord was putting rat-poison everywhere. The only disturbing element was the talk among the superstitious foreigners, whose imaginations had become highly excited. Mazurewicz was always trying to make him get a crucifix, and finally forced one upon him which he said had been blessed by the good Father Iwanicki. Desrochers, too, had something to say—in fact, he insisted that cautious steps had sounded in the now vacant room above him on the first and second nights of Gilman's absence from it. Paul Choynski thought he heard sounds in the halls and on the stairs at night, and claimed that his door had been softly tried, while Mrs. Dombrowski vowed she had seen Brown Jenkin for the first time since All-Hallows. But such naive reports could mean very little, and Gilman let the cheap metal crucifix hang idly from a knob on his host's dresser.

For three days Gilman and Elwood canvassed the local museums in an effort to identify the strange spiky image, but always without success. In every quarter, however, interest was intense; for the utter alienage of the thing was a tremendous challenge to scientific curiosity. One of the small radiating arms was broken off and subjected to chemical analysis, and the result is still talked about in college circles. Professor Ellery found platinum, iron, and tellurium in the strange alloy; but mixed with these were at least three other apparent elements of high atomic weight which chemistry was absolutely powerless to classify. Not only did they fail to correspond with any known element, but they did not even fit the vacant places reserved for probable elements in the periodic system. The mystery

remains unsolved to this day, though the image is on exhibition at the museum of Miskatonic University.

On the morning of April 27 a fresh rat-hole appeared in the room where Gilman was a guest, but Dombrowski tinned it up during the day. The poison was not having much effect, for scratchings and scurrings in the walls were virtually undiminished. Elwood was out late that night, and Gilman waited up for him. He did not wish to go to sleep in a room alone—especially since he thought he had glimpsed in the evening twilight the repellent old woman whose image had become so horribly transferred to his dreams. He wondered who she was, and what had been near her rattling the tin can in a rubbish-heap at the mouth of a squalid courtyard. The crone had seemed to notice him and leer evilly at him—though perhaps this was merely his imagination.

The next day both youths felt very tired, and knew they would sleep like logs when night came. In the evening they drowsily discussed the mathematical studies which had so completely and perhaps harmfully engrossed Gilman, and speculated about the linkage with ancient magic and folklore which seemed so darkly probable. They spoke of old Keziah Mason, and Elwood agreed that Gilman had good scientific grounds for thinking she might have stumbled on strange and significant information. The hidden cults to which these witches belonged often guarded and handed down surprising secrets from elder, forgotten aeons; and it was by no means impossible that Keziah had actually mastered the art of passing through dimensional gates. Tradition emphasises the uselessness of material barriers in halting a witch's motions; and who can say what underlies the old tales of broomstick rides through the night?

Whether a modern student could ever gain similar powers from mathematical research alone, was still to be seen. Success, Gilman added, might lead to dangerous and unthinkable situations; for who could foretell the conditions pervading an adjacent but normally inaccessible dimension? On the other hand, the picturesque possibilities were enormous. Time could not exist in certain belts of space, and by entering and remaining in such a belt one might preserve one's life and age indefinitely; never suffering organic metabolism or deterioration except for slight amounts incurred

during visits to one's own or similar planes. One might, for example, pass into a timeless dimension and emerge at some remote period of the earth's history as young as before.

Whether anybody had ever managed to do this, one could hardly conjecture with any degree of authority. Old legends are hazy and ambiguous, and in historic times all attempts at crossing forbidden gaps seem complicated by strange and terrible alliances with beings and messengers from outside. There was the immemorial figure of the deputy or messenger of hidden and terrible powers—the "Black Man" of the witch-cult, and the "Nyarlathotep" of the *Necronomicon*. There was, too, the baffling problem of the lesser messengers or intermediaries—the quasi-animals and queer hybrids which legend depicts as witches' familiars. As Gilman and Elwood retired, too sleepy to argue further, they heard Joe Mazurewicz reel into the house half-drunk, and shuddered at the desperate wildness of his whining prayers.

That night Gilman saw the violet light again. In his dream he had heard a scratching and gnawing in the partitions, and thought that someone fumbled clumsily at the latch. Then he saw the old woman and the small furry thing advancing toward him over the carpeted floor. The beldame's face was alight with inhuman exultation, and the little yellow-toothed morbidity tittered mockingly as it pointed at the heavily sleeping form of Elwood on the other couch across the room. A paralysis of fear stifled all attempts to cry out. As once before, the hideous crone seized Gilman by the shoulders, yanking him out of bed and into empty space. Again the infinitude of the shrieking twilight abysses flashed past him, but in another second he thought he was in a dark, muddy, unknown alley of foetid odours, with the rotting walls of ancient houses towering up on every hand.

Ahead was the robed black man he had seen in the peaked space in the other dream, while from a lesser distance the old woman was beckoning and grimacing imperiously. Brown Jenkin was rubbing itself with a kind of affectionate playfulness around the ankles of the black man, which the deep mud largely concealed. There was a dark open doorway on the right, to which the black man silently pointed. Into this the grimacing crone started, dragging Gilman after her by his pajama sleeve. There were evil-smelling staircases

which creaked ominously, and on which the old woman seemed to radiate a faint violet light; and finally a door leading off a landing. The crone fumbled with the latch and pushed the door open, motioning to Gilman to wait and disappearing inside the black aperture.

The youth's oversensitive ears caught a hideous strangled cry, and presently the beldame came out of the room bearing a small, senseless form which she thrust at the dreamer as if ordering him to carry it. The sight of this form, and the expression on its face, broke the spell. Still too dazed to cry out, he plunged recklessly down the noisome staircase and into the mud outside; halting only when seized and choked by the waiting black man. As consciousness departed he heard the faint, shrill tittering of the fanged, rat-like abnormality.

On the morning of the 29th Gilman awaked into a maelstrom of horror. The instant he opened his eyes he knew something was terribly wrong, for he was back in his old garret room with the slanting wall and ceiling, sprawled on the now unmade bed. His throat was aching inexplicably, and as he struggled to a sitting posture he saw with growing fright that his feet and pajama-bottoms were brown with caked mud. For the moment his recollections were hopelessly hazy, but he knew at least that he must have been sleep-walking. Elwood had been lost too deeply in slumber to hear and stop him. On the floor were confused muddy prints, but oddly enough they did not extend all the way to the door. The more Gilman looked at them, the more peculiar they seemed; for in addition to those he could recognise as his there were some smaller, almost round markings—such as the legs of a large chair or table might make, except that most of them tended to be divided into halves. There were also some curious muddy rat-tracks leading out of a fresh hole and back into it again. Utter bewilderment and the fear of madness racked Gilman as he staggered to the door and saw that there were no muddy prints outside. The more he remembered of his hideous dream the more terrified he felt, and it added to his desperation to hear Joe Mazurewicz chanting mournfully two floors below.

Descending to Elwood's room he roused his still-sleeping host and began telling of how he had found himself, but Elwood could

form no idea of what might really have happened. Where Gilman could have been, how he got back to his room without making tracks in the hall, and how the muddy, furniture-like prints came to be mixed with his in the garret chamber, were wholly beyond conjecture. Then there were those dark, livid marks on his throat, as if he had tried to strangle himself. He put his hands up to them, but found that they did not even approximately fit. While they were talking Desrochers dropped in to say that he had heard a terrific clattering overhead in the dark small hours. No, there had been no one on the stairs after midnight—though just before midnight he had heard faint footfalls in the garret, and cautiously descending steps he did not like. It was, he added, a very bad time of year for Arkham. The young gentleman had better be sure to wear the crucifix Joe Mazurewicz had given him. Even the daytime was not safe, for after dawn there had been strange sounds in the house—especially a thin, childish wail hastily choked off.

Gilman mechanically attended classes that morning, but was wholly unable to fix his mind on his studies. A mood of hideous apprehension and expectancy had seized him, and he seemed to be awaiting the fall of some annihilating blow. At noon he lunched at the University Spa, picking up a paper from the next seat as he waited for dessert. But he never ate that dessert; for an item on the paper's first page left him limp, wild-eyed, and able only to pay his check and stagger back to Elwood's room.

There had been a strange kidnapping the night before in Orne's Gangway, and the two-year-old child of a clod-like laundry worker named Anastasia Wolejko had completely vanished from sight. The mother, it appeared, had feared the event for some time; but the reasons she assigned for her fear were so grotesque that no one took them seriously. She had, she said, seen Brown Jenkin about the place now and then ever since early in March, and knew from its grimaces and titterings that little Ladislav must be marked for sacrifice at the awful Sabbat on Walpurgis-Night. She had asked her neighbour Mary Czanek to sleep in the room and try to protect the child, but Mary had not dared. She could not tell the police, for they never believed such things. Children had been taken that way every year ever since she could remember. And her friend Pete

Stowacki would not help because he wanted the child out of the way anyhow.

But what threw Gilman into a cold perspiration was the report of a pair of revellers who had been walking past the mouth of the gangway just after midnight. They admitted they had been drunk, but both vowed they had seen a crazily dressed trio furtively entering the dark passageway. There had, they said, been a huge robed negro, a little old woman in rags, and a young white man in his night-clothes. The old woman had been dragging the youth, while around the feet of the negro a tame rat was rubbing and weaving in the brown mud.

Gilman sat in a daze all the afternoon, and Elwood—who had meanwhile seen the papers and formed terrible conjectures from them—found him thus when he came home. This time neither could doubt but that something hideously serious was closing in around them. Between the phantasms of nightmare and the realities of the objective world a monstrous and unthinkable relationship was crystallising, and only stupendous vigilance could avert still more direful developments. Gilman must see a specialist sooner or later, but not just now, when all the papers were full of this kidnapping business.

Just what had really happened was maddeningly obscure, and for a moment both Gilman and Elwood exchanged whispered theories of the wildest kind. Had Gilman unconsciously succeeded better than he knew in his studies of space and its dimensions? Had he actually slipped outside our sphere to points unguessed and unimaginable? Where—if anywhere—had he been on those nights of daemonic alienage? The roaring twilight abysses—the green hillside—the blistering terrace—the pulls from the stars—the ultimate black vortex—the black man—the muddy alley and the stairs—the old witch and the fanged, furry horror—the bubble-congeries and the little polyhedron—the strange sunburn—the wrist wound—the unexplained image—the muddy feet—the throat-marks—the tales and fears of the superstitious foreigners—what did all this mean? To what extent could the laws of sanity apply to such a case?

There was no sleep for either of them that night, but next day

they both cut classes and drowsed. This was April 30th, and with the dusk would come the hellish Sabbat-time which all the foreigners and the superstitious old folk feared. Mazurewicz came home at six o'clock and said people at the mill were whispering that the Walpurgis-revels would be held in the dark ravine beyond Meadow Hill where the old white stone stands in a place queerly void of all plant-life. Some of them had even told the police and advised them to look there for the missing Wolejko child, but they did not believe anything would be done. Joe insisted that the poor young gentleman wear his nickel-chained crucifix, and Gilman put it on and dropped it inside his shirt to humour the fellow.

Late at night the two youths sat drowsing in their chairs, lulled by the rhythmical praying of the loomfixer on the floor below. Gilman listened as he nodded, his preternaturally sharpened hearing seeming to strain for some subtle, dreaded murmur beyond the noises in the ancient house. Unwholesome recollections of things in the *Necronomicon* and the Black Book welled up, and he found himself swaying to infandous rhythms said to pertain to the blackest ceremonies of the Sabbat and to have an origin outside the time and space we comprehend.

Presently he realised what he was listening for—the hellish chant of the celebrants in the distant black valley. How did he know so much about what they expected? How did he know the time when Nahab and her acolyte were due to bear the brimming bowl which would follow the black cock and the black goat? He saw that Elwood had dropped asleep, and tried to call out and waken him. Something, however, closed his throat. He was not his own master. Had he signed the black man's book after all?

Then his fevered, abnormal hearing caught the distant, wind-borne notes. Over miles of hill and field and alley they came, but he recognised them none the less. The fires must be lit, and the dancers must be starting in. How could he keep himself from going? What was it that had enmeshed him? Mathematics—folklore—the house—old Keziah—Brown Jenkin . . . and now he saw that there was a fresh rat-hole in the wall near his couch. Above the distant chanting and the nearer praying of Joe Mazurewicz came another sound—a stealthy, determined scratching in the partitions. He hoped the electric lights would not go out. Then he saw the fanged, bearded little

face in the rat-hole—the accursed little face which he at last realised bore such a shocking, mocking resemblance to old Keziah’s—and heard the faint fumbling at the door.

The screaming twilight abysses flashed before him, and he felt himself helpless in the formless grasp of the iridescent bubble-congeries. Ahead raced the small, kaleidoscopic polyhedron, and all through the churning void there was a heightening and acceleration of the vague tonal pattern which seemed to foreshadow some unutterable and unendurable climax. He seemed to know what was coming—the monstrous burst of Walpurgis-rhythm in whose cosmic timbre would be concentrated all the primal, ultimate space-time seethings which lie behind the massed spheres of matter and sometimes break forth in measured reverberations that penetrate faintly to every layer of entity and give hideous significance throughout the worlds to certain dreaded periods.

But all this vanished in a second. He was again in the cramped, violet-litten peaked space with the slanting floor, the low cases of ancient books, the bench and table, the queer objects, and the triangular gulf at one side. On the table lay a small white figure—an infant boy, unclothed and unconscious—while on the other side stood the monstrous, leering old woman with a gleaming, grotesque-hafted knife in her right hand, and a queerly proportioned pale metal bowl covered with curiously chased designs and having delicate lateral handles in her left. She was intoning some croaking ritual in a language which Gilman could not understand, but which seemed like something guardedly quoted in the *Necronomicon*.

As the scene grew clear he saw the ancient crone bend forward and extend the empty bowl across the table—and unable to control his own motions, he reached far forward and took it in both hands, noticing as he did so its comparative lightness. At the same moment the disgusting form of Brown Jenkin scrambled up over the brink of the triangular black gulf on his left. The crone now motioned him to hold the bowl in a certain position while she raised the huge, grotesque knife above the small white victim as high as her right hand could reach. The fanged, furry thing began tittering a continuation of the unknown ritual, while the witch croaked loathsome responses. Gilman felt a gnawing, poignant abhorrence shoot through his mental and emotional paralysis, and the light metal

bowl shook in his grasp. A second later the downward motion of the knife broke the spell completely, and he dropped the bowl with a resounding bell-like clangour while his hands darted out frantically to stop the monstrous deed.

In an instant he had edged up the slanting floor around the end of the table and wrenched the knife from the old woman's claws; sending it clattering over the brink of the narrow triangular gulf. In another instant, however, matters were reversed; for those murderous claws had locked themselves tightly around his own throat, while the wrinkled face was twisted with insane fury. He felt the chain of the cheap crucifix grinding into his neck, and in his peril wondered how the sight of the object itself would affect the evil creature. Her strength was altogether superhuman, but as she continued her choking he reached feebly in his shirt and drew out the metal symbol, snapping the chain and pulling it free.

At sight of the device the witch seemed struck with panic, and her grip relaxed long enough to give Gilman a chance to break it entirely. He pulled the steel-like claws from his neck, and would have dragged the beldame over the edge of the gulf had not the claws received a fresh access of strength and closed in again. This time he resolved to reply in kind, and his own hands reached out for the creature's throat. Before she saw what he was doing he had the chain of the crucifix twisted about her neck, and a moment later he had tightened it enough to cut off her breath. During her last struggle he felt something bite at his ankle, and saw that Brown Jenkin had come to her aid. With one savage kick he sent the morbidity over the edge of the gulf and heard it whimper on some level far below.

Whether he had killed the ancient crone he did not know, but he let her rest on the floor where she had fallen. Then, as he turned away, he saw on the table a sight which nearly snapped the last thread of his reason. Brown Jenkin, tough of sinew and with four tiny hands of daemonic dexterity, had been busy while the witch was throttling him, and his efforts had been in vain. What he had prevented the knife from doing to the victim's chest, the yellow fangs of the furry blasphemy had done to a wrist—and the bowl so lately on the floor stood full beside the small lifeless body.

In his dream-delirium Gilman heard the hellish, alien-rhythmed

chant of the Sabbat coming from an infinite distance, and knew the black man must be there. Confused memories mixed themselves with his mathematics, and he believed his subconscious mind held the *angles* which he needed to guide him back to the normal world—alone and unaided for the first time. He felt sure he was in the immemorially sealed loft above his own room, but whether he could ever escape through the slanting floor or the long-stopped egress he doubted greatly. Besides, would not an escape from a dream-loft bring him merely into a dream-house—an abnormal projection of the actual place he sought? He was wholly bewildered as to the relation betwixt dream and reality in all his experiences.

The passage through the vague abysses would be frightful, for the Walpurgis-rhythm would be vibrating, and at last he would have to hear that hitherto veiled cosmic pulsing which he so mortally dreaded. Even now he could detect a low, monstrous shaking whose tempo he suspected all too well. At Sabbat-time it always mounted and reached through to the worlds to summon the initiate to nameless rites. Half the chants of the Sabbat were patterned on this faintly overheard pulsing which no earthly ear could endure in its unveiled spatial fulness. Gilman wondered, too, whether he could trust his instinct to take him back to the right part of space. How could he be sure he would not land on that green-litten hill-side of a far planet, on the tessellated terrace above the city of tentacled monsters somewhere beyond the galaxy, or in the spiral black vortices of that ultimate void of Chaos wherein reigns the mindless daemon-sultan Azathoth?

Just before he made the plunge the violet light went out and left him in utter blackness. The witch—old Keziah—Nahab—that must have meant her death. And mixed with the distant chant of the Sabbat and the whimpers of Brown Jenkin in the gulf below he thought he heard another and wilder whine from unknown depths. Joe Mazurewicz—the prayers against the Crawling Chaos now turning to an inexplicably triumphant shriek—worlds of sardonic actuality impinging on vortices of febrile dream—lä! Shub-Niggurath! The Goat with a Thousand Young. . . .

They found Gilman on the floor of his queerly angled old garret room long before dawn, for the terrible cry had brought Desrochers and Choynski and Dombrowski and Mazurewicz at once, and had

even wakened the soundly sleeping Elwood in his chair. He was alive, and with open, staring eyes, but seemed largely unconscious. On his throat were the marks of murderous hands, and on his left ankle was a distressing rat-bite. His clothing was badly rumpled, and Joe's crucifix was missing. Elwood trembled, afraid even to speculate on what new form his friend's sleep-walking had taken. Mazurewicz seemed half-dazed because of a "sign" he said he had had in response to his prayers, and he crossed himself frantically when the squealing and whimpering of a rat sounded from beyond the slanting partition.

When the dreamer was settled on his couch in Elwood's room they sent for Dr. Malkowski—a local practitioner who would repeat no tales where they might prove embarrassing—and he gave Gilman two hypodermic injections which caused him to relax in something like natural drowsiness. During the day the patient regained consciousness at times and whispered his newest dream disjointedly to Elwood. It was a painful process, and at its very start brought out a fresh and disconcerting fact.

Gilman—whose ears had so lately possessed an abnormal sensitiveness—was now stone deaf. Dr. Malkowski, summoned again in haste, told Elwood that both ear-drums were ruptured, as if by the impact of some stupendous sound intense beyond all human conception or endurance. How such a sound could have been heard in the last few hours without arousing all the Miskatonic Valley was more than the honest physician could say.

Elwood wrote his part of the colloquy on paper, so that a fairly easy communication was maintained. Neither knew what to make of the whole chaotic business, and decided it would be better if they thought as little as possible about it. Both, though, agreed that they must leave this ancient and accursed house as soon as it could be arranged. Evening papers spoke of a police raid on some curious revellers in a ravine beyond Meadow Hill just before dawn, and mentioned that the white stone there was an object of age-long superstitious regard. Nobody had been caught, but among the scattering fugitives had been glimpsed a huge negro. In another column it was stated that no trace of the missing child Ladislav Wolejko had been found.

The crowning horror came that very night. Elwood will never

forget it, and was forced to stay out of college the rest of the term because of the resulting nervous breakdown. He had thought he heard rats in the partitions all the evening, but paid little attention to them. Then, long after both he and Gilman had retired, the atrocious shrieking began. Elwood jumped up, turned on the lights, and rushed over to his guest's couch. The occupant was emitting sounds of veritably inhuman nature, as if racked by some torment beyond description. He was writhing under the bedclothes, and a great red stain was beginning to appear on the blankets.

Elwood scarcely dared to touch him, but gradually the screaming and writhing subsided. By this time Dombrowski, Choynski, Desrochers, Mazurewicz, and the top-floor lodger were all crowding into the doorway, and the landlord had sent his wife back to telephone for Dr. Malkowski. Everybody shrieked when a large rat-like form suddenly jumped out from beneath the ensanguined bedclothes and scuttled across the floor to a fresh, open hole close by. When the doctor arrived and began to pull down those frightful covers Walter Gilman was dead.

It would be barbarous to do more than suggest what had killed Gilman. There had been virtually a tunnel through his body—something had eaten his heart out. Dombrowski, frantic at the failure of his constant rat-poisoning efforts, cast aside all thought of his lease and within a week had moved with all his older lodgers to a dingy but less ancient house in Walnut Street. The worst thing for a while was keeping Joe Mazurewicz quiet; for the brooding loomfixer would never stay sober, and was constantly whining and muttering about spectral and terrible things.

It seems that on that last hideous night Joe had stooped to look at the crimson rat-tracks which led from Gilman's couch to the nearby hole. On the carpet they were very indistinct, but a piece of open flooring intervened between the carpet's edge and the base-board. There Mazurewicz had found something monstrous—or thought he had, for no one else could quite agree with him despite the undeniable queerness of the prints. The tracks on the flooring were certainly vastly unlike the average prints of a rat, but even Choynski and Desrochers would not admit that they were like the prints of four tiny human hands.

The house was never rented again. As soon as Dombrowski left it the pall of its final desolation began to descend, for people shunned it both on account of its old reputation and because of the new foetid odour. Perhaps the ex-landlord's rat-poison had worked after all, for not long after his departure the place became a neighbourhood nuisance. Health officials traced the smell to the closed spaces above and beside the eastern garret room, and agreed that the number of dead rats must be enormous. They decided, however, that it was not worth their while to hew open and disinfect the long sealed spaces; for the foetor would soon be over, and the locality was not one which encouraged fastidious standards. Indeed, there were always vague local tales of unexplained stenchcs upstairs in the Witch House just after May-Eve and Hallowmass. The neighbours grumblingly acquiesced in the inertia—but the foetor none the less formed an additional count against the place. Toward the last the house was condemned as an habitation by the building inspector.

Gilman's dreams and their attendant circumstances have never been explained. Elwood, whose thoughts on the entire episode are sometimes almost maddening, came back to college the next autumn and graduated in the following June. He found the spectral gossip of the town much diminished, and it is indeed a fact that—notwithstanding certain reports of a ghostly tittering in the deserted house which lasted almost as long as that edifice itself—no fresh appearances either of old Keziah or of Brown Jenkin have been muttered of since Gilman's death. It is rather fortunate that Elwood was not in Arkham in that later year when certain events abruptly renewed the local whispers about elder horrors. Of course he heard about the matter afterward and suffered untold torments of black and bewildered speculation; but even that was not as bad as actual nearness and several possible sights would have been.

In March, 1931, a gale wrecked the roof and great chimney of the vacant Witch House, so that a chaos of crumbling bricks, blackened, moss-grown shingles, and rotting planks and timbers crashed down into the loft and broke through the floor beneath. The whole attic story was choked with debris from above, but no one took the trouble to touch the mess before the inevitable razing of the decrepit structure. That ultimate step came in the following December, and it was when Gilman's old room was cleared out by reluctant, apprehensive workmen that the gossip began.

Among the rubbish which had crashed through the ancient slanting ceiling were several things which made the workmen pause and call in the police. Later the police in turn called in the coroner and several professors from the university. There were bones—badly crushed and splintered, but clearly recognisable as human—whose manifestly modern date conflicted puzzlingly with the remote period at which their only possible lurking-place, the low, slant-floored loft overhead, had supposedly been sealed from all human access. The coroner's physician decided that some belonged to a small child, while certain others—found mixed with shreds of rotten brownish cloth—belonged to a rather undersized, bent female of advanced years. Careful sifting of debris also disclosed many tiny bones of rats caught in the collapse, as well as older rat-bones gnawed by small fangs in a fashion now and then highly productive of controversy and reflection.

Other objects found included the mingled fragments of many books and papers, together with a yellowish dust left from the total disintegration of still older books and papers. All, without exception, appeared to deal with black magic in its most advanced and horrible forms; and the evidently recent date of certain items is still a mystery as unsolved as that of the modern human bones. An even greater mystery is the absolute homogeneity of the crabbed, archaic writing found on a wide range of papers whose conditions and watermarks suggest age differences of at least 150 to 200 years. To some, though, the greatest mystery of all is the variety of utterly inexplicable objects—objects whose shapes, materials, types of workmanship, and purposes baffle all conjecture—found scattered amidst the wreckage in evidently diverse states of injury. One of these things—which excited several Miskatonic professors profoundly—is a badly damaged monstrosity plainly resembling the strange image which Gilman gave to the college museum, save that it is larger, wrought of some peculiar bluish stone instead of metal, and possessed of a singularly angled pedestal with undecipherable hieroglyphics.

Archaeologists and anthropologists are still trying to explain the bizarre designs chased on a crushed bowl of light metal whose inner side bore ominous brownish stains when found. Foreigners and credulous grandmothers are equally garrulous about the modern nickel crucifix with broken chain mixed in the rubbish and shiver-

ingly identified by Joe Mazurewicz as that which he had given poor Gilman many years before. Some believe this crucifix was dragged up to the sealed loft by rats, while others think it must have been on the floor in some corner of Gilman's old room all the time. Still others, including Joe himself, have theories too wild and fantastic for sober credence.

When the slanting wall of Gilman's room was torn out, the once sealed triangular space between that partition and the house's north wall was found to contain much less structural debris, even in proportion to its size, than the room itself; though it had a ghastly layer of older materials which paralysed the wreckers with horror. In brief, the floor was a veritable ossuary of the bones of small children—some fairly modern, but others extending back in infinite gradations to a period so remote that crumbling was almost complete. On this deep bony layer rested a knife of great size, obvious antiquity, and grotesque, ornate, and exotic design—above which the debris was piled.

In the midst of this debris, wedged between a fallen plank and a cluster of cemented bricks from the ruined chimney, was an object destined to cause more bafflement, veiled fright, and openly superstitious talk in Arkham than anything else discovered in the haunted and accursed building. This object was the partly crushed skeleton of a huge, diseased rat, whose abnormalities of form are still a topic of debate and source of singular reticence among the members of Miskatonic's department of comparative anatomy. Very little concerning this skeleton has leaked out, but the workmen who found it whisper in shocked tones about the long, brownish hairs with which it was associated.

The bones of the tiny paws, it is rumoured, imply prehensile characteristics more typical of a diminutive monkey than of a rat; while the small skull with its savage yellow fangs is of the utmost anomalousness, appearing from certain angles like a miniature, monstrosly degraded parody of a human skull. The workmen crossed themselves in fright when they came upon this blasphemy, but later burned candles of gratitude in St. Stanislaus' Church because of the shrill, ghostly tittering they felt they would never hear again.

The Statement of Randolph Carter

I repeat to you, gentlemen, that your inquisition is fruitless. Detain me here forever if you will; confine or execute me if you must have a victim to propitiate the illusion you call justice; but I can say no more than I have said already. Everything that I can remember, I have told with perfect candour. Nothing has been distorted or concealed, and if anything remains vague, it is only because of the dark cloud which has come over my mind—that cloud and the nebulous nature of the horrors which brought it upon me.

Again I say, I do not know what has become of Harley Warren; though I think—almost hope—that he is in peaceful oblivion, if there be anywhere so blessed a thing. It is true that I have for five years been his closest friend, and a partial sharer of his terrible researches into the unknown. I will not deny, though my memory is uncertain and indistinct, that this witness of yours may have seen us together as he says, on the Gainesville pike, walking toward Big Cypress Swamp, at half past eleven on that awful night. That we bore electric lanterns, spades, and a curious coil of wire with attached instruments, I will even affirm; for these things all played a part in the single hideous scene which remains burned into my

shaken recollection. But of what followed, and of the reason I was found alone and dazed on the edge of the swamp next morning, I must insist that I know nothing save what I have told you over and over again. You say to me that there is nothing in the swamp or near it which could form the setting of that frightful episode. I reply that I know nothing beyond what I saw. Vision or nightmare it may have been—vision or nightmare I fervently hope it was—yet it is all that my mind retains of what took place in those shocking hours after we left the sight of men. And why Harley Warren did not return, he or his shade—or some nameless *thing* I cannot describe—alone can tell.

As I have said before, the weird studies of Harley Warren were well known to me, and to some extent shared by me. Of his vast collection of strange, rare books on forbidden subjects I have read all that are written in the languages of which I am master; but these are few as compared with those in languages I cannot understand. Most, I believe, are in Arabic; and the fiend-inspired book which brought on the end—the book which he carried in his pocket out of the world—was written in characters whose like I never saw elsewhere. Warren would never tell me just what was in that book. As to the nature of our studies—must I say again that I no longer retain full comprehension? It seems to me rather merciful that I do not, for they were terrible studies, which I pursued more through reluctant fascination than through actual inclination. Warren always dominated me, and sometimes I feared him. I remember how I shuddered at his facial expression on the night before the awful happening, when he talked so incessantly of his theory, *why certain corpses never decay, but rest firm and fat in their tombs for a thousand years*. But I do not fear him now, for I suspect that he has known horrors beyond my ken. Now I fear *for* him.

Once more I say that I have no clear idea of our object on that night. Certainly, it had much to do with something in the book which Warren carried with him—that ancient book in undecipherable characters which had come to him from India a month before—but I swear I do not know what it was that we expected to find. Your witness says he saw us at half past eleven on the Gainesville pike, headed for Big Cypress Swamp. This is probably true, but I have no distinct memory of it. The picture seared into

my soul is of one scene only, and the hour must have been long after midnight; for a waning crescent moon was high in the vaporous heavens.

The place was an ancient cemetery; so ancient that I trembled at the manifold signs of immemorial years. It was in a deep, damp hollow, overgrown with rank grass, moss, and curious creeping weeds, and filled with a vague stench which my idle fancy associated absurdly with rotting stone. On every hand were the signs of neglect and decrepitude, and I seemed haunted by the notion that Warren and I were the first living creatures to invade a lethal silence of centuries. Over the valley's rim a wan, waning crescent moon peered through the noisome vapours that seemed to emanate from unheard-of catacombs, and by its feeble, wavering beams I could distinguish a repellent array of antique slabs, urns, cenotaphs, and mausolean facades; all crumbling, moss-grown, and moisture-stained, and partly concealed by the gross luxuriance of the unhealthy vegetation. My first vivid impression of my own presence in this terrible necropolis concerns the act of pausing with Warren before a certain half-obliterated sepulchre, and of throwing down some burdens which we seemed to have been carrying. I now observed that I had with me an electric lantern and two spades, whilst my companion was supplied with a similar lantern and a portable telephone outfit. No word was uttered, for the spot and the task seemed known to us; and without delay we seized our spades and commenced to clear away the grass, weeds, and drifted earth from the flat, archaic mortuary. After uncovering the entire surface, which consisted of three immense granite slabs, we stepped back some distance to survey the charnel scene; and Warren appeared to make some mental calculations. Then he returned to the sepulchre, and using his spade as a lever, sought to pry up the slab lying nearest to a stony ruin which may have been a monument in its day. He did not succeed, and motioned to me to come to his assistance. Finally our combined strength loosened the stone, which we raised and tipped to one side.

The removal of the slab revealed a black aperture, from which rushed an effluence of miasmal gases so nauseous that we started back in horror. After an interval, however, we approached the pit again, and found the exhalations less unbearable. Our lanterns dis-

closed the top of a flight of stone steps, dripping with some detestable ichor of the inner earth, and bordered by moist walls encrusted with nitre. And now for the first time my memory records verbal discourse, Warren addressing me at length in his mellow tenor voice; a voice singularly unperturbed by our awesome surroundings.

"I'm sorry to have to ask you to stay on the surface," he said, "but it would be a crime to let anyone with your frail nerves go down there. You can't imagine, even from what you have read and from what I've told you, the things I shall have to see and do. It's fiendish work, Carter, and I doubt if any man without ironclad sensibilities could ever see it through and come up alive and sane. I don't wish to offend you, and heaven knows I'd be glad enough to have you with me; but the responsibility is in a certain sense mine, and I couldn't drag a bundle of nerves like you down to probable death or madness. I tell you, you can't imagine what the thing is really like! But I promise to keep you informed over the telephone of every move—you see I've enough wire here to reach to the centre of the earth and back!"

I can still hear, in memory, those coolly spoken words; and I can still remember my remonstrances. I seemed desperately anxious to accompany my friend into those sepulchral depths, yet he proved inflexibly obdurate. At one time he threatened to abandon the expedition if I remained insistent; a threat which proved effective, since he alone held the key to the *thing*. All this I can still remember, though I no longer know what manner of *thing* we sought. After he had secured my reluctant acquiescence in his design, Warren picked up the reel of wire and adjusted the instruments. At his nod I took one of the latter and seated myself upon an aged, discoloured gravestone close by the newly uncovered aperture. Then he shook my hand, shouldered the coil of wire, and disappeared within that indescribable ossuary. For a moment I kept sight of the glow of his lantern, and heard the rustle of the wire as he laid it down after him; but the glow soon disappeared abruptly, as if a turn in the stone staircase had been encountered, and the sound died away almost as quickly. I was alone, yet bound to the unknown depths by those magic strands whose insulated surface lay green beneath the struggling beams of that waning crescent moon.

In the lone silence of that hoary and deserted city of the dead, my mind conceived the most ghastly phantasies and illusions; and the grotesque shrines and monoliths seemed to assume a hideous personality—a half-sentience. Amorphous shadows seemed to lurk in the darker recesses of the weed-choked hollow and to flit as in some blasphemous ceremonial procession past the portals of the mouldering tombs in the hillside; shadows which could not have been cast by that pallid, peering crescent moon. I constantly consulted my watch by the light of my electric lantern, and listened with feverish anxiety at the receiver of the telephone; but for more than a quarter of an hour heard nothing. Then a faint clicking came from the instrument, and I called down to my friend in a tense voice. Apprehensive as I was, I was nevertheless unprepared for the words which came up from that uncanny vault in accents more alarmed and quivering than any I had heard before from Harley Warren. He who had so calmly left me a little while previously, now called from below in a shaky whisper more portentous than the loudest shriek:

"God! If you could see what I am seeing!"

I could not answer. Speechless, I could only wait. Then came the frenzied tones again:

"Carter, it's terrible—monstrous—unbelievable!"

This time my voice did not fail me, and I poured into the transmitter a flood of excited questions. Terrified, I continued to repeat, "Warren, what is it? What is it?"

Once more came the voice of my friend, still hoarse with fear, and now apparently tinged with despair:

"I can't tell you, Carter! It's too utterly beyond thought—I dare not tell you—no man could know it and live—Great God! I never dreamed of THIS!" Stillness again, save for my now incoherent torrent of shuddering inquiry. Then the voice of Warren in a pitch of wilder consternation:

"Carter! for the love of God, put back the slab and get out of this if you can! Quick!—leave everything else and make for the outside—it's your only chance! Do as I say, and don't ask me to explain!"

I heard, yet was able only to repeat my frantic questions. Around me were the tombs and the darkness and the shadows; below me, some peril beyond the radius of the human imagination. But my

friend was in greater danger than I, and through my fear I felt a vague resentment that he should deem me capable of deserting him under such circumstances. More clicking, and after a pause a piteous cry from Warren:

"Beat it! For God's sake, put back the slab and beat it, Carter!"

Something in the boyish slang of my evidently stricken companion unleashed my faculties. I formed and shouted a resolution, "Warren, brace up! I'm coming down!" But at this offer the tone of my auditor changed to a scream of utter despair:

"Don't! You can't understand! It's too late—and my own fault. Put back the slab and run—there's nothing else you or anyone can do now!" The tone changed again, this time acquiring a softer quality, as of hopeless resignation. Yet it remained tense through anxiety for me.

"Quick—before it's too late!" I tried not to heed him; tried to break through the paralysis which held me, and to fulfil my vow to rush down to his aid. But his next whisper found me still held inert in the chains of stark horror.

"Carter—hurry! It's no use—you must go—better one than two—the slab—" A pause, more clicking, then the faint voice of Warren:

"Nearly over now—don't make it harder—cover up those damned steps and run for your life—you're losing time— So long, Carter—won't see you again." Here Warren's whisper swelled into a cry; a cry that gradually rose to a shriek fraught with all the horror of the ages—

"Curse these hellish things—legions— My God! Beat it! Beat it! Beat it!"

After that was silence. I know not how many interminable aeons I sat stupefied; whispering, muttering, calling, screaming into that telephone. Over and over again through those aeons I whispered and muttered, called, shouted, and screamed, "Warren! Warren! Answer me—are you there?"

And then there came to me the crowning horror of all—the unbelievable, unthinkable, almost unmentionable thing. I have said that aeons seemed to elapse after Warren shrieked forth his last despairing warning, and that only my own cries now broke the hideous silence. But after a while there was a further clicking in the receiver,

and I strained my ears to listen. Again I called down, "Warren, are you there?", and in answer heard the *thing* which has brought this cloud over my mind. I do not try, gentlemen, to account for that *thing*—that voice—nor can I venture to describe it in detail, since the first words took away my consciousness and created a mental blank which reaches to the time of my awakening in the hospital. Shall I say that the voice was deep; hollow; gelatinous; remote; unearthly; inhuman; disembodied? What shall I say? It was the end of my experience, and is the end of my story. I heard it, and knew no more. Heard it as I sat petrified in that unknown cemetery in the hollow, amidst the crumbling stones and the falling tombs, the rank vegetation and the miasmal vapours. Heard it well up from the innermost depths of that damnable open sepulchre as I watched amorphous, necrophagous shadows dance beneath an accursed waning moon. And this is what it said:

"YOU FOOL, WARREN IS DEAD!"

The Dream-Quest of Unknown Kadath

Three times Randolph Carter dreamed of the marvellous city, and three times was he snatched away while still he paused on the high terrace above it. All golden and lovely it blazed in the sunset, with walls, temples, colonnades, and arched bridges of veined marble, silver-basined fountains of prismatic spray in broad squares and perfumed gardens, and wide streets marching between delicate trees and blossom-laden urns and ivory statues in gleaming rows; while on steep northward slopes climbed tiers of red roofs and old peaked gables harbouring little lanes of grassy cobbles. It was a fever of the gods; a fanfare of supernal trumpets and a clash of immortal cymbals. Mystery hung about it as clouds about a fabulous unvisited mountain; and as Carter stood breathless and expectant on that balustraded parapet there swept up to him the poignancy and suspense of almost-vanished memory, the pain of lost things, and the maddening need to place again what once had an awesome and momentous place.

He knew that for him its meaning must once have been supreme; though in what cycle or incarnation he had known it, or whether in dream or in waking, he could not tell. Vaguely it called up glimpses

of a far, forgotten first youth, when wonder and pleasure lay in all the mystery of days, and dawn and dusk alike strode forth prophetic to the eager sound of lutes and song; unclosing faery gates toward further and surprising marvels. But each night as he stood on that high marble terrace with the curious urns and carven rail and looked off over that hushed sunset city of beauty and unearthly immanence, he felt the bondage of dream's tyrannous gods; for in no wise could he leave that lofty spot, or descend the wide mar-moreal flights flung endlessly down to where those streets of elder witchery lay outspread and beckoning.

When for the third time he awaked with those flights still undescended and those hushed sunset streets still untraversed, he prayed long and earnestly to the hidden gods of dream that brood capricious above the clouds on unknown Kadath, in the cold waste where no man treads. But the gods made no answer and shewed no relenting, nor did they give any favouring sign when he prayed to them in dream, and invoked them sacrificially through the bearded priests Nasht and Kaman-Thah, whose cavern-temple with its pillar of flame lies not far from the gates of the waking world. It seemed, however, that his prayers must have been adversely heard, for after even the first of them he ceased wholly to behold the marvellous city; as if his three glimpses from afar had been mere accidents or oversights, and against some hidden plan or wish of the gods.

At length, sick with longing for those glittering sunset streets and cryptical hill lanes among ancient tiled roofs, nor able sleeping or waking to drive them from his mind, Carter resolved to go with bold entreaty whither no man had gone before, and dare the icy deserts through the dark to where unknown Kadath, veiled in cloud and crowned with unimagined stars, holds secret and nocturnal the onyx castle of the Great Ones.

In light slumber he descended the seventy steps to the cavern of flame and talked of this design to the bearded priests Nasht and Kaman-Thah. And the priests shook their pshent-bearing heads and vowed it would be the death of his soul. They pointed out that the Great Ones had shewn already their wish, and that it is not agreeable to them to be harassed by insistent pleas. They reminded him, too, that not only had no man ever been to unknown Kadath,

but no man had ever suspected in what part of space it may lie; whether it be in the dreamlands around our world, or in those surrounding some unguessed companion of Fomalhaut or Aldebaran. If in our dreamland, it might conceivably be reached; but only three fully human souls since time began had ever crossed and re-crossed the black impious gulfs to other dreamlands, and of that three two had come back quite mad. There were, in such voyages, incalculable local dangers; as well as that shocking final peril which gibbers unmentionably outside the ordered universe, where no dreams reach; that last amorphous blight of nethermost confusion which blasphemes and bubbles at the centre of all infinity—the boundless daemon-sultan Azathoth, whose name no lips dare speak aloud, and who gnaws hungrily in inconceivable, unlighted chambers beyond time amidst the muffled, maddening beating of vile drums and the thin, monotonous whine of accursed flutes; to which detestable pounding and piping dance slowly, awkwardly, and absurdly the gigantic ultimate gods, the blind, voiceless, tenebrous, mindless Other Gods whose soul and messenger is the crawling chaos Nyarlathotep.

Of these things was Carter warned by the priests Nasht and Kaman-Thah in the cavern of flame, but still he resolved to find the gods on unknown Kadath in the cold waste, wherever that might be, and to win from them the sight and remembrance and shelter of the marvellous sunset city. He knew that his journey would be strange and long, and that the Great Ones would be against it; but being old in the land of dream he counted on many useful memories and devices to aid him. So asking a farewell blessing of the priests and thinking shrewdly on his course, he boldly descended the seven hundred steps to the Gate of Deeper Slumber and set out through the enchanted wood.

In the tunnels of that twisted wood, whose low prodigious oaks twine groping boughs and shine dim with the phosphorescence of strange fungi, dwell the furtive and secretive zoogs; who know many obscure secrets of the dream-world and a few of the waking world, since the wood at two places touches the lands of men, though it would be disastrous to say where. Certain unexplained rumours, events, and vanishments occur among men where the zoogs have access, and it is well that they cannot travel far outside

the world of dream. But over the nearer parts of the dream-world they pass freely, flitting small and brown and unseen and bearing back piquant tales to beguile the hours around their hearths in the forest they love. Most of them live in burrows, but some inhabit the trunks of the great trees; and although they live mostly on fungi it is muttered that they have also a slight taste for meat, either physical or spiritual, for certainly many dreamers have entered that wood who have not come out. Carter, however, had no fear; for he was an old dreamer and had learnt their fluttering language and made many a treaty with them; having found through their help the splendid city of Celephaïs in Ooth-Nargai beyond the Tanarian Hills, where reigns half the year the great King Kuranès, a man he had known by another name in life. Kuranès was the one soul who had been to the star-gulfs and returned free from madness.

Threading now the low phosphorescent aisles between those gigantic trunks, Carter made fluttering sounds in the manner of the zoogs, and listened now and then for responses. He remembered one particular village of the creatures near the centre of the wood, where a circle of great mossy stones in what was once a clearing tells of older and more terrible dwellers long forgotten, and toward this spot he hastened. He traced his way by the grotesque fungi, which always seem better nourished as one approaches the dread circle where elder beings danced and sacrificed. Finally the greater light of those thicker fungi revealed a sinister green and grey vastness pushing up through the roof of the forest and out of sight. This was the nearest of the great ring of stones, and Carter knew he was close to the zoog village. Renewing his fluttering sound, he waited patiently; and was at length rewarded by an impression of many eyes watching him. It was the zoogs, for one sees their weird eyes long before one can discern their small, slippery brown outlines.

Out they swarmed, from hidden burrow and honeycombed tree, till the whole dim-litten region was alive with them. Some of the wilder ones brushed Carter unpleasantly, and one even nipped loathsomely at his ear; but these lawless spirits were soon restrained by their elders. The Council of Sages, recognising the visitor, offered a gourd of fermented sap from a haunted tree unlike the others, which had grown from a seed dropt down by someone on the moon; and as Carter drank it ceremoniously a very strange

colloquy began. The zoogs did not, unfortunately, know where the peak of Kadath lies, nor could they even say whether the cold waste is in our dream-world or in another. Rumours of the Great Ones came equally from all points; and one might only say that they were likelier to be seen on high mountain peaks than in valleys, since on such peaks they dance reminiscently when the moon is above and the clouds beneath.

Then one very ancient zoog recalled a thing unheard-of by the others; and said that in Ulthar, beyond the river Skai, there still lingered the last copy of those inconceivably old Pnakotic Manuscripts made by waking men in forgotten boreal kingdoms and borne into the land of dreams when the hairy cannibal Gnophkehs overcame many-templed Olathoë and slew all the heroes of the land of Lomar. Those manuscripts, he said, told much of the gods; and besides, in Ulthar there were men who had seen the signs of the gods, and even one old priest who had scaled a great mountain to behold them dancing by moonlight. He had failed, though his companion had succeeded and perished namelessly.

So Randolph Carter thanked the zoogs, who fluttered amicably and gave him another gourd of moon-tree wine to take with him, and set out through the phosphorescent wood for the other side, where the rushing Skai flows down from the slopes of Ierion, and Hatheg and Nir and Ulthar dot the plain. Behind him, furtive and unseen, crept several of the curious zoogs; for they wished to learn what might befall him, and bear back the legend to their people. The vast oaks grew thicker as he pushed on beyond the village, and he looked sharply for a certain spot where they would thin somewhat, standing quite dead or dying among the unnaturally dense fungi and the rotting mould and mushy logs of their fallen brothers. There he would turn sharply aside, for at that spot a mighty slab of stone rests on the forest floor; and those who have dared approach it say that it bears an iron ring three feet wide. Remembering the archaic circle of great mossy rocks, and what it was possibly set up for, the zoogs do not pause near that expansive slab with its huge ring; for they realise that all which is forgotten need not necessarily be dead, and they would not like to see the slab rise slowly and deliberately.

Carter detoured at the proper place, and heard behind him the

frightened fluttering of some of the more timid zoogs. He had known they would follow him, so he was not disturbed; for one grows accustomed to the anomalies of these prying creatures. It was twilight when he came to the edge of the wood, and the strengthening glow told him it was the twilight of morning. Over fertile plains rolling down to the Skai he saw the smoke of cottage chimneys, and on every hand were the hedges and ploughed fields and thatched roofs of a peaceful land. Once he stopped at a farmhouse well for a cup of water, and all the dogs barked affrightedly at the inconspicuous zoogs that crept through the grass behind. At another house, where people were stirring, he asked questions about the gods, and whether they danced often upon Lerion; but the farmer and his wife would only make the Elder Sign and tell him the way to Nir and Ulthar.

At noon he walked through the one broad high street of Nir, which he had once visited and which marked his farthest former travels in this direction; and soon afterward he came to the great stone bridge across the Skai, into whose central pier the masons had sealed a living human sacrifice when they built it thirteen-hundred years before. Once on the other side, the frequent presence of cats (who all arched their backs at the trailing zoogs) revealed the near neighbourhood of Ulthar; for in Ulthar, according to an ancient and significant law, no man may kill a cat. Very pleasant were the suburbs of Ulthar, with their little green cottages and neatly fenced farms; and still pleasanter was the quaint town itself, with its old peaked roofs and overhanging upper stories and numberless chimney-pots and narrow hill streets where one can see old cobbles whenever the graceful cats afford space enough. Carter, the cats being somewhat dispersed by the half-seen zoogs, picked his way directly to the modest Temple of the Elder Ones where the priests and old records were said to be; and once within that venerable circular tower of ivied stone—which crowns Ulthar's highest hill—he sought out the patriarch Atal, who had been up the forbidden peak Hatheg-Kla in the stony desert and had come down again alive.

Atal, seated on an ivory dais in a festooned shrine at the top of the temple, was fully three centuries old; but still very keen of mind and memory. From him Carter learned many things about the gods, but mainly that they are indeed only earth's gods, ruling

feebly our own dreamland and having no power or habitation elsewhere. They might, Atal said, heed a man's prayer if in good humour; but one must not think of climbing to their onyx stronghold atop Kadath in the cold waste. It was lucky that no man knew where Kadath towers, for the fruits of ascending it would be very grave. Atal's companion Barzai the Wise had been drawn screaming into the sky for climbing merely the known peak of Hatheg-Kla. With unknown Kadath, if ever found, matters would be much worse; for although earth's gods may sometimes be surpassed by a wise mortal, they are protected by the Other Gods from Outside, whom it is better not to discuss. At least twice in the world's history the Other Gods set their seal upon earth's primal granite; once in antediluvian times, as guessed from a drawing in those parts of the Pnakotic Manuscripts too ancient to be read, and once on Hatheg-Kla when Barzai the Wise tried to see earth's gods dancing by moonlight. So, Atal said, it would be much better to let all gods alone except in tactful prayers.

Carter, though disappointed by Atal's discouraging advice and by the meagre help to be found in the Pnakotic Manuscripts and the Seven Cryptical Books of Hsan, did not wholly despair. First he questioned the old priest about that marvellous sunset city seen from the railed terrace, thinking that perhaps he might find it without the gods' aid; but Atal could tell him nothing. Probably, Atal said, the place belonged to his especial dream-world and not to the general land of vision that many know; and conceivably it might be on another planet. In that case earth's gods could not guide him if they would. But this was not likely, since the stopping of the dreams shewed pretty clearly that it was something the Great Ones wished to hide from him.

Then Carter did a wicked thing, offering his guileless host so many draughts of the moon-wine which the zoogs had given him that the old man became irresponsibly talkative. Robbed of his reserve, poor Atal babbled freely of forbidden things; telling of a great image reported by travellers as carved on the solid rock of the mountain Ngranek, on the isle of Oriab in the Southern Sea, and hinting that it may be a likeness which earth's gods once wrought of their own features in the days when they danced by moonlight on that mountain. And he hiccupped likewise that the features of that

image are very strange, so that one might easily recognise them, and that they are sure signs of the authentic race of the gods.

Now the use of all this in finding the gods became at once apparent to Carter. It is known that in disguise the younger among the Great Ones often espouse the daughters of men, so that around the borders of the cold waste wherein stands Kadath the peasants must all bear their blood. This being so, the way to find that waste must be to see the stone face on Ngranek and mark the features; then, having noted them with care, to search for such features among living men. Where they are plainest and thickest, there must the gods dwell nearest; and whatever stony waste lies back of the villages in that place must be that wherein stands Kadath.

Much of the Great Ones might be learnt in such regions, and those with their blood might inherit little memories very useful to a seeker. They might not know their parentage, for the gods so dislike to be known among men that none can be found who has seen their faces wittingly; a thing which Carter realised even as he sought to scale Kadath. But they would have queer lofty thoughts misunderstood by their fellows, and would sing of far places and gardens so unlike any known even in dreamland that common folk would call them fools; and from all this one could perhaps learn old secrets of Kadath, or gain hints of the marvellous sunset city which the gods held secret. And more, one might in certain cases seize some well-loved child of a god as hostage; or even capture some young god himself, disguised and dwelling amongst men with a comely peasant maiden as his bride.

Atal, however, did not know how to find Ngranek on its isle of Oriab; and recommended that Carter follow the singing Skai under its bridges down to the Southern Sea; where no burgess of Ulthar has ever been, but whence the merchants come in boats or with long caravans of mules and two-wheeled carts. There is a great city there, Dylath-Leen, but in Ulthar its reputation is bad because of the black three-banked galleys that sail to it with rubies from no clearly named shore. The traders that come from those galleys to deal with the jewellers are human, or nearly so, but the rowers are never beheld; and it is not thought wholesome in Ulthar that merchants should trade with black ships from unknown places whose rowers cannot be exhibited.

By the time he had given this information Atal was very drowsy, and Carter laid him gently on a couch of inlaid ebony and gathered his long beard decorously on his chest. As he turned to go, he observed that no suppressed fluttering followed him, and wondered why the zoogs had become so lax in their curious pursuit. Then he noticed all the sleek complacent cats of Ulthar licking their chops with unusual gusto, and recalled the spitting and caterwauling he had faintly heard in lower parts of the temple while absorbed in the old priest's conversation. He recalled, too, the evilly hungry way in which an especially impudent young zoog had regarded a small black kitten in the cobbled street outside. And because he loved nothing on earth more than small black kittens, he stooped and petted the sleek cats of Ulthar as they licked their chops, and did not mourn because those inquisitive zoogs would escort him no farther.

It was sunset now, so Carter stopped at an ancient inn on a steep little street overlooking the lower town. And as he went out on the balcony of his room and gazed down at the sea of red tiled roofs and cobbled ways and the pleasant fields beyond, all mellow and magical in the slanted light, he swore that Ulthar would be a very likely place to dwell in always, were not the memory of a greater sunset city ever goading one on toward unknown perils. Then twilight fell, and the pink walls of the plastered gables turned violet and mystic, and little yellow lights floated up one by one from old lattice windows. And sweet bells pealed in the temple tower above, and the first star winked softly above the meadows across the Skai. With the night came song, and Carter nodded as the lutanists praised ancient days from beyond the filigreed balconies and tessellated courts of simple Ulthar. And there might have been sweetness even in the voices of Ulthar's many cats, but that they were mostly heavy and silent from strange feasting. Some of them stole off to those cryptical realms which are known only to cats and which villagers say are on the moon's dark side, whither the cats leap from tall housetops, but one small black kitten crept upstairs and sprang in Carter's lap to purr and play, and curled up near his feet when he lay down at last on the little couch whose pillows were stuffed with fragrant, drowsy herbs.

In the morning Carter joined a caravan of merchants bound for

Dylath-Leen with the spun wool of Ulthar and the cabbages of Ulthar's busy farms. And for six days they rode with tinkling bells on the smooth road beside the Skai; stopping some nights at the inns of little quaint fishing towns, and on other nights camping under the stars while snatches of boatmen's songs came from the placid river. The country was very beautiful, with green hedges and groves and picturesque peaked cottages and octagonal windmills.

On the seventh day a blur of smoke arose on the horizon ahead, and then the tall black towers of Dylath-Leen, which is built mostly of basalt. Dylath-Leen with its thin angular towers looks in the distance like a bit of the Giants' Causeway, and its streets are dark and uninviting. There are many dismal sea-taverns near the myriad wharves, and all the town is thronged with the strange seamen of every land on earth and of a few which are said to be not on earth. Carter questioned the oddly robed men of that city about the peak of Ngranek on the isle of Oriab, and found that they knew of it well. Ships came from Baharna on that island, one being due to return thither in only a month, and Ngranek is but two days' zebra-ride from that port. But few had seen the stone face of the god, because it is on a very difficult side of Ngranek, which overlooks only sheer crags and a valley of sinister lava. Once the gods were angered with men on that side, and spoke of the matter to the Other Gods.

It was hard to get this information from the traders and sailors in Dylath-Leen's sea-taverns, because they mostly preferred to whisper of the black galleys. One of them was due in a week with rubies from its unknown shore, and the townsfolk dreaded to see it dock. The mouths of the men who came from it to trade were too wide, and the way their turbans were humped up in two points above their foreheads was in especially bad taste. And their shoes were the shortest and queerest ever seen in the Six Kingdoms. But worst of all was the matter of the unseen rowers. Those three banks of oars moved too briskly and accurately and vigorously to be comfortable, and it was not right for a ship to stay in port for weeks while the merchants traded, yet to give no glimpse of its crew. It was not fair to the tavern-keepers of Dylath-Leen, or to the grocers and butchers, either; for not a scrap of provisions was ever sent aboard. The merchants took only gold and stout black slaves from

Parg across the river. That was all they ever took, those unpleasantly featured merchants and their unseen rowers; never anything from the butchers and grocers, but only gold and the fat black men of Parg whom they bought by the pound. And the odours from those galleys which the south wind blew in from the wharves are not to be described. Only by constantly smoking strong thagweed could even the hardiest denizen of the old sea-taverns bear them. Dylath-Leen would never have tolerated the black galleys had such rubies been obtainable elsewhere, but no mine in all earth's dream-land was known to produce their like.

Of these things Dylath-Leen's cosmopolitan folk chiefly gossiped whilst Carter waited patiently for the ship from Baharna, which might bear him to the isle whereon carved Ngranek towers lofty and barren. Meanwhile he did not fail to seek through the haunts of far travellers for any tales they might have concerning Kadath in the cold waste or a marvellous city of marble walls and silver fountains seen below terraces in the sunset. Of these things, however, he learned nothing; though he once thought that a certain old slant-eyed merchant looked queerly intelligent when the cold waste was spoken of. This man was reputed to trade with the horrible stone villages on the icy desert plateau of Leng, which no healthy folk visit and whose evil fires are seen at night from afar. He was even rumoured to have dealt with that high-priest not to be described, which wears a yellow silken mask over its face and dwells all alone in a prehistoric stone monastery. That such a person might well have had nibbling traffick with such beings as may conceivably dwell in the cold waste was not to be doubted, but Carter soon found that it was no use questioning him.

Then the black galley slipped into the harbour past the basalt mole and the tall lighthouse, silent and alien, and with a strange stench that the south wind drove into the town. Uneasiness rustled through the taverns along that waterfront, and after a while the dark wide-mouthed merchants with humped turbans and short feet clumped stealthily ashore to seek the bazaars of the jewellers. Carter observed them closely, and disliked them more the longer he looked at them. Then he saw them drive the stout black men of Parg up the gangplank grunting and sweating into that singular

galley, and wondered in what lands—or if in any lands at all—those fat pathetic creatures might be destined to serve.

And on the third evening of that galley's stay one of the uncomfortable merchants spoke to him, smirking sinfully and hinting of what he had heard in the taverns of Carter's quest. He appeared to have knowledge too secret for public telling; and though the sound of his voice was unbearably hateful, Carter felt that the lore of so far a traveller must not be overlooked. He bade him therefore be his own guest in locked chambers above, and drew out the last of the zoogs' moon-wine to loosen his tongue. The strange merchant drank heavily, but smirked unchanged by the draught. Then he drew forth a curious bottle with wine of his own, and Carter saw that the bottle was a single hollowed ruby, grotesquely carved in patterns too fabulous to be comprehended. He offered his wine to his host, and though Carter took only the least sip, he felt the dizziness of space and the fever of unimagined jungles. All the while the guest had been smiling more and more broadly, and as Carter slipped into blankness the last thing he saw was that dark odious face convulsed with evil laughter, and something quite unspeakable where one of the two frontal puffs of that orange turban had become disarranged with the shakings of that epileptic mirth.

Carter next had consciousness amidst horrible odours beneath a tent-like awning on the deck of a ship, with the marvellous coasts of the Southern Sea flying by in unnatural swiftness. He was not chained, but three of the dark sardonic merchants stood grinning nearby, and the sight of those humps in their turbans made him almost as faint as did the stench that filtered up through the sinister hatches. He saw slip past him the glorious lands and cities of which a fellow-dreamer of earth—a lighthouse-keeper in ancient Kingsport—had often discoursed in the old days, and recognised the templed terraces of Zar, abode of forgotten dreams; the spires of infamous Thalarion, that daemon-city of a thousand wonders where the eidolon Lathi reigns; the charnel gardens of Xura, land of pleasures unattained, and the twin headlands of crystal, meeting above in a resplendent arch, which guard the harbour of Sona-Nyl, blessed land of fancy.

Past all these gorgeous lands the malodorous ship flew unwhole-

somely, urged by the abnormal strokes of those unseen rowers below. And before the day was done Carter saw that the steersman could have no other goal than the Basalt Pillars of the West, beyond which simple folk say splendid Cathuria lies, but which wise dreamers well know are the gates of a monstrous cataract wherein the oceans of earth's dreamland drop wholly to abysmal nothingness and shoot through the empty spaces toward other worlds and other stars and the awful voids outside the ordered universe where the daemon-sultan Azathoth gnaws hungrily in chaos amid pounding and piping and the hellish dancing of the Other Gods, blind, voiceless, tenebrous, and mindless, with their soul and messenger Nyarlathotep.

Meanwhile the three sardonic merchants would give no word of their intent, though Carter well knew that they must be leagued with those who wished to hold him from his quest. It is understood in the land of dream that the Other Gods have many agents moving among men; and all these agents, whether wholly human or slightly less than human, are eager to work the will of those blind and mindless things in return for the favour of their hideous soul and messenger, the crawling chaos Nyarlathotep. So Carter inferred that the merchants of the humped turbans, hearing of his daring search for the Great Ones in their castle on Kadath, had decided to take him away and deliver him to Nyarlathotep for whatever nameless bounty might be offered for such a prize. What might be the land of those merchants, in our known universe or in the eldritch spaces outside, Carter could not guess; nor could he imagine at what hellish trysting-place they would meet the crawling chaos to give him up and claim their reward. He knew, however, that no beings as nearly human as these would dare approach the ultimate nighted throne of the daemon Azathoth in the formless central void.

At the set of sun the merchants licked their excessively wide lips and glared hungrily, and one of them went below and returned from some hidden and offensive cabin with a pot and basket of plates. Then they squatted close together beneath the awning and ate the smoking meat that was passed around. But when they gave Carter a portion, he found something very terrible in the size and shape of it; so that he turned even paler than before and cast that

portion into the sea when no eye was on him. And again he thought of those unseen rowers beneath, and of the suspicious nourishment from which their far too mechanical strength was derived.

It was dark when the galley passed betwixt the Basalt Pillars of the West and the sound of the ultimate cataract swelled portentous from ahead. And the spray of that cataract rose to obscure the stars, and the deck grew damp, and the vessel reeled in the surging current of the brink. Then with a queer whistle and plunge the leap was taken, and Carter felt the terrors of nightmare as earth fell away and the great boat shot silent and comet-like into planetary space. Never before had he known what shapeless black things lurk and caper and flounder all through the aether, leering and grinning at such voyagers as may pass, and sometimes feeling about with slimy paws when some moving object excites their curiosity. These are the nameless larvae of the Other Gods, and like them are blind and without mind, and possessed of singular hungers and thirsts.

But that offensive galley did not aim as far as Carter had feared, for he soon saw that the helmsman was steering a course directly for the moon. The moon was a crescent, shining larger and larger as they approached it, and shewing its singular craters and peaks uncomfortably. The ship made for the edge, and it soon became clear that its destination was that secret and mysterious side which is always turned away from the earth, and which no fully human person, save perhaps the dreamer Snireth-Ko, has ever beheld. The close aspect of the moon as the galley drew near proved very disturbing to Carter, and he did not like the size and shape of the ruins which crumbled here and there. The dead temples on the mountains were so placed that they could have glorified no wholesome or suitable gods, and in the symmetries of the broken columns there seemed to lurk some dark and inner meaning which did not invite solution. And what the structure and proportions of the olden worshippers could have been, Carter steadily refused to conjecture.

When the ship rounded the edge, and sailed over those lands unseen by man, there appeared in the queer landscape certain signs of life, and Carter saw many low, broad, round cottages in fields of grotesque whitish fungi. He noticed that these cottages had no windows, and thought that their shape suggested the huts of Esquimaux. Then he glimpsed the oily waves of a sluggish sea, and

knew that the voyage was once more to be by water—or at least through some liquid. The galley struck the surface with a peculiar sound, and the odd elastic way the waves received it was very perplexing to Carter. They now slid along at great speed, once passing and hailing another galley of kindred form, but generally seeing nothing but that curious sea and a sky that was black and star-strown even though the sun shone scorchingly in it.

There presently rose ahead the jagged hills of a leprous-looking coast, and Carter saw the thick unpleasant grey towers of a city. The way they leaned and bent, the manner in which they were clustered, and the fact that they had no windows at all, was very disturbing to the prisoner; and he bitterly mourned the folly which had made him sip the curious wine of that merchant with the humped turban. As the coast drew nearer, and the hideous stench of that city grew stronger, he saw upon the jagged hills many forests, some of whose trees he recognised as akin to that solitary moon-tree in the enchanted wood of earth, from whose sap the small brown zoogs ferment their peculiar wine.

Carter could now distinguish moving figures on the noisome wharves ahead, and the better he saw them the worse he began to fear and detest them. For they were not men at all, or even approximately men, but great greyish-white slippery things which could expand and contract at will, and whose principal shape—though it often changed—was that of a sort of toad without any eyes, but with a curiously vibrating mass of short pink tentacles on the end of its blunt, vague snout. These objects were waddling busily about the wharves, moving bales and crates and boxes with preternatural strength, and now and then hopping on or off some anchored galley with long oars in their fore paws. And now and then one would appear driving a herd of clumping slaves, which indeed were approximate human beings with wide mouths like those merchants who traded in Dylath-Leen; only these herds, being without turbans or shoes or clothing, did not seem so very human after all. Some of these slaves—the fatter ones, whom a sort of overseer would pinch experimentally—were unloaded from ships and nailed in crates which workers pushed into low warehouses or loaded on great lumbering vans.

Once a van was hitched up and driven off, and the fabulous thing

which drew it was such that Carter gasped, even after having seen the other monstrosities of that hateful place. Now and then a small herd of slaves dressed and turbaned like the dark merchants would be driven aboard a galley, followed by a great crew of the slippery grey toad-things as officers, navigators, and rowers. And Carter saw that the almost-human creatures were reserved for the more ignominious kinds of servitude which required no strength, such as steering and cooking, fetching and carrying, and bargaining with men on the earth or other planets where they traded. These creatures must have been convenient on earth, for they were truly not unlike men when dressed and carefully shod and turbaned, and could haggle in the shops of men without embarrassment or curious explanations. But most of them, unless lean and ill-favoured, were unclothed and packed in crates and drawn off in lumbering lorries by fabulous things. Occasionally other beings were unloaded and crated; some very like these semi-humans, some not so similar, and some not similar at all. And he wondered if any of the poor stout black men of Parg were left to be unloaded and crated and shipped inland in those obnoxious drays.

When the galley landed at a greasy-looking quay of spongy rock a nightmare horde of toad-things wiggled out of the hatches, and two of them seized Carter and dragged him ashore. The smell and aspect of that city are beyond telling, and Carter held only scattered images of the tiled streets and black doorways and endless precipices of grey vertical walls without windows. At length he was dragged within a low doorway and made to climb infinite steps in pitch blackness. It was, apparently, all one to the toad-things whether it were light or dark. The odour of the place was intolerable, and when Carter was locked into a chamber and left alone he scarcely had strength to crawl around and ascertain its form and dimensions. It was circular, and about twenty feet across.

From then on time ceased to exist. At intervals food was pushed in, but Carter would not touch it. What his fate would be, he did not know; but he felt that he was held for the coming of that frightful soul and messenger of infinity's Other Gods, the crawling chaos Nyarlathotep. Finally, after an unguessed span of hours or days, the great stone door swung wide again and Carter was shoved down the stairs and out into the red-litten streets of that fearsome

city. It was night on the moon, and all through the town were stationed slaves bearing torches.

In a detestable square a sort of procession was formed; ten of the toad-things and twenty-four almost-human torch-bearers, eleven on either side, and one each before and behind. Carter was placed in the middle of the line; five toad-things ahead and five behind, and one almost-human torch-bearer on each side of him. Certain of the toad-things produced disgustingly carved flutes of ivory and made loathsome sounds. To that hellish piping the column advanced out of the tiled streets and into nighted plains of obscene fungi, soon commencing to climb one of the lower and more gradual hills that lay behind the city. That on some frightful slope or blasphemous plateau the crawling chaos waited, Carter could not doubt; and he wished that the suspense might soon be over. The whining of those impious flutes was shocking, and he would have given worlds for some even half-normal sound; but these toad-things had no voices, and the slaves did not talk.

Then through that star-specked darkness there did come a normal sound. It rolled from the higher hills, and from all the jagged peaks around it was caught up and echoed in a swelling pandæmoniac chorus. It was the midnight yell of the cat, and Carter knew at last that the old village folk were right when they made low guesses about the cryptical realms which are known only to cats, and to which the elders among cats repair by stealth nocturnally, springing from high housetops. Verily, it is to the moon's dark side that they go to leap and gambol on the hills and converse with ancient shadows, and here amidst that column of foetid things Carter heard their homely, friendly cry, and thought of the steep roofs and warm hearths and little lighted windows of home.

Now much of the speech of cats was known to Randolph Carter, and in this far, terrible place he uttered the cry that was suitable. But that he need not have done, for even as his lips opened he heard the chorus wax and draw nearer, and saw swift shadows against the stars as small graceful shapes leaped from hill to hill in gathering legions. The call of the clan had been given, and before the foul procession had time even to be frightened a cloud of smothering fur and a phalanx of murderous claws were tidally and tempestuously upon it. The flutes stopped, and there were shrieks in the night.

Dying almost-humans screamed, and cats spit and yowled and roared, but the toad-things made never a sound as their stinking green ichor oozed fatally upon that porous earth with the obscene fungi.

It was a stupendous sight while the torches lasted, and Carter had never before seen so many cats. Black, grey, and white; yellow, tiger, and mixed; common, Persian, and Manx; Thibetan, Angora, and Egyptian; all were there in the fury of battle, and there hovered over them some trace of that profound and inviolate sanctity which made their goddess great in the temples of Bubastis. They would leap seven strong at the throat of an almost-human or the pink tentacled snout of a toad-thing and drag it down savagely to the fungous plain, where myriads of their fellows would surge over it and into it with the frenzied claws and teeth of a divine battle-fury. Carter had seized a torch from a stricken slave, but was soon overborne by the surging waves of his loyal defenders. Then he lay in the utter blackness hearing the clangour of war and the shouts of the victors, and feeling the soft paws of his friends as they rushed to and fro over him in the fray.

At last awe and exhaustion closed his eyes, and when he opened them again it was upon a strange scene. The great shining disc of the earth, thirteen times greater than that of the moon as we see it, had risen with floods of weird light over the lunar landscape; and across all those leagues of wild plateau and ragged crest there squatted one endless sea of cats in orderly array. Circle on circle they reached, and two or three leaders out of the ranks were licking his face and purring to him consolingly. Of the dead slaves and toad-things there were not many signs, but Carter thought he saw one bone a little way off in the open space between him and the beginning of the solid circles of the warriors.

Carter now spoke with the leaders in the soft language of cats, and learned that his ancient friendship with the species was well known and often spoken of in the places where cats congregate. He had not been unmarked in Ulthar when he passed through, and the sleek old cats had remembered how he petted them after they had attended to the hungry zoogs who looked evilly at a small black kitten. And they recalled, too, how he had welcomed the very little kitten who came to see him at the inn, and how he had given it a

saucer of rich cream in the morning before he left. The grandfather of that very little kitten was the leader of the army now assembled, for he had seen the evil procession from a far hill and recognised the prisoner as a sworn friend of his kind on earth and in the land of dream.

A yowl now came from a farther peak, and the old leader paused abruptly in his conversation. It was one of the army's outposts, stationed on the highest of the mountains to watch the one foe which earth's cats fear; the very large and peculiar cats from Saturn, who for some reason have not been oblivious of the charm of our moon's dark side. They are leagued by treaty with the evil toad-things, and are notoriously hostile to our earthly cats; so that at this juncture a meeting would have been a somewhat grave matter.

After a brief consultation of generals, the cats rose and assumed a closer formation, crowding protectingly around Carter and preparing to take the great leap through space back to the housetops of our earth and its dreamland. The old field-marshal advised Carter to let himself be borne along smoothly and passively in the massed ranks of furry leapers, and told him how to spring when the rest sprang and land gracefully when the rest landed. He also offered to deposit him in any spot he desired, and Carter decided on the city of Dylath-Leen whence the black galley had set out; for he wished to sail thence for Oriab and the carven crest of Ngranek, and also to warn the people of the city to have no more traffick with black galleys, if indeed that traffick could be tactfully and judiciously broken off. Then, upon a signal, the cats all leaped gracefully with their friend packed securely in their midst; while in a black cave on a far unhallowed summit of the moon-mountains still vainly waited the crawling chaos Nyarlathotep.

The leap of the cats through space was very swift; and being surrounded by his companions, Carter did not see this time the great black shapelessnesses that lurk and caper and flounder in the abyss. Before he fully realised what had happened he was back in his familiar room at the inn at Dylath-Leen, and the stealthy, friendly cats were pouring out of the window in streams. The old leader from Ulthar was the last to leave, and as Carter shook his paw he said he would be able to get home by cockcrow. When dawn came, Carter went downstairs and learned that a week had elapsed since

his capture and leaving. There was still nearly a fortnight to wait for the ship bound toward Oriab, and during that time he said what he could against the black galleys and their infamous ways. Most of the townsfolk believed him; yet so fond were the jewellers of great rubies that none would wholly promise to cease trafficking with the wide-mouthed merchants. If aught of evil ever befalls Dylath-Leen through such traffick, it will not be his fault.

In about a week the desiderate ship put in by the black mole and tall lighthouse, and Carter was glad to see that she was a barque of wholesome men, with painted sides and yellow lateen sails and a grey captain in silken robes. Her cargo was the fragrant resin of Oriab's inner groves, and the delicate pottery baked by the artists of Baharna, and the strange little figures carved from Ngranek's ancient lava. For this they were paid in the wool of Ulthar and the iridescent textiles of Hatheg and the ivory that the black men carve across the river in Parg. Carter made arrangements with the captain to go to Baharna and was told that the voyage would take ten days. And during his week of waiting he talked much with that captain of Ngranek, and was told that very few had seen the carved face thereon; but that most travellers are content to learn its legends from old people and lava-gatherers and image-makers in Baharna and afterward say in their far homes that they have indeed beheld it. The captain was not even sure that any person now living had beheld that carved face, for the wrong side of Ngranek is very difficult and barren and sinister, and there are rumours of caves near the peak wherein dwell the night-gaunts. But the captain did not wish to say just what a night-gaunt might be like, since such cattle are known to haunt most persistently the dreams of those who think too often of them. Then Carter asked that captain about unknown Kadath in the cold waste, and the marvellous sunset city, but of these the good man could truly tell nothing.

Carter sailed out of Dylath-Leen one early morning when the tide turned, and saw the first rays of sunrise on the thin angular towers of that dismal basalt town. And for two days they sailed eastward in sight of green coasts, and saw often the pleasant fishing towns that climbed up steeply with their red roofs and chimney-pots from old dreaming wharves and beaches where nets lay drying. But on the third day they turned sharply south where the roll of the water

was stronger, and soon passed from sight of any land. On the fifth day the sailors were nervous, but the captain apologised for their fears, saying that the ship was about to pass over the weedy walls and broken columns of a sunken city too old for memory, and that when the water was clear one could see so many moving shadows in that deep place that simple folk disliked it. He admitted, moreover, that many ships had been lost in that part of the sea; having been hailed when quite close to it, but never seen again.

That night the moon was very bright, and one could see a great way down in the water. There was so little wind that the ship could not move much, and the ocean was very calm. Looking over the rail Carter saw many fathoms deep the dome of a great temple, and in front of it an avenue of unnatural sphinxes leading to what was once a public square. Dolphins sported merrily in and out of the ruins, and porpoises revelled clumsily here and there, sometimes coming to the surface and leaping clear out of the sea. As the ship drifted on a little the floor of the ocean rose in hills, and one could clearly mark the lines of ancient climbing streets and the washed-down walls of myriad little houses.

Then the suburbs appeared, and finally a great lone building on a hill, of simpler architecture than the other structures, and in much better repair. It was dark and low and covered four sides of a square, with a tower at each corner, a paved court in the centre, and small curious round windows all over it. Probably it was of basalt, though weeds draped the greater part; and such was its lonely and impressive place on that far hill that it may have been a temple or a monastery. Some phosphorescent fish inside it gave the small round windows an aspect of shining, and Carter did not blame the sailors much for their fears. Then by the watery moonlight he noticed an odd high monolith in the middle of that central court, and saw that something was tied to it. And when after getting a telescope from the captain's cabin he saw that that bound thing was a sailor in the silk robes of Oriab, head downward and without any eyes, he was glad that a rising breeze soon took the ship ahead to more healthy parts of the sea.

The next day they spoke a ship with violet sails bound for Zar, in the land of forgotten dreams, with bulbs of strange coloured lilies for cargo. And on the evening of the eleventh day they came in sight

of the isle of Oriab, with Ngranek rising jagged and snow-crowned in the distance. Oriab is a very great isle, and its port of Baharna a mighty city. The wharves of Baharna are of porphyry, and the city rises in great stone terraces behind them, having streets of steps that are frequently arched over by buildings and the bridges between buildings. There is a great canal which goes under the whole city in a tunnel with granite gates and leads to the inland lake of Yath, on whose farther shore are the vast clay-brick ruins of a primal city whose name is not remembered. As the ship drew into the harbour at evening the twin beacons Thon and Thal gleamed a welcome, and in all the million windows of Baharna's terraces mellow lights peeped out quietly and gradually as the stars peep out overhead in the dusk, till that steep and climbing seaport became a glittering constellation hung between the stars of heaven and the reflections of those stars in the still harbour.

The captain, after landing, made Carter a guest in his own small house on the shore of Yath where the rear of the town slopes down to it; and his wife and servants brought strange toothsome foods for the traveller's delight. And in the days after that Carter asked for rumours and legends of Ngranek in all the taverns and public places where lava-gatherers and image-makers meet, but could find no one who had been up the higher slopes or seen the carved face. Ngranek was a hard mountain with only an accursed valley behind it, and besides, one could never depend on the certainty that night-gaunts are altogether fabulous.

When the captain sailed back to Dylath-Leen Carter took quarters in an ancient tavern opening on an alley of steps in the original part of the town, which is built of brick and resembles the ruins of Yath's farther shore. Here he laid his plans for the ascent of Ngranek, and correlated all that he had learned from the lava-gatherers about the roads thither. The keeper of the tavern was a very old man, and had heard so many legends that he was a great help. He even took Carter to an upper room in that ancient house and shewed him a crude picture which a traveller had scratched on the clay wall in the olden days when men were bolder and less reluctant to visit Ngranek's higher slopes. The old tavern-keeper's great-grandfather had heard from his great-grandfather that the traveller who scratched that picture had climbed Ngranek and seen

the carved face, here drawing it for others to behold; but Carter had very great doubts, since the large rough features on the wall were hasty and careless, and wholly overshadowed by a crowd of little companion shapes in the worst possible taste, with horns and wings and claws and curling tails.

At last, having gained all the information he was likely to gain in the taverns and public places of Baharna, Carter hired a zebra and set out one morning on the road by Yath's shore for those inland parts wherein towers stony Ngranek. On his right were rolling hills and pleasant orchards and neat little stone farmhouses, and he was much reminded of those fertile fields that flank the Skai. By evening he was near the nameless ancient ruins on Yath's farther shore, and though old lava-gatherers had warned him not to camp there at night, he tethered his zebra to a curious pillar before a crumbling wall and laid his blanket in a sheltered corner beneath some carvings whose meaning none could decipher. Around him he wrapped another blanket, for the nights are cold in Oriab; and when upon awaking once he thought he felt the wings of some insect brushing his face he covered his head altogether and slept in peace till roused by the magah birds in distant resin groves.

The sun had just come up over the great slope whereon leagues of primal brick foundations and worn walls and occasional cracked pillars and pedestals stretched down desolate to the shore of Yath, and Carter looked about for his tethered zebra. Great was his dismay to see that docile beast stretched prostrate beside the curious pillar to which it had been tied, and still greater was he vexed on finding that the steed was quite dead, with its blood all sucked away through a singular wound in its throat. His pack had been disturbed, and several shiny knick-knacks taken away, and all around on the dusty soil were great webbed footprints for which he could not in any way account. The legends and warnings of lava-gatherers occurred to him and he thought of what had brushed his face in the night. Then he shouldered his pack and strode on toward Ngranek, though not without a shiver when he saw close to him as the highway passed through the ruins a great gaping arch low in the wall of an old temple, with steps leading down into darkness farther than he could peer.

His course now led uphill through wilder and partly wooded

country, and he saw only the huts of charcoal-burners and the camps of those who gathered resin from the groves. The whole air was fragrant with balsam, and all the magah birds sang blithely as they flashed their seven colours in the sun. Near sunset he came on a new camp of lava-gatherers returning with laden sacks from Ngranek's lower slopes; and here he also camped, listening to the songs and tales of the men, and overhearing what they whispered about a companion they had lost. He had climbed high to reach a mass of fine lava above him, and at nightfall did not return to his fellows. When they looked for him the next day they found only his turban, nor was there any sign on the crags below that he had fallen. They did not search any more, because the old men among them said it would be of no use. No one ever found what the night-gaunts took, though those beasts themselves were so uncertain as to be almost fabulous. Carter asked them if night-gaunts sucked blood and liked shiny things and left webbed footprints, but they all shook their heads negatively and seemed frightened at his making such an inquiry. When he saw how taciturn they had become he asked them no more, but went to sleep in his blanket.

The next day he rose with the lava-gatherers and exchanged farewells as they rode west and he rode east on a zebra he had bought of them. Their older men gave him blessings and warnings, and told him he had better not climb too high on Ngranek, but while he thanked them heartily he was in no wise dissuaded. For still did he feel that he must find the gods on unknown Kadath, and win from them a way to that haunting and marvellous city in the sunset. By noon, after a long uphill ride, he came upon some abandoned brick villages of the hill-people who had once dwelt thus close to Ngranek and carved images from its smooth lava. Here they had dwelt till the days of the old tavern-keeper's grandfather, but about that time they felt that their presence was disliked. Their homes had crept even up the mountain's slope, and the higher they built the more people they would miss when the sun rose. At last they decided it would be better to leave altogether, since things were sometimes glimpsed in the darkness which no one could interpret favourably; so in the end all of them went down to the sea and dwelt in Baharna, inhabiting a very old quarter and teaching their sons the old art of image-making which to this day they carry on. It

was from these children of the exiled hill-people that Carter had heard the best tales about Ngranek when searching through Baharna's ancient taverns.

All this time the great gaunt side of Ngranek was looming up higher and higher as Carter approached it. There were sparse trees on the lower slope, and feeble shrubs above them, and then the bare hideous rock rose spectral into the sky to mix with frost and ice and eternal snow. Carter could see the rifts and ruggedness of that sombre stone, and did not welcome the prospect of climbing it. In places there were solid streams of lava, and scoriac heaps that littered slopes and ledges. Ninety aeons ago, before even the gods had danced upon its pointed peak, that mountain had spoken with fire and roared with the voices of the inner thunders. Now it towered all silent and sinister, bearing on the hidden side that secret titan image whereof rumour told. And there were caves in that mountain, which might be empty and alone with elder darkness, or might—if legend spoke truly—hold horrors of a form not to be surmised.

The ground sloped upward to the foot of Ngranek, thinly covered with scrub oaks and ash trees, and strewn with bits of rock, lava, and ancient cinder. There were the charred embers of many camps, where the lava-gatherers were wont to stop, and several rude altars which they had built either to propitiate the Great Ones or to ward off what they dreamed of in Ngranek's high passes and labyrinthine caves. At evening Carter reached the farthestmost pile of embers and camped for the night, tethering his zebra to a sapling and wrapping himself well in his blanket before going to sleep. And all through the night a voonith howled distantly from the shore of some hidden pool, but Carter felt no fear of that amphibious terror, since he had been told with certainty that not one of them dares even approach the slopes of Ngranek.

In the clear sunshine of morning Carter began the long ascent, taking his zebra as far as that useful beast could go, but tying it to a stunted ash tree when the floor of the thin road became too steep. Thereafter he scrambled up alone; first through the forest with its ruins of old villages in overgrown clearings, and then over the tough grass where anaemic shrubs grew here and there. He regretted coming clear of the trees, since the slope was very

precipitous and the whole thing rather dizzying. At length he began to discern all the countryside spread out beneath him whenever he looked around; the deserted huts of the image-makers, the groves of resin trees and the camps of those who gathered from them, the woods where prismatic magahs nest and sing, and even a hint very far away of the shores of Yath and of those forbidding ancient ruins whose name is forgotten. He found it best not to look around, and kept on climbing and climbing till the shrubs became very sparse and there was often nothing but the tough grass to cling to.

Then the soil became meagre, with great patches of bare rock cropping out, and now and then the nest of a condor in a crevice. Finally there was nothing at all but the bare rock, and had it not been very rough and weathered, he could scarcely have ascended farther. Knobs, ledges, and pinnacles, however, helped greatly; and it was cheering to see occasionally the sign of some lava-gatherer scratched clumsily in the friable stone, and know that wholesome human creatures had been there before him. After a certain height the presence of man was further shewn by hand-holds and foot-holds hewn where they were needed, and by little quarries and excavations where some choice vein or stream of lava had been found. In one place a narrow ledge had been chopped artificially to an especially rich deposit far to the right of the main line of ascent. Once or twice Carter dared to look around, and was almost stunned by the spread of landscape below. All the island betwixt him and the coast lay open to his sight, with Baharna's stone terraces and the smoke of its chimneys mystical in the distance. And beyond that the illimitable Southern Sea with all its curious secrets.

Thus far there had been much winding around the mountain, so that the farther and carven side was still hidden. Carter now saw a ledge running upward and to the left which seemed to head the way he wished, and this course he took in the hope that it might prove continuous. After ten minutes he saw it was indeed no cul-de-sac, but that it led steeply on in an arc which would, unless suddenly interrupted or deflected, bring him after a few hours' climbing to that unknown southern slope overlooking the desolate crags and the accursed valley of lava. As new country came into view below him he saw that it was bleaker and wilder than those seaward lands he had traversed. The mountain's side, too, was somewhat different; being

here pierced by curious cracks and caves not found on the straighter route he had left. Some of these were above him and some beneath him, all opening on sheerly perpendicular cliffs and wholly unreachable by the feet of man. The air was very cold now, but so hard was the climbing that he did not mind it. Only the increasing rarity bothered him, and he thought that perhaps it was this which had turned the heads of other travellers and excited those absurd tales of night-gaunts whereby they explained the loss of such climbers as fell from these perilous paths. He was not much impressed by travellers' tales, but had a good curved scimitar in case of any trouble. All lesser thoughts were lost in the wish to see that carven face which might set him on the track of the gods atop unknown Kadath.

At last, in the fearsome iciness of upper space, he came round fully to the hidden side of Ngranek and saw in infinite gulfs below him the lesser crags and sterile abysses of lava which marked the olden wrath of the Great Ones. There was unfolded, too, a vast expanse of country to the south; but it was a desert land without fair fields or cottage chimneys, and seemed to have no ending. No trace of the sea was visible on this side, for Oriab is a great island. Black caverns and odd crevices were still numerous on the sheer vertical cliffs, but none of them was accessible to a climber. There now loomed aloft a great beetling mass which hampered the upward view, and Carter was for a moment shaken with doubt lest it prove impassable. Poised in windy insecurity miles above earth, with only space and death on one side and only slippery walls of rock on the other, he knew for a moment the fear that makes men shun Ngranek's hidden side. He could not turn round, yet the sun was already low. If there were no way aloft, the night would find him crouching there still, and the dawn would not find him at all.

But there was a way, and he saw it in due season. Only a very expert dreamer could have used those imperceptible foot-holds, yet to Carter they were sufficient. Surmounting now the outward-hanging rock, he found the slope above much easier than that below, since a great glacier's melting had left a generous space with loam and ledges. To the left a precipice dropped straight from unknown heights to unknown depths, with a cave's dark mouth

just out of reach above him. Elsewhere, however, the mountain slanted back strongly, and even gave him space to lean and rest.

He felt from the chill that he must be near the snow line, and looked up to see what glittering pinnacles might be shining in that late ruddy sunlight. Surely enough, there was the snow uncounted thousands of feet above, and below it a great beetling crag like that he had just climbed; hanging there forever in bold outline, black against the white of the frozen peak. And when he saw that crag he gasped and cried out aloud, and clutched at the jagged rock in awe; for the titan bulge had not stayed as earth's dawn had shaped it, but gleamed red and stupendous in the sunset with the carved and polished features of a god.

Stern and terrible shone that face that the sunset lit with fire. How vast it was no mind can ever measure, but Carter knew at once that man could never have fashioned it. It was a god chiselled by the hands of the gods, and it looked down haughty and majestic upon the seeker. Rumour had said it was strange and not to be mistaken, and Carter saw that it was indeed so; for those long narrow eyes and long-lobed ears, and that thin nose and pointed chin, all spoke of a race that is not of men but of gods. He clung overawed in that lofty and perilous eyrie, even though it was this which he had expected and come to find; for there is in a god's face more of marvel than prediction can tell, and when that face is vaster than a great temple and seen looking down at sunset in the cryptic silences of that upper world from whose dark lava it was divinely hewn of old, the marvel is so strong that none may escape it.

Here, too, was the added marvel of recognition; for although he had planned to search all dreamland over for those whose likeness to this face might mark them as the gods' children, he now knew that he need not do so. Certainly, the great face carved on that mountain was of no strange sort, but the kin of such as he had seen often in the taverns of the seaport Celephaïs which lies in Ooth-Nargai beyond the Tanarian Hills and is ruled over by that King Kuranos whom Carter once knew in waking life. Every year sailors with such a face came in dark ships from the north to trade their onyx for the carved jade and spun gold and little red singing birds of Celephaïs, and it was clear that these could be no others than the

half-gods he sought. Where they dwelt, there must the cold waste lie close, and within it unknown Kadath and its onyx castle for the Great Ones. So to Celephaïs he must go, far distant from the isle of Oriab, and in such parts as would take him back to Dylath-Leen and up the Skai to the bridge by Nir, and again into the enchanted wood of the zoogs, whence the way would bend northward through the garden lands by Oukranos to the gilded spires of Thran, where he might find a galleon bound over the Cerenerian Sea.

But dusk was now thick, and the great carved face looked down even sterner in shadow. Perched on that ledge night found the seeker; and in the blackness he might neither go down nor go up, but only stand and cling and shiver in that narrow place till the day came, praying to keep awake lest sleep loose his hold and send him down the dizzy miles of air to the crags and sharp rocks of the accursed valley. The stars came out, but save for them there was only black nothingness in his eyes; nothingness leagued with death, against whose beckoning he might do no more than cling to the rocks and lean back away from an unseen brink. The last thing of earth that he saw in the gloaming was a condor soaring close to the westward precipice beside him, and darting screaming away when it came near the cave whose mouth yawned just out of reach.

Suddenly, without a warning sound in the dark, Carter felt his curved scimitar drawn stealthily out of his belt by some unseen hand. Then he heard it clatter down over the rocks below. And between him and the Milky Way he thought he saw a very terrible outline of something noxiously thin and horned and tailed and bat-winged. Other things, too, had begun to blot out patches of stars west of him, as if a flock of vague entities were flapping thickly and silently out of that inaccessible cave in the face of the precipice. Then a sort of cold rubbery arm seized his neck and something else seized his feet, and he was lifted inconsiderately up and swung about in space. Another minute and the stars were gone, and Carter knew that the night-gaunts had got him.

They bore him breathless into that cliffside cavern and through monstrous labyrinths beyond. When he struggled, as at first he did by instinct, they tickled him with deliberation. They made no

sound at all themselves, and even their membraneous wings were silent. They were frightfully cold and damp and slippery, and their paws kneaded one detestably. Soon they were plunging hideously downward through inconceivable abysses in a whirling, giddy, sickening rush of dank, tomb-like air; and Carter felt they were shooting into the ultimate vortex of shrieking and daemonic madness. He screamed again and again, but whenever he did so the black paws tickled him with greater subtlety. Then he saw a sort of grey phosphorescence about, and guessed they were coming even to that inner world of subterrene horror of which dim legends tell, and which is litten only by the pale death-fire wherewith reeks the ghoulish air and the primal mists of the pits at earth's core.

At last far below him he saw faint lines of grey and ominous pinacles which he knew must be the fabled Peaks of Thok. Awful and sinister they stand in the haunted dusk of sunless and eternal depths; higher than man may reckon, and guarding terrible valleys where the bholes crawl and burrow nastily. But Carter preferred to look at them than at his captors, which were indeed shocking and uncouth black beings with smooth, oily, whale-like surfaces, unpleasant horns that curved inward toward each other, bat-wings whose beating made no sound, ugly prehensile paws, and barbed tails that lashed needlessly and disquietingly. And worst of all, they never spoke or laughed, and never smiled because they had no faces at all to smile with, but only a suggestive blankness where a face ought to be. All they ever did was clutch and fly and tickle; that was the way of night-gaunts.

As the band flew lower the Peaks of Thok rose grey and towering on all sides, and one saw clearly that nothing lived on that austere and impassive granite of the endless twilight. At still lower levels the death-fires in the air gave out, and one met only the primal blackness of the void save aloft where the thin peaks stood out goblin-like. Soon the peaks were very far away, and nothing about but great rushing winds with the dankness of nethermost grottoes in them. Then in the end the night-gaunts landed on a floor of unseen things which felt like layers of bones, and left Carter all alone in that black valley. To bring him thither was the duty of the night-gaunts that guard Ngranek; and this done, they flapped away

silently. When Carter tried to trace their flight he found he could not, since even the Peaks of Thok had faded out of sight. There was nothing anywhere but blackness and horror and silence and bones.

Now Carter knew from a certain source that he was in the vale of Pnath, where crawl and burrow the enormous bholes; but he did not know what to expect, because no one has ever seen a bhole or even guessed what such a thing may be like. Bholes are known only by dim rumour, from the rustling they make amongst mountains of bones and the slimy touch they have when they wriggle past one. They cannot be seen because they creep only in the dark. Carter did not wish to meet a bhole, so listened intently for any sound in the unknown depths of bones about him. Even in this fearsome place he had a plan and an objective, for whispers of Pnath and its approaches were not unknown to one with whom he had talked much in the old days. In brief, it seemed fairly likely that this was the spot into which all the ghouls of the waking world cast the refuse of their feastings; and that if he but had good luck he might stumble upon that mighty crag taller even than Thok's peaks which marks the edge of their domain. Showers of bones would tell him where to look, and once found he could call to a ghoul to let down a ladder; for strange to say, he had a very singular link with these terrible creatures.

A man he had known in Boston—a painter of strange pictures with a secret studio in an ancient and unhallowed alley near a graveyard—had actually made friends with the ghouls and had taught him to understand the simpler part of their disgusting meeping and glibbering. This man had vanished at last, and Carter was not sure but that he might find him now, and use for the first time in dreamland that far-away English of his dim waking life. In any case, he felt he could persuade a ghoul to guide him out of Pnath; and it would be better to meet a ghoul, which one can see, than a bhole, which one cannot see.

So Carter walked in the dark, and ran when he thought he heard something among the bones underfoot. Once he bumped into a stony slope, and knew it must be the base of one of Thok's peaks. Then at last he heard a monstrous rattling and clatter which reached far up in the air, and became sure he had come nigh the crag of the ghouls. He was not sure he could be heard from this

valley miles below, but realised that the inner world has strange laws. As he pondered he was struck by a flying bone so heavy that it must have been a skull, and therefore realising his nearness to the fateful crag he sent up as best he might that meeping cry which is the call of the ghoul.

Sound travels slowly, so that it was some time before he heard an answering glibber. But it came at last, and before long he was told that a rope ladder would be lowered. The wait for this was very tense, since there was no telling what might not have been stirred up among those bones by his shouting. Indeed, it was not long before he actually did hear a vague rustling afar off. As this thoughtfully approached, he became more and more uncomfortable; for he did not wish to move away from the spot where the ladder would come. Finally the tension grew almost unbearable, and he was about to flee in panic when the thud of something on the newly heaped bones nearby drew his notice from the other sound. It was the ladder, and after a minute of groping he had it taut in his hands. But the other sound did not cease, and followed him even as he climbed. He had gone fully five feet from the ground when the rattling beneath waxed emphatic, and was a good ten feet up when something swayed the ladder from below. At a height which must have been fifteen or twenty feet he felt his whole side brushed by a great slippery length which grew alternately convex and concave with wriggling, and thereafter he climbed desperately to escape the unendurable nuzzling of that loathsome and overfed bhole whose form no man might see.

For hours he climbed with aching arms and blistered hands, seeing again the grey death-fire and Thok's uncomfortable pinnacles. At last he discerned above him the projecting edge of the great crag of the ghouls, whose vertical side he could not glimpse; and hours later he saw a curious face peering over it as a gargoyle peers over a parapet of Notre Dame. This almost made him lose his hold through faintness, but a moment later he was himself again; for his vanished friend Richard Pickman had once introduced him to a ghoul, and he knew well their canine faces and slumping forms and unmentionable idiosyncrasies. So he had himself well under control when that hideous thing pulled him out of the dizzy emptiness over the edge of the crag, and did not scream at the partly consumed

refuse heaped at one side or at the squatting circles of ghouls who gnawed and watched curiously.

He was now on a dim-litten plain whose sole topographical features were great boulders and the entrances of burrows. The ghouls were in general respectful, even if one did attempt to pinch him while several others eyed his leanness speculatively. Through patient glibbering he made inquiries regarding his vanished friend, and found he had become a ghoul of some prominence in abysses nearer the waking world. A greenish elderly ghoul offered to conduct him to Pickman's present habitation, so despite a natural loathing he followed the creature into a capacious burrow and crawled after him for hours in the blackness of rank mould. They emerged on a dim plain strown with singular relics of earth—old gravestones, broken urns, and grotesque fragments of monuments—and Carter realised with some emotion that he was probably nearer the waking world than at any other time since he had gone down the seven hundred steps from the cavern of flame to the Gate of Deeper Slumber.

There, on a tombstone of 1768 stolen from the Granary Burying Ground in Boston, sat the ghoul which was once the artist Richard Upton Pickman. It was naked and rubbery, and had acquired so much of the ghoulish physiognomy that its human origin was already obscure. But it still remembered a little English, and was able to converse with Carter in grunts and monosyllables, helped out now and then by the glibbering of ghouls. When it learned that Carter wished to get to the enchanted wood and from there to the city Celephaïs in Ooth-Nargai beyond the Tanarian Hills, it seemed rather doubtful; for these ghouls of the waking world do no business in the graveyards of upper dreamland (leaving that to the web-footed wamps that are spawned in dead cities), and many things intervene betwixt their gulf and the enchanted wood, including the terrible kingdom of the gugs.

The gugs, hairy and gigantic, once reared stone circles in that wood and made strange sacrifices to the Other Gods and the crawling chaos Nyarlathotep, until one night an abomination of theirs reached the ears of earth's gods and they were banished to caverns below. Only a great trap-door of stone with an iron ring connects the abyss of the earth-ghouls with the enchanted wood, and this the

gugs are afraid to open because of a curse. That a mortal dreamer could traverse their cavern realm and leave by that door is inconceivable; for mortal dreamers were their former food, and they have legends of the toothsome-ness of such dreamers even though banishment has restricted their diet to the ghosts, those repulsive beings which die in the light, and which live in the vaults of Zin and leap on long hind legs like kangaroos.

So the ghoul that was Pickman advised Carter either to leave the abyss at Sarkomand, that deserted city in the valley below Leng where black nitrous stairways guarded by winged diorite lions lead down from dreamland to the lower gulfs, or to return through a churchyard to the waking world and begin the quest anew down the seventy steps of light slumber to the cavern of flame and the seven hundred steps to the Gate of Deeper Slumber and the enchanted wood. This, however, did not suit the seeker; for he knew nothing of the way from Leng to Ooth-Nargai, and was likewise reluctant to awake lest he forget all he had so far gained in this dream. It were disastrous to his quest to forget the august and celestial faces of those seamen from the north who traded onyx in Celephaïs, and who, being the sons of gods, must point the way to the cold waste and Kadath where the Great Ones dwell.

After much persuasion the ghoul consented to guide his guest inside the great wall of the gugs' kingdom. There was one chance that Carter might be able to steal through that twilight realm of circular stone towers at an hour when the giants would be all gorged and snoring indoors, and reach the central tower with the sign of Koth upon it, which has the stairs leading up to that stone trap-door in the enchanted wood. Pickman even consented to lend three ghouls to help with a tombstone lever in raising the stone door; for of ghouls the gugs are somewhat afraid, and they often flee from their own colossal graveyards when they see feasting there.

He also advised Carter to disguise as a ghoul himself; shaving the beard he had allowed to grow (for ghouls have none), wallowing naked in the mould to get the correct surface, and loping in the usual slumping way, with his clothing carried in a bundle as if it were a choice morsel from a tomb. They would reach the city of the gugs—which is coterminous with the whole kingdom—through the proper burrows, emerging in a cemetery not far from the stair-

containing Tower of Koth. They must beware, however, of a large cave near the cemetery; for this is the mouth of the vaults of Zin, and the vindictive ghastrs are always on watch there murderously for those denizens of the upper abyss who hunt and prey on them. The ghastrs try to come out when the gugs sleep, and they attack ghouls as readily as gugs, for they cannot discriminate. They are very primitive, and eat one another. The gugs have a sentry at a narrow place in the vaults of Zin, but he is often drowsy and is sometimes surprised by a party of ghastrs. Though ghastrs cannot live in real light, they can endure the grey twilight of the abyss for hours.

So at length Carter crawled through endless burrows with three helpful ghouls bearing the slate gravestone of Col. Nehemiah Derby, obiit 1719, from the Charter Street Burying Ground in Salem. When they came again into open twilight they were in a forest of vast lichened monoliths reaching nearly as high as the eye could see and forming the modest gravestones of the gugs. On the right of the hole out of which they wriggled, and seen through aisles of monoliths, was a stupendous vista of Cyclopean round towers mounting up illimitable into the grey air of inner earth. This was the great city of the gugs, whose doorways are thirty feet high. Ghouls come here often, for a buried gug will feed a community for almost a year, and even with the added peril it is better to burrow for gugs than to bother with the graves of men. Carter now understood the occasional titan bones he had felt beneath him in the vale of Pnath.

Straight ahead, and just outside the cemetery, rose a sheer perpendicular cliff at whose base an immense and forbidding cavern yawned. This the ghouls told Carter to avoid as much as possible, since it was the entrance to the unhallowed vaults of Zin where gugs hunt ghastrs in the darkness. And truly, that warning was soon well justified; for the moment a ghou began to creep toward the towers to see if the hour of the gugs' resting had been rightly timed, there glowed in the gloom of that great cavern's mouth first one pair of yellowish-red eyes and then another, implying that the gugs were one sentry less, and that ghastrs have indeed an excellent sharpness of smell. So the ghou returned to the burrow and motioned his companions to be silent. It was best to leave the

ghosts to their own devices, and there was a possibility that they might soon withdraw, since they must naturally be rather tired after coping with a gug sentry in the black vaults. After a moment something about the size of a small horse hopped out into the grey twilight, and Carter turned sick at the aspect of that scabrous and unwholesome beast, whose face is so curiously human despite the absence of a nose, a forehead, and other important particulars.

Presently three other ghosts hopped out to join their fellow, and a ghoul glibbered softly at Carter that their absence of battle-scars was a bad sign. It proved that they had not fought the gug sentry at all, but merely slipped past him as he slept, so that their strength and savagery were still unimpaired and would remain so till they had found and disposed of a victim. It was very unpleasant to see those filthy and disproportioned animals, which soon numbered about fifteen, grubbing about and making their kangaroo leaps in the grey twilight where titan towers and monoliths arose, but it was still more unpleasant when they spoke among themselves in the coughing gutturals of ghosts. And yet, horrible as they were, they were not so horrible as what presently came out of the cave after them with disconcerting suddenness.

It was a paw, fully two feet and a half across, and equipped with formidable talons. After it came another paw, and after that a great black-furred arm to which both of the paws were attached by short forearms. Then two pink eyes shone, and the head of the awakened gug sentry, large as a barrel, wobbled into view. The eyes jutted two inches from each side, shaded by bony protuberances overgrown with coarse hairs. But the head was chiefly terrible because of the mouth. That mouth had great yellow fangs and ran from the top to the bottom of the head, opening vertically instead of horizontally.

But before that unfortunate gug could emerge from the cave and rise to his full twenty feet, the vindictive ghosts were upon him. Carter feared for a moment that he would give an alarm and arouse all his kin, till a ghoul softly glibbered that gugs have no voice, but talk by means of facial expression. The battle which then ensued was truly a frightful one. From all sides the venomous ghosts rushed feverishly at the creeping gug, nipping and tearing with their muzzles, and mauling murderously with their hard pointed hooves.

All the time they coughed excitedly, screaming when the great vertical mouth of the gug would occasionally bite into one of their number, so that the noise of the combat would surely have aroused the sleeping city had not the weakening of the sentry begun to transfer the action farther and farther within the cavern. As it was, the tumult soon receded altogether from sight in the blackness, with only occasional evil echoes to mark its continuance.

Then the most alert of the ghouls gave the signal for all to advance, and Carter followed the loping three out of the forest of monoliths and into the dark noisome streets of that awful city whose rounded towers of Cyclopean stone soared up beyond the sight. Silently they shambled over that rough rock pavement, hearing with disgust the abominable muffled snortings from great black doorways which marked the slumber of the gugs. Apprehensive of the ending of the rest hour, the ghouls set a somewhat rapid pace; but even so the journey was no brief one, for distances in that town of giants are on a great scale. At last, however, they came to a somewhat open space before a tower even vaster than the rest, above whose colossal doorway was fixed a monstrous symbol in bas-relief which made one shudder without knowing its meaning. This was the central tower with the sign of Koth, and those huge stone steps just visible through the dusk within were the beginning of the great flight leading to upper dreamland and the enchanted wood.

There now began a climb of interminable length in utter blackness; made almost impossible by the monstrous size of the steps, which were fashioned for gugs, and were therefore nearly a yard high. Of their number Carter could form no just estimate, for he soon became so worn out that the tireless and elastic ghouls were forced to aid him. All through the endless climb there lurked the peril of detection and pursuit; for though no gug dares lift the stone door to the forest because of the Great Ones' curse, there are no such restraints concerning the tower and the steps, and escaped ghouls are often chased even to the very top. So sharp are the ears of gugs, that the bare feet and hands of the climbers might readily be heard when the city awoke; and it would of course take but little time for the striding giants, accustomed from their ghoult-hunts in the vaults of Zin to seeing without light, to overtake their smaller

and slower quarry on those Cyclopean steps. It was very depressing to reflect that the silent pursuing gugs would not be heard at all, but would come very suddenly and shockingly in the dark upon the climbers. Nor could the traditional fear of gugs for ghouls be depended upon in that peculiar place where the advantages lay so heavily with the gugs. There was also some peril from the furtive and venomous ghastrs, which frequently hopped up into the tower during the sleep hour of the gugs. If the gugs slept long, and the ghastrs returned soon from their deed in the cavern, the scent of the climbers might easily be picked up by those loathsome and ill-disposed things; in which case it would almost be better to be eaten by a gug.

Then, after aeons of climbing, there came a cough from the darkness above; and matters assumed a very grave and unexpected turn. It was clear that a ghastr, or perhaps even more, had strayed into that tower before the coming of Carter and his guides; and it was equally clear that this peril was very close. After a breathless second the leading ghastr pushed Carter to the wall and arranged his two kinsfolk in the best possible way, with the old slate tombstone raised for a crushing blow whenever the enemy might come in sight. Ghastrs can see in the dark, so the party was not as badly off as Carter would have been alone. In another moment the clatter of hooves revealed the downward hopping of at least one beast, and the slab-bearing ghastrs poised their weapon for a desperate blow. Presently two yellowish-red eyes flashed into view, and the panting of the ghastr became audible above its clattering. As it hopped down to the step just above the ghastrs, they wielded the ancient grave-stone with prodigious force, so that there was only a wheeze and a choking before the victim collapsed in a noxious heap. There seemed to be only this one animal, and after a moment of listening the ghastrs tapped Carter as a signal to proceed again. As before, they were obliged to aid him; and he was glad to leave that place of carnage where the ghastr's uncouth remains sprawled invisible in the blackness.

At last the ghastrs brought their companion to a halt; and feeling above him, Carter realised that the great stone trap-door was reached at last. To open so vast a thing completely was not to be thought of, but the ghastrs hoped to get it up just enough to slip the

gravestone under as a prop, and permit Carter to escape through the crack. They themselves planned to descend again and return through the city of the gugs, since their elusiveness was great, and they did not know the way overland to spectral Sarkomand with its lion-guarded gate to the abyss.

Mighty was the straining of those three ghouls at the stone of the door above them, and Carter helped push with as much strength as he had. They judged the edge next the top of the staircase to be the right one, and to this they bent all the force of their disreputably nourished muscles. After a few moments a crack of light appeared; and Carter, to whom that task had been entrusted, slipped the end of the old gravestone in the aperture. There now ensued a mighty heaving; but progress was very slow, and they had of course to return to their first position every time they failed to turn the slab and prop the portal open.

Suddenly their desperation was magnified a thousandfold by a sound on the steps below them. It was only the thumping and rattling of the slain ghaſt's hooved body as it rolled down to lower levels; but of all the possible causes of that body's dislodgment and rolling, none was in the least reassuring. Therefore, knowing the ways of gugs, the ghouls set to with something of a frenzy; and in a surprisingly short time had the door so high that they were able to hold it still whilst Carter turned the slab and left a generous opening. They now helped Carter through, letting him climb up to their rubbery shoulders and later guiding his feet as he clutched at the blessed soil of the upper dreamland outside. Another second and they were through themselves, knocking away the gravestone and closing the great trap-door while a panting became audible beneath. Because of the Great Ones' curse no gug might ever emerge from that portal, so with a deep relief and sense of repose Carter lay quietly on the thick grotesque fungi of the enchanted wood while his guides squatted near in the manner that ghouls rest.

Weird as was that enchanted wood through which he had fared so long ago, it was verily a haven and a delight after the gulfs he had now left behind. There was no living denizen about, for zoogs shun the mysterious door in fear, and Carter at once consulted with his ghouls about their future course. To return through the tower they no longer dared, and the waking world did not appeal to them

when they learned that they must pass the priests Nasht and Kaman-Thah in the cavern of flame. So at length they decided to return through Sarkomand and its gate of the abyss, though of how to get there they knew nothing. Carter recalled that it lies in the valley below Leng, and recalled likewise that he had seen in Dylath-Leen a sinister, slant-eyed old merchant reputed to trade on Leng. Therefore he advised the ghouls to seek out Dylath-Leen, crossing the fields to Nir and the Skai and following the river to its mouth. This they at once resolved to do, and lost no time in loping off, since the thickening of the dusk promised a full night ahead for travel. And Carter shook the paws of those repulsive beasts, thanking them for their help and sending his gratitude to the beast which once was Pickman; but could not help sighing with pleasure when they left. For a ghoul is a ghoul, and at best an unpleasant companion for man. After that Carter sought a forest pool and cleansed himself of the mud of nether earth, thereupon reassuming the clothes he had so carefully carried.

It was now night in that redoubtable wood of monstrous trees, but because of the phosphorescence one might travel as well as by day; wherefore Carter set out upon the well-known route toward Celephaïs, in Ooth-Nargai beyond the Tanarian Hills. And as he went he thought of the zebra he had left tethered to an ash tree on Ngranek in far-away Oriab so many aeons ago, and wondered if any lava-gatherer had fed and released it. And he wondered, too, if he would ever return to Baharna and pay for the zebra that was slain by night in those ancient ruins by Yath's shore, and if the old tavern-keeper would remember him. Such were the thoughts that came to him in the air of the regained upper dreamland.

But presently his progress was halted by a sound from a very large hollow tree. He had avoided the great circle of stones, since he did not care to speak with zoogs just now; but it appeared from the singular fluttering in that huge tree that important councils were in session elsewhere. Upon drawing nearer he made out the accents of a tense and heated discussion; and before long became conscious of matters which he viewed with the greatest concern. For a war on the cats was under debate in that sovereign assembly of zoogs. It all came from the loss of the party which had sneaked after Carter to Ulthar, and which the cats had justly punished for unsuitable inten-

tions. The matter had long rankled; and now, or within at least a month, the marshalled zoogs were about to strike the whole feline tribe in a series of surprise attacks, taking individual cats or groups of cats unawares, and giving not even the myriad cats of Ulthar a proper chance to drill and mobilise. This was the plan of the zoogs, and Carter saw that he must foil it before leaving on his mighty quest.

Very quietly therefore did Randolph Carter steal to the edge of the wood and send the cry of the cat over the starlit fields. And a great grimalkin in a nearby cottage took up the burden and relayed it across leagues of rolling meadow to warriors large and small, black, grey, tiger, white, yellow, and mixed; and it echoed through Nir and beyond the Skai even into Ulthar, and Ulthar's numerous cats called in chorus and fell into a line of march. It was fortunate that the moon was not up, so that all the cats were on earth. Swiftly and silently leaping, they sprang from every hearth and housetop and poured in a great furry sea across the plains to the edge of the wood. Carter was there to greet them, and the sight of shapely, wholesome cats was indeed good for his eyes after the things he had seen and walked with in the abyss. He was glad to see his venerable friend and one-time rescuer at the head of Ulthar's detachment, a collar of rank around his sleek neck, and whiskers bristling at a martial angle. Better still, as a sub-lieutenant in that army was a brisk young fellow who proved to be none other than the very little kitten at the inn to whom Carter had given a saucer of rich cream on that long-vanished morning in Ulthar. He was a strapping and promising cat now, and purred as he shook hands with his friend. His grandfather said he was doing very well in the army, and that he might well expect a captaincy after one more campaign.

Carter now outlined the peril of the cat tribe, and was rewarded by deep-throated purrs of gratitude from all sides. Consulting with the generals, he prepared a plan of instant action which involved marching at once upon the zoog council and other known strongholds of zoogs; forestalling their surprise attacks and forcing them to terms before the mobilisation of their army of invasion. Thereupon without a moment's loss that great ocean of cats flooded the enchanted wood and surged around the council tree and the great stone circle. Flutterings rose to panic pitch as the enemy saw the

newcomers, and there was very little resistance among the furtive and curious brown zoogs. They saw that they were beaten in advance, and turned from thoughts of vengeance to thoughts of present self-preservation.

Half the cats now seated themselves in a circular formation with the captured zoogs in the centre, leaving open a lane down which were marched the additional captives rounded up by the other cats in other parts of the wood. Terms were discussed at length, Carter acting as interpreter, and it was decided that the zoogs might remain a free tribe on condition of rendering to the cats a large annual tribute of grouse, quail, and pheasants from the less fabulous parts of their forest. Twelve young zoogs of noble families were taken as hostages to be kept in the Temple of the Cats at Ulthar, and the victors made it plain that any disappearances of cats on the borders of the zoog domain would be followed by consequences highly disastrous to zoogs. These matters disposed of, the assembled cats broke ranks and permitted the zoogs to slink off one by one to their respective homes, which they hastened to do with many a sullen backward glance.

The old cat general now offered Carter an escort through the forest to whatever border he wished to reach, deeming it likely that the zoogs would harbour dire resentment against him for the frustration of their warlike enterprise. This offer he welcomed with gratitude; not only for the safety it afforded, but because he liked the graceful companionship of cats. So in the midst of a pleasant and playful regiment, relaxed after the successful performance of its duty, Randolph Carter walked with dignity through that enchanted and phosphorescent wood of titan trees, talking of his quest with the old general and his grandson whilst others of the band indulged in fantastic gambols or chased fallen leaves that the wind drove among the fungi of the primeval floor. And the old cat said that he had heard much of unknown Kadath in the cold waste, but did not know where it was. As for the marvellous sunset city, he had not even heard of that, but would gladly relay to Carter anything he might later learn.

He gave the seeker some passwords of great value among the cats of dreamland, and commended him especially to the old chief of the cats in Celephaïs, whither he was bound. That old cat, already

slightly known to Carter, was a dignified Maltese; and would prove highly influential in any transaction. It was dawn when they came to the proper edge of the wood, and Carter bade his friends a reluctant farewell. The young sub-lieutenant he had met as a small kitten would have followed him had not the old general forbidden it, but that austere patriarch insisted that the path of duty lay with the tribe and the army. So Carter set out alone over the golden fields that stretched mysterious beside a willow-fringed river, and the cats went back into the wood.

Well did the traveller know those garden lands that lie betwixt the wood of the Cerenerian Sea, and blithely did he follow the singing river Oukranos that marked his course. The sun rose higher over gentle slopes of grove and lawn, and heightened the colours of the thousand flowers that starred each knoll and dingle. A blessed haze lies upon all this region, wherein is held a little more of the sunlight than other places hold, and a little more of the summer's humming music of birds and bees; so that men walk through it as through a faery place, and feel greater joy and wonder than they ever afterward remember.

By noon Carter reached the jasper terraces of Kiran which slope down to the river's edge and bear that temple of loveliness wherein the King of Ilek-Vad comes from his far realm on the twilight sea once a year in a golden palanquin to pray to the god of Oukranos, who sang to him in youth when he dwelt in a cottage by its banks. All of jasper is that temple, and covering an acre of ground with its walls and courts, its seven pinnaced towers, and its inner shrine where the river enters through hidden channels and the god sings softly in the night. Many times the moon hears strange music as it shines on those courts and terraces and pinnacles, but whether that music be the song of the god or the chant of the cryptical priests, none but the King of Ilek-Vad may say; for only he has entered the temple or seen the priests. Now, in the drowsiness of day, that carven and delicate fane was silent, and Carter heard only the murmur of the great stream and the hum of the birds and bees as he walked onward under an enchanted sun.

All that afternoon the pilgrim wandered on through perfumed meadows and in the lee of gentle riverward hills bearing peaceful thatched cottages and the shrines of amiable gods carven from jas-

per or chrysoberyl. Sometimes he walked close to the bank of Oukranos and whistled to the sprightly and iridescent fish of that crystal stream, and at other times he paused amidst the whispering rushes and gazed at the great dark wood on the farther side, whose trees came down clear to the water's edge. In former dreams he had seen quaint lumbering buopoths come shyly out of that wood to drink, but now he could not glimpse any. Once in a while he paused to watch a carnivorous fish catch a fishing bird, which it lured to the water by shewing its tempting scales in the sun, and grasped by the beak with its enormous mouth as the winged hunter sought to dart down upon it.

Toward evening he mounted a low grassy rise and saw before him flaming in the sunset the thousand gilded spires of Thran. Lofty beyond belief are the alabaster walls of that incredible city, sloping inward toward the top and wrought in one solid piece by what means no man knows, for they are more ancient than memory. Yet lofty as they are with their hundred gates and two hundred turrets, the clustered towers within, all white beneath their golden spires, are loftier still; so that men on the plain around see them soaring into the sky, sometimes shining clear, sometimes caught at the top in tangles of cloud and mist, and sometimes clouded lower down with their utmost pinnacles blazing free above the vapours. And where Thran's gates open on the river are great wharves of marble, with ornate galleons of fragrant cedar and calamander riding gently at anchor, and strange bearded sailors sitting on casks and bales with the hieroglyphs of far places. Landward beyond the walls lies the farm country, where small white cottages dream between little hills, and narrow roads with many stone bridges wind gracefully among streams and gardens.

Down through this verdant land Carter walked at evening, and saw twilight float up from the river to the marvellous golden spires of Thran. And just at the hour of dusk he came to the southern gate, and was stopped by a red-robed sentry till he had told three dreams beyond belief, and proved himself a dreamer worthy to walk up Thran's steep mysterious streets and linger in bazaars where the wares of the ornate galleons were sold. Then into that incredible city he walked; through a wall so thick that the gate was a tunnel, and thereafter amidst curved and undulant ways winding

deep and narrow between the heavenward towers. Lights shone through grated and balconied windows, and the sound of lutes and pipes stole timid from inner courts where marble fountains bubbled. Carter knew his way, and edged down through darker streets to the river, where at an old sea-tavern he found the captains and seamen he had known in myriad other dreams. There he bought his passage to Celephaïs on a great green galleon, and there he stopped for the night after speaking gravely to the venerable cat of that inn, who blinked dozing before an enormous hearth and dreamed of old wars and forgotten gods.

In the morning Carter boarded the galleon bound for Celephaïs, and sat in the prow as the ropes were cast off and the long sail down to the Cerenerian Sea begun. For many leagues the banks were much as they were above Thran, with now and then a curious temple rising on the farther hills toward the right, and a drowsy village on the shore, with steep red roofs and nets spread in the sun. Mindful of his search, Carter questioned all the mariners closely about those whom they had met in the taverns of Celephaïs, asking the names and ways of the strange men with long, narrow eyes, long-lobed ears, thin noses, and pointed chins who came in dark ships from the north and traded onyx for the carved jade and spun gold and little red singing birds of Celephaïs. Of these men the sailors knew not much, save that they talked but seldom and spread a kind of awe about them.

Their land, very far away, was called Inganok, and not many people cared to go thither because it was a cold twilight land, and said to be close to unpleasant Leng; although high impassable mountains towered on the side where Leng was thought to lie, so that none might say whether this evil plateau with its horrible stone villages and unmentionable monastery were really there, or whether the rumour were only a fear that timid people felt in the night when those formidable barrier peaks loomed black against a rising moon. Certainly, men reached Leng from very different oceans. Of other boundaries of Inganok those sailors had no notion, nor had they heard of the cold waste and unknown Kadath save from vague unplaced report. And of the marvellous sunset city which Carter sought they knew nothing at all. So the traveller asked no more of far things, but bided his time till he might talk

with those strange men from cold and twilight Inganok who are the seed of such gods as carved their features on Ngranek.

Late in the day the galleon reached those bends of the river which traverse the perfumed jungles of Kled. Here Carter wished he might disembark, for in those tropic tangles sleep wondrous palaces of ivory, lone and unbroken, where once dwelt fabulous monarchs of a land whose name is forgotten. Spells of the Elder Ones keep those places unharmed and undecayed, for it is written that there may one day be need of them again; and elephant caravans have glimpsed them from afar by moonlight, though none dares approach them closely because of the guardians to which their wholeness is due. But the ship swept on, and dusk hushed the hum of the day, and the first stars above blinked answers to the early fireflies on the banks as that jungle fell far behind, leaving only its fragrance as a memory that it had been. And all through the night that galleon floated on past mysteries unseen and unsuspected. Once a lookout reported fires on the hills to the east, but the sleepy captain said they had better not be looked at too much, since it was highly uncertain just who or what had lit them.

In the morning the river had broadened out greatly, and Carter saw by the houses along the banks that they were close to the vast trading city of Hlanith on the Cerenerian Sea. Here the walls are of rugged granite, and the houses peakedly fantastic with beamed and plastered gables. The men of Hlanith are more like those of the waking world than any others in dreamland; so that the city is not sought except for barter, but is prized for the solid work of its artisans. The wharves of Hlanith are of oak, and there the galleon made fast while the captain traded in the taverns. Carter also went ashore, and looked curiously upon the rutted streets where wooden ox-carts lumbered and feverish merchants cried their wares vacuously in the bazaars. The sea-taverns were all close to the wharves on cobbled lanes salt with the spray of high tides, and seemed exceedingly ancient with their low black-beamed ceilings and casements of greenish bull's-eye panes. Ancient sailors in those taverns talked much of distant ports, and told many stories of the curious men from twilight Inganok, but had little to add to what the seamen of the galleon had told. Then at last, after much unloading and loading, the ship set sail once more over the sunset sea,

and the high walls and gables of Hlanith grew less as the last golden light of day lent them a wonder and beauty beyond any that men had given them.

Two nights and two days the galleon sailed over the Cerenerian Sea, sighting no land and speaking but one other vessel. Then near sunset of the second day there loomed up ahead the snowy peak of Aran with its gingko-trees swaying on the lower slopes, and Carter knew that they were come to the land of Ooth-Nargai and the marvellous city of Celephaïs. Swiftly there came into sight the glittering minarets of that fabulous town, and the untarnished marble walls with their bronze statues, and the great stone bridge where Naraxa joins the sea. Then rose the green gentle hills behind the town, with their groves and gardens of asphodels and the small shrines and cottages upon them; and far in the background the purple ridge of the Tanarians, potent and mystical, behind which lay forbidden ways into the waking world and toward other regions of dream.

The harbour was full of painted galleys, some of which were from the marble cloud-city of Serannian, that lies in ethereal space beyond where the sea meets the sky, and some of which were from more substantial parts on the oceans of dreamland. Among these the steersman threaded his way up to the spice-fragrant wharves, where the galleon made fast in the dusk as the city's million lights began to twinkle out over the water. Ever new seemed this deathless city of vision, for here time has no power to tarnish or destroy. As it has always been is still the turquoise of Nath-Horthath, and the eighty orchid-wreathed priests are the same who builded it ten thousand years ago. Shining still is the bronze of the great gates, nor are the onyx pavements ever worn or broken. And the great bronze statues on the walls look down on merchants and camel drivers older than fable, yet without one grey hair in their forked beards.

Carter did not at once seek out the temple or the palace or the citadel, but stayed by the seaward wall among traders and sailors. And when it was too late for rumours and legends he sought out an ancient tavern he knew well, and rested with dreams of the gods on unknown Kadath whom he sought. The next day he searched all along the quays for some of the strange mariners of Inganok, but was told that none were now in port, their galley not being due

from the north for full two weeks. He found, however, one Thorabonian sailor who had been to Inganok and had worked in the onyx quarries of that twilight place; and this sailor said there was certainly a descent to the north of the peopled region, which everybody seemed to fear and shun. The Thorabonian opined that this desert led around the utmost rim of impassable peaks into Leng's horrible plateau, and that this was why men feared it; though he admitted there were other vague tales of evil presences and nameless sentinels. Whether or not this could be the fabled waste wherein unknown Kadath stands he did not know; but it seemed unlikely that those presences and sentinels, if indeed they truly existed, were stationed for naught.

On the following day Carter walked up the Street of the Pillars to the turquoise temple and talked with the high-priest. Though Nath-Horthath is chiefly worshipped in Celephaïs, all the Great Ones are mentioned in diurnal prayers; and the priest was reasonably versed in their moods. Like Atal in distant Ulthar, he strongly advised against any attempt to see them; declaring that they are testy and capricious, and subject to strange protection from the mindless Other Gods from Outside, whose soul and messenger is the crawling chaos Nyarlathotep. Their jealous hiding of the marvellous sunset city shewed clearly that they did not wish Carter to reach it, and it was doubtful how they would regard a guest whose object was to see them and plead before them. No man had ever found Kadath in the past, and it might be just as well if none ever found it in the future. Such rumours as were told about that onyx castle of the Great Ones were not by any means reassuring.

Having thanked the orchid-crowned high-priest, Carter left the temple and sought the bazaar of the sheep-butchers, where the old chief of Celephaïs' cats dwelt sleek and contented. That grey and dignified being was sunning himself on the onyx pavement, and extended a languid paw as his caller approached. But when Carter repeated the passwords and introductions furnished him by the old cat general of Ulthar, the furry patriarch became very cordial and communicative; and told much of the secret lore known to cats on the seaward slopes of Ooth-Nargai. Best of all, he repeated several things told him furtively by the timid waterfront cats of Celephaïs about the men of Inganok, on whose dark ships no cat will go.

It seems that these men have an aura not of earth about them, though that is not the reason why no cat will sail on their ships. The reason for this is that Inganok holds shadows which no cat can endure, so that in all that cold twilight realm there is never a cheering purr or a homely mew. Whether it be because of things wafted over the impassable peaks from hypothetical Leng, or because of things filtering down from the chilly desert to the north, none may say; but it remains a fact that in that far land there broods a hint of outer space which cats do not like, and to which they are more sensitive than men. Therefore they will not go on the dark ships that seek the basalt quays of Inganok.

The old chief of the cats also told him where to find his friend King Kuranos, who in Carter's latter dreams had reigned alternately in the rose-crystal Palace of the Seventy Delights at Celephaïs and in the turreted cloud-castle of sky-floating Serannian. It seems that he could no more find content in those places, but had formed a mighty longing for the English cliffs and downlands of his boyhood; where in little dreaming villages England's old songs hover at evening behind lattice windows, and where grey church towers peep lovely through the verdure of distant valleys. He could not go back to these things in the waking world because his body was dead; but he had done the next best thing and dreamed a small tract of such countryside in the region east of the city, where meadows roll gracefully up from the sea-cliffs to the foot of the Tanarian Hills. There he dwelt in a grey Gothic manor-house of stone looking on the sea, and tried to think it was ancient Trevor Towers, where he was born and where thirteen generations of his forefathers had first seen the light. And on the coast nearby he had built a little Cornish fishing village with steep cobbled ways, settling therein such people as had the most English faces, and seeking ever to teach them the dear remembered accents of old Cornwall fishers. And in a valley not far off he had reared a great Norman Abbey whose tower he could see from his window, placing around it in the churchyard grey stones with the names of his ancestors carved thereon, and with a moss somewhat like Old England's moss. For though Kuranos was a monarch in the land of dream, with all imagined pomps and marvels, splendours and beauties, ecstasies and delights, novelties and excitements at his command, he would

gladly have resigned forever the whole of his power and luxury and freedom for one blessed day as a simple boy in that pure and quiet England, that ancient, beloved England which had moulded his being and of which he must always be immutably a part.

So when Carter bade that old grey chief of the cats adieu, he did not seek the terraced palace of rose-crystal but walked out the eastern gate and across the daisied fields toward a peaked gable which he glimpsed through the oaks of a park sloping up to the sea-cliffs. And in time he came to a great hedge and a gate with a little brick lodge, and when he rang the bell there hobbled to admit him no robed and anointed lackey of the palace, but a small stubbly old man in a smock who spoke as best he could in the quaint tones of far Cornwall. And Carter walked up the shady path between trees as near as possible to England's trees, and climbed the terraces among gardens set out as in Queen Anne's time. At the door, flanked by stone cats in the old way, he was met by a whiskered butler in suitable livery; and was presently taken to the library where Kuranès, Lord of Ooth-Nargai and the Sky around Seranian, sat pensive in a chair by the window looking on his little sea-coast village and wishing that his old nurse would come in and scold him because he was not ready for that hateful lawn-party at the vicar's, with the carriage waiting and his mother nearly out of patience.

Kuranès, clad in a dressing-gown of the sort favoured by London tailors in his youth, rose eagerly to meet his guest; for the sight of an Anglo-Saxon from the waking world was very dear to him, even if it was a Saxon from Boston, Massachusetts, instead of from Cornwall. And for long they talked of old times, having much to say because both were old dreamers and well versed in the wonders of incredible places. Kuranès, indeed, had been out beyond the stars in the ultimate void, and was said to be the only one who had ever returned sane from such a voyage.

At length Carter brought up the subject of his quest, and asked of his host those questions he had asked of so many others. Kuranès did not know where Kadath was, or the marvellous sunset city; but he did know that the Great Ones were very dangerous creatures to seek out, and that the Other Gods had strange ways of protecting them from impertinent curiosity. He had learned much of the Other

Gods in distant parts of space, especially in that region where form does not exist, and coloured gases study the innermost secrets. The violet gas S'ngac had told him terrible things of the crawling chaos Nyarlathotep, and had warned him never to approach the central void where the daemon-sultan Azathoth gnaws hungrily in the dark. Altogether, it was not well to meddle with the Elder Ones; and if they persistently denied all access to the marvellous sunset city, **it were better not to seek that city.**

Kuranes furthermore doubted whether his guest would profit aught by coming to the city even were he to gain it. He himself had dreamed and yearned long years for lovely Celephais and the land of Ooth-Nargai, and for the freedom and colour and high experience of life devoid of its chains, conventions, and stupidities. But now that he was come into that city and that land, and was the king thereof, he found the freedom and the vividness all too soon worn out, and monotonous for want of linkage with anything firm in his feelings and memories. He was a king in Ooth-Nargai, but found no meaning therein, and drooped always for the old familiar things of England that had shaped his youth. All his kingdom would he give for the sound of Cornish church bells over the downs, and all the thousand minarets of Celephais for the steep homely roofs of the village near his home. So he told his guest that the unknown sunset city might not hold quite the content he sought, and that perhaps it had better remain a glorious and half-remembered dream. For he had visited Carter often in the old waking days, and knew well the lovely New England slopes that had given him birth.

At the last, he was very certain, the seeker would long only for the early remembered scenes; the glow of Beacon Hill at evening, the tall steeples and winding hill streets of quaint Kingsport, the hoary gambrel roofs of ancient and witch-haunted Arkham, and the blessed miles of meads and valleys where stone walls rambled and white farmhouse gables peeped out from bowers of verdure. These things he told Randolph Carter, but still the seeker held to his purpose. And in the end they parted each with his own conviction, and Carter went back through the bronze gate into Celephais and down the Street of the Pillars to the old sea-wall, where he talked more with the mariners of far parts and waited for the dark

ship from cold and twilight Inganok, whose strange-faced sailors and onyx-traders had in them the blood of the Great Ones.

One starlight evening when the Pharos shone splendid over the harbour the longed-for ship put in, and strange-faced sailors and traders appeared one by one and group by group in the ancient taverns along the sea-wall. It was very exciting to see again those living faces so like the godlike features on Ngranek, but Carter did not hasten to speak with the silent seamen. He did not know how much of pride and secrecy and dim supernal memory might fill those children of the Great Ones, and was sure it would not be wise to tell them of his quest or ask too closely of that cold desert stretching north of their twilight land. They talked little with the other folk in those ancient sea-taverns; but would gather in groups in remote corners and sing among themselves the haunting airs of unknown places, or chant long tales to one another in accents alien to the rest of dreamland. And so rare and moving were those airs and tales, that one might guess their wonders from the faces of those who listened, even though the words came to common ears only as strange cadence and obscure melody.

For a week the strange seamen lingered in the taverns and traded in the bazaars of Celephaïs, and before they sailed Carter had taken passage on their dark ship, telling them that he was an old onyx-miner and wishful to work in their quarries. That ship was very lovely and cunningly wrought, being of teakwood with ebony fittings and trceries of gold, and the cabin in which the traveller lodged had hangings of silk and velvet. One morning at the turn of the tide the sails were raised and the anchor lifted, and as Carter stood on the high stern he saw the sunrise-blazing walls and bronze statues and golden minarets of ageless Celephaïs sink into the distance, and the snowy peak of Mount Aran grow smaller and smaller. By noon there was nothing in sight save the gentle blue of the Cerenerian Sea, with one painted galley afar off bound for that cloud-hung realm of Serannian where the sea meets the sky.

And night came with gorgeous stars, and the dark ship steered for Charles' Wain and the Little Bear as they swung slowly round the pole. And the sailors sang strange songs of unknown places, and then stole off one by one to the forecandle while the wistful watchers murmured old chants and leaned over the rail to glimpse

the luminous fish playing in bowers beneath the sea. Carter went to sleep at midnight, and rose in the glow of a young morning, marking that the sun seemed farther south than was its wont. And all through that second day he made progress in knowing the men of the ship, getting them little by little to talk of their cold twilight land, of their exquisite onyx city, and of their fear of the high and impassable peaks beyond which Leng was said to be. They told him how sorry they were that no cats would stay in the land of Inganok, and how they thought the hidden nearness of Leng was to blame for it. Only of the stony desert to the north they would not talk. There was something disquieting about that desert, and it was thought expedient not to admit its existence.

On later days they talked of the quarries in which Carter said he was going to work. There were many of them, for all the city of Inganok was builded of onyx, whilst great polished blocks of it were traded in Rinar, Ogrothan, and Celephais, and at home with the merchants of Thraa, Ilarneke, and Kadatheron, for the beautiful wares of those fabulous ports. And far to the north, almost in that cold desert whose existence the men of Inganok did not care to admit, there was an unused quarry greater than all the rest; from which had been hewn in forgotten times such prodigious lumps and blocks that the sight of their chiselled vacancies struck terror to all who beheld. Who had mined those incredible blocks, and whither they had been transported, no man might say; but it was thought best not to trouble that quarry, around which such inhuman memories might conceivably cling. So it was left all alone in the twilight, with only the raven and the rumoured shantak-bird to brood on its immensities. When Carter heard of this quarry he was moved to deep thought, for he knew from old tales that the Great Ones' castle atop unknown Kadath is of onyx.

Each day the sun wheeled lower and lower in the sky, and the mists overhead grew thicker and thicker. And in two weeks there was not any sunlight at all, but only a weird grey twilight shining through a dome of eternal cloud by day, and a cold starless phosphorescence from the under side of that cloud by night. On the twentieth day a great jagged rock in the sea was sighted from afar, the first land glimpsed since Aran's snowy peak had dwindled behind the ship. Carter asked the captain the name of that rock, but

was told that it had no name and had never been sought by any vessel because of the sounds that came from it at night. And when, after dark, a dull and ceaseless howling arose from that jagged granite place, the traveller was glad that no stop had been made, and that the rock had no name. The seamen prayed and chanted till the noise was out of earshot, and Carter dreamed terrible dreams within dreams in the small hours.

Two mornings after that there loomed far ahead and to the east a line of great grey peaks whose tops were lost in the changeless clouds of that twilight world. And at the sight of them the sailors sang glad songs, and some knelt down on the deck to pray; so that Carter knew they were come to the land of Inganok and would soon be moored to the basalt quays of the great town bearing that land's name. Toward noon a dark coast-line appeared, and before three o'clock there stood out against the north the bulbous domes and fantastic spires of the onyx city. Rare and curious did that archaic city rise above its walls and quays, all of delicate black with scrolls, flutings, and arabesques of inlaid gold. Tall and many-windowed were the houses, and carved on every side with flowers and patterns whose dark symmetries dazzled the eye with a beauty more poignant than light. Some ended in swelling domes that tapered to a point, others in terraced pyramids whereon rose clustered minarets displaying every phase of strangeness and imagination. The walls were low, and pierced by frequent gates, each under a great arch rising high above the general level and capped by the head of a god chiselled with that same skill displayed in the monstrous face on distant Ngranek. On a hill in the centre rose a sixteen-angled tower greater than all the rest and bearing a high pinnacled belfry resting on a flattened dome. This, the seamen said, was the Temple of the Elder Ones, and was ruled by an old high-priest sad with inner secrets.

At intervals the clang of a strange bell shivered over the onyx city, answered each time by a peal of mystic music made up of horns, viols, and chanting voices. And from a row of tripods on a gallery round the high dome of the temple there burst flares of flame at certain moments; for the priests and people of that city were wise in the primal mysteries, and faithful in keeping the rhythms of the Great Ones as set forth in scrolls older than the Pnakotic Manu-

scripts. As the ship rode past the great basalt breakwater into the harbour the lesser noises of the city grew manifest, and Carter saw the slaves, sailors, and merchants on the docks. The sailors and merchants were of the strange-faced race of the gods, but the slaves were squat, slant-eyed folk said by rumour to have drifted somehow across or around the impassable peaks from valleys beyond Leng. The wharves reached wide outside the city wall and bore upon them all manner of merchandise from the galleys anchored there, while at one end were great piles of onyx both carved and uncarved awaiting shipment to the far markets of Rinar, Ogrothan, and Celephaïs.

It was not yet evening when the dark ship anchored beside a jutting quay of stone, and all the sailors and traders filed ashore and through the arched gate into the city. The streets of that city were paved with onyx, and some of them were wide and straight whilst others were crooked and narrow. The houses near the water were lower than the rest, and bore above their curiously arched doorways certain signs of gold said to be in honour of the respective small gods that favoured each. The captain of the ship took Carter to an old sea-tavern where flocked the mariners of quaint countries, and promised that he would next day shew him the wonders of the twilight city, and lead him to the taverns of the onyx-miners by the northern wall. And evening fell, and little bronze lamps were lighted, and the sailors in that tavern sang songs of remote places. But when from its high tower the great bell shivered over the city, and the peal of the horns and viols and voices rose cryptical in answer thereto, all ceased their songs or tales and bowed silent till the last echo died away. For there is a wonder and a strangeness on the twilight city of Inganok, and men fear to be lax in its rites lest a doom and a vengeance lurk unsuspectedly close.

Far in the shadows of that tavern Carter saw a squat form he did not like, for it was unmistakably that of the old slant-eyed merchant he had seen so long before in the taverns of Dylath-Leen, who was reputed to trade with the horrible stone villages of Leng which no healthy folk visit and whose evil fires are seen at night from afar, and even to have dealt with that high-priest not to be described, which wears a yellow silken mask over its face and dwells all alone in a prehistoric stone monastery. This man had seemed to shew a

queer gleam of knowing when Carter asked the traders of Dylath-Leen about the cold waste and Kadath; and somehow his presence in dark and haunted Inganok, so close to the wonders of the north, was not a reassuring thing. He slipped wholly out of sight before Carter could speak to him, and sailors later said that he had come with a yak caravan from some point not well determined, bearing the colossal and rich-flavoured eggs of the rumoured shantak-bird to trade for the dexterous jade goblets that merchants brought from Ilarne.

On the following morning the ship-captain led Carter through the onyx streets of Inganok, dark under their twilight sky. The inlaid doors and figured house-fronts, carved balconies and crystal-paned oriels, all gleamed with a sombre and polished loveliness; and now and then a plaza would open out with black pillars, colonnades, and the statues of curious beings both human and fabulous. Some of the vistas down long and unbending streets, or through side alleys and over bulbous domes, spires, and arabesqued roofs, were weird and beautiful beyond words; and nothing was more splendid than the massive height of the great central Temple of the Elder Ones with its sixteen carved sides, its flattened dome, and its lofty pinnacled belfry, overtopping all else, and majestic whatever its foreground. And always to the east, far beyond the city walls and the leagues of pasture land, rose the gaunt grey sides of those topless and impassable peaks across which hideous Leng was said to lie.

The captain took Carter to the mighty temple, which is set with its walled garden in a great round plaza whence the streets go as spokes from a wheel's hub. The seven arched gates of that garden, each having over it a carved face like those on the city's gates, are always open; and the people roam reverently at will down the tiled paths and through the little lanes lined with grotesque termini and the shrines of modest gods. And there are fountains, pools, and basins there to reflect the frequent blaze of the tripods on the high balcony, all of onyx and having in them small luminous fish taken by divers from the lower bowers of ocean. When the deep clang from the temple's belfry shivers over the garden and the city, and the answer of the horns and viols and voices peals out from the seven lodges by the garden gates, there issue from the seven doors

of the temple long columns of masked and hooded priests in black, bearing at arm's length before them great golden bowls from which a curious steam rises. And all the seven columns strut peculiarly in single file, legs thrown far forward without bending the knees, down the walks that lead to the seven lodges, wherein they disappear and do not appear again. It is said that subterrene paths connect the lodges with the temple, and that the long files of priests return through them; nor is it unwhispered that deep flights of onyx steps go down to mysteries that are never told. But only a few are those who hint that the priests in the masked and hooded columns are not human priests.

Carter did not enter the temple, because none but the Veiled King is permitted to do that. But before he left the garden the hour of the bell came, and he heard the shivering clang deafeningly above him, and the wailing of the horns and viols and voices loud from the lodges by the gates. And down the seven great walks stalked the long files of bowl-bearing priests in their singular way, giving to the traveller a fear which human priests do not often give. When the last of them had vanished he left that garden, noting as he did so a spot on the pavement over which the bowls had passed. Even the ship-captain did not like that spot, and hurried him on toward the hill whereon the Veiled King's palace rises many-domed and marvellous.

The ways to the onyx palace are steep and narrow, all but that broad curving one where the king and his companions ride on yaks or in yak-drawn chariots. Carter and his guide climbed up an alley that was all steps, between inlaid walls bearing strange signs in gold, and under balconies and oriels whence sometimes floated soft strains of music or breaths of exotic fragrance. Always ahead loomed those titan walls, mighty buttresses, and clustered and bulbous domes for which the Veiled King's palace is famous; and at length they passed under a great black arch and emerged in the gardens of the monarch's pleasure. There Carter paused in faintness at so much of beauty; for the onyx terraces and colonnaded walks, the gay parterres and delicate flowering trees espaliered to golden lattices, the brazen urns and tripods with cunning bas-reliefs, the pedestalled and almost breathing statues of veined black marble, the basalt-bottomed lagoons and tiled fountains with

luminous fish, the tiny temples of iridescent singing birds atop carven columns, the marvellous scrollwork of the great bronze gates, and the blossoming vines trained along every inch of the polished walls all joined to form a sight whose loveliness was beyond reality, and half-fabulous even in the land of dream. There it shimmered like a vision under that grey twilight sky, with the domed and fretted magnificence of the palace ahead, and the fantastic silhouette of the distant impassable peaks on the right. And ever the small birds and the fountains sang, while the perfume of rare blossoms spread like a veil over that incredible garden. No other human presence was there, and Carter was glad it was so. Then they turned and descended again the onyx alley of steps, for the palace itself no visitor may enter; and it is not well to look too long and steadily at the great central dome, since it is said to house the archaic father of all the rumoured shantak-birds, and to send out queer dreams to the curious.

After that the captain took Carter to the north quarter of the town, near the Gate of the Caravans, where are the taverns of the yak-merchants and the onyx-miners. And there, in a low-ceiled inn of quarrymen, they said farewell; for business called the captain whilst Carter was eager to talk with miners about the north. There were many men in that inn, and the traveller was not long in speaking to some of them; saying that he was an old miner of onyx, and anxious to know somewhat of Inganok's quarries. But all that he learnt was not much more than he knew before, for the miners were timid and evasive about the cold desert to the north and the quarry that no man visits. They had fears of fabled emissaries from around the mountains where Leng is said to lie, and of evil presences and nameless sentinels far north among the scattered rocks. And they whispered also that the rumoured shantak-birds are no wholesome things; it being indeed for the best that no man has ever truly seen one (for that fabled father of shantaks in the king's dome is fed in the dark).

The next day, saying that he wished to look over all the various mines for himself and to visit the scattered farms and quaint onyx villages of Inganok, Carter hired a yak and stuffed great leathern saddle-bags for a journey. Beyond the Gate of the Caravans the road lay straight betwixt tilled fields, with many odd farmhouses

crowned by low domes. At some of these houses the seeker stopped to ask questions; once finding a host so austere and reticent, and so full of an unplaced majesty like to that in the huge features on Ngranek, that he felt certain he had come at last upon one of the Great Ones themselves, or upon one with full nine-tenths of their blood, dwelling amongst men. And to that austere and reticent cotter he was careful to speak very well of the gods, and to praise all the blessings they had ever accorded him.

That night Carter camped in a roadside meadow beneath a great lygath-tree to which he tied his yak, and in the morning resumed his northward pilgrimage. At about ten o'clock he reached the small-domed village of Urg, where traders rest and miners tell their tales, and paused in its taverns till noon. It is here that the great caravan road turns west toward Selarn, but Carter kept on north by the quarry road. All the afternoon he followed that rising road, which was somewhat narrower than the great highway, and which now led through a region with more rocks than tilled fields. And by evening the low hills on his left had risen into sizeable black cliffs, so that he knew he was close to the mining country. All the while the great gaunt sides of the impassable mountains towered afar off at his right, and the farther he went, the worse tales he heard of them from the scattered farmers and traders and drivers of lumbering onyx-carts along the way.

On the second night he camped in the shadow of a large black crag, tethering his yak to a stake driven in the ground. He observed the greater phosphorescence of the clouds at this northerly point, and more than once thought he saw dark shapes outlined against them. And on the third morning he came in sight of the first onyx quarry, and greeted the men who there laboured with picks and chisels. Before evening he had passed eleven quarries; the land being here given over altogether to onyx cliffs and boulders, with no vegetation at all, but only great rocky fragments scattered about a floor of black earth, with the grey impassable peaks always rising gaunt and sinister on his right. The third night he spent in a camp of quarry men whose flickering fires cast weird reflections on the polished cliffs to the west. And they sang many songs and told many tales, shewing such strange knowledge of the olden days and the habits of gods that Carter could see they held many latent mem-

ories of their sires the Great Ones. They asked him whither he went, and cautioned him not to go too far to the north; but he replied that he was seeking new cliffs of onyx, and would take no more risks than were common among prospectors. In the morning he bade them adieu and rode on into the darkening north, where they had warned him he would find the feared and unvisited quarry whence hands older than men's hands had wrenched prodigious blocks. But he did not like it when, turning back to wave a last farewell, he thought he saw approaching the camp that squat and evasive old merchant with slanting eyes, whose conjectured traffick with Leng was the gossip of distant Dylath-Leen.

After two more quarries the inhabited part of Inganok seemed to end, and the road narrowed to a steeply rising yak-path among forbidding black cliffs. Always on the right towered the gaunt and distant peaks, and as Carter climbed farther and farther into this untraversed realm he found it grew darker and colder. Soon he perceived that there were no prints of feet or hooves on the black path beneath, and realised that he was indeed come into strange and deserted ways of elder time. Once in a while a raven would croak far overhead, and now and then a flapping behind some vast rock would make him think uncomfortably of the rumoured shantak-bird. But in the main he was alone with his shaggy steed, and it troubled him to observe that this excellent yak became more and more reluctant to advance, and more and more disposed to snort affrightedly at any small noise along the route.

The path now contracted between sable and glistening walls, and began to display an even greater steepness than before. It was a bad footing, and the yak often slipped on the stony fragments strown thickly about. In two hours Carter saw ahead a definite crest, beyond which was nothing but dull grey sky, and blessed the prospect of a level or downward course. To reach this crest, however, was no easy task; for the way had grown nearly perpendicular, and was perilous with loose black gravel and small stones. Eventually Carter dismounted and led his dubious yak; pulling very hard when the animal balked or stumbled, and keeping his own footing as best he might. Then suddenly he came to the top and saw beyond, and gasped at what he saw.

The path indeed led straight ahead and slightly down, with the

same lines of high natural walls as before; but on the left hand there opened out a monstrous space, vast acres in extent, where some archaic power had riven and rent the native cliffs of onyx in the form of a giants' quarry. Far back into the solid precipice ran that Cyclopean gouge, and deep down within earth's bowels its lower delvings yawned. It was no quarry of man, and the concave sides were scarred with great squares yards wide which told of the size of the blocks once hewn by nameless hands and chisels. High over its jagged rim huge ravens flapped and croaked, and vague whirrings in the unseen depths told of bats or urhags or less mentionable presences haunting the endless blackness. There Carter stood in the narrow way amidst the twilight with the rocky path sloping down before him; tall onyx cliffs on his right that lead on as far as he could see, and tall cliffs on the left chopped off just ahead to make that terrible and unearthly quarry.

All at once the yak uttered a cry and burst from his control, leaping past him and darting on in a panic till it vanished down the narrow slope toward the north. Stones kicked by its flying hooves fell over the brink of the quarry and lost themselves in the dark without any sound of striking bottom; but Carter ignored the perils of that scanty path as he raced breathlessly after the flying steed. Soon the left-hand cliffs resumed their course, making the way once more a narrow lane; and still the traveller leaped on after the yak whose great wide prints told of its desperate flight.

Once he thought he heard the hoofbeats of the frightened beast, and doubled his speed from this encouragement. He was covering miles, and little by little the way was broadening in front till he knew he must soon emerge on the cold and dreaded desert to the north. The gaunt grey flanks of the distant impassable peaks were again visible above the right-hand crags, and ahead were the rocks and boulders of an open space which was clearly a foretaste of the dark and limitless plain. And once more those hoofbeats sounded in his ears, plainer than before, but this time giving terror instead of encouragement because he realised that they were not the frightened hoofbeats of his fleeing yak. These beats were ruthless and purposeful, and they were behind him.

Carter's pursuit of the yak became now a flight from an unseen thing, for though he dared not glance over his shoulder he felt that

the presence behind him could be nothing wholesome or mentionable. His yak must have heard or felt it first, and he did not like to ask himself whether it had followed him from the haunts of men or had floundered up out of that black quarry pit. Meanwhile the cliffs had been left behind, so that the oncoming night fell over a great waste of sand and spectral rocks wherein all paths were lost. He could not see the hoofprints of his yak, but always from behind him there came that detestable clopping; mingled now and then with what he fancied were titanic flappings and whirrings. That he was losing ground seemed unhappily clear to him, and he knew he was hopelessly lost in this broken and blasted desert of meaningless rocks and untravelled sands. Only those remote and impassable peaks on the right gave him any sense of direction, and even they were less clear as the grey twilight waned and the sickly phosphorescence of the clouds took its place.

Then dim and misty in the darkling north before him he glimpsed a terrible thing. He had thought it for some moments a range of black mountains, but now he saw it was something more. The phosphorescence of the brooding clouds shewed it plainly, and even silhouetted parts of it as low vapours glowed behind. How distant it was he could not tell, but it must have been very far. It was thousands of feet high, stretching in a great concave arc from the grey impassable peaks to the unimagined westward spaces, and had once indeed been a ridge of mighty onyx hills. But now those hills were hills no more, for some hand greater than man's had touched them. Silent they squatted there atop the world like wolves or ghouls, crowned with clouds and mists and guarding the secrets of the north forever. All in a great half circle they squatted, those dog-like mountains carven into monstrous watching statues, and their right hands were raised in menace against mankind.

It was only the flickering light of the clouds that made their mitred double heads seem to move, but as Carter stumbled on he saw arise from their shadowy laps great forms whose motions were no delusion. Winged and whirring, those forms grew larger each moment, and the traveller knew his stumbling was at an end. They were not any birds or bats known elsewhere on earth or in dreamland, for they were larger than elephants and had heads like a horse's. Carter knew that they must be the shantak-birds of ill

rumour, and wondered no more what evil guardians and nameless sentinels made men avoid the boreal rock desert. And as he stopped in final resignation he dared at last to look behind him; where indeed was trotting the squat slant-eyed trader of evil legend, grinning astride a lean yak and leading on a noxious horde of leering shantaks to whose wings still clung the rime and nitre of the nether pits.

Trapped though he was by fabulous and hippocephalic winged nightmares that pressed around in great unholy circles, Randolph Carter did not lose consciousness. Lofty and horrible those titan gargoyles towered above him, while the slant-eyed merchant leaped down from his yak and stood grinning before the captive. Then the man motioned Carter to mount one of the repugnant shantaks, helping him up as his judgment struggled with his loathing. It was hard work ascending, for the shantak-bird has scales instead of feathers, and those scales are very slippery. Once he was seated, the slant-eyed man hopped up behind him, leaving the lean yak to be led away northward toward the ring of carven mountains by one of the incredible bird colossi.

There now followed a hideous whirl through frigid space, endlessly up and eastward toward the gaunt grey flanks of those impassable mountains beyond which Leng was said to lie. Far above the clouds they flew, till at last there lay beneath them those fabled summits which the folk of Inganok have never seen, and which lie always in high vortices of gleaming mist. Carter beheld them very plainly as they passed below, and saw upon their topmost peaks strange caves which made him think of those on Ngranek; but he did not question his captor about these things when he noticed that both the man and the horse-headed shantak appeared oddly fearful of them, hurrying past nervously and shewing great tension until they were left far in the rear.

The shantak now flew lower, revealing beneath the canopy of cloud a grey barren plain whereon at great distances shone little feeble fires. As they descended there appeared at intervals lone huts of granite and bleak stone villages whose tiny windows glowed with pallid light. And there came from those huts and villages a shrill droning of pipes and a nauseous rattle of crotala which proved at once that Inganok's people are right in their geographick

rumours. For travellers have heard such sounds before, and know that they float only from the cold desert plateau which healthy folk never visit; that haunted place of evil and mystery which is Leng.

Around the feeble fires dark forms were dancing, and Carter was curious as to what manner of beings they might be; for no healthy folk have ever been to Leng, and the place is known only by its fires and stone huts as seen from afar. Very slowly and awkwardly did those forms leap, and with an insane twisting and bending not good to behold; so that Carter did not wonder at the monstrous evil imputed to them by vague legend, or the fear in which all dreamland holds their abhorrent frozen plateau. As the shantak flew lower, the repulsiveness of the dancers became tinged with a certain hellish familiarity; and the prisoner kept straining his eyes and racking his memory for clues to where he had seen such creatures before.

They leaped as though they had hooves instead of feet, and seemed to wear a sort of wig or headpiece with small horns. Of other clothing they had none, but most of them were quite furry. Behind they had dwarfish tails, and when they glanced upward he saw the excessive width of their mouths. Then he knew what they were, and that they did not wear any wigs or headpieces after all. For the cryptic folk of Leng were of one race with the uncomfortable merchants of the black galleys that traded rubies at Dylath-Leen; those not quite human merchants who are the slaves of the monstrous moon-things! They were indeed the same dark folk who had shanghaied Carter on their noisome galley so long ago, and whose kith he had seen driven in herds about the unclean wharves of that accursed lunar city, with the leaner ones toiling and the fatter ones taken away in crates for other needs of their polypous and amorphous masters. Now he saw where such ambiguous creatures came from, and shuddered at the thought that Leng must be known to these formless abominations from the moon.

But the shantak flew on past the fires and the stone huts and the less than human dancers, and soared over sterile hills of grey granite and dim wastes of rock and ice and snow. Day came, and the phosphorescence of low clouds gave place to the misty twilight of that northern world, and still the vile bird winged meaningly through the cold and silence. At times the slant-eyed man talked

with his steed in a hateful and guttural language, and the shantak would answer with tittering tones that rasped like the scratching of ground glass. All this while the land was getting higher, and finally they came to a windswept table-land which seemed the very roof of a blasted and tenantless world. There, all alone in the hush and the dusk and the cold, rose the uncouth stones of a squat windowless building, around which a circle of crude monoliths stood. In all this arrangement there was nothing human, and Carter surmised from old tales that he was indeed come to that most dreadful and legendary of all places, the remote and prehistoric monastery wherein dwells unaccompanied the high-priest not to be described, which wears a yellow silken mask over its face and prays to the Other Gods and their crawling chaos Nyarlathotep.

The loathsome bird now settled to the ground, and the slant-eyed man hopped down and helped his captive alight. Of the purpose of his seizure Carter now felt very sure; for clearly the slant-eyed merchant was an agent of the darker powers, eager to drag before his masters a mortal whose presumption had aimed at the finding of unknown Kadath and the saying of a prayer before the faces of the Great Ones in their onyx castle. It seemed likely that this merchant had caused his former capture by the slaves of the moon-things in Dylath-Leen, and that he now meant to do what the rescuing cats had baffled; taking the victim to some dread rendezvous with monstrous Nyarlathotep and telling with what boldness the seeking of unknown Kadath had been tried. Leng and the cold waste north of Inganok must be close to the Other Gods, and there the passes to Kadath are well guarded.

The slant-eyed man was small, but the great hippocephalic bird was there to see he was obeyed; so Carter followed where he led, and passed within the circle of standing rocks and into the low arched doorway of that windowless stone monastery. There were no lights inside, but the evil merchant lit a small clay lamp bearing morbid bas-reliefs and prodded his prisoner on through mazes of narrow winding corridors. On the walls of the corridors were painted frightful scenes older than history, and in a style unknown to the archaeologists of earth. After countless aeons their pigments were brilliant still, for the cold and dryness of hideous Leng keep

alive many primal things. Carter saw them fleetingly in the rays of that dim and moving lamp, and shuddered at the tale they told.

Through those archaic frescoes Leng's annals stalked; and the horned, hooved, and wide-mouthed almost-humans danced evilly amidst forgotten cities. There were scenes of old wars, wherein Leng's almost-humans fought with the bloated purple spiders of the neighbouring vales; and there were scenes also of the coming of the black galleys from the moon, and of the submission of Leng's people to the polypous and amorphous blasphemies that hopped and floundered and wriggled out of them. Those slippery greyish-white blasphemies they worshipped as gods, nor ever complained when scores of their best and fatted males were taken away in the black galleys. The monstrous moon-beasts made their camp on a jagged isle in the sea, and Carter could tell from the frescoes that this was none other than the lone nameless rock he had seen when sailing to Inganok; that grey accursed rock which Inganok's seamen shun, and from which vile howlings reverberate all through the night.

And in those frescoes was shewn the great seaport and capital of the almost-humans; proud and pillared betwixt the cliffs and the basalt wharves, and wondrous with high fanes and carven places. Great gardens and columned streets led from the cliffs and from each of the six sphinx-crowned gates to a vast central plaza, and in that plaza was a pair of winged colossal lions guarding the top of a subterrene staircase. Again and again were those huge winged lions shewn, their mighty flanks of diorite glistening in the grey twilight of the day and the cloudy phosphorescence of the night. And as Carter stumbled past their frequent and repeated pictures it came to him at last what indeed they were, and what city it was that the almost-humans had ruled so anciently before the coming of the black galleys. There could be no mistake, for the legends of dreamland are generous and profuse. Indubitably that primal city was no less a place than storied Sarkomand, whose ruins had bleached for a million years before the first true human saw the light, and whose twin titan lions guard eternally the steps that lead down from dreamland to the Great Abyss.

Other views shewed the gaunt grey peaks dividing Leng from Inganok, and the monstrous shantak-birds that build nests on the

ledges half way up. And they shewed likewise the curious caves near the very topmost pinnacles, and how even the boldest of the shantaks fly screaming away from them. Carter had seen those caves when he passed over them, and had noticed their likeness to the caves on Ngranek. Now he knew that the likeness was more than a chance one, for in these pictures were shewn their fearsome denizens; and those bat-wings, curving horns, barbed tails, prehensile paws, and rubbery bodies were not strange to him. He had met those silent, flitting, and clutching creatures before; those mindless guardians of the Great Abyss whom even the Great Ones fear, and who own not Nyarlathotep but hoary Nodens as their lord. For they were the dreaded night-gaunts, who never laugh or smile because they have no faces, and who flop unendingly in the dark betwixt the Vale of Pnath and the passes to the outer world.

The slant-eyed merchant had now prodded Carter into a great domed space whose walls were carved in shocking bas-reliefs, and whose centre held a gaping circular pit surrounded by six malignly stained stone altars in a ring. There was no light in this vast and evil-smelling crypt, and the small lamp of the sinister merchant shone so feebly that one could grasp details only little by little. At the farther end was a high stone dais reached by five steps; and there on a golden throne sat a lumpish figure robed in yellow silk figured with red and having a yellow silken mask over its face. To this being the slant-eyed man made certain signs with his hands, and the lurker in the dark replied by raising a disgustingly carven flute of ivory in silk-covered paws and blowing certain loathsome sounds from beneath its flowing yellow mask. This colloquy went on for some time, and to Carter there was something sickeningly familiar in the sound of that flute and the stench of the malodorous place. It made him think of a frightful red-litten city and of the revolting procession that once filed through it; of that, and of an awful climb through lunar countryside beyond, before the rescuing rush of earth's friendly cats. He knew that the creature on the dais was without doubt the high-priest not to be described, of which legend whispers such fiendish and abnormal possibilities, but he feared to think just what that abhorred high-priest might be.

Then the figured silk slipped a trifle from one of the greyish-white paws, and Carter knew what the noisome high-priest was.

And in that hideous second stark fear drove him to something his reason would never have dared to attempt, for in all his shaken consciousness there was room only for one frantic will to escape from what squatted on that golden throne. He knew that hopeless labyrinths of stone lay betwixt him and the cold table-land outside, and that even on that table-land the noxious shantak still waited; yet in spite of all this there was in his mind only the instant need to get away from that wriggling, silk-robed monstrosity.

The slant-eyed man had set his curious lamp upon one of the high and wickedly stained altar-stones by the pit, and had moved forward somewhat to talk to the high-priest with his hands. Carter, hitherto wholly passive, now gave that man a terrific push with all the wild strength of fear, so that the victim toppled at once into that gaping well which rumour holds to reach down to the hellish Vaults of Zin where gugs hunt ghastrs in the dark. In almost the same second he seized the lamp from the altar and darted out into the frescoed labyrinths, racing this way and that as chance determined and trying not to think of the stealthy padding of shapeless paws on the stones behind him, or of the silent wriggings and crawlings which must be going on back there in lightless corridors.

After a few moments he regretted his thoughtless haste, and wished he had tried to follow backward the frescoes he had passed on the way in. True, they were so confused and duplicated that they could not have done him much good, but he wished none the less he had made the attempt. Those he now saw were even more horrible than those he had seen then, and he knew he was not in the corridors leading outside. In time he became quite sure he was not followed, and slackened his pace somewhat; but scarce had he breathed in half-relief when a new peril beset him. His lamp was waning, and he would soon be in pitch blackness with no means of sight or guidance.

When the light was all gone he groped slowly in the dark, and prayed to the Great Ones for such help as they might afford. At times he felt the stone floor sloping up or down, and once he stumbled over a step for which no reason seemed to exist. The farther he went the damper it seemed to be, and when he was able to feel a junction or the mouth of a side passage he always chose the way which sloped downward the least. He believed, though, that

his general course was down; and the vault-like smell and incrustations on the greasy walls and floor alike warned him he was burrowing deep in Leng's unwholesome table-land. But there was not any warning of the thing which came at last; only the thing itself with its terror and shock and breath-taking chaos. One moment he was groping slowly over the slippery floor of an almost level place, and the next he was shooting dizzily downward in the dark through a burrow which must have been well-nigh vertical.

Of the length of that hideous sliding he could never be sure, but it seemed to take hours of delirious nausea and ecstatic frenzy. Then he realised he was still, with the phosphorescent clouds of a northern night shining sickly above him. All around were crumbling walls and broken columns, and the pavement on which he lay was pierced by straggling grass and wrenched asunder by frequent shrubs and roots. Behind him a basalt cliff rose topless and perpendicular; its dark side sculptured into repellent scenes, and pierced by an arched and carven entrance to the inner blacknesses out of which he had come. Ahead stretched double rows of pillars, and the fragments and pedestals of pillars, that spoke of a broad and bygone street; and from the urns and basins along the way he knew it had been a great street of gardens. Far off at its end the pillars spread to mark a vast round plaza, and in that open circle there loomed gigantic under the lurid night clouds a pair of monstrous things. Huge winged lions of diorite they were, with blackness and shadow between them. Full twenty feet they reared their grotesque and unbroken heads, and snarled derisive on the ruins around them. And Carter knew right well what they must be, for legend tells of only one such twain. They were the changeless guardians of the Great Abyss, and these dark ruins were in truth primordial Sarkomand.

Carter's first act was to close and barricade the archway in the cliff with fallen blocks and odd debris that lay around. He wished no follower from Leng's hateful monastery, for along the way ahead would lurk enough of other dangers. Of how to get from Sarkomand to the peopled parts of dreamland he knew nothing at all; nor could he gain much by descending to the grottoes of the ghouls, since he knew they were no better informed than he. The three ghouls which had helped him through the city of gugs to the

outer world had not known how to reach Sarkomand in their journey back, but had planned to ask old traders in Dylath-Leen. He did not like to think of going again to the subterrene world of gugs and risking once more that hellish tower of Koth with its Cyclopean steps leading to the enchanted wood, yet he felt he might have to try this course if all else failed. Over Leng's plateau past the lone monastery he dared not go unaided; for the high-priest's emissaries must be many, while at the journey's end there would no doubt be the shantaks and perhaps other things to deal with. If he could get a boat he might sail back to Inganok past the jagged and hideous rock in the sea, for the primal frescoes in the monastery labyrinth had shewn that this frightful place lies not far from Sarkomand's basalt quays. But to find a boat in this aeon-deserted city was no probable thing, and it did not appear likely that he could ever make one.

Such were the thoughts of Randolph Carter when a new impression began beating upon his mind. All this while there had stretched before him the great corpse-like width of fabled Sarkomand with its black broken pillars and crumbling sphinx-crowned gates and titan stones and monstrous winged lions against the sickly glow of those luminous night clouds. Now he saw far ahead and on the right a glow that no clouds could account for, and knew he was not alone in the silence of that dead city. The glow rose and fell fitfully, flickering with a greenish tinge which did not reassure the watcher. And when he crept closer, down the littered street and through some narrow gaps between tumbled walls, he perceived that it was a campfire near the wharves with many vague forms clustered darkly around it, and a lethal odour hanging heavily over all. Beyond was the oily lapping of the harbour water with a great ship riding at anchor, and Carter paused in stark terror when he saw that the ship was indeed one of the dreaded black galleys from the moon.

Then, just as he was about to creep back from that detestable flame, he saw a stirring among the vague dark forms and heard a peculiar and unmistakable sound. It was the frightened meeping of a ghoul, and in a moment it had swelled to a veritable chorus of anguish. Secure as he was in the shadow of monstrous ruins, Carter allowed his curiosity to conquer his fear, and crept forward again

instead of retreating. Once in crossing an open street he wriggled worm-like on his stomach, and in another place he had to rise to his feet to avoid making a noise among heaps of fallen marble. But always he succeeded in avoiding discovery, so that in a short time he had found a spot behind a titan pillar whence he could watch the whole green-litten scene of action. There, around a hideous fire fed by the obnoxious stems of lunar fungi, there squatted a stinking circle of the toad-like moon-beasts and their almost-human slaves. Some of these slaves were heating curious iron spears in the leaping flames, and at intervals applying their white-hot points to three tightly trussed prisoners that lay writhing before the leaders of the party. From the motions of their tentacles Carter could see that the blunt-snouted moon-beasts were enjoying the spectacle hugely, and vast was his horror when he suddenly recognised the frantic meeping and knew that the tortured ghouls were none other than the faithful trio which had guided him safely from the abyss and had thereafter set out from the enchanted wood to find Sarkomand and the gate to their native deeps.

The number of malodorous moon-beasts about that greenish fire was very great, and Carter saw that he could do nothing now to save his former allies. Of how the ghouls had been captured he could not guess; but fancied that the grey toad-like blasphemies had heard them inquire in Dylath-Leen concerning the way to Sarkomand and had not wished them to approach so closely the hateful plateau of Leng and the high-priest not to be described. For a moment he pondered on what he ought to do, and recalled how near he was to the gate of the ghouls' black kingdom. Clearly it was wisest to creep east to the plaza of twin lions and descend at once to the gulf, where assuredly he would meet no horrors worse than those above, and where he might soon find ghouls eager to rescue their brethren and perhaps to wipe out the moon-beasts from the black galley. It occurred to him that the portal, like other gates to the abyss, might be guarded by flocks of night-gaunts; but he did not fear these faceless creatures now. He had learned that they are bound by solemn treaties with the ghouls, and the ghoulish Pickman had taught him how to glibber a password they understood.

So Carter began another silent crawl through the ruins, edging

slowly toward the great central plaza and the winged lions. It was ticklish work, but the moon-beasts were pleasantly busy and did not hear the slight noises which he twice made by accident among the scattered stones. At last he reached the open space and picked his way among the stunted trees and briars that had grown up therein. The gigantic lions loomed terrible above him in the sickly glow of the phosphorescent night clouds, but he manfully persisted toward them and presently crept round to their faces, knowing it was on that side he would find the mighty darkness which they guard. Ten feet apart crouched the mocking-faced beasts of diorite, brooding on Cyclopean pedestals whose sides were chiselled into fearsome bas-reliefs. Betwixt them was a tiled court with a central space which had once been railed with balusters of onyx. Midway in this space a black well opened, and Carter soon saw that he had indeed reached the yawning gulf whose crusted and mouldy stone steps lead down to the crypts of nightmare.

Terrible is the memory of that dark descent, in which hours wore themselves away whilst Carter wound sightlessly round and round down a fathomless spiral of steep and slippery stairs. So worn and narrow were the steps, and so greasy with the ooze of inner earth, that the climber never quite knew when to expect a breathless fall and hurtling down to the ultimate pits; and he was likewise uncertain just when or how the guardian night-gaunts would suddenly pounce upon him, if indeed there were any stationed in this primeval passage. All about him was a stifling odour of nether gulfs, and he felt that the air of these choking depths was not made for mankind. In time he became very numb and somnolent, moving more from automatic impulse than from reasoned will; nor did he realise any change when he stopped moving altogether as something quietly seized him from behind. He was flying very rapidly through the air before a malevolent tickling told him that the rubbery night-gaunts had performed their duty.

Awaked to the fact that he was in the cold, damp clutch of the faceless flutterers, Carter remembered the password of the ghouls and glibbered it as loudly as he could amidst the wind and chaos of flight. Mindless though night-gaunts are said to be, the effect was instantaneous; for all tickling stopped at once, and the creatures hastened to shift their captive to a more comfortable position. Thus

encouraged, Carter ventured some explanations; telling of the seizure and torture of three ghouls by the moon-beasts, and of the need of assembling a party to rescue them. The night-gaunts, though inarticulate, seemed to understand what was said; and shewed greater haste and purpose in their flight. Suddenly the dense blackness gave place to the grey twilight of inner earth, and there opened up ahead one of those flat sterile plains on which ghouls love to squat and gnaw. Scattered tombstones and osseous fragments told of the denizens of that place; and as Carter gave a loud meep of urgent summons, a score of burrows emptied forth their leathery, dog-like tenants. The night-gaunts now flew low and set their passenger upon his feet, afterward withdrawing a little and forming a hunched semicircle on the ground while the ghouls greeted the newcomer.

Carter glibbered his message rapidly and explicitly to the grotesque company, and four of them at once departed through different burrows to spread the news to others and gather such troops as might be available for the rescue. After a long wait a ghoulish of some importance appeared, and made significant signs to the night-gaunts, causing two of the latter to fly off into the dark. Thereafter there were constant accessions to the hunched flock of night-gaunts on the plain, till at length the slimy soil was fairly black with them. Meanwhile fresh ghouls crawled out of the burrows one by one, all glibbering excitedly and forming in crude battle array not far from the huddled night-gaunts. In time there appeared that proud and influential ghoulish which was once the artist Richard Pickman of Boston, and to him Carter glibbered a very full account of what had occurred. The erstwhile Pickman, surprised to greet his ancient friend again, seemed very much impressed, and held a conference with other chiefs a little apart from the growing throng.

Finally, after scanning the ranks with care, the assembled chiefs all meeped in unison and began glibbering orders to the crowds of ghouls and night-gaunts. A large detachment of the horned flyers vanished at once, while the rest grouped themselves two by two on their knees with extended fore legs, awaiting the approach of the ghouls one by one. As each ghoulish reached the pair of night-gaunts to which he was assigned, he was taken up and borne away into the blackness; till at last the whole throng had vanished save for

Carter, Pickman, and the other chiefs, and a few pairs of night-gaunts. Pickman explained that night-gaunts are the advance guard and battle steeds of the ghouls, and that the army was issuing forth to Sarkomand to deal with the moon-beasts. Then Carter and the ghoulish chiefs approached the waiting bearers and were taken up by the damp, slippery paws. Another moment and all were whirling in wind and darkness; endlessly up, up, up to the gate of the winged lions and the spectral ruins of primal Sarkomand.

When, after a great interval, Carter saw again the sickly light of Sarkomand's nocturnal sky, it was to behold the great central plaza swarming with militant ghouls and night-gaunts. Day, he felt sure, must be almost due; but so strong was the army that no surprise of the enemy would be needed. The greenish flare near the wharves still glimmered faintly, though the absence of ghoulish meeping shewed that the torture of the prisoners was over for the nonce. Softly glibbering directions to their steeds, and to the flock of riderless night-gaunts ahead, the ghouls presently rose in wide whirring columns and swept on over the bleak ruins toward the evil flame. Carter was now beside Pickman in the front rank of ghouls, and saw as they approached the noisome camp that the moon-beasts were totally unprepared. The three prisoners lay bound and inert beside the fire, while their toad-like captors slumped drowsily about in no certain order. The almost-human slaves were asleep, even the sentinels shirking a duty which in this realm must have seemed to them merely perfunctory.

The final swoop of the night-gaunts and mounted ghouls was very sudden, each of the greyish toad-like blasphemies and their almost-human slaves being seized by a group of night-gaunts before a sound was made. The moon-beasts, of course, were voiceless; and even the slaves had little chance to scream before rubbery paws choked them into silence. Horrible were the writhings of those great jellyish abnormalities as the sardonic night-gaunts clutched them, but nothing availed against the strength of those black prehensile talons. When a moon-beast writhed too violently, a night-gaunt would seize and pull its quivering pink tentacles; which seemed to hurt so much that the victim would cease its struggles. Carter expected to see much slaughter, but found that the ghouls were far subtler in their plans. They glibbered certain simple orders

to the night-gaunts which held the captives, trusting the rest to instinct; and soon the hapless creatures were borne silently away into the Great Abyss, to be distributed impartially amongst the bholes, gugs, ghastrs, and other dwellers in darkness whose modes of nourishment are not painless to their chosen victims. Meanwhile the three bound ghouls had been released and consoled by their conquering kinsfolk, whilst various parties searched the neighbourhood for possible remaining moon-beasts, and boarded the evil-smelling black galley at the wharf to make sure that nothing had escaped the general defeat. Surely enough, the capture had been thorough; for not a sign of further life could the victors detect. Carter, anxious to preserve a means of access to the rest of dream-land, urged them not to sink the anchored galley; and this request was freely granted out of gratitude for his act in reporting the plight of the captured trio. On the ship were found some very curious objects and decorations, some of which Carter cast at once into the sea.

Ghouls and night-gaunts now formed themselves in separate groups, the former questioning their rescued fellows anent past happenings. It appeared that the three had followed Carter's directions and proceeded from the enchanted wood to Dylath-Leen by way of Nir and the Skai, stealing human clothes at a lonely farmhouse and loping as closely as possible in the fashion of a man's walk. In Dylath-Leen's taverns their grotesque ways and faces had aroused much comment; but they had persisted in asking the way to Sarkomand until at last an old traveller was able to tell them. Then they knew that only a ship for Lelag-Leng would serve their purpose, and prepared to wait patiently for such a vessel.

But evil spies had doubtless reported much; for shortly a black galley put into port, and the wide-mouthed ruby merchants invited the ghouls to drink with them in a tavern. Wine was produced from one of those sinister bottles grotesquely carven from a single ruby, and after that the ghouls found themselves prisoners on the black galley as Carter had once found himself. This time, however, the unseen rowers steered not for the moon but for antique Sarkomand; bent evidently on taking their captives before the high-priest not to be described. They had touched at the jagged rock in the northern sea which Inganok's mariners shun, and the ghouls had

there seen for the first time the real masters of the ship; being sickened despite their own callousness by such extremes of malign shapelessness and fearsome odour. There, too, were witnessed the nameless pastimes of the toad-like resident garrison—such pastimes as give rise to the night-howlings which men fear. After that had come the landing at ruined Sarkomand and the beginning of the tortures, whose continuance the present rescue had prevented.

Future plans were next discussed, the three rescued ghouls suggesting a raid on the jagged rock and the extermination of the toad-like garrison there. To this, however, the night-gaunts objected; since the prospect of flying over water did not please them. Most of the ghouls favoured the design, but were at a loss how to follow it without the help of the winged night-gaunts. Thereupon Carter, seeing that they could not navigate the anchored galley, offered to teach them the use of the great banks of oars; to which proposal they eagerly assented. Grey day had now come, and under that leaden northern sky a picked detachment of ghouls filed into the noisome ship and took their seats on the rowers' benches. Carter found them fairly apt at learning, and before night had risked several experimental trips around the harbour. Not till three days later, however, did he deem it safe to attempt the voyage of conquest. Then, the rowers trained and the night-gaunts safely stowed in the forecabin, the party set sail at last; Pickman and the other chiefs gathering on deck and discussing modes of approach and procedure.

On the very first night the howlings from the rock were heard. Such was their timbre that all the galley's crew shook visibly; but most of all trembled the three rescued ghouls who knew precisely what those howlings meant. It was not thought best to attempt an attack by night, so the ship lay to under the phosphorescent clouds to wait for the dawn of a greyish day. When the light was ample and the howlings still the rowers resumed their strokes, and the galley drew closer and closer to that jagged rock whose granite pinnacles clawed fantastically at the dull sky. The sides of the rock were very steep; but on ledges here and there could be seen the bulging walls of queer windowless dwellings, and the low railings guarding travelled high roads. No ship of men had ever come so near the place, or at least, had never come so near and departed

again; but Carter and the ghouls were void of fear and kept inflexibly on, rounding the eastern face of the rock and seeking the wharves which the rescued trio described as being on the southern side within a harbour formed of steep headlands.

The headlands were prolongations of the island proper, and came so closely together that only one ship at a time might pass between them. There seemed to be no watchers on the outside, so the galley was steered boldly through the flume-like strait and into the stagnant foetid harbour beyond. Here, however, all was bustle and activity; with several ships lying at anchor along a forbidding stone quay, and scores of almost-human slaves and moon-beasts by the waterfront handling crates and boxes or driving nameless and fabulous horrors hitched to lumbering lorries. There was a small stone town hewn out of the vertical cliff above the wharves, with the start of a winding road that spiralled out of sight toward higher ledges of the rock. Of what lay inside that prodigious peak of granite none might say, but the things one saw on the outside were far from encouraging.

At sight of the incoming galley the crowds on the wharves displayed much eagerness; those with eyes staring intently, and those without eyes wriggling their pink tentacles expectantly. They did not, of course, realise that the black ship had changed hands; for ghouls look much like the horned and hooved almost-humans, and the night-gaunts were all out of sight below. By this time the leaders had fully formed a plan; which was to loose the night-gaunts as soon as the wharf was touched, and then to sail directly away, leaving matters wholly to the instincts of those almost mindless creatures. Marooned on the rock, the horned flyers would first of all seize whatever living things they found there, and afterward, quite helpless to think except in terms of the homing instinct, would forget their fear of water and fly swiftly back to the abyss; bearing their noisome prey to appropriate destinations in the dark, from which not much would emerge alive.

The ghoul that was Pickman now went below and gave the night-gaunts their simple instructions, while the ship drew very near to the ominous and malodorous wharves. Presently a fresh stir rose along the waterfront, and Carter saw that the motions of the galley had begun to excite suspicion. Evidently the steersman was not

making for the right dock, and probably the watchers had noticed the difference between the hideous ghouls and the almost-human slaves whose places they were taking. Some silent alarm must have been given, for almost at once a horde of the mephitic moon-beasts began to pour from the little black doorways of the windowless houses and down the winding road at the right. A rain of curious javelins struck the galley as the prow hit the wharf, felling two ghouls and slightly wounding another; but at this point all the hatches were thrown open to emit a black cloud of whirring night-gaunts which swarmed over the town like a flock of horned and Cyclopean bats.

The jellyish moon-beasts had procured a great pole and were trying to push off the invading ship, but when the night-gaunts struck them they thought of such things no more. It was a very terrible spectacle to see those faceless and rubbery ticklers at their pastime, and tremendously impressive to watch the dense cloud of them spreading through the town and up the winding roadway to the reaches above. Sometimes a group of the black flutterers would drop a toad-like prisoner from aloft by mistake, and the manner in which the victim would burst was highly offensive to the sight and smell. When the last of the night-gaunts had left the galley the ghoulish leaders glibbered an order of withdrawal, and the rowers pulled quietly out of the harbour between the grey headlands while still the town was a chaos of battle and conquest.

The Pickman ghoul allowed several hours for the night-gaunts to make up their rudimentary minds and overcome their fear of flying over the sea, and kept the galley standing about a mile off the jagged rock while he waited and dressed the wounds of the injured men. Night fell, and the grey twilight gave place to the sickly phosphorescence of low clouds, and all the while the leaders watched the high peaks of that accursed rock for signs of the night-gaunts' flight. Toward morning a black speck was seen hovering timidly over the topmost pinnacle, and shortly afterward the speck had become a swarm. Just before daybreak the swarm seemed to scatter, and within a quarter of an hour it had vanished wholly in the distance toward the northeast. Once or twice something seemed to fall from the thinning swarm into the sea; but Carter did not worry, since he knew from observation that the toad-like moon-beasts can-

not swim. At length, when the ghouls were satisfied that all the night-gaunts had left for Sarkomand and the Great Abyss with their doomed burdens, the galley put back into the harbour betwixt the grey headlands; and all the hideous company landed and roamed curiously over the denuded rock with its towers and eyries and fortresses chiselled from the solid stone.

Frightful were the secrets uncovered in those evil and windowless crypts; for the remnants of unfinished pastimes were many, and in various stages of departure from their primal state. Carter put out of the way certain things which were after a fashion alive, and fled precipitately from a few other things about which he could not be very positive. The stench-filled houses were furnished mostly with grotesque stools and benches carved from moon-trees, and were painted inside with nameless and frantic designs. Countless weapons, implements, and ornaments lay about; including some large idols of solid ruby depicting singular beings not found on the earth. These latter did not, despite their material, invite either appropriation or long inspection; and Carter took the trouble to hammer five of them into very small pieces. The scattered spears and javelins he collected, and with Pickman's approval distributed among the ghouls. Such devices were new to the dog-like lopers, but their relative simplicity made them easy to master after a few concise hints.

The upper parts of the rock held more temples than private homes, and in numerous hewn chambers were found terrible carved altars and doubtfully stained fonts and shrines for the worship of things more monstrous than the mild gods atop Kadath. From the rear of one great temple stretched a low black passage which Carter followed far into the rock with a torch till he came to a lightless domed hall of vast proportions, whose vaultings were covered with daemonic carvings and in whose centre yawned a foul and bottomless well like that in the hideous monastery of Leng where broods alone the high-priest not to be described. On the distant shadowy side, beyond the noisome well, he thought he discerned a small door of strangely wrought bronze; but for some reason he felt an unaccountable dread of opening it or even approaching it, and hastened back through the cavern to his unlovely allies as they shambled about with an ease and abandon he could

scarcely feel. The ghouls had observed the unfinished pastimes of the moon-beasts, and had profited in their fashion. They had also found a hogshead of potent moon-wine, and were rolling it down to the wharves for removal and later use in diplomatic dealings, though the rescued trio, remembering its effect on them in Dylath-Leen, had warned their company to taste none of it. Of rubies from lunar mines there was a great store, both rough and polished, in one of the vaults near the water; but when the ghouls found they were not good to eat they lost all interest in them. Carter did not try to carry any away, since he knew too much about those which had mined them.

Suddenly there came an excited meeping from the sentries on the wharves, and all the loathsome foragers turned from their tasks to stare seaward and cluster round the waterfront. Betwixt the grey headlands a fresh black galley was rapidly advancing, and it could be but a moment before the almost-humans on deck would perceive the invasion of the town and give the alarm to the monstrous things below. Fortunately the ghouls still bore the spears and javelins which Carter had distributed amongst them; and at his command, sustained by the being that was Pickman, they now formed a line of battle and prepared to prevent the landing of the ship. Presently a burst of excitement on the galley told of the crew's discovery of the changed state of things, and the instant stoppage of the vessel proved that the superior numbers of the ghouls had been noted and taken into account. After a moment of hesitation the newcomers silently turned and passed out between the headlands again, but not for an instant did the ghouls imagine that the conflict was averted. Either the dark ship would seek reinforcements, or the crew would try to land elsewhere on the island; hence a party of scouts was at once set up toward the pinnacle to see what the enemy's course would be.

In a very few minutes a ghoul returned breathless to say that the moon-beasts and almost-humans were landing on the outside of the more easterly of the rugged grey headlands, and ascending by hidden paths and ledges which a goat could scarcely tread in safety. Almost immediately afterward the galley was sighted again through the flume-like strait, but only for a second. Then, a few moments later, a second messenger panted down from aloft to say that

another party was landing on the other headland; both being much more numerous than the size of the galley would seem to allow for. The ship itself, moving slowly with only one sparsely manned tier of oars, soon hove in sight betwixt the cliffs, and lay to in the foetid harbour as if to watch the coming fray and stand by for any possible use.

By this time Carter and Pickman had divided the ghouls into three parties, one to meet each of the two invading columns and one to remain in the town. The first two at once scrambled up the rocks in their respective directions, while the third was subdivided into a land party and a sea party. The sea party, commanded by Carter, boarded the anchored galley and rowed out to meet the undermanned galley of the newcomers; whereat the latter retreated through the strait to the open sea. Carter did not at once pursue it, for he knew he might be needed more acutely near the town.

Meanwhile the frightful detachments of the moon-beasts and almost-humans had lumbered up to the top of the headlands and were shockingly silhouetted on either side against the grey twilight sky. The thin hellish flutes of the invaders had now begun to whine, and the general effect of those hybrid, half-amorphous processions was as nauseating as the actual odour given off by the toad-like lunar blasphemies. Then the two parties of the ghouls swarmed into sight and joined the silhouetted panorama. Javelins began to fly from both sides, and the swelling meeps of the ghouls and the bestial howls of the almost-humans gradually joined the hellish whine of the flutes to form a frantick and indescribable chaos of daemon cacophony. Now and then bodies fell from the narrow ridges of the headlands into the sea outside or the harbour inside, in the latter case being sucked quickly under by certain submarine lurkers whose presence was indicated only by prodigious bubbles.

For half an hour this dual battle raged in the sky, till upon the west cliff the invaders were completely annihilated. On the east cliff, however, where the leader of the moon-beast party appeared to be present, the ghouls had not fared so well; and were slowly retreating to the slopes of the pinnacle proper. Pickman had quickly ordered reinforcements for this front from the party in the town, and these had helped greatly in the earlier stages of the combat. Then, when the western battle was over, the victorious survivors

hastened across to the aid of their hard-pressed fellows; turning the tide and forcing the invaders back again along the narrow ridge of the headland. The almost-humans were by this time all slain, but the last of the toad-like horrors fought desperately with the great spears clutched in their powerful and disgusting paws. The time for javelins was now nearly past, and the fight became a hand-to-hand contest of what few spearmen could meet upon that narrow ridge.

As fury and recklessness increased, the number falling into the sea became very great. Those striking the harbour met nameless extinction from the unseen bubblers, but of those striking the open sea some were able to swim to the foot of the cliffs and land on tidal rocks, while the hovering galley of the enemy rescued several moon-beasts. The cliffs were unscalable except where the monsters had debarked, so that none of the ghouls on the rocks could rejoin their battle-line. Some were killed by javelins from the hostile galley or from the moon-beasts above, but a few survived to be rescued. When the security of the land parties seemed assured, Carter's galley sallied forth between the headlands and drove the hostile ship far out to sea; pausing to rescue such ghouls as were on the rocks or still swimming in the ocean. Several moon-beasts washed on rocks or reefs were speedily put out of the way.

Finally, the moon-beasts' galley being safely in the distance and the invading land army concentrated in one place, Carter landed a considerable force on the eastern headland in the enemy's rear; after which the fight was short-lived indeed. Attacked from both sides, the noisome flounders were rapidly cut to pieces or pushed into the sea, till by evening the ghoulish chiefs agreed that the island was again clear of them. The hostile galley, meanwhile, had disappeared; and it was decided that the evil jagged rock had better be evacuated before any overwhelming horde of lunar horrors might be assembled and brought against the victors.

So by night Pickman and Carter assembled all the ghouls and counted them with care, finding that over a fourth had been lost in the day's battles. The wounded were placed on bunks in the galley, for Pickman always discouraged the old ghoulish custom of killing and eating one's own wounded, and the able-bodied troops were assigned to the oars or to such other places as they might most usefully fill. Under the low phosphorescent clouds of night the

galley sailed, and Carter was not sorry to be departing from that island of unwholesome secrets, whose lightless domed hall with its bottomless well and repellent bronze door lingered restlessly in his fancy. Dawn found the ship in sight of Sarkomand's ruined quays of basalt, where a few night-gaunt sentries still waited, squatting like black horned gargoyles on the broken columns and crumbling sphinxes of that fearful city which lived and died before the years of man.

The ghouls made camp amongst the fallen stones of Sarkomand, despatching a messenger for enough night-gaunts to serve them as steeds. Pickman and the other chiefs were effusive in their gratitude for the aid Carter had lent them; and Carter now began to feel that his plans were indeed maturing well, and that he would be able to command the help of these fearsome allies not only in quitting this part of dreamland, but in pursuing his ultimate quest for the gods atop unknown Kadath, and the marvellous sunset city they so strangely withheld from his slumbers. Accordingly he spoke of these things to the ghoulish leaders; telling what he knew of the cold waste wherein Kadath stands and of the monstrous shantaks and the mountains carven into double-headed images which guard it. He spoke of the fear of shantaks for night-gaunts, and of how the vast hippocephalic birds fly screaming from the black burrows high up on the gaunt grey peaks that divide Inganok from hateful Leng. He spoke, too, of the things he had learnt concerning night-gaunts from the frescoes in the windowless monastery of the high-priest not to be described; how even the Great Ones fear them, and how their ruler is not the crawling chaos Nyarlathotep at all, but hoary and immemorial Nodens, Lord of the Great Abyss.

All these things Carter glibbered to the assembled ghouls, and presently outlined that request which he had in mind, and which he did not think extravagant considering the services he had so lately rendered the rubbery, dog-like lopers. He wished very much, he said, for the services of enough night-gaunts to bear him safely through the air past the realm of shantaks and carven mountains, and up into the cold waste beyond the returning tracks of any other mortal. He desired to fly to the onyx castle atop unknown Kadath in the cold waste to plead with the Great Ones for the sunset city they denied him, and felt sure that the night-gaunts could take him

thither without trouble; high above the perils of the plain, and over the hideous double heads of those carven sentinel mountains that squat eternally in the grey dusk. For the horned and faceless creatures there could be no danger from aught of earth, since the Great Ones themselves dread them. And even were unexpected things to come from the Other Gods, who are prone to oversee the affairs of earth's milder gods, the night-gaunts need not fear; for the outer hells are indifferent matters to such silent and slippery flyers as own not Nyarlathotep for their master, but bow only to potent and archaic Nodens.

A flock of ten or fifteen night-gaunts, Carter glibbered, would surely be enough to keep any combination of shantaks at a distance; though perhaps it might be well to have some ghouls in the party to manage the creatures, their ways being better known to their ghoulish allies than to men. The party could land him at some convenient point within whatever walls that fabulous onyx citadel might have, waiting in the shadows for his return or his signal whilst he ventured inside the castle to give prayer to the gods of earth. If any ghouls chose to escort him into the throne-room of the Great Ones, he would be thankful, for their presence would add weight and importance to his plea. He would not, however, insist upon this but merely wished transportation to and from the castle atop unknown Kadath; the final journey being either to the marvellous sunset city itself, in case the gods proved favourable, or back to the earthward Gate of Deeper Slumber in the enchanted wood in case his prayers were fruitless.

Whilst Carter was speaking all the ghouls listened with great attention, and as the moments advanced the sky became black with clouds of those night-gaunts for which messengers had been sent. The winged horrors settled in a semicircle around the ghoulish army, waiting respectfully as the dog-like chieftains considered the wish of the earthly traveller. The ghoul that was Pickman glibbered gravely with its fellows, and in the end Carter was offered far more than he had at most expected. As he had aided the ghouls in their conquest of the moon-beasts, so would they aid him in his daring voyage to realms whence none had ever returned; lending him not merely a few of their allied night-gaunts, but their entire army as they encamped, veteran fighting ghouls and newly assembled night-

gaunts alike, save only a small garrison for the captured black galley and such spoils as had come from the jagged rock in the sea. They would set out through the air whenever he might wish, and once arrived on Kadath a suitable train of ghouls would attend him in state as he placed his petition before earth's gods in their onyx castle.

Moved by a gratitude and satisfaction beyond words, Carter made plans with the ghoulish leaders for his audacious voyage. The army would fly high, they decided, over hideous Leng with its nameless monastery and wicked stone villages; stopping only at the vast grey peaks to confer with the shantak-frightening night-gaunts whose burrows honeycombed their summits. They would then, according to what advice they might receive from those denizens, choose their final course; approaching unknown Kadath either through the desert of carven mountains north of Inganok, or through the more northerly reaches of repulsive Leng itself. Dog-like and soulless as they are, the ghouls and night-gaunts had no dread of what those untrodden deserts might reveal; nor did they feel any deterring awe at the thought of Kadath towering lone with its onyx castle of mystery.

About midday the ghouls and night-gaunts prepared for flight, each ghoul selecting a suitable pair of horned steeds to bear him. Carter was placed well up toward the head of the column beside Pickman, and in front of the whole a double line of riderless night-gaunts was provided as a vanguard. At a brisk meep from Pickman the whole shocking army rose in a nightmare cloud above the broken columns and crumbling sphinxes of primordial Sarkomand; higher and higher, till even the great basalt cliff behind the town was cleared, and the cold, sterile table-land of Leng's outskirts laid open to sight. Still higher flew the black host, till even this table-land grew small beneath them; and as they worked northward over the windswept plateau of horror Carter saw once again with a shudder the circle of crude monoliths and the squat windowless building which he knew held that frightful silken-masked blasphemy from whose clutches he had so narrowly escaped. This time no descent was made as the army swept bat-like over the sterile landscape, passing the feeble fires of the unwholesome stone villages at a great altitude, and pausing not at all to mark the morbid

twistings of the hooved, horned almost-humans that dance and pipe eternally therein. Once they saw a shantak-bird flying low over the plain, but when it saw them it screamed noxiously and flapped off to the north in grotesque panic.

At dusk they reached the jagged grey peaks that form the barrier of Inganok, and hovered about those strange caves near the summits which Carter recalled as so frightful to the shantaks. At the insistent meeping of the ghoulish leaders there issued forth from each lofty burrow a stream of horned black flyers; with which the ghouls and night-gaunts of the party conferred at length by means of ugly gestures. It soon became clear that the best course would be that over the cold waste north of Inganok, for Leng's northward reaches are full of unseen pitfalls that even the night-gaunts dislike; abysmal influences centring in certain white hemispherical buildings on curious knolls, which common folklore associates unpleasantly with the Other Gods and their crawling chaos Nyarlathotep.

Of Kadath the flutterers of the peaks knew almost nothing, save that there must be some mighty marvel toward the north, over which the shantaks and the carven mountains stand guard. They hinted at rumoured abnormalities of proportion in those trackless leagues beyond, and recalled vague whispers of a realm where night broods eternally; but of definite data they had nothing to give. So Carter and his party thanked them kindly; and, crossing the topmost granite pinnacles to the skies of Inganok, dropped below the level of the phosphorescent night clouds and beheld in the distance those terrible squatting gargoyles that were mountains till some titan hand carved fright into their virgin rock.

There they squatted, in a hellish half-circle, their legs on the desert sand and their mitres piercing the luminous clouds; sinister, wolf-like, and double-headed, with faces of fury and right hands raised, dully and malignly watching the rim of man's world and guarding with horror the reaches of a cold northern world that is not man's. From their hideous laps rose evil shantaks of elephantine bulk, but these all fled with insane titters as the vanguard of night-gaunts was sighted in the misty sky. Northward above those gargoyle mountains the army flew, and over leagues of dim desert where never a landmark rose. Less and less luminous grew the clouds, till at length Carter could see only blackness around him;

but never did the winged steeds falter, bred as they were in earth's blackest crypts, and seeing not with any eyes, but with the whole dank surface of their slippery forms. On and on they flew, past winds of dubious scent and sounds of dubious import; ever in thickest darkness, and covering such prodigious spaces that Carter wondered whether or not they could still be within earth's dream-land.

Then suddenly the clouds thinned and the stars shone spectrally above. All below was still black, but those pallid beacons in the sky seemed alive with a meaning and directiveness they had never possessed elsewhere. It was not that the figures of the constellations were different, but that the same familiar shapes now revealed a significance they had formerly failed to make plain. Everything focussed toward the north; every curve and asterism of the glittering sky became part of a vast design whose function was to hurry first the eye and then the whole observer onward to some secret and terrible goal of convergence beyond the frozen waste that stretched endlessly ahead. Carter looked toward the east where the great ridge of barrier peaks had towered along all the length of Inganok, and saw against the stars a jagged silhouette which told of its continued presence. It was more broken now, with yawning clefts and fantastically erratic pinnacles; and Carter studied closely the suggestive turns and inclinations of that grotesque outline, which seemed to share with the stars some subtle northward urge.

They were flying past at a tremendous speed, so that the watcher had to strain hard to catch details; when all at once he beheld just above the line of the topmost peaks a dark and moving object against the stars, whose course exactly paralleled that of his own bizarre party. The ghouls had likewise glimpsed it, for he heard their low glibbering all about him, and for a moment he fancied the object was a gigantic shantak, of a size vastly greater than that of the average specimen. Soon, however, he saw that this theory would not hold; for the shape of the thing above the mountains was not that of any hippocephalic bird. Its outline against the stars, necessarily vague as it was, resembled rather some huge mitred head or pair of heads infinitely magnified; and its rapid bobbing flight through the sky seemed most peculiarly a wingless one. Carter could not tell which side of the mountains it was on, but

soon perceived that it had parts below the parts he had first seen, since it blotted out all the stars in places where the ridge was deeply cleft.

Then came a wide gap in the range, where the hideous reaches of transmontane Leng were joined to the cold waste on this side by a low pass through which the stars shone wanly. Carter watched this gap with intense care, knowing that he might see outlined against the sky beyond it the lower parts of the vast thing that flew undulantly above the pinnacles. The object had now floated ahead a trifle, and every eye of the party was fixed on the rift where it would presently appear in full-length silhouette. Gradually the huge thing above the peaks neared the gap, slightly slackening its speed as if conscious of having outdistanced the ghoulish army. For another minute suspense was keen, and then the brief instant of full silhouette and revelation came; bringing to the lips of the ghouls an awed and half-choked meep of cosmic fear, and to the soul of the traveller a chill that has never wholly left it. For the mammoth bobbing shape that overtopped the ridge was only a head—a mitred double head—and below it in terrible vastness loped the frightful swollen body that bore it; the mountain-high monstrosity that walked in stealth and silence; the hyaena-like distortion of a giant anthropoid shape that trotted blackly against the sky, its repulsive pair of cone-capped heads reaching half way to the zenith.

Carter did not lose consciousness or even scream aloud, for he was an old dreamer; but he looked behind him in horror and shuddered when he saw that there were other monstrous heads silhouetted above the level of the peaks, bobbing along stealthily after the first one. And straight in the rear were three of the mighty mountain shapes seen full against the southern stars, tiptoeing wolf-like and lumberingly, their tall mitres nodding thousands of feet in the air. The carven mountains, then, had not stayed squatting in that rigid semicircle north of Inganok with right hands up-lifted. They had duties to perform, and were not remiss. But it was horrible that they never spoke, and never even made a sound in walking.

Meanwhile the ghoul that was Pickman had glibbered an order to the night-gaunts, and the whole army soared higher into the air. Up toward the stars the grotesque column shot, till nothing stood

out any longer against the sky; neither the grey granite ridge that was still nor the carven and mitred mountains that walked. All was blackness beneath as the fluttering legions surged northward amidst rushing winds and invisible laughter in the aether, and never a shantak or less mentionable entity rose from the haunted wastes to pursue them. The farther they went, the faster they flew, till soon their dizzying speed seemed to pass that of a rifle ball and approach that of a planet in its orbit. Carter wondered how with such speed the earth could still stretch beneath them, but knew that in the land of dream dimensions have strange properties. That they were in a realm of eternal night he felt certain, and he fancied that the constellations overhead had subtly emphasised their northward focus; gathering themselves up as it were to cast the flying army into the void of the boreal pole, as the folds of a bag are gathered up to cast out the last bits of substance therein.

Then he noticed with terror that the wings of the night-gaunts were not flapping any more. The horned and faceless steeds had folded their membranous appendages, and were resting quite passive in the chaos of wind that whirled and chuckled as it bore them on. A force not of earth had seized on the army, and ghouls and night-gaunts alike were powerless before a current which pulled madly and relentlessly into the north whence no mortal had ever returned. At length a lone pallid light was seen on the skyline ahead, thereafter rising steadily as they approached, and having beneath it a black mass that blotted out the stars. Carter saw that it must be some beacon on a mountain, for only a mountain could rise so vast as seen from so prodigious a height in the air.

Higher and higher rose the light and the blackness beneath it, till half the northern sky was obscured by the rugged conical mass. Lofty as the army was, that pale and sinister beacon rose above it, towering monstrous over all peaks and concernments of earth, and tasting the atomless aether where the cryptical moon and the mad planets reel. No mountain known of man was that which loomed before them. The high clouds far below were but a fringe for its foothills. The gasping dizziness of topmost air was but a girdle for its loins. Scornful and spectral climbed that bridge betwixt earth and heaven, black in eternal night, and crowned with a pshent of

unknown stars whose awful and significant outline grew every moment clearer. Ghouls meeped in wonder as they saw it, and Carter shivered in fear lest all the hurtling army be dashed to pieces on the unyielding onyx of that Cyclopean cliff.

Higher and higher rose the light, till it mingled with the loftiest orbs of the zenith and winked down at the flyers with lurid mockery. All the north beneath it was blackness now; dread, stony blackness from infinite depths to infinite heights, with only that pale winking beacon perched unreachably at the top of all vision. Carter studied the light more closely, and saw at last what lines its inky background made against the stars. There were towers on that titan mountain-top; horrible domed towers in noxious and incalculable tiers and clusters beyond any dreamable workmanship of man; battlements and terraces of wonder and menace, all limned tiny and black and distant against the starry pshent that glowed malevolently at the uppermost rim of sight. Capping that most measureless of mountains was a castle beyond all mortal thought, and in it glowed the daemon-light. Then Randolph Carter knew that his quest was done, and that he saw above him the goal of all forbidden steps and audacious visions; the fabulous, the incredible home of the Great Ones atop unknown Kadath.

Even as he realised this thing, Carter noticed a change in the course of the helplessly wind-sucked party. They were rising abruptly now, and it was plain that the focus of their flight was the onyx castle where the pale light shone. So close was the great black mountain that its sides sped by them dizzily as they shot upward, and in the darkness they could discern nothing upon it. Vaster and vaster loomed the tenebrous towers of the nighted castle above, and Carter could see that it was well-nigh blasphemous in its immensity. Well might its stones have been quarried by nameless workmen in that horrible gulf rent out of the rock in the hill pass north of Inganok, for such was its size that a man on its threshold stood even as an ant on the steps of earth's loftiest fortress. The pshent of unknown stars above the myriad domed turrets glowed with a sallow, sickly flare, so that a kind of twilight hung about the murky walls of slippery onyx. The pallid beacon was now seen to be a single shining window high up in one of the loftiest towers, and as

the helpless army neared the top of the mountain Carter thought he detected unpleasant shadows flitting across the feebly luminous expanse. It was a strangely arched window, of a design wholly alien to earth.

The solid rock now gave place to the giant foundations of the monstrous castle, and it seemed that the speed of the party was somewhat abated. Vast walls shot up, and there was a glimpse of a great gate through which the voyagers were swept. All was night in the titan courtyard, and then came the deeper blackness of inmost things as a huge arched portal engulfed the column. Vortices of cold wind surged dankly through sightless labyrinths of onyx, and Carter could never tell what Cyclopean stairs and corridors lay silent along the route of his endless aerial twisting. Always upward led the terrible plunge in darkness, and never a sound, touch, or glimpse broke the dense pall of mystery. Large as the army of ghouls and night-gaunts was, it was lost in the prodigious voids of that more than earthly castle. And when at last there suddenly dawned around him the lurid light of that single tower room whose lofty window had served as a beacon, it took Carter long to discern the far walls and high, distant ceiling, and to realise that he was indeed not again in the boundless air outside.

Randolph Carter had hoped to come into the throne-room of the Great Ones with poise and dignity, flanked and followed by impressive lines of ghouls in ceremonial order, and offering his prayer as a free and potent master among dreamers. He had known that the Great Ones themselves are not beyond a mortal's power to cope with, and had trusted to luck that the Other Gods and their crawling chaos Nyarlathotep would not happen to come to their aid at the crucial moment, as they had so often done before when men sought out earth's gods in their home or on their mountains. And with his hideous escort he had half hoped to defy even the Other Gods if need were, knowing as he did that ghouls have no masters, and that night-gaunts own not Nyarlathotep but only archaic Nodens for their lord. But now he saw that supernal Kadath in its cold waste is indeed girt with dark wonders and nameless sentinels, and that the Other Gods are of a surety vigilant in guarding the mild, feeble gods of earth. Void as they are of lordship over ghouls and night-gaunts, the mindless, shapeless blasphemies of outer

space can yet control them when they must; so that it was not in state as a free and potent master of dreamers that Randolph Carter came into the Great Ones' throne-room with his ghouls. Swept and herded by nightmare tempests from the stars, and dogged by unseen horrors of the northern waste, all that army floated captive and helpless in the lurid light, dropping numbly to the onyx floor when by some voiceless order the winds of fright dissolved.

Before no golden dais had Randolph Carter come, nor was there any august circle of crowned and haloed beings with narrow eyes, long-lobed ears, thin nose, and pointed chin whose kinship to the carven face on Ngranek might stamp them as those to whom a dreamer might pray. Save for that one tower room the onyx castle atop Kadath was dark, and the masters were not there. Carter had come to unknown Kadath in the cold waste, but he had not found the gods. Yet still the lurid light glowed in that one tower room whose size was so little less than that of all outdoors, and whose distant walls and roof were so nearly lost to sight in thin, curling mists. Earth's gods were not there, it was true, but of subtler and less visible presences there could be no lack. Where the mild gods are absent, the Other Gods are not unrepresented; and certainly, the onyx castle of castles was far from tenantless. In what outrageous form or forms terror would next reveal itself, Carter could by no means imagine. He felt that his visit had been expected, and wondered how close a watch had all along been kept upon him by the crawling chaos Nyarlathotep. It is Nyarlathotep, horror of infinite shapes and dread soul and messenger of the Other Gods, that the fungous moon-beasts serve; and Carter thought of the black galley that had vanished when the tide of battle turned against the toad-like abnormalities on the jagged rock in the sea.

Reflecting upon these things, he was staggering to his feet in the midst of his nightmare company when there rang without warning through that pale-litten and limitless chamber the hideous blast of a daemon trumpet. Three times pealed that frightful brazen scream, and when the echoes of the third blast had died chucklingly away Randolph Carter saw that he was alone. Whither, why, and how the ghouls and night-gaunts had been snatched from sight was not for him to divine. He knew only that he was suddenly alone, and that whatever unseen powers lurked mockingly around him were

no powers of earth's friendly dreamland. Presently from the chamber's uttermost reaches a new sound came. This, too, was a rhythmic trumpeting; but of a kind far removed from the three raucous blasts which had dissolved his grisly cohorts. In this low fanfare echoed all the wonder and melody of ethereal dream; exotic vistas of unimagined loveliness floating from each strange chord and subtly alien cadence. Odours of incense came to match the golden notes; and overhead a great light dawned, its colours changing in cycles unknown to earth's spectrum, and following the song of the trumpets in weird symphonic harmonies. Torches flared in the distance, and the beat of drums throbbed nearer amidst waves of tense expectancy.

Out of the thinning mists and the cloud of strange incense filed twin columns of giant black slaves with loin-cloths of iridescent silk. Upon their heads were strapped vast helmet-like torches of glittering metal, from which the fragrance of obscure balsams spread in fumous spirals. In their right hands were crystal wands whose tips were carved into leering chimaeras, while their left hands grasped long, thin silver trumpets which they blew in turn. Armlets and anklets of gold they had, and between each pair of anklets stretched a golden chain that held its wearer to a sober gait. That they were true black men of earth's dreamland was at once apparent, but it seemed less likely that their rites and costumes were wholly things of our earth. Ten feet from Carter the columns stopped, and as they did so each trumpet flew abruptly to its bearer's thick lips. Wild and ecstatic was the blast that followed, and wilder still the cry that chorused just after from dark throats somehow made shrill by strange artifice.

Then down the wide lane betwixt the two columns a lone figure strode; a tall, slim figure with the young face of an antique Pharaoh, gay with prismatic robes and crowned with a golden pschent that glowed with inherent light. Close up to Carter strode that regal figure; whose proud carriage and swart features had in them the fascination of a dark god or fallen archangel, and around whose eyes there lurked the languid sparkle of capricious humour. It spoke, and in its mellow tones there rippled the mild music of Lethean streams.

"Randolph Carter," said the voice, "you have come to see the

Great Ones whom it is unlawful for men to see. Watchers have spoken of this thing, and the Other Gods have grunted as they rolled and tumbled mindlessly to the sound of thin flutes in the black ultimate void where broods the daemon-sultan whose name no lips dare speak aloud.

"When Barzai the Wise climbed Hatheg-Kla to see the Great Ones dance and howl above the clouds in the moonlight he never returned. The Other Gods were there, and they did what was expected. Zenig of Aphorat sought to reach unknown Kadath in the cold waste, and his skull is now set in a ring on the little finger of one whom I need not name.

"But you, Randolph Carter, have braved all things of earth's dreamland, and burn still with the flame of quest. You came not as one curious, but as one seeking his due, nor have you failed ever in reverence toward the mild gods of earth. Yet have these gods kept you from the marvellous sunset city of your dreams, and wholly through their own small covetousness; for verily, they craved the weird loveliness of that which your fancy had fashioned, and vowed that henceforward no other spot should be their abode.

"They are gone from their castle on unknown Kadath to dwell in your marvellous city. All through its palaces of veined marble they revel by day, and when the sun sets they go out in the perfumed gardens and watch the golden glory on temples and colonnades, arched bridges and silver-basined fountains, and wide streets with blossom-laden urns and ivory statues in gleaming rows. And when night comes they climb tall terraces in the dew, and sit on carved benches of porphyry scanning the stars, or lean over pale balustrades to gaze at the town's steep northward slopes, where one by one the little windows in old peaked gables shine softly out with the calm yellow light of homely candles.

"The gods love your marvellous city, and walk no more in the ways of the gods. They have forgotten the high places of earth, and the mountains that knew their youth. The earth has no longer any gods that are gods, and only the Other Ones from outer space hold sway on unremembered Kadath. Far away in a valley of your own childhood, Randolph Carter, play the heedless Great Ones. You have dreamed too well, O wise arch-dreamer, for you have drawn dream's gods away from the world of all men's visions to that

which is wholly yours; having builded out of your boyhood's small fancies a city more lovely than all the phantoms that have gone before.

"It is not well that earth's gods leave their thrones for the spider to spin on, and their realm for the Others to sway in the dark manner of Others. Fain would the powers from outside bring chaos and horror to you, Randolph Carter, who are the cause of their up-setting, but that they know it is by you alone that the gods may be sent back to their world. In that half-waking dreamland which is yours, no power of uttermost night may pursue; and only you can send the selfish Great Ones gently out of your marvellous sunset city, back through the northern twilight to their wonted place atop unknown Kadath in the cold waste.

"So, Randolph Carter, in the name of the Other Gods I spare you and charge you to serve my will. I charge you to seek that sunset city which is yours, and to send thence the drowsy truant gods for whom the dream-world waits. Not hard to find is that roseal fever of the gods, that fanfare of supernal trumpets and clash of immortal cymbals, that mystery whose place and meaning have haunted you through the halls of waking and the gulfs of dreaming, and tormented you with hints of vanished memory and the pain of lost things awesome and momentous. Not hard to find is that symbol and relic of your days of wonder, for truly, it is but the stable and eternal gem wherein all that wonder sparkles crystallised to light your evening path. Behold! It is not over unknown seas but back over well-known years that your quest must go; back to the bright strange things of infancy and the quick sun-drenched glimpses of magic that old scenes brought to wide young eyes.

"For know you, that your gold and marble city of wonder is only the sum of what you have seen and loved in youth. It is the glory of Boston's hillside roofs and western windows aflame with sunset; of the flower-fragrant Common and the great dome on the hill and the tangle of gables and chimneys in the violet valley where the many-bridged Charles flows drowsily. These things you saw, Randolph Carter, when your nurse first wheeled you out in the springtime, and they will be the last things you will ever see with eyes of memory and of love. And there is antique Salem with its brooding years, and spectral Marblehead scaling its rocky precipices into

past centuries, and the glory of Salem's towers and spires seen afar from Marblehead's pastures across the harbour against the setting sun.

"There is Providence, quaint and lordly on its seven hills over the blue harbour, with terraces of green leading up to steeples and citadels of living antiquity, and Newport climbing wraith-like from its dreaming breakwater. Arkham is there, with its moss-grown gambrel roofs and the rocky rolling meadows behind it; and antediluvian Kingsport hoary with stacked chimneys and deserted quays and overhanging gables, and the marvel of high cliffs and the milky-misted ocean with tolling buoys beyond.

"Cool vales in Concord, cobbled lanes in Portsmouth, twilight bends of rustic New-Hampshire roads where giant elms half hide white farmhouse walls and creaking well-sweeps. Gloucester's salt wharves and Truro's windy willows. Vistas of distant steeped towns and hills beyond hills along the North Shore, hushed stony slopes and low ivied cottages in the lee of huge boulders in Rhode-Island's back country. Scent of the sea and fragrance of the fields; spell of the dark woods and joy of the orchards and gardens at dawn. These, Randolph Carter, are your city; for they are yourself. New-England bore you, and into your soul she poured a liquid loveliness which cannot die. This loveliness, moulded, crystallised, and polished by years of memory and dreaming, is your terraced wonder of elusive sunsets; and to find that marble parapet with curious urns and carven rail, and descend at last those endless balustraded steps to the city of broad squares and prismatic fountains, you need only to turn back to the thoughts and visions of your wistful boyhood.

"Look! through that window shine the stars of eternal night. Even now they are shining above the scenes you have known and cherished, drinking of their charm that they may shine more lovely over the gardens of dream. There is Antares—he is winking at this moment over the roofs of Tremont Street, and you could see him from your window on Beacon Hill. Out beyond those stars yawn the gulfs from whence my mindless masters have sent me. Some day you too may traverse them, but if you are wise you will beware such folly; for of those mortals who have been and returned, only one preserves a mind unshattered by the pounding, clawing horrors

of the void. Terrors and blasphemies gnaw at one another for space, and there is more evil in the lesser ones than in the greater; even as you know from the deeds of those who sought to deliver you into my hands, whilst I myself harboured no wish to shatter you, and would indeed have helped you hither long ago had I not been elsewhere busy, and certain that you would yourself find the way. Shun, then, the outer hells, and stick to the calm, lovely things of your youth. Seek out your marvellous city and drive thence the recreant Great Ones, sending them back gently to those scenes which are of their own youth, and which wait uneasy for their return.

"Easier even than the way of dim memory is the way I will prepare for you. See! There comes hither a monstrous shantak, led by a slave who for your peace of mind had best keep invisible. Mount and be ready—there! Yogash the black will help you on the scaly horror. Steer for that brightest star just south of the zenith—it is Vega, and in two hours will be just above the terrace of your sunset city. Steer for it only till you hear a far-off singing in the high aether. Higher than that lurks madness, so rein your shantak when the first note lures. Look then back to earth, and you will see shining the deathless altar-flame of Ired-Naa from the sacred roof of a temple. That temple is in your desiderate sunset city, so steer for it before you heed the singing and are lost.

"When you draw nigh the city steer for the same high parapet whence of old you scanned the outspread glory, prodding the shantak till he cry aloud. That cry the Great Ones will hear and know as they sit on their perfumed terraces, and there will come upon them such a homesickness that all of your city's wonders will not console them for the absence of Kadath's grim castle and the pshent of eternal stars that crowns it.

"Then must you land amongst them with the shantak, and let them see and touch that noisome and hippocephalic bird; meanwhile discoursing to them of unknown Kadath, which you will so lately have left, and telling them how its boundless halls are lonely and unlighted, where of old they used to leap and revel in supernal radiance. And the shantak will talk to them in the manner of shantaks, but it will have no powers of persuasion beyond the recalling of elder days.

"Over and over must you speak to the wandering Great Ones of their home and youth, till at last they will weep and ask to be shewn the returning path they have forgotten. Thereat can you loose the waiting shantak, sending him skyward with the homing cry of his kind; hearing which the Great Ones will prance and jump with antique mirth, and forthwith stride after the loathly bird in the fashion of gods, through the deep gulfs of heaven to Kadath's familiar towers and domes.

"Then will the marvellous sunset city be yours to cherish and inhabit forever, and once more will earth's gods rule the dreams of men from their accustomed seat. Go now—the casement is open and the stars await outside. Already your shantak wheezes and titters with impatience. Steer for Vega through the night, but turn when the singing sounds. Forget not this warning, lest horrors unthinkable suck you into the gulf of shrieking and ululant madness. Remember the Other Gods; they are great and mindless and terrible, and lurk in the outer voids. They are good gods to shun.

"*Hei! Aa-shanta 'nygh!* You are off! Send back earth's gods to their haunts on unknown Kadath, and pray to all space that you may never meet me in my thousand other forms. Farewell, Randolph Carter, and beware; *for I am Nyarlathotep, the Crawling Chaos!*"

And Randolph Carter, gasping and dizzy on his hideous shantak, shot screamingly into space toward the cold blue glare of boreal Vega; looking but once behind him at the clustered and chaotic turrets of the onyx nightmare wherein still glowed the lone lurid light of that window above the air and the clouds of earth's dreamland. Great polypous horrors slid darkly past, and unseen bat-wings beat multitudinous around him, but still he clung to the unwholesome mane of that loathly and hippocephalic scaled bird. The stars danced mockingly, almost shifting now and then to form pale signs of doom that one might wonder one had not seen and feared before; and ever the winds of aether howled of vague blackness and loneliness beyond the cosmos.

Then through the glittering vault ahead there fell a hush of portent, and all the winds and horrors slunk away as night things slink away before the dawn. Trembling in waves that golden wisps of nebula made weirdly visible, there rose a timid hint of far-off

melody, droning in faint chords that our own universe of stars knows not. And as that music grew, the shantak raised its ears and plunged ahead, and Carter likewise bent to catch each lovely strain. It was a song, but not the song of any voice. Night and the spheres sang it, and it was old when space and Nyarlathotep and the Other Gods were born.

Faster flew the shantak, and lower bent the rider, drunk with the marvel of strange gulfs, and whirling in the crystal coils of outer magic. Then came too late the warning of the evil one, the sardonic caution of the daemon legate who had bidden the seeker beware the madness of that song. Only to taunt had Nyarlathotep marked out the way to safety and the marvellous sunset city; only to mock had that black messenger revealed the secret of those truant gods whose steps he could so easily lead back at will. For madness and the void's wild vengeance are Nyarlathotep's only gifts to the presumptuous; and frantick though the rider strove to turn his disgusting steed, that leering, tittering shantak coursed on impetuous and relentless, flapping its great slippery wings in malignant joy, and headed for those unhallowed pits whither no dreams reach; that last amorphous blight of nethermost confusion where bubbles and blasphemes at infinity's centre the mindless daemon-sultan Azathoth, whose name no lips dare speak aloud.

Unswerving and obedient to the foul legate's orders, that hellish bird plunged onward through shoals of shapeless lurkers and caperers in darkness, and vacuous herds of drifting entities that pawed and groped and groped and pawed; the nameless larvae of the Other Gods, that are like them blind and without mind, and possessed of singular hungers and thirsts.

Onward unswerving and relentless, and tittering hilariously to watch the chuckling and hysterics into which the siren song of night and the spheres had turned, that eldritch scaly monster bore its helpless rider; hurtling and shooting, cleaving the uttermost rim and spanning the outermost abysses; leaving behind the stars and the realms of matter, and darting meteor-like through stark formlessness toward those inconceivable, unlighted chambers beyond Time wherein black Azathoth gnaws shapeless and ravenous amidst the muffled, maddening beat of vile drums and the thin, monotonous whine of accursed flutes.

Onward—onward—through the screaming, cackling, and blackly populous gulfs—and then from some dim blessed distance there came an image and a thought to Randolph Carter the doomed. Too well had Nyarlathotep planned his mocking and his tantalising, for he had brought up that which no gusts of icy terror could quite efface. Home—New England—Beacon Hill—the waking world.

“For know you, that your gold and marble city of wonder is only the sum of what you have seen and loved in youth . . . the glory of Boston’s hillside roofs and western windows aflame with sunset; of the flower-fragrant Common and the great dome on the hill and the tangle of gables and chimneys in the violet valley where the many-bridged Charles flows drowsily . . . this loveliness, moulded, crystallised, and polished by years of memory and dreaming, is your terraced wonder of elusive sunsets; and to find that marble parapet with curious urns and carven rail, and descend at last those endless balustraded steps to the city of broad squares and prismatic fountains, you need only to turn back to the thoughts and visions of your wistful boyhood.”

Onward—onward—dizzily onward to ultimate doom through the blackness where sightless feelers pawed and slimy snouts jostled and nameless things tittered and tittered and tittered. But the image and the thought had come, and Randolph Carter knew clearly that he was dreaming and only dreaming, and that somewhere in the background the world of waking and the city of his infancy still lay. Words came again—“You need only turn back to the thoughts and visions of your wistful boyhood.” Turn—turn—blackness on every side, but Randolph Carter could turn.

Thick though the rushing nightmare that clutched his senses, Randolph Carter could turn and move. He could move, and if he chose he could leap off the evil shantak that bore him hurtlingly doomward at the orders of Nyarlathotep. He could leap off and dare those depths of night that yawned interminably down, those depths of fear whose terrors yet could not exceed the nameless doom that lurked waiting at chaos’ core. He could turn and move and leap—he could—he would—he would—

Off that vast hippocephalic abomination leaped the doomed and desperate dreamer, and down through endless voids of sentient

blackness he fell. Aeons reeled, universes died and were born again, stars became nebulae and nebulae became stars, and still Randolph Carter fell through those endless voids of sentient blackness.

Then in the slow creeping course of eternity the utmost cycle of the cosmos churned itself into another futile completion, and all things became again as they were unreckoned kalpas before. Matter and light were born anew as space once had known them; and comets, suns, and worlds sprang flaming into life, though nothing survived to tell that they had been and gone, been and gone, always and always, back to no first beginning.

And there was a firmament again, and a wind, and a glare of purple light in the eyes of the falling dreamer. There were gods and presences and wills; beauty and evil, and the shrieking of noxious night robbed of its prey. For through the unknown ultimate cycle had lived a thought and a vision of a dreamer's boyhood, and now there were re-made a waking world and an old cherished city to body and to justify these things. Out of the void S'ngac the violet gas had pointed the way, and archaic Nodens was bellowing his guidance from unhinted deeps.

Stars swelled to dawns, and dawns burst into fountains of gold, carmine, and purple, and still the dreamer fell. Cries rent the aether as ribbons of light beat back the fiends from outside. And hoary Nodens raised a howl of triumph when Nyarlathotep, close on his quarry, stopped baffled by a glare that seared his formless hunting-horrors to grey dust. Randolph Carter had indeed descended at last the wide marmoreal flights to his marvellous city, for he was come again to the fair New England world that had wrought him.

So to the organ chords of morning's myriad whistles, and dawn's blaze thrown dazzling through purple panes by the great gold dome of the State House on the hill, Randolph Carter leaped shoutingly awake within his Boston room. Birds sang in hidden gardens and the perfume of trellised vines came wistful from arbours his grandfather had reared. Beauty and light glowed from classic mantel and carven cornice and walls grotesquely figured, while a sleek black cat rose yawning from hearthside sleep that his master's start and shriek had disturbed. And vast infinities away, past the Gate of Deeper Slumber and the enchanted wood and the garden lands and

the Cerenerian Sea and the twilight reaches of Inganok, the crawling chaos Nyarlathotep strode brooding into the onyx castle atop unknown Kadath in the cold waste, and taunted insolently the mild gods of earth whom he had snatched abruptly from their scented revels in the marvellous sunset city.

The Silver Key

When Randolph Carter was thirty he lost the key of the gate of dreams. Prior to that time he had made up for the prosiness of life by nightly excursions to strange and ancient cities beyond space, and lovely, unbelievable garden lands across ethereal seas; but as middle age hardened upon him he felt these liberties slipping away little by little, until at last he was cut off altogether. No more could his galleys sail up the river Oukranos past the gilded spires of Thran, or his elephant caravans tramp through perfumed jungles in Kled, where forgotten palaces with veined ivory columns sleep lovely and unbroken under the moon.

He had read much of things as they are, and talked with too many people. Well-meaning philosophers had taught him to look into the logical relations of things, and analyse the processes which shaped his thoughts and fancies. Wonder had gone away, and he had forgotten that all life is only a set of pictures in the brain, among which there is no difference betwixt those born of real things and those born of inward dreamings, and no cause to value the one above the other. Custom had dinned into his ears a superstitious reverence for that which tangibly and physically exists, and

had made him secretly ashamed to dwell in visions. Wise men told him his simple fancies were inane and childish, and he believed it because he could see that they might easily be so. What he failed to recall was that the deeds of reality are just as inane and childish, and even more absurd because their actors persist in fancying them full of meaning and purpose as the blind cosmos grinds aimlessly on from nothing to something and from something back to nothing again, neither heeding nor knowing the wishes or existence of the minds that flicker for a second now and then in the darkness.

They had chained him down to things that are, and had then explained the workings of those things till mystery had gone out of the world. When he complained, and longed to escape into twilight realms where magic moulded all the little vivid fragments and prized associations of his mind into vistas of breathless expectancy and unquenchable delight, they turned him instead toward the new-found prodigies of science, bidding him find wonder in the atom's vortex and mystery in the sky's dimensions. And when he had failed to find these boons in things whose laws are known and measurable, they told him he lacked imagination, and was immature because he preferred dream-illusions to the illusions of our physical creation.

So Carter had tried to do as others did, and pretended that the common events and emotions of earthy minds were more important than the fantasies of rare and delicate souls. He did not dissent when they told him that the animal pain of a stuck pig or dyspeptic ploughman in real life is a greater thing than the peerless beauty of Narath with its hundred carven gates and domes of chalcedony, which he dimly remembered from his dreams; and under their guidance he cultivated a painstaking sense of pity and tragedy.

Once in a while, though, he could not help seeing how shallow, fickle, and meaningless all human aspirations are, and how emptily our real impulses contrast with those pompous ideals we profess to hold. Then he would have recourse to the polite laughter they had taught him to use against the extravagance and artificiality of dreams; for he saw that the daily life of our world is every inch as extravagant and artificial, and far less worthy of respect because of its poverty in beauty and its silly reluctance to admit its own lack of reason and purpose. In this way he became a kind of humorist, for

he did not see that even humour is empty in a mindless universe devoid of any true standard of consistency or inconsistency.

In the first days of his bondage he had turned to the gentle churchly faith endeared to him by the naive trust of his fathers, for thence stretched mystic avenues which seemed to promise escape from life. Only on closer view did he mark the starved fancy and beauty, the stale and prosy triteness, and the owlish gravity and grotesque claims of solid truth which reigned boresomely and overwhelmingly among most of its professors; or feel to the full the awkwardness with which it sought to keep alive as literal fact the outgrown fears and guesses of a primal race confronting the unknown. It wearied Carter to see how solemnly people tried to make earthly reality out of old myths which every step of their boasted science confuted, and this misplaced seriousness killed the attachment he might have kept for the ancient creeds had they been content to offer the sonorous rites and emotional outlets in their true guise of ethereal fantasy.

But when he came to study those who had thrown off the old myths, he found them even more ugly than those who had not. They did not know that beauty lies in harmony, and that loveliness of life has no standard amidst an aimless cosmos save only its harmony with the dreams and the feelings which have gone before and blindly moulded our little spheres out of the rest of chaos. They did not see that good and evil and beauty and ugliness are only ornamental fruits of perspective, whose sole value lies in their linkage to what chance made our fathers think and feel, and whose finer details are different for every race and culture. Instead, they either denied these things altogether or transferred them to the crude, vague instincts which they shared with the beasts and peasants; so that their lives were dragged malodorously out in pain, ugliness, and disproportion, yet filled with a ludicrous pride at having escaped from something no more unsound than that which still held them. They had traded the false gods of fear and blind piety for those of licence and anarchy.

Carter did not taste deeply of these modern freedoms; for their cheapness and squalor sickened a spirit loving beauty alone, while his reason rebelled at the flimsy logic with which their champions tried to gild brute impulse with a sacredness stripped from the idols

they had discarded. He saw that most of them, in common with their cast-off priestcraft, could not escape from the delusion that life has a meaning apart from that which men dream into it; and could not lay aside the crude notion of ethics and obligations beyond those of beauty, even when all Nature shrieked of its unconsciousness and impersonal unmorality in the light of their scientific discoveries. Warped and bigoted with preconceived illusions of justice, freedom, and consistency, they cast off the old lore and the old ways with the old beliefs; nor ever stopped to think that that lore and those ways were the sole makers of their present thoughts and judgments, and the sole guides and standards in a meaningless universe without fixed aims or stable points of reference. Having lost these artificial settings, their lives grew void of direction and dramatic interest; till at length they strove to drown their ennui in bustle and pretended usefulness, noise and excitement, barbaric display and animal sensation. When these things palled, disappointed, or grew nauseous through revulsion, they cultivated irony and bitterness, and found fault with the social order. Never could they realise that their brute foundations were as shifting and contradictory as the gods of their elders, and that the satisfaction of one moment is the bane of the next. Calm, lasting beauty comes only in dream, and this solace the world had thrown away when in its worship of the real it threw away the secrets of childhood and innocence.

Amidst this chaos of hollowness and unrest Carter tried to live as befitted a man of keen thought and good heritage. With his dreams fading under the ridicule of the age he could not believe in anything, but the love of harmony kept him close to the ways of his race and station. He walked impassive through the cities of men, and sighed because no vista seemed fully real; because every flash of yellow sunlight on tall roofs and every glimpse of balustraded plazas in the first lamps of evening served only to remind him of dreams he had once known, and to make him homesick for ethereal lands he no longer knew how to find. Travel was only a mockery; and even the Great War stirred him but little, though he served from the first in the Foreign Legion of France. For a while he sought friends, but soon grew weary of the crudeness of their emotions, and the sameness and earthiness of their visions. He felt vaguely

glad that all his relatives were distant and out of touch with him, for they could not have understood his mental life. That is, none but his grandfather and great-uncle Christopher could, and they were long dead.

Then he began once more the writing of books, which he had left off when dreams first failed him. But here, too, was there no satisfaction or fulfilment; for the touch of earth was upon his mind, and he could not think of lovely things as he had done of yore. Ironic humour dragged down all the twilight minarets he reared, and the earthy fear of improbability blasted all the delicate and amazing flowers in his faery gardens. The convention of assumed pity spilt mawkishness on his characters, while the myth of an important reality and significant human events and emotions debased all his high fantasy into thin-veiled allegory and cheap social satire. His new novels were successful as his old ones had never been; and because he knew how empty they must be to please an empty herd, he burned them and ceased his writing. They were very graceful novels, in which he urbanely laughed at the dreams he lightly sketched; but he saw that their sophistication had sapped all their life away.

It was after this that he cultivated deliberate illusion, and dabbled in the notions of the bizarre and the eccentric as an antidote for the commonplace. Most of these, however, soon shewed their poverty and barrenness; and he saw that the popular doctrines of occultism are as dry and inflexible as those of science, yet without even the slender palliative of truth to redeem them. Gross stupidity, falsehood, and muddled thinking are not dream; and form no escape from life to a mind trained above their level. So Carter bought stranger books and sought out deeper and more terrible men of fantastic erudition; delving into arcana of consciousness that few have trod, and learning things about the secret pits of life, legend, and immemorial antiquity which disturbed him ever afterward. He decided to live on a rarer plane, and furnished his Boston home to suit his changing moods; one room for each, hung in appropriate colours, furnished with befitting books and objects, and provided with sources of the proper sensations of light, heat, sound, taste, and odour.

Once he heard of a man in the South who was shunned and

feared for the blasphemous things he read in prehistoric books and clay tablets smuggled from India and Arabia. Him he visited, living with him and sharing his studies for seven years, till horror overtook them one midnight in an unknown and archaic graveyard, and only one emerged where two had entered. Then he went back to Arkham, the terrible witch-haunted old town of his forefathers in New England, and had experiences in the dark, amidst the hoary willows and tottering gambrel roofs, which made him seal forever certain pages in the diary of a wild-minded ancestor. But these horrors took him only to the edge of reality, and were not of the true dream country he had known in youth; so that at fifty he despaired of any rest or contentment in a world grown too busy for beauty and too shrewd for dream.

Having perceived at last the hollowness and futility of real things, Carter spent his days in retirement, and in wistful disjointed memories of his dream-filled youth. He thought it rather silly that he bothered to keep on living at all, and got from a South American acquaintance a very curious liquid to take him to oblivion without suffering. Inertia and force of habit, however, caused him to defer action; and he lingered indecisively among thoughts of old times, taking down the strange hangings from his walls and refitting the house as it was in his early boyhood—purple panes, Victorian furniture, and all.

With the passage of time he became almost glad he had lingered, for his relics of youth and his cleavage from the world made life and sophistication seem very distant and unreal; so much so that a touch of magic and expectancy stole back into his nightly slumbers. For years those slumbers had known only such twisted reflections of every-day things as the commonest slumbers know, but now there returned a flicker of something stranger and wilder; something of vaguely awesome immanence which took the form of tensely clear pictures from his childhood days, and made him think of little inconsequential things he had long forgotten. He would often awake calling for his mother and grandfather, both in their graves a quarter of a century.

Then one night his grandfather reminded him of a key. The grey old scholar, as vivid as in life, spoke long and earnestly of their ancient line, and of the strange visions of the delicate and sensitive

men who composed it. He spoke of the flame-eyed Crusader who learnt wild secrets of the Saracens that held him captive; and of the first Sir Randolph Carter who studied magic when Elizabeth was queen. He spoke, too, of that Edmund Carter who had just escaped hanging in the Salem witchcraft, and who had placed in an antique box a great silver key handed down from his ancestors. Before Carter awaked, the gentle visitant had told him where to find that box; that carved oak box of archaic wonder whose grotesque lid no hand had raised for two centuries.

In the dust and shadows of the great attic he found it, remote and forgotten at the back of a drawer in a tall chest. It was about a foot square, and its Gothic carvings were so fearful that he did not marvel no person since Edmund Carter had dared to open it. It gave forth no noise when shaken, but was mystic with the scent of unremembered spices. That it held a key was indeed only a dim legend, and Randolph Carter's father had never known such a box existed. It was bound in rusty iron, and no means was provided for working the formidable lock. Carter vaguely understood that he would find within it some key to the lost gate of dreams, but of where and how to use it his grandfather had told him nothing.

An old servant forced the carven lid, shaking as he did so at the hideous faces leering from the blackened wood, and at some unplaced familiarity. Inside, wrapped in a discoloured parchment, was a huge key of tarnished silver covered with cryptical arabesques; but of any legible explanation there was none. The parchment was voluminous, and held only the strange hieroglyphs of an unknown tongue written with an antique reed. Carter recognised the characters as those he had seen on a certain papyrus scroll belonging to that terrible scholar of the South who had vanished one midnight in a nameless cemetery. The man had always shivered when he read this scroll, and Carter shivered now.

But he cleaned the key, and kept it by him nightly in its aromatic box of ancient oak. His dreams were meanwhile increasing in vividness, and though shewing him none of the strange cities and incredible gardens of the old days, were assuming a definite cast whose purpose could not be mistaken. They were calling him back along the years, and with the mingled wills of all his fathers were pulling him toward some hidden and ancestral source. Then he knew he

must go into the past and merge himself with old things, and day after day he thought of the hills to the north where haunted Arkham and the rushing Miskatonic and the lonely rustic homestead of his people lay.

In the brooding fire of autumn Carter took the old remembered way past graceful lines of rolling hill and stone-walled meadow, distant vale and hanging woodland, curving road and nestling farmstead, and the crystal windings of the Miskatonic, crossed here and there by rustic bridges of wood or stone. At one bend he saw the group of giant elms among which an ancestor had oddly vanished a century and a half before, and shuddered as the wind blew meaningly through them. Then there was the crumbling farmhouse of old Goody Fowler the witch, with its little evil windows and great roof sloping nearly to the ground on the north side. He speeded up his car as he passed it, and did not slacken till he had mounted the hill where his mother and her fathers before her were born, and where the old white house still looked proudly across the road at the breathlessly lovely panorama of rocky slope and verdant valley, with the distant spires of Kingsport on the horizon, and hints of the archaic, dream-laden sea in the farthest background.

Then came the steeper slope that held the old Carter place he had not seen in over forty years. Afternoon was far gone when he reached the foot, and at the bend half way up he paused to scan the outspread countryside golden and glorified in the slanting floods of magic poured out by a western sun. All the strangeness and expectancy of his recent dreams seemed present in this hushed and unearthly landscape, and he thought of the unknown solitudes of other planets as his eyes traced out the velvet and deserted lawns shining undulant between their tumbled walls, the clumps of faery forest setting off far lines of purple hills beyond hills, and the spectral wooded valley dipping down in shadow to dank hollows where trickling waters crooned and gurgled among swollen and distorted roots.

Something made him feel that motors did not belong in the realm he was seeking, so he left his car at the edge of the forest, and putting the great key in his coat pocket walked on up the hill. Woods now engulfed him utterly, though he knew the house was on a high knoll that cleared the trees except to the north. He won-

dered how it would look, for it had been left vacant and untended through his neglect since the death of his strange great-uncle Christopher thirty years before. In his boyhood he had revelled through long visits there, and had found weird marvels in the woods beyond the orchard.

Shadows thickened around him, for the night was near. Once a gap in the trees opened up to the right, so that he saw off across leagues of twilight meadow and spied the old Congregational steeple on Central Hill in Kingsport; pink with the last flush of day, the panes of the little round windows blazing with reflected fire. Then, when he was in deep shadow again, he recalled with a start that the glimpse must have come from childish memory alone, since the old white church had long been torn down to make room for the Congregational Hospital. He had read of it with interest, for the paper had told about some strange burrows or passages found in the rocky hill beneath.

Through his puzzlement a voice piped, and he started again at its familiarity after long years. Old Benijah Corey had been his Uncle Christopher's hired man, and was aged even in those far-off times of his boyhood visits. Now he must be well over a hundred, but that piping voice could come from no one else. He could distinguish no words, yet the tone was haunting and unmistakable. To think that "Old Benijy" should still be alive!

"Mister Randy! Mister Randy! Whar be ye? D'ye want to skeer yer Aunt Marthy plumb to death? Hain't she tuld ye to keep nigh the place in the arternoon an' git back afur dark? Randy! Ran . . . dee! . . . He's the beatin'est boy fer runnin' off in the woods I ever see; haff the time a-settin' moonin' raound that snake-den in the upper timber-lot! . . . Hey, yew, Ran . . . dee!"

Randolph Carter stopped in the pitch darkness and rubbed his hand across his eyes. Something was queer. He had been somewhere he ought not to be; had strayed very far away to places where he had not belonged, and was now inexcusably late. He had not noticed the time on the Kingsport steeple, though he could easily have made it out with his pocket telescope; but he knew his lateness was something very strange and unprecedented. He was not sure he had his little telescope with him, and put his hand in his blouse pocket to see. No, it was not there, but there was the big

silver key he had found in a box somewhere. Uncle Chris had told him something odd once about an old unopened box with a key in it, but Aunt Martha had stopped the story abruptly, saying it was no kind of thing to tell a child whose head was already too full of queer fancies. He tried to recall just where he had found the key, but something seemed very confused. He guessed it was in the attic at home in Boston, and dimly remembered bribing Parks with half his week's allowance to help him open the box and keep quiet about it; but when he remembered this, the face of Parks came up very strangely, as if the wrinkles of long years had fallen upon the brisk little Cockney.

"Ran . . . dee! Ran . . . dee! Hi! Hi! Randy!"

A swaying lantern came around the black bend, and old Benijah pounced on the silent and bewildered form of the pilgrim.

"Durn ye, boy, so thar ye be! Ain't ye got a tongue in yer head, that ye can't answer a body? I ben callin' this haff hour, an' ye must a heerd me long ago! Dun't ye know yer Aunt Marthy's all a-fidget over yer bein' off arter dark? Wait till I tell yer Uncle Chris when he gits hum! Ye'd orta know these here woods ain't no fitten place to be traipsin' this hour! They's things abroad what dun't do nobody no good, as my gran'sir' knowed afur me. Come, Mister Randy, or Hannah wun't keep supper no longer!"

So Randolph Carter was marched up the road where wondering stars glimmered through high autumn boughs. And dogs barked as the yellow light of small-paned windows shone out at the farther turn, and the Pleiades twinkled across the open knoll where a great gambrel roof stood black against the dim west. Aunt Martha was in the doorway, and did not scold too hard when Benijah shoved the truant in. She knew Uncle Chris well enough to expect such things of the Carter blood. Randolph did not shew his key, but ate his supper in silence and protested only when bedtime came. He sometimes dreamed better when awake, and he wanted to use that key.

In the morning Randolph was up early, and would have run off to the upper timber-lot if Uncle Chris had not caught him and forced him into his chair by the breakfast table. He looked impatiently around the low-pitched room with the rag carpet and exposed beams and corner-posts, and smiled only when the orchard boughs scratched at the leaded panes of the rear window. The trees

and the hills were close to him, and formed the gates of that timeless realm which was his true country.

Then, when he was free, he felt in his blouse pocket for the key; and being reassured, skipped off across the orchard to the rise beyond, where the wooded hill climbed again to heights above even the treeless knoll. The floor of the forest was mossy and mysterious, and great lichened rocks rose vaguely here and there in the dim light like Druid monoliths among the swollen and twisted trunks of a sacred grove. Once in his ascent Randolph crossed a rushing stream whose falls a little way off sang runic incantations to the lurking fauns and aegipans and dryads.

Then he came to the strange cave in the forest slope, the dreaded "snake-den" which country folk shunned, and away from which Benijah had warned him again and again. It was deep; far deeper than anyone but Randolph suspected, for the boy had found a fissure in the farthestmost black corner that led to a loftier grotto beyond—a haunting sepulchral place whose granite walls held a curious illusion of conscious artifice. On this occasion he crawled in as usual, lighting his way with matches filched from the sitting-room match-safe, and edging through the final crevice with an eagerness hard to explain even to himself. He could not tell why he approached the farther wall so confidently, or why he instinctively drew forth the great silver key as he did so. But on he went, and when he danced back to the house that night he offered no excuses for his lateness, nor heeded in the least the reproofs he gained for ignoring the noontide dinner-horn altogether.

Now it is agreed by all the distant relatives of Randolph Carter that something occurred to heighten his imagination in his tenth year. His cousin, Ernest B. Aspinwall, Esq., of Chicago, is fully ten years his senior; and distinctly recalls a change in the boy after the autumn of 1883. Randolph had looked on scenes of fantasy that few others can ever have beheld, and stranger still were some of the qualities which he shewed in relation to very mundane things. He seemed, in fine, to have picked up an odd gift of prophecy; and reacted unusually to things which, though at the time without meaning, were later found to justify the singular impressions. In subsequent decades as new inventions, new names, and new events

appeared one by one in the book of history, people would now and then recall wonderingly how Carter had years before let fall some careless word of undoubted connexion with what was then far in the future. He did not himself understand these words, or know why certain things made him feel certain emotions; but fancied that some unremembered dream must be responsible. It was as early as 1897 that he turned pale when some traveller mentioned the French town of Belloy-en-Santerre, and friends remembered it when he was almost mortally wounded there in 1916, while serving with the Foreign Legion in the Great War.

Carter's relatives talk much of these things because he has lately disappeared. His little old servant Parks, who for years bore patiently with his vagaries, last saw him on the morning he drove off alone in his car with a key he had recently found. Parks had helped him get the key from the old box containing it, and had felt strangely affected by the grotesque carvings on the box, and by some other odd quality he could not name. When Carter left, he had said he was going to visit his old ancestral country around Arkham.

Half way up Elm Mountain, on the way to the ruins of the old Carter place, they found his motor set carefully by the roadside; and in it was a box of fragrant wood with carvings that frightened the countrymen who stumbled on it. The box held only a queer parchment whose characters no linguist or palaeographer has been able to decipher or identify. Rain had long effaced any possible footprints, though Boston investigators had something to say about evidences of disturbances among the fallen timbers of the Carter place. It was, they averred, as though someone had groped about the ruins at no distant period. A common white handkerchief found among forest rocks on the hillside beyond cannot be identified as belonging to the missing man.

There is talk of apportioning Randolph Carter's estate among his heirs, but I shall stand firmly against this course because I do not believe he is dead. There are twists of time and space, of vision and reality, which only a dreamer can divine; and from what I know of Carter I think he has merely found a way to traverse these mazes. Whether or not he will ever come back, I cannot say. He wanted the lands of dream he had lost, and yearned for the days of his

childhood. Then he found a key, and I somehow believe he was able to use it to strange advantage.

I shall ask him when I see him, for I expect to meet him shortly in a certain dream-city we both used to haunt. It is rumoured in Ulthar, beyond the river Skai, that a new king reigns on the opal throne in Ilek-Vad, that fabulous town of turrets atop the hollow cliffs of glass overlooking the twilight sea wherein the bearded and finny Gnorri build their singular labyrinths, and I believe I know how to interpret this rumour. Certainly, I look forward impatiently to the sight of that great silver key, for in its cryptical arabesques there may stand symbolised all the aims and mysteries of a blindly impersonal cosmos.

Through the Gates of the Silver Key^{*}

I.

In a vast room hung with strangely figured arras and carpeted with Bokhara rugs of impressive age and workmanship four men were sitting around a document-strown table. From the far corners, where odd tripods of wrought-iron were now and then replenished by an incredibly aged negro in sombre livery, came the hypnotic fumes of olibanum; while in a deep niche on one side there ticked a curious coffin-shaped clock whose dial bore baffling hieroglyphs and whose four hands did not move in consonance with any time system known on this planet. It was a singular and disturbing room, but well fitted to the business now at hand. For here, in the New Orleans home of this continent's greatest mystic, mathematician, and orientalist, there was being settled at last the estate of a scarcely less great mystic, scholar, author, and dreamer who had vanished from the face of the earth four years before.

Randolph Carter, who had all his life sought to escape from the tedium and limitations of waking reality in the beckoning vistas of

^{*}Written in collaboration with E. Hoffmann Price.

dreams and fabled avenues of other dimensions, disappeared from the sight of man on the seventh of October, 1928, at the age of fifty-four. His career had been a strange and lonely one, and there were those who inferred from his curious novels many episodes more bizarre than any in his recorded history. His association with Harley Warren, the South Carolina mystic whose studies in the primal Naacal language of the Himalayan priests had led to such outrageous conclusions, had been close. Indeed, it was he who—one mist-mad, terrible night in an ancient graveyard—had seen Warren descend into a dank and nitrous vault, never to emerge. Carter lived in Boston, but it was from the wild, haunted hills behind hoary and witch-accursed Arkham that all his forbears had come. And it was amid those ancient, cryptically brooding hills that he had ultimately vanished.

His old servant Parks—who died early in 1930—had spoken of the strangely aromatic and hideously carved box he had found in the attic, and of the undecipherable parchments and queerly figured silver key which that box had contained; matters of which Carter had also written to others. Carter, he said, had told him that this key had come down from his ancestors, and that it would help him to unlock the gate to his lost boyhood, and to strange dimensions and fantastic realms which he had hitherto visited only in vague, brief, and elusive dreams. Then one day Carter took the box and its contents and rode away in his car, never to return.

Later on people found the car at the side of an old, grass-grown road in the hills behind crumbling Arkham—the hills where Carter's forbears had once dwelt, and where the ruined cellar of the great Carter homestead still gaped to the sky. It was in a grove of tall elms near by that another of the Carters had mysteriously vanished in 1781, and not far away was the half-rotted cottage where Goody Fowler the witch had brewed her ominous potions still earlier. The region had been settled in 1692 by fugitives from the witchcraft trials in Salem, and even now it bore a name for vaguely ominous things scarcely to be envisaged. Edmund Carter had fled from the shadow of Gallows Hill just in time, and the tales of his sorceries were many. Now, it seemed, his lone descendant had gone somewhere to join him.

In the car they found the hideously carved box of fragrant wood,

and the parchment which no man could read. The Silver Key was gone—presumably with Carter. Further than that there was no certain clue. Detectives from Boston said that the fallen timbers of the old Carter place seemed oddly disturbed, and somebody found a handkerchief on the rock-ridged, sinisterly wooded slope behind the ruins near the dreaded cave called the “Snake-Den”. It was then that the country legends about the Snake-Den gained a new vitality. Farmers whispered of the blasphemous uses to which old Edmund Carter the wizard had put that horrible grotto, and added later tales about the fondness which Randolph Carter himself had had for it when a boy. In Carter’s boyhood the venerable gambrel-roofed homestead was still standing and tenanted by his great-uncle Christopher. He had visited there often, and had talked singularly about the Snake-Den. People remembered what he had said about a deep fissure and an unknown inner cave beyond, and speculated on the change he had shewn after spending one whole memorable day in the cavern when he was nine. That was in October, too—and ever after that he had seemed to have an uncanny knack at prophesying future events.

It had rained late in the night that Carter vanished, and no one was quite able to trace his footprints from the car. Inside the Snake-Den all was amorphous liquid mud owing to copious seepage. Only the ignorant rustics whispered about the prints they thought they spied where the great elms overhang the road, and on the sinister hillside near the Snake-Den, where the handkerchief was found. Who could pay attention to whispers that spoke of stubby little tracks like those which Randolph Carter’s square-toed boots made when he was a small boy? It was as crazy a notion as that other whisper—that the tracks of old Benijah Corey’s peculiar heel-less boots had met the stubby little tracks in the road. Old Benijah had been the Carters’ hired man when Randolph was young—but he had died thirty years ago.

It must have been these whispers—plus Carter’s own statement to Parks and others that the queerly arabesqued Silver Key would help him unlock the gate of his lost boyhood—which caused a number of mystical students to declare that the missing man had actually doubled back on the trail of time and returned through forty-five years to that other October day in 1883 when he had stayed in

the Snake-Den as a small boy. When he came out that night, they argued, he had somehow made the whole trip to 1928 and back—for did he not thereafter know of things which were to happen later? And yet he had never spoken of anything to happen after 1928.

One student—an elderly eccentric of Providence, Rhode Island, who had enjoyed a long and close correspondence with Carter—had a still more elaborate theory, and believed that Carter had not only returned to boyhood, but achieved a further liberation, roving at will through the prismatic vistas of boyhood dream. After a strange vision this man published a tale of Carter's vanishing, in which he hinted that the lost one now reigned as king on the opal throne of Ilek-Vad, that fabulous town of turrets atop the hollow cliffs of glass overlooking the twilight sea wherein the bearded and finny Gnorri build their singular labyrinths.

It was this old man, Ward Phillips, who pleaded most loudly against the apportionment of Carter's estate to his heirs—all distant cousins—on the ground that he was still alive in another time-dimension and might well return some day. Against him was arrayed the legal talent of one of the cousins, Ernest B. Aspinwall of Chicago, a man ten years Carter's senior, but keen as a youth in forensic battles. For four years the contest had raged, but now the time for apportionment had come, and this vast, strange room in New Orleans was to be the scene of the arrangements.

It was the home of Carter's literary and financial executor—the distinguished Creole student of mysteries and Eastern antiquities, Etienne-Laurent de Marigny. Carter had met de Marigny during the war, when they both served in the French Foreign Legion, and had at once cleaved to him because of their similar tastes and outlook. When, on a memorable joint furlough, the learned young Creole had taken the wistful Boston dreamer to Bayonne, in the south of France, and had shewn him certain terrible secrets in the nighted and immemorial crypts that burrow beneath that brooding, aeon-weighted city, the friendship was forever sealed. Carter's will had named de Marigny as executor, and now that vivid scholar was reluctantly presiding over the settlement of the estate. It was sad work for him, for like the old Rhode-Islander he did not believe

that Carter was dead. But what weight have the dreams of mystics against the harsh wisdom of the world?

Around the table in that strange room in the old French quarter sat the men who claimed an interest in the proceedings. There had been the usual legal advertisements of the conference in papers wherever Carter heirs were thought to live, yet only four now sat listening to the abnormal ticking of that coffin-shaped clock which told no earthly time, and to the bubbling of the courtyard fountain beyond half-curtained, fanlighted windows. As the hours wore on the faces of the four were half-shrouded in the curling fumes from the tripods, which, piled recklessly with fuel, seemed to need less and less attention from the silently gliding and increasingly nervous old negro.

There was Etienne de Marigny himself—slim, dark, handsome, moustached, and still young. Aspinwall, representing the heirs, was white-haired, apoplectic-faced, side-whiskered, and portly. Phillips, the Providence mystic, was lean, grey, long-nosed, clean-shaven, and stoop-shouldered. The fourth man was non-committal in age—lean, and with a dark, bearded, singularly immobile face of very regular contour, bound with the turban of a high-caste Brahmin and having night-black, burning, almost irisless eyes which seemed to gaze out from a vast distance behind the features. He had announced himself as the Swami Chandraputra, an adept from Benares with important information to give; and both de Marigny and Phillips—who had corresponded with him—had been quick to recognise the genuineness of his mystical pretensions. His speech had an oddly forced, hollow, metallic quality, as if the use of English taxed his vocal apparatus; yet his language was as easy, correct, and idiomatic as any native Anglo-Saxon's. In general attire he was the normal European civilian, but his loose clothes sat peculiarly badly on him, while his bushy black beard, Eastern turban, and large white mittens gave him an air of exotic eccentricity.

De Marigny, fingering the parchment found in Carter's car, was speaking.

"No, I have not been able to make anything of the parchment. Mr. Phillips, here, also gives it up. Col. Churchward declares it is not Naacal, and it looks nothing at all like the hieroglyphs on that

Easter Island wooden club. The carvings on that box, though, do strongly suggest Easter Island images. The nearest thing I can recall to these parchment characters—notice how all the letters seem to hang down from horizontal word-bars—is the writing in a book poor Harley Warren once had. It came from India while Carter and I were visiting him in 1919, and he never would tell us anything about it. Said it would be better if we didn't know, and hinted that it might have come originally from some place other than the earth. He took it with him in December when he went down into the vault in that old graveyard—but neither he nor the book ever came to the surface again. Some time ago I sent our friend here—the Swami Chandraputra—a memory-sketch of some of those letters, and also a photostatic copy of the Carter parchment. He believes he may be able to shed light on them after certain references and consultations.

“But the key—Carter sent me a photograph of that. Its curious arabesques were not letters, but seem to have belonged to the same culture-tradition as the hieroglyphs on the parchment. Carter always spoke of being on the point of solving the mystery, though he never gave details. Once he grew almost poetic about the whole business. That antique Silver Key, he said, would unlock the successive doors that bar our free march down the mighty corridors of space and time to the very Border which no man has crossed since Shaddad with his terrific genius built and concealed in the sands of Arabia Petraea the prodigious domes and uncounted minarets of thousand-pillared Irem. Half-starved dervishes—wrote Carter—and thirst-crazed nomads have returned to tell of that monumental portal, and of the Hand that is sculptured above the keystone of the arch, but no man has passed and returned to say that his footprints on the garnet-strown sands within bear witness to his visit. The key, he surmised, was that for which the Cyclopean sculptured Hand vainly grasps.

“Why Carter didn't take the parchment as well as the key, we cannot say. Perhaps he forgot it—or perhaps he forbore to take it through recollection of one who had taken a book of like characters into a vault and never returned. Or perhaps it was really immaterial to what he wished to do.”

As de Marigny paused, old Mr. Phillips spoke in a harsh, shrill voice.

"We can know of Randolph Carter's wandering only what we dream. I have been to many strange places in dreams, and have heard many strange and significant things in Ulthar, beyond the river Skai. It does not appear that the parchment was needed, for certainly Carter reëntered the world of his boyhood dreams, and is now a king in Ilek-Vad."

Mr. Aspinwall grew doubly apoplectic-looking as he sputtered.

"Can't somebody shut that old fool up? We've had enough of these moonings. The problem is to divide the property, and it's about time we got to it."

For the first time Swami Chandraputra spoke in his queerly alien voice.

"Gentlemen, there is more to this matter than you think. Mr. Aspinwall does not do well to laugh at the evidence of dreams. Mr. Phillips has taken an incomplete view—perhaps because he has not dreamed enough. I, myself, have done much dreaming—we in India have always done that, just as all the Carters seem to have done it. You, Mr. Aspinwall, as a maternal cousin, are naturally not a Carter. My own dreams, and certain other sources of information, have told me a great deal which you still find obscure. For example, Randolph Carter forgot that parchment—which he couldn't then decipher—yet it would have been well for him had he remembered to take it. You see, I have really learned pretty much what happened to Carter after he left his car with the Silver Key at sunset on that seventh of October, four years ago."

Aspinwall audibly sneered, but the others sat up with heightened interest. The smoke from the tripods increased, and the crazy ticking of that coffin-shaped clock seemed to fall into bizarre patterns like the dots and dashes of some alien and insoluble telegraph message from outer space. The Hindoo leaned back, half closed his eyes, and continued in that oddly laboured yet idiomatic voice, while before his audience there began to float a picture of what had happened to Randolph Carter.

II.

The hills behind Arkham are full of a strange magic—something, perhaps, which the old wizard Edmund Carter called down from the stars and up from the crypts of nether earth when he fled there

from Salem in 1692. As soon as Randolph Carter was back among them he knew that he was close to one of the gates which a few audacious, abhorred, and alien-souled men have blasted through titan walls betwixt the world and the outside absolute. Here, he felt, and on this day of the year, he could carry out with success the message he had deciphered months before from the arabesques of that tarnished and incredibly ancient Silver Key. He knew now how it must be rotated, how it must be held up to the setting sun, and what syllables of ceremony must be intoned into the void at the ninth and last turning. In a spot as close to a dark polarity and induced gate as this, it could not fail in its primary function. Certainly, he would rest that night in the lost boyhood for which he had never ceased to mourn.

He got out of the car with the key in his pocket, walking uphill deeper and deeper into the shadowy core of that brooding, haunted countryside of winding road, vine-grown stone wall, black woodland, gnarled, neglected orchard, gaping-windowed, deserted farmhouse, and nameless ruin. At the sunset hour, when the distant spires of Kingsport gleamed in the ruddy blaze, he took out the key and made the needed turnings and intonations. Only later did he realise how soon the ritual had taken effect.

Then in the deepening twilight he had heard a voice out of the past. Old Benijah Corey, his great-uncle's hired man. Had not old Benijah been dead for thirty years? Thirty years before when? What was time? Where had he been? Why was it strange that Benijah should be calling him on this seventh of October, 1883? Was he not out later than Aunt Martha had told him to stay? What was this key in his blouse pocket, where his little telescope—given him by his father on his ninth birthday two months before—ought to be? Had he found it in the attic at home? Would it unlock the mystic pylon which his sharp eye had traced amidst the jagged rocks at the back of that inner cave behind the Snake-Den on the hill? That was the place they always coupled with old Edmund Carter the wizard. People wouldn't go there, and nobody but him had ever noticed or squirmed through the root-choked fissure to that great black inner chamber with the pylon. Whose hands had carved that hint of a pylon out of the living rock? Old Wizard Edmund's—or *others* that he had conjured up and commanded? That evening little Randolph

ate supper with Uncle Chris and Aunt Martha in the old gambrel-roofed farmhouse.

Next morning he was up early, and out through the twisted-boughed apple orchard to the upper timber-lot where the mouth of the Snake-Den lurked black and forbidding amongst grotesque, overnourished oaks. A nameless expectancy was upon him, and he did not even notice the loss of his handkerchief as he fumbled in his blouse pocket to see if the queer Silver Key was safe. He crawled through the dark orifice with tense, adventurous assurance, lighting his way with matches taken from the sitting-room. In another moment he had wriggled through the root-choked fissure at the farther end, and was in the vast, unknown inner grotto whose ultimate rock wall seemed half like a monstrous and consciously shapen pylon. Before that dank, dripping wall he stood silent and awestruck, lighting one match after another as he gazed. Was that stony bulge above the keystone of the imagined arch really a gigantic sculptured hand? Then he drew forth the Silver Key, and made motions and intonations whose source he could only dimly remember. Was anything forgotten? He knew only that he wished to cross the barrier to the untrammelled land of his dreams and the gulfs where all dimensions dissolve in the absolute.

III.

What happened then is scarcely to be described in words. It is full of those paradoxes, contradictions, and anomalies which have no place in waking life, but which fill our more fantastic dreams, and are taken as matters of course till we return to our narrow, rigid, objective world of limited causation and tri-dimensional logic. As the Hindoo continued his tale, he had difficulty in avoiding what seemed—even more than the notion of a man transferred through the years to boyhood—an air of trivial, puerile extravagance. Mr. Aspinwall, in disgust, gave an apoplectic snort and virtually stopped listening.

For the rite of the Silver Key, as practiced by Randolph Carter in that black, haunted cave within a cave, did not prove unavailing. From the first gesture and syllable an aura of strange, awesome mutation was apparent—a sense of incalculable disturbance and

confusion in time and space, yet one which held no hint of what we recognise as motion and duration. Imperceptibly, such things as age and location ceased to have any significance whatever. The day before, Randolph Carter had miraculously leaped a gulf of years. Now there was no distinction between boy and man. There was only the entity Randolph Carter, with a certain store of images which had lost all connexion with terrestrial scenes and circumstances of acquisition. A moment before, there had been an inner cave with vague suggestions of a monstrous arch and gigantic sculptured hand on the farther wall. Now there was neither cave nor absence of cave; neither wall nor absence of wall. There was only a flux of impressions not so much visual as cerebral, amidst which the entity that was Randolph Carter experienced perceptions or registrations of all that his mind revolved on, yet without any clear consciousness of the way in which he received them.

By the time the rite was over Carter knew that he was in no region whose place could be told by earth's geographers, and in no age whose date history could fix. For the nature of what was happening was not wholly unfamiliar to him. There were hints of it in the cryptical Pnakotic fragments, and a whole chapter in the forbidden *Necronomicon* of the mad Arab Abdul Alhazred had taken on significance when he had deciphered the designs graven on the Silver Key. A gate had been unlocked—not indeed the Ultimate Gate, but one leading from earth and time to that extension of earth which is outside time, and from which in turn the Ultimate Gate leads fearsomely and perilously to the Last Void which is outside all earths, all universes, and all matter.

There would be a Guide—and a very terrible one; a Guide who had been an entity of earth millions of years before, when man was undreamed of, and when forgotten shapes moved on a steaming planet building strange cities among whose last, crumbling ruins the earliest mammals were to play. Carter remembered what the monstrous *Necronomicon* had vaguely and disconcertingly adumbrated concerning that Guide.

"And while there are those," the mad Arab had written, "who have dared to seek glimpses beyond the Veil, and to accept HIM as a Guide, they would have been more prudent had they avoided commerce with HIM; for it is written in the Book of Thoth how

terrific is the price of a single glimpse. Nor may those who pass ever return, for in the Vastnesses transcending our world are Shapes of darkness that seize and bind. The Affair that shambleth about in the night, the Evil that defieth the Elder Sign, the Herd that stand watch at the secret portal each tomb is known to have, and that thrive on that which groweth out of the tenants within—all these Blacknesses are lesser than HE Who guardeth the Gateway; HE Who will guide the rash one beyond all the worlds into the Abyss of unnamable Devourers. For HE is 'UMR AT-TAWIL, the Most Ancient One, which the scribe rendereth as THE PROLONGED OF LIFE."

Memory and imagination shaped dim half-pictures with uncertain outlines amidst the seething chaos, but Carter knew that they were of memory and imagination only. Yet he felt that it was not chance which built these things in his consciousness, but rather some vast reality, ineffable and undimensioned, which surrounded him and strove to translate itself into the only symbols he was capable of grasping. For no mind of earth may grasp the extensions of shape which interweave in the oblique gulfs outside time and the dimensions we know.

There floated before Carter a cloudy pageantry of shapes and scenes which he somehow linked with earth's primal, aeon-forgotten past. Monstrous living things moved deliberately through vistas of fantastic handiwork that no sane dream ever held, and landscapes bore incredible vegetation and cliffs and mountains and masonry of no human pattern. There were cities under the sea, and denizens thereof; and towers in great deserts where globes and cylinders and nameless winged entities shot off into space or hurtled down out of space. All this Carter grasped, though the images bore no fixed relation to one another or to him. He himself had no stable form or position, but only such shifting hints of form and position as his whirling fancy supplied.

He had wished to find the enchanted regions of his boyhood dreams, where galleys sail up the river Oukranos past the gilded spires of Thran, and elephant caravans tramp through perfumed jungles in Kled beyond forgotten palaces with veined ivory columns that sleep lovely and unbroken under the moon. Now, intoxicated with wider visions, he scarcely knew what he sought. Thoughts of

infinite and blasphemous daring rose in his mind, and he knew he would face the dreaded Guide without fear, asking monstrous and terrible things of him.

All at once the pageant of impressions seemed to achieve a vague kind of stabilisation. There were great masses of towering stone, carven into alien and incomprehensible designs and disposed according to the laws of some unknown, inverse geometry. Light filtered down from a sky of no assignable colour in baffling, contradictory directions, and played almost sentiently over what seemed to be a curved line of gigantic hieroglyphed pedestals more hexagonal than otherwise and surmounted by cloaked, ill-defined Shapes.

There was another Shape, too, which occupied no pedestal, but which seemed to glide or float over the cloudy, floor-like lower level. It was not exactly permanent in outline, but held transient suggestions of something remotely preceding or paralleling the human form, though half as large again as an ordinary man. It seemed to be heavily cloaked, like the Shapes on the pedestals, with some neutral-coloured fabric; and Carter could not detect any eye-holes through which it might gaze. Probably it did not need to gaze, for it seemed to belong to an order of being far outside the merely physical in organisation and faculties.

A moment later Carter knew that this was so, for the Shape had spoken to his mind without sound or language. And though the name it uttered was a dreaded and terrible one, Randolph Carter did not flinch in fear. Instead, he spoke back, equally without sound or language, and made those obeisances which the hideous *Necronomicon* had taught him to make. For this Shape was nothing less than that which all the world has feared since Lomar rose out of the sea and the Winged Ones came to earth to teach the Elder Lore to man. It was indeed the frightful Guide and Guardian of the Gate—'Umr at-Tawil, the ancient one, which the scribe rendereth the Prolonged of Life.

The Guide knew, as he knew all things, of Carter's quest and coming, and that this seeker of dreams and secrets stood before him unafraid. There was no horror or malignity in what he radiated, and Carter wondered for a moment whether the mad Arab's terrific blasphemous hints, and extracts from the Book of Thoth, might

not have come from envy and a baffled wish to do what was now about to be done. Or perhaps the Guide reserved his horror and malignity for those who feared. As the radiations continued, Carter mentally interpreted them in the form of words.

"I am indeed that Most Ancient One," said the Guide, "of whom you know. We have awaited you—the Ancient Ones and I. You are welcome, even though long delayed. You have the Key, and have unlocked the First Gate. Now the Ultimate Gate is ready for your trial. If you fear, you need not advance. You may still go back unharmed the way you came. But if you choose to advance. . . ."

The pause was ominous, but the radiations continued to be friendly. Carter hesitated not a moment, for a burning curiosity drove him on.

"I will advance," he radiated back, "and I accept you as my Guide."

At this reply the Guide seemed to make a sign by certain motions of his robe which may or may not have involved the lifting of an arm or some homologous member. A second sign followed, and from his well-learnt lore Carter knew that he was at last very close to the Ultimate Gate. The light now changed to another inexplicable colour, and the Shapes on the quasi-hexagonal pedestals became more clearly defined. As they sat more erect, their outlines became more like those of men, though Carter knew that they could not be men. Upon their cloaked heads there now seemed to rest tall, uncertainly coloured mitres, strangely suggestive of those on certain nameless figures chiselled by a forgotten sculptor along the living cliffs of a high, forbidden mountain in Tartary; while grasped in certain folds of their swathings were long sceptres whose carven heads bodied forth a grotesque and archaic mystery.

Carter guessed what they were, whence they came, and Whom they served; and guessed, too, the price of their service. But he was still content, for at one mighty venture he was to learn all. Damnation, he reflected, is but a word bandied about by those whose blindness leads them to condemn all who can see, even with a single eye. He wondered at the vast conceit of those who had babbled of the *malignant* Ancient Ones, as if They could pause from their everlasting dreams to wreak a wrath upon mankind. As well, he thought, might a mammoth pause to visit frantic vengeance on an

angleworm. Now the whole assemblage on the vaguely hexagonal pillars was greeting him with a gesture of those oddly carved sceptres, and radiating a message which he understood:

"We salute you, Most Ancient One, and you, Randolph Carter, whose daring has made you one of us."

Carter saw now that one of the pedestals was vacant, and a gesture of the Most Ancient One told him it was reserved for him. He saw also another pedestal, taller than the rest, and at the centre of the oddly curved line (neither semicircle nor ellipse, parabola nor hyperbola) which they formed. This, he guessed, was the Guide's own throne. Moving and rising in a manner hardly definable, Carter took his seat; and as he did so he saw that the Guide had likewise seated himself.

Gradually and mistily it became apparent that the Most Ancient One was holding something—some object clutched in the outflung folds of his robe as if for the sight, or what answered for sight, of the cloaked Companions. It was a large sphere or apparent sphere of some obscurely iridescent metal, and as the Guide put it forward a low, pervasive half-impression of *sound* began to rise and fall in intervals which seemed to be rhythmic even though they followed no rhythm of earth. There was a suggestion of chanting—or what human imagination might interpret as chanting. Presently the quasi-sphere began to grow luminous, and as it gleamed up into a cold, pulsating light of unassignable colour Carter saw that its flickerings conformed to the alien rhythm of the chant. Then all the mitred, sceptre-bearing Shapes on the pedestals commenced a slight, curious swaying in the same inexplicable rhythm, while nim-buses of unclassifiable light—resembling that of the quasi-sphere—played round their shrouded heads.

The Hindoo paused in his tale and looked curiously at the tall, coffin-shaped clock with the four hands and hieroglyphed dial, whose crazy ticking followed no known rhythm of earth.

"You, Mr. de Marigny," he suddenly said to his learned host, "do not need to be told the particular alien rhythm to which those cowed Shapes on the hexagonal pillars chanted and nodded. You are the only one else—in America—who has had a taste of the Outer Extension. That clock—I suppose it was sent you by the Yogi poor Harley Warren used to talk about—the seer who said

that he alone of living men had been to Yian-Ho, the hidden legacy of sinister, aeon-old Leng, and had borne certain things away from that dreadful and forbidden city. I wonder how many of its subtler properties you know? If my dreams and readings be correct, it was made by those who knew much of the First Gateway. But let me go on with my tale."

At last, continued the Swami, the swaying and the suggestion of chanting ceased, the lambent nimbuses around the now drooping and motionless heads faded away, while the cloaked Shapes slumped curiously on their pedestals. The quasi-sphere, however, continued to pulsate with inexplicable light. Carter felt that the Ancient Ones were sleeping as they had been when he first saw them, and he wondered out of what cosmic dreams his coming had wakened them. Slowly there filtered into his mind the truth that this strange chanting ritual had been one of instruction, and that the Companions had been chanted by the Most Ancient One into a new and peculiar kind of sleep, in order that their dreams might open the Ultimate Gate to which the Silver Key was a passport. He knew that in the profundity of this deep sleep they were contemplating unplumbed vastnesses of utter and absolute Outsideness with which the earth had nothing to do, and that they were to accomplish that which his presence had demanded.

The Guide did not share this sleep, but seemed still to be giving instructions in some subtle, soundless way. Evidently he was implanting images of those things which he wished the Companions to dream; and Carter knew that as each of the Ancient Ones pictured the prescribed thought, there would be born the nucleus of a manifestation visible to his own earthly eyes. When the dreams of all the Shapes had achieved a oneness, that manifestation would occur, and everything he required be materialised, through concentration. He had seen such things on earth—in India, where the combined, projected will of a circle of adepts can make a thought take tangible substance, and in hoary Atlaanât, of which few men dare speak.

Just what the Ultimate Gate was, and how it was to be passed, Carter could not be certain; but a feeling of tense expectancy surged over him. He was conscious of having a kind of body, and of holding the fateful Silver Key in his hand. The masses of towering stone

opposite him seemed to possess the evenness of a wall, toward the centre of which his eyes were irresistibly drawn. And then suddenly he felt the mental currents of the Most Ancient One cease to flow forth.

For the first time Carter realised how terrific utter silence, mental and physical, may be. The earlier moments had never failed to contain some perceptible rhythm, if only the faint, cryptical pulse of the earth's dimensional extension, but now the hush of the abyss seemed to fall upon everything. Despite his intimations of body, he had no audible breath; and the glow of 'Umr at-Tawil's quasi-sphere had grown petrifiedly fixed and unpulsating. A potent nimbus, brighter than those which had played round the heads of the Shapes, blazed frozenly over the shrouded skull of the terrible Guide.

A dizziness assailed Carter, and his sense of lost orientation waxed a thousandfold. The strange lights seemed to hold the quality of the most impenetrable blacknesses heaped upon blacknesses, while about the Ancient Ones, so close on their pseudo-hexagonal thrones, there hovered an air of the most stupefying remoteness. Then he felt himself wafted into immeasurable depths, with waves of perfumed warmth lapping against his face. It was as if he floated in a torrid, rose-tinctured sea; a sea of drugged wine whose waves broke foaming against shores of brazen fire. A great fear clutched him as he half saw that vast expanse of surging sea lapping against its far-off coast. But the moment of silence was broken—the surgings were speaking to him in a language that was not of physical sound or articulate words.

"The man of Truth is beyond good and evil," intoned a voice that was not a voice. "The man of Truth has ridden to All-Is-One. The man of Truth has learnt that Illusion is the only reality, and that substance is an imposter."

And now, in that rise of masonry to which his eyes had been so irresistibly drawn, there appeared the outline of a titanic arch not unlike that which he thought he had glimpsed so long ago in that cave within a cave, on the far, unreal surface of the three-dimensioned earth. He realised that he had been using the Silver Key—moving it in accord with an unlearnt and instinctive ritual closely akin to that which had opened the Inner Gate. That rose-

drunken sea which lapped his cheeks was, he realised, no more or less than the adamantine mass of the solid wall yielding before his spell, and the vortex of thought with which the Ancient Ones had aided his spell. Still guided by instinct and blind determination, he floated forward—and through the Ultimate Gate.

IV.

Randolph Carter's advance through that Cyclopean bulk of abnormal masonry was like a dizzy precipitation through the measureless gulfs between the stars. From a great distance he felt triumphant, godlike surges of deadly sweetness, and after that the rustling of great wings, and impressions of sound like the chirpings and murmurings of objects unknown on earth or in the solar system. Glancing backward, he saw not one gate alone, but a multiplicity of gates, at some of which clamoured Forms he strove not to remember.

And then, suddenly, he felt a greater terror than that which any of the Forms could give—a terror from which he could not flee because it was connected with himself. Even the First Gateway had taken something of stability from him, leaving him uncertain about his bodily form and about his relationship to the mistily defined objects around him, but it had not disturbed his sense of unity. He had still been Randolph Carter, a fixed point in the dimensional seething. Now, beyond the Ultimate Gateway, he realised in a moment of consuming fright that he was not one person, but many persons.

He was in many places at the same time. On earth, on October 7, 1883, a little boy named Randolph Carter was leaving the Snake-Den in the hushed evening light and running down the rocky slope and through the twisted-boughed orchard toward his Uncle Christopher's house in the hills beyond Arkham—yet at that same moment, which was also somehow in the earthly year of 1928, a vague shadow not less Randolph Carter was sitting on a pedestal among the Ancient Ones in earth's trans-dimensional extension. Here, too, was a third Randolph Carter in the unknown and formless cosmic abyss beyond the Ultimate Gate. And elsewhere, in a chaos of scenes whose infinite multiplicity and monstrous diversity brought

him close to the brink of madness, were a limitless confusion of beings which he knew were as much himself as the local manifestation now beyond the Ultimate Gate.

There were "Carters" in settings belonging to every known and suspected age of earth's history, and to remoter ages of earthly entity transcending knowledge, suspicion, and credibility. "Carters" of forms both human and non-human, vertebrate and invertebrate, conscious and mindless, animal and vegetable. And more, there were "Carters" having nothing in common with earthly life, but moving outrageously amidst backgrounds of other planets and systems and galaxies and cosmic continua. Spores of eternal life drifting from world to world, universe to universe, yet all equally himself. Some of the glimpses recalled dreams—both faint and vivid, single and persistent—which he had had through the long years since he first began to dream, and a few possessed a haunting, fascinating, and almost horrible familiarity which no earthly logic could explain.

Faced with this realisation, Randolph Carter reeled in the clutch of supreme horror—horror such as had not been hinted even at the climax of that hideous night when two had ventured into an ancient and abhorred necropolis under a waning moon and only one had emerged. No death, no doom, no anguish can arouse the surpassing despair which flows from a loss of *identity*. Merging with nothingness is peaceful oblivion; but to be aware of existence and yet to know that one is no longer a definite being distinguished from other beings—that one no longer has a *self*—that is the nameless summit of agony and dread.

He knew that there had been a Randolph Carter of Boston, yet could not be sure whether he—the fragment or facet of an earthly entity beyond the Ultimate Gate—had been that one or some other. His *self* had been annihilated; and yet he—if indeed there could, in view of that utter nullity of individual existence, be such a thing as *he*—was equally aware of being in some inconceivable way a legion of selves. It was as though his body had been suddenly transformed into one of those many-limbed and many-headed effigies sculptured in Indian temples, and he contemplated the aggregation in a bewildered attempt to discern which was the original and which the

additions—if indeed (supremely monstrous thought) there *were* any original as distinguished from other embodiments.

Then, in the midst of these devastating reflections, Carter's beyond-the-gate fragment was hurled from what had seemed the nadir of horror to black, clutching pits of a horror still more profound. This time it was largely external—a force or personality which at once confronted and surrounded and pervaded him, and which in addition to its local presence, seemed also to be a part of himself, and likewise to be coexistent with all time and coterminous with all space. There was no visual image, yet the sense of entity and the awful concept of combined localism, identity, and infinity lent a paralysing terror beyond anything which any Carter-fragment had hitherto deemed capable of existing.

In the face of that awful wonder, the quasi-Carter forgot the horror of destroyed individuality. It was an All-in-One and One-in-All of limitless being and self—not merely a thing of one Space-Time continuum, but allied to the ultimate animating essence of existence's whole unbounded sweep—the last, utter sweep which has no confines and which outreaches fancy and mathematics alike. It was perhaps that which certain secret cults of earth have whispered of as YOG-SOTHOTH, and which has been a deity under other names; that which the crustaceans of Yuggoth worship as the Beyond-One, and which the vaporous brains of the spiral nebulae know by an untranslatable Sign—yet in a flash the Carter-facet realised how slight and fractional all these conceptions are.

And now the BEING was addressing the Carter-facet in prodigious waves that smote and burned and thundered—a concentration of energy that blasted its recipient with well-nigh unendurable violence, and that followed, with certain definite variations, the singular unearthly rhythm which had marked the chanting and swaying of the Ancient Ones, and the flickering of the monstrous lights, in that baffling region beyond the First Gate. It was as though suns and worlds and universes had converged upon one point whose very position in space they had conspired to annihilate with an impact of resistless fury. But amidst the greater terror one lesser terror was diminished; for the searing waves appeared somehow to isolate the beyond-the-gate Carter from his infinity of

duplicates—to restore, as it were, a certain amount of the illusion of identity. After a time the hearer began to translate the waves into speech-forms known to him, and his sense of horror and oppression waned. Fright became pure awe, and what had seemed blasphemously abnormal seemed now only ineffably majestic.

“Randolph Carter,” IT seemed to say, “MY manifestations on your planet’s extension, the Ancient Ones, have sent you as one who would lately have returned to small lands of dream which he had lost, yet who with greater freedom has risen to greater and nobler desires and curiosities. You wished to sail up golden Oukranos, to search out forgotten ivory cities in orchid-heavy Kled, and to reign on the opal throne of Ilek-Vad, whose fabulous towers and numberless domes rise mighty toward a single red star in a firmament alien to your earth and to all matter. Now, with the passing of two Gates, you wish loftier things. You would not flee like a child from a scene disliked to a dream beloved, but would plunge like a man into that last and inmost of secrets which lies behind all scenes and dreams.

“What you wish, I have found good; and I am ready to grant that which I have granted eleven times only to beings of your planet—five times only to those you call men, or those resembling them. I am ready to shew you the Ultimate Mystery, to look on which is to blast a feeble spirit. Yet before you gaze full at that last and first of secrets you may still wield a free choice, and return if you will through the two Gates with the Veil still unrent before your eyes.”

V.

A sudden shutting-off of the waves left Carter in a chilling and awesome silence full of the spirit of desolation. On every hand pressed the illimitable vastness of the void, yet the seeker knew that the BEING was still there. After a moment he thought of words whose mental substance he flung into the abyss:

“I accept. I will not retreat.”

The waves surged forth again, and Carter knew that the BEING had heard. And now there poured from that limitless MIND a flood of knowledge and explanation which opened new vistas to the seeker, and prepared him for such a grasp of the cosmos as he

had never hoped to possess. He was told how childish and limited is the notion of a tri-dimensional world, and what an infinity of directions there are besides the known directions of up-down, forward-backward, right-left. He was shewn the smallness and tinsel emptiness of the little gods of earth, with their petty, human interests and connexions—their hatreds, rages, loves, and vanities; their craving for praise and sacrifice, and their demands for faith contrary to reason and Nature.

While most of the impressions translated themselves to Carter as words, there were others to which other senses gave interpretation. Perhaps with eyes and perhaps with imagination he perceived that he was in a region of dimensions beyond those conceivable to the eye and brain of man. He saw now, in the brooding shadows of that which had been first a vortex of power and then an illimitable void, a sweep of creation that dizzied his senses. From some inconceivable vantage-point he looked upon prodigious forms whose multiple extensions transcended any conception of being, size, and boundaries which his mind had hitherto been able to hold, despite a lifetime of cryptical study. He began to understand dimly why there could exist at the same time the little boy Randolph Carter in the Arkham farmhouse in 1883, the misty form on the vaguely hexagonal pillar beyond the First Gate, the fragment now facing the PRESENCE in the limitless abyss, and all the other "Carters" his fancy or perception envisaged.

Then the waves increased in strength, and sought to improve his understanding, reconciling him to the multiform entity of which his present fragment was an infinitesimal part. They told him that every figure of space is but the result of the intersection by a plane of some corresponding figure of one more dimension—as a square is cut from a cube or a circle from a sphere. The cube and sphere, of three dimensions, are thus cut from corresponding forms of four dimensions that men know only through guesses and dreams; and these in turn are cut from forms of five dimensions, and so on up to the dizzy and reachless heights of archetypal infinity. The world of men and of the gods of men is merely an infinitesimal phase of an infinitesimal thing—the three-dimensional phase of that small wholeness reached by the First Gate, where 'Umr at-Tawil dictates dreams to the Ancient Ones. Though men hail it as reality and

brand thoughts of its many-dimensioned original as unreality, it is in truth the very opposite. That which we call substance and reality is shadow and illusion, and that which we call shadow and illusion is substance and reality.

Time, the waves went on, is motionless, and without beginning or end. That it has motion, and is the cause of change, is an illusion. Indeed, it is itself really an illusion, for except to the narrow sight of beings in limited dimensions there are no such things as past, present, and future. Men think of time only because of what they call change, yet that too is illusion. All that was, and is, and is to be, exists simultaneously.

These revelations came with a godlike solemnity which left Carter unable to doubt. Even though they lay almost beyond his comprehension, he felt that they must be true in the light of that final cosmic reality which belies all local perspectives and narrow partial views; and he was familiar enough with profound speculations to be free from the bondage of local and partial conceptions. Had his whole quest not been based upon a faith in the unreality of the local and partial?

After an impressive pause the waves continued, saying that what the denizens of few-dimensioned zones call change is merely a function of their consciousness, which views the external world from various cosmic angles. As the shapes produced by the cutting of a cone seem to vary with the angles of cutting—being circle, ellipse, parabola, or hyperbola according to that angle, yet without any change in the cone itself—so do the local aspects of an unchanged and endless reality seem to change with the cosmic angle of regarding. To this variety of angles of consciousness the feeble beings of the inner worlds are slaves, since with rare exceptions they cannot learn to control them. Only a few students of forbidden things have gained inklings of this control, and have thereby conquered time and change. But the entities outside the Gates command all angles, and view the myriad parts of the cosmos in terms of fragmentary, change-involving perspective, or of the changeless totality beyond perspective, in accordance with their will.

As the waves paused again, Carter began to comprehend, vaguely and terrifiedly, the ultimate background of that riddle of lost individuality which had at first so horrified him. His intuition

pieced together the fragments of revelation, and brought him closer and closer to a grasp of the secret. He understood that much of the frightful revelation would have come upon him—splitting up his ego amongst myriads of earthly counterparts—inside the First Gate, had not the magic of 'Umr at-Tawil kept it from him in order that he might use the Silver Key with precision for the Ultimate Gate's opening. Anxious for clearer knowledge, he sent out waves of thought, asking more of the exact relationship between his various facets—the fragment now beyond the Ultimate Gate, the fragment still on the quasi-hexagonal pedestal beyond the First Gate, the boy of 1883, the man of 1928, the various ancestral beings who had formed his heritage and the bulwark of his ego, and the nameless denizens of the other aeons and other worlds which that first hideous flash of ultimate perception had identified with him. Slowly the waves of the BEING surged out in reply, trying to make plain what was almost beyond the reach of an earthly mind.

All descended lines of beings of the finite dimensions, continued the waves, and all stages of growth in each one of these beings, are merely manifestations of one archetypal and eternal being in the space outside dimensions. Each local being—son, father, grandfather, and so on—and each stage of individual being—infant, child, boy, young man, old man—is merely one of the infinite phases of that same archetypal and eternal being, caused by a variation in the angle of the consciousness-plane which cuts it. Randolph Carter at all ages; Randolph Carter and all his ancestors both human and pre-human, terrestrial and pre-terrestrial; all these were only phases of one ultimate, eternal "Carter" outside space and time—phantom projections differentiated only by the angle at which the plane of consciousness happened to cut the eternal archetype in each case.

A slight change of angle could turn the student of today into the child of yesterday; could turn Randolph Carter into that wizard Edmund Carter who fled from Salem to the hills behind Arkham in 1692, or that Pickman Carter who in the year 2169 would use strange means in repelling the Mongol hordes from Australia; could turn a human Carter into one of those earlier entities which had dwelt in primal Hyperborea and worshipped black, plastic Tsathoggua after flying down from Kythanil, the double planet

that once revolved around Arcturus; could turn a terrestrial Carter to a remotely ancestral and doubtfully shaped dweller on Kythanil itself, or a still remoter creature of trans-galactic Shonhi, or a four-dimensioned gaseous consciousness in an older space-time continuum, or a vegetable brain of the future on a dark radio-active comet of inconceivable orbit—and so on, in the endless cosmic circle.

The archetypes, throbbed the waves, are the people of the ultimate abyss—formless, ineffable, and guessed at only by rare dreamers on the low-dimensioned worlds. Chief among such was this informing BEING itself . . . *which indeed was Carter's own archetype*. The glutless zeal of Carter and all his forbears for forbidden cosmic secrets was a natural result of derivation from the SUPREME ARCHETYPE. On every world all great wizards, all great thinkers, all great artists, are facets of IT.

Almost stunned with awe, and with a kind of terrifying delight, Randolph Carter's consciousness did homage to that transcendent ENTITY from which it was derived. As the waves paused again he pondered in the mighty silence, thinking of strange tributes, stranger questions, and still stranger requests. Curious concepts flowed conflictingly through a brain dazed with unaccustomed vistas and unforeseen disclosures. It occurred to him that, if those disclosures were literally true, he might *bodily* visit all those infinitely distant ages and parts of the universe which he had hitherto known only in dreams, could he but command the magic to change the angle of his consciousness-plane. And did not the Silver Key supply that magic? Had it not first changed him from a man in 1928 to a boy in 1883, and then to something quite outside time? Oddly, despite his present apparent absence of body, he knew that the Key was still with him.

While the silence still lasted, Randolph Carter radiated forth the thoughts and questions which assailed him. He knew that in this ultimate abyss he was equidistant from every facet of his archetype—human or non-human, earthly or extra-earthly, galactic or trans-galactic; and his curiosity regarding the other phases of his being—especially those phases which were farthest from an earthly 1928 in time and space, or which had most persistently haunted his

dreams throughout life—was at fever heat. He felt that his archetypal ENTITY could at will send him bodily to any of these phases of bygone and distant life by changing his consciousness-plane, and despite the marvels he had undergone he burned for the further marvel of walking in the flesh through those grotesque and incredible scenes which visions of the night had fragmentarily brought him.

Without definite intention he was asking the PRESENCE for access to a dim, fantastic world whose five multi-coloured suns, alien constellations, dizzy black crags, clawed, tapir-snouted denizens, bizarre metal towers, unexplained tunnels, and cryptical floating cylinders had intruded again and again upon his slumbers. That world, he felt vaguely, was in all the conceivable cosmos the one most freely in touch with others; and he longed to explore the vistas whose beginnings he had glimpsed, and to embark through space to those still remoter worlds with which the clawed, snouted denizens trafficked. There was no time for fear. As at all crises of his strange life, sheer cosmic curiosity triumphed over everything else.

When the waves resumed their awesome pulsing Carter knew that his terrible request was granted. The BEING was telling him of the nighted gulfs through which he would have to pass, of the unknown quintuple star in an unsuspected galaxy around which the alien world revolved, and of the burrowing inner horrors against which the clawed, snouted race of that world perpetually fought. IT told him, too, of how the angle of his personal consciousness-plane, and the angle of his consciousness-plane regarding the space-time elements of the sought-for world, would have to be tilted simultaneously in order to restore to that world the Carter-facet which had dwelt there.

The PRESENCE warned him to be sure of his symbols if he wished ever to return from the remote and alien world he had chosen, and he radiated back an impatient affirmation; confident that the Silver Key, which he felt was with him and which he knew had tilted both world and personal planes in throwing him back to 1883, contained those symbols which were meant. And now the BEING, grasping his impatience, signified Its readiness to accomplish the monstrous precipitation. The waves abruptly ceased,

and there supervened a momentary stillness tense with nameless and dreadful expectancy.

Then, without warning, came a whirring and drumming that swelled to a terrific thundering. Once again Carter felt himself the focal point of an intense concentration of energy which smote and hammered and seared unbearably in the now-familiar alien rhythm of outer space, and which he could not classify as either the blasting heat of a blazing star or the all-petrifying cold of the ultimate abyss. Bands and rays of colour utterly foreign to any spectrum of our universe played and wove and interlaced before him, and he was conscious of a frightful velocity of motion. He caught one fleeting glimpse of a figure sitting *alone* upon a cloudy throne more hexagonal than otherwise. . . .

VI.

As the Hindoo paused in his story he saw that de Marigny and Phillips were watching him absorbedly. Aspinwall pretended to ignore the narrative, and kept his eyes ostentatiously on the papers before him. The alien-rhythmed ticking of the coffin-shaped clock took on a new and portentous meaning, while the fumes from the choked, neglected tripods wove themselves into fantastic and inexplicable shapes, and formed disturbing combinations with the grotesque figures of the draught-swayed tapestries. The old negro who had tended them was gone—perhaps some growing tension had frightened him out of the house. An almost apologetic hesitancy hampered the speaker as he resumed in his oddly laboured yet idiomatic voice.

"You have found these things of the abyss hard to believe," he said, "but you will find the tangible and material things ahead still harder. That is the way of our minds. Marvels are doubly incredible when brought into three dimensions from the vague regions of possible dream. I shall not try to tell you much—that would be another and very different story. I will tell only what you absolutely have to know."

Carter, after that final vortex of alien and polychromatic rhythm, had found himself in what for a moment he thought was his old insistent dream. He was, as many a night before, walking

amidst throngs of clawed, snouted beings through the streets of a labyrinth of inexplicably fashioned metal under a blaze of diverse solar colour; and as he looked down he saw that his body was like those of the others—rugose, partly squamous, and curiously articulated in a fashion mainly insect-like yet not without a caricaturish resemblance to the human outline. The Silver Key was still in his grasp—though held by a noxious-looking claw.

In another moment the dream-sense vanished, and he felt rather as one just awaked from a dream. The ultimate abyss—the BEING—an entity of absurd, outlandish race called “Randolph Carter” on a world of the future not yet born—some of these things were parts of the persistent, recurrent dreams of the wizard Zkauba on the planet Yaddith. They were too persistent—they interfered with his duties in weaving spells to keep the frightful bholes in their burrows, and became mixed up with his recollections of the myriad real worlds he had visited in his light-beam envelope. And now they had become quasi-real as never before. This heavy, material Silver Key in his right upper claw, exact image of one he had dreamt about, meant no good. He must rest and reflect, and consult the Tablets of Nhing for advice on what to do. Climbing a metal wall in a lane off the main concourse, he entered his apartment and approached the rack of tablets.

Seven day-fractions later Zkauba squatted on his prism in awe and half-despair, for the truth had opened up a new and conflicting set of memories. Nevermore could he know the peace of being one entity. For all time and space he was two: Zkauba the Wizard of Yaddith, disgusted with the thought of the repellent earth-mammal Carter that he was to be and had been, and Randolph Carter, of Boston on the earth, shivering with fright at the clawed, snouted thing which he had once been, and had become again.

The time-units spent on Yaddith, croaked the Swami—whose laboured voice was beginning to shew signs of fatigue—made a tale in themselves which could not be related in brief compass. There were trips to Shonhi and Mthura and Kath, and other worlds in the twenty-eight galaxies accessible to the light-beam envelopes of the creatures of Yaddith, and trips back and forth through aeons of time with the aid of the Silver Key and various other symbols known to Yaddith’s wizards. There were hideous struggles with the

bleached, viscous bholes in the primal tunnels that honeycombed the planet. There were awed sessions in libraries amongst the massed lore of ten thousand worlds living and dead. There were tense conferences with other minds of Yaddith, including that of the Arch-Ancient Buu. Zkauba told no one of what had befallen his personality, but when the Randolph Carter facet was uppermost he would study furiously every possible means of returning to the earth and to human form, and would desperately practice human speech with the buzzing, alien throat-organs so ill adapted to it.

The Carter-facet had soon learned with horror that the Silver Key was unable to effect his return to human form. It was, as he deduced too late from things he remembered, things he dreamed, and things he inferred from the lore of Yaddith, a product of Hyperborea on earth; with power over the personal consciousness-angles of human beings alone. It could, however, change the planetary angle and send the user at will through time in an unchanged body. There had been an added spell which gave it limitless powers it otherwise lacked; but this, too, was a human discovery—peculiar to a spatially unreachable region, and not to be duplicated by the wizards of Yaddith. It had been written on the undecipherable parchment in the hideously carved box with the Silver Key, and Carter bitterly lamented that he had left it behind. The now inaccessible BEING of the abyss had warned him to be sure of his symbols, and had doubtless thought he lacked nothing.

As time wore on he strove harder and harder to utilise the monstrous lore of Yaddith in finding a way back to the abyss and the omnipotent ENTIFY. With his new knowledge he could have done much toward reading the cryptic parchment; but that power, under present conditions, was merely ironic. There were times, however, when the Zkauba-facet was uppermost, and when he strove to erase the conflicting Carter-memories which troubled him.

Thus long spaces of time wore on—ages longer than the brain of man could grasp, since the beings of Yaddith die only after prolonged cycles. After many hundred revolutions the Carter-facet seemed to gain on the Zkauba-facet, and would spend vast periods calculating the distance of Yaddith in space and time from the human earth that was to be. The figures were staggering—aeons of light-years beyond counting—but the immemorial lore of Yaddith

fitted Carter to grasp such things. He cultivated the power of dreaming himself momentarily earthward, and learned many things about our planet that he had never known before. But he could not dream the needed formula on the missing parchment.

Then at last he conceived a wild plan of escape from Yaddith—which began when he found a drug that would keep his Zkaubafacet always dormant, yet without dissolution of the knowledge and memories of Zkauba. He thought that his calculations would let him perform a voyage with a light-wave envelope such as no being of Yaddith had ever performed—a *bodily* voyage through nameless aeons and across incredible galactic reaches to the solar system and the earth itself. Once on earth, though in the body of a clawed, snouted thing, he might be able somehow to find—and finish deciphering—the strangely hieroglyphed parchment he had left in the car at Arkham; and with its aid—and the Key's—resume his normal terrestrial semblance.

He was not blind to the perils of the attempt. He knew that when he had brought the planet-angle to the right aeon (a thing impossible to do while hurtling through space), Yaddith would be a dead world dominated by triumphant bholes, and that his escape in the light-wave envelope would be a matter of grave doubt. Likewise was he aware of how he must achieve suspended animation, in the manner of an adept, to endure the aeon-long flight through fathomless abysses. He knew, too, that—assuming his voyage succeeded—he must immunise himself to the bacterial and other earthly conditions hostile to a body from Yaddith. Furthermore, he must provide a way of feigning human shape on earth until he might recover and decipher the parchment and resume that shape in truth. Otherwise he would probably be discovered and destroyed by the people in horror as a thing that should not be. And there must be some gold—luckily obtainable on Yaddith—to tide him over that period of quest.

Slowly Carter's plans went forward. He provided a light-wave envelope of abnormal toughness, able to stand both the prodigious time-transition and the unexampled flight through space. He tested all his calculations, and sent forth his earthward dreams again and again, bringing them as close as possible to 1928. He practiced suspended animation with marvellous success. He discovered just

the bacterial agent he needed, and worked out the varying gravity-stress to which he must become used. He artfully fashioned a waxen mask and loose costume enabling him to pass among men as a human being of a sort, and devised a doubly potent spell with which to hold back the bholes at the moment of his starting from the black, dead Yaddith of the inconceivable future. He took care, too, to assemble a large supply of the drugs—unobtainable on earth—which would keep his Zkauba-facet in abeyance till he might shed the Yaddith body, nor did he neglect a small store of gold for earthly use.

The starting-day was a time of doubt and apprehension. Carter climbed up to his envelope-platform, on the pretext of sailing for the triple star Nython, and crawled into the sheath of shining metal. He had just room to perform the ritual of the Silver Key, and as he did so he slowly started the levitation of his envelope. There was an appalling seething and darkening of the day, and a hideous racking of pain. The cosmos seemed to reel irresponsibly, and the other constellations danced in a black sky.

All at once Carter felt a new equilibrium. The cold of interstellar gulfs gnawed at the outside of his envelope, and he could see that he floated free in space—the metal building from which he had started having decayed ages before. Below him the ground was festering with gigantic bholes; and even as he looked, one reared up several hundred feet and levelled a bleached, viscous end at him. But his spells were effective, and in another moment he was falling away from Yaddith unharmed.

VII.

In that bizarre room in New Orleans, from which the old black servant had instinctively fled, the odd voice of Swami Chandraputra grew hoarser still.

"Gentlemen," he continued, "I will not ask you to believe these things until I have shewn you special proof. Accept it, then, as a myth, when I tell you of the *thousands of light-years—thousands of years of time, and uncounted billions of miles*—that Randolph Carter hurtled through space as a nameless, alien entity in a thin envelope of electron-activated metal. He timed his period of sus-

pended animation with utmost care, planning to have it end only a few years before the time of landing on the earth in or near 1928.

"He will never forget that awakening. Remember, gentlemen, that before that aeon-long sleep *he had lived consciously for thousands of terrestrial years amidst the alien and horrible wonders of Yaddith*. There was a hideous gnawing of cold, a cessation of menacing dreams, and a glance through the eye-plates of the envelope. Stars, clusters, nebulae, on every hand—and *at last their outlines bore some kinship to the constellations of earth that he knew*.

"Some day his descent into the solar system may be told. He saw Kynarth and Yuggoth on the rim, passed close to Neptune and glimpsed the hellish white fungi that spot it, learned an untellable secret from the close-glimpsed mists of Jupiter and saw the horror on one of the satellites, and gazed at the Cyclopean ruins that sprawl over Mars' ruddy disc. When the earth drew near he saw it as a thin crescent which swelled alarmingly in size. He slackened speed, though his sensations of homecoming made him wish to lose not a moment. I will not try to tell you of those sensations as I learned them from Carter.

"Well, toward the last Carter hovered about in the earth's upper air waiting till daylight came over the western hemisphere. He wanted to land where he had left—near the Snake-Den in the hills behind Arkham. If any of you have been away from home long—and I know one of you has—I leave it to you how the sight of New England's rolling hills and great elms and gnarled orchards and ancient stone walls must have affected him.

"He came down at dawn in the lower meadow of the old Carter place, and was thankful for the silence and solitude. It was autumn, as when he had left, and the smell of the hills was balm to his soul. He managed to drag the metal envelope up the slope of the timberlot into the Snake-Den, though it would not go through the weed-choked fissure to the inner cave. It was there also that he covered his alien body with the human clothing and waxen mask which would be necessary. He kept the envelope here for over a year, till certain circumstances made a new hiding-place necessary.

"He walked to Arkham—incidentally practicing the management of his body in human posture and against terrestrial gravity—and got his gold changed to money at a bank. He also made some in-

quiries—posing as a foreigner ignorant of much English—and found that the year was 1930, only two years after the goal he had aimed at.

“Of course, his position was horrible. Unable to assert his identity, forced to live on guard every moment, with certain difficulties regarding food, and with a need to conserve the alien drug which kept his Zkauba-facet dormant, he felt that he must act as quickly as possible. Going to Boston and taking a room in the decaying West End, where he could live cheaply and inconspicuously, he at once established inquiries concerning Randolph Carter’s estate and effects. It was then that he learned how anxious Mr. Aspinwall, here, was to have the estate divided, and how valiantly Mr. de Marigny and Mr. Phillips strove to keep it intact.”

The Hindoo bowed, though no expression crossed his dark, tranquil, and thickly bearded face.

“Indirectly,” he continued, “Carter secured a good copy of the missing parchment and began work on its deciphering. I am glad to say that I was able to help in all this—for he appealed to me quite early, and through me came in touch with other mystics throughout the world. I went to live with him in Boston—a wretched place in Chambers St. As for the parchment—I am pleased to help Mr. de Marigny in his perplexity. To him let me say that the language of those hieroglyphics is not Naacal but R’lyehian, which was brought to earth by the spawn of Cthulhu countless cycles ago. It is, of course, a translation—there was an Hyperborean original millions of years earlier in the primal tongue of Tsath-yo.

“There was more to decipher than Carter had looked for, but at no time did he give up hope. Early this year he made great strides through a book he imported from Nepal, and there is no question but that he will win before long. Unfortunately, however, one handicap has developed—the exhaustion of the alien drug which keeps the Zkauba-facet dormant. This is not, however, as great a calamity as was feared. Carter’s personality is gaining in the body, and when Zkauba comes uppermost—for shorter and shorter periods, and now only when evoked by some unusual excitement—he is generally too dazed to undo any of Carter’s work. He cannot find the metal envelope that would take him back to Yaddith, for although he almost did, once, Carter hid it anew at a time when

the Zkauba-facet was wholly latent. All the harm he has done is to frighten a few people and create certain nightmare rumours among the Poles and Lithuanians of Boston's West End. So far, he has never injured the careful disguise prepared by the Carter-facet, though he sometimes throws it off so that parts have to be replaced. I have seen what lies beneath—and it is not good to see.

"A month ago Carter saw the advertisement of this meeting, and knew that he must act quickly to save his estate. He could not wait to decipher the parchment and resume his human form. Consequently he deputed me to act for him, and in that capacity I am here.

"Gentlemen, I say to you that Randolph Carter is not dead; that he is temporarily in an anomalous condition, but that within two or three months at the outside he will be able to appear in proper form and demand the custody of his estate. I am prepared to offer proof if necessary. Therefore I beg that you adjourn this meeting for an indefinite period."

VIII.

De Marigny and Phillips stared at the Hindoo as if hypnotised, while Aspinwall emitted a series of snorts and bellows. The old attorney's disgust had by now surged into open rage, and he pounded the table with an apoplectically veined fist. When he spoke, it was in a kind of bark.

"How long is this foolery to be borne? I've listened an hour to this madman—this faker—and now he has the damned effrontery to say that Randolph Carter is alive—to ask us to postpone the settlement for no good reason! Why don't you throw the scoundrel out, de Marigny? Do you mean to make us all the butts of a charlatan or idiot?"

De Marigny quietly raised his hands and spoke softly.

"Let us think slowly and clearly. This has been a very singular tale, and there are things in it which I, as a mystic not altogether ignorant, recognise as far from impossible. Furthermore—since 1930 I have received letters from the Swami which tally with his account."

As he paused, old Mr. Phillips ventured a word.

"Swami Chandraputra spoke of proofs. I, too, recognise much that is significant in this story, and I have myself had many oddly corroborative letters from the Swami during the last two years; but some of these statements are very extreme. Is there not something tangible which can be shewn?"

At last the impassive-faced Swami replied, slowly and hoarsely, and drawing an object from the pocket of his loose coat as he spoke.

"While none of you here has ever *seen* the Silver Key itself, Messrs. de Marigny and Phillips have seen photographs of it. *Does this look familiar to you?*"

He fumblingly laid on the table, with his large, white-mittened hand, a heavy key of tarnished silver—nearly five inches long, of unknown and utterly exotic workmanship, and covered from end to end with hieroglyphs of the most bizarre description. De Marigny and Phillips gasped.

"That's it!" cried de Marigny. "The camera doesn't lie. I couldn't be mistaken!"

But Aspinwall had already launched a reply.

"Fools! What does it prove? If that's really the key that belonged to my cousin, it's up to this foreigner—this damned nigger—to explain how he got it! Randolph Carter vanished with the key four years ago. How do we know he wasn't robbed and murdered? He was half-crazy himself, and in touch with still crazier people.

"Look here, you nigger—where did you get that key? Did you kill Randolph Carter?"

The Swami's features, abnormally placid, did not change; but the remote, irisless black eyes behind them blazed dangerously. He spoke with great difficulty.

"Please control yourself, Mr. Aspinwall. There is another form of proof that I *could* give, but its effect upon everybody would not be pleasant. Let us be reasonable. Here are some papers obviously written since 1930, and in the unmistakable style of Randolph Carter."

He clumsily drew a long envelope from inside his loose coat and handed it to the sputtering attorney as de Marigny and Phillips watched with chaotic thoughts and a dawning feeling of supernal wonder.

"Of course the handwriting is almost illegible—but remember that Randolph Carter now has no hands well adapted to forming human script."

Aspinwall looked through the papers hurriedly, and was visibly perplexed, but he did not change his demeanour. The room was tense with excitement and nameless dread, and the alien rhythm of the coffin-shaped clock had an utterly diabolic sound to de Marigny and Phillips—though the lawyer seemed affected not at all. Aspinwall spoke again.

"These look like clever forgeries. If they aren't, they may mean that Randolph Carter has been brought under the control of people with no good purpose. There's only one thing to do—have this faker arrested. De Marigny, will you telephone for the police?"

"Let us wait," answered their host. "I do not think this case calls for the police. I have a certain idea. Mr. Aspinwall, this gentleman is a mystic of real attainments. He says he is in the confidence of Randolph Carter. Will it satisfy you if he can answer certain questions which could be answered only by one in such confidence? I know Carter, and can ask such questions. Let me get a book which I think will make a good test."

He turned toward the door to the library, Phillips dazedly following in a kind of automatic way. Aspinwall remained where he was, studying closely the Hindoo who confronted him with abnormally impassive face. Suddenly, as Chandraputra clumsily restored the Silver Key to his pocket, the lawyer emitted a guttural shout which stopped de Marigny and Phillips in their tracks.

"Hey, by God, I've got it! This rascal is in disguise. I don't believe he's an East Indian at all. That face—it isn't a face, but a *mask*! I guess his story put that into my head, but it's true. It never moves, and that turban and beard hide the edges. This fellow's a common crook! He isn't even a foreigner—I've been watching his language. He's a Yankee of some sort. And look at those mittens—he knows his fingerprints could be spotted. Damn you, I'll pull that thing off—"

"Stop!" The hoarse, oddly alien voice of the Swami held a tone beyond all mere earthly fright. "I told you there was *another form of proof which I could give if necessary*, and I warned you not to provoke me to it. This red-faced old meddler is right—I'm not

really an East Indian. *This face is a mask, and what it covers is not human.* You others have guessed—I felt that minutes ago. It wouldn't be pleasant if I took that mask off—let it alone, Ernest. I may as well tell you that *I am Randolph Carter.*”

No one moved. Aspinwall snorted and made vague motions. De Marigny and Phillips, across the room, watched the workings of his red face and studied the back of the turbaned figure that confronted him. The clock's abnormal ticking was hideous, and the tripod fumes and swaying arras danced a dance of death. The half-choking lawyer broke the silence.

“No you don't, you crook—you can't scare me! You've reasons of your own for not wanting that mask off. Maybe we'd know who you are. Off with it—”

As he reached forward, the Swami seized his hand with one of his own clumsily mittened members, evoking a curious cry of mixed pain and surprise. De Marigny started toward the two, but paused confused as the pseudo-Hindoo's shout of protest changed to a wholly inexplicable rattling and buzzing sound. Aspinwall's red face was furious, and with his free hand he made another lunge at his opponent's bushy beard. This time he succeeded in getting a hold, and at his frantic tug the whole waxen visage came loose from the turban and clung to the lawyer's apoplectic fist.

As it did so, Aspinwall uttered a frightful gurgling cry, and Phillips and de Marigny saw his face convulsed with a wilder, deeper, and more hideous epilepsy of stark panic than ever they had seen on human countenance before. The pseudo-Swami had meanwhile released his other hand and was standing as if dazed, making buzzing noises of a most abnormal quality. Then the turbaned figure slumped oddly into a posture scarcely human, and began a curious, fascinated sort of shuffle toward the coffin-shaped clock that ticked out its cosmic and abnormal rhythm. His now uncovered face was turned away, and de Marigny and Phillips could not see what the lawyer's act had disclosed. Then their attention was turned to Aspinwall, who was sinking ponderously to the floor. The spell was broken—but when they reached the old man he was dead.

Turning quickly to the shuffling Swami's receding back, de Marigny saw one of the great white mittens drop listlessly off a

dangling arm. The fumes of the olibanum were thick, and all that could be glimpsed of the revealed hand was something long and black. Before the Creole could reach the retreating figure, old Mr. Phillips laid a restraining hand on his shoulder.

"Don't!" he whispered. "We don't know what we're up against—that other facet, you know—Zkauba, the wizard of Yad-dith. . . ."

The turbaned figure had now reached the abnormal clock, and the watchers saw through the dense fumes a blurred black claw fumbling with the tall, hieroglyphed door. The fumbling made a queer clicking sound. Then the figure entered the coffin-shaped case and pulled the door shut after it.

De Marigny could no longer be restrained, but when he reached and opened the clock it was empty. The abnormal ticking went on, beating out the dark cosmic rhythm which underlies all mystical gate-openings. On the floor the great white mitten, and the dead man with a bearded mask clutched in his hand, had nothing further to reveal.

A year has passed, and nothing has been heard of Randolph Carter. His estate is still unsettled. The Boston address from which one "Swami Chandraputra" sent inquiries to various mystics in 1930-31-32 was indeed tenanted by a strange Hindoo, but he left shortly before the date of the New Orleans conference and has never been seen since. He was said to be dark, expressionless, and bearded, and his landlord thinks the swarthy mask—which was duly exhibited—looks very much like him. He was never, however, suspected of any connexion with the nightmare apparitions whispered of by local Slavs. The hills behind Arkham were searched for the "metal envelope", but nothing of the sort was ever found. However, a clerk in Arkham's First National Bank does recall a queer turbaned man who cashed an odd bit of gold bullion in October, 1930.

De Marigny and Phillips scarcely know what to make of the business. After all, what was proved? There was a story. There was a key which might have been forged from one of the pictures Carter had freely distributed in 1928. There were papers—all indecisive.

There was a masked stranger, but who now living saw behind the mask? Amidst the strain and the olibanum fumes that act of vanishing in the clock might easily have been a dual hallucination. Hindoos know much of hypnotism. Reason proclaims the "Swami" a criminal with designs on Randolph Carter's estate. But the autopsy said that Aspinwall had died of shock. Was it rage *alone* which caused it? And some things in that story . . .

In a vast room hung with strangely figured arras and filled with olibanum fumes, Etienne-Laurent de Marigny often sits listening with vague sensations to the abnormal rhythm of that hieroglyphed, coffin-shaped clock.

H. P. Lovecraft

Though only forty-six when he died in 1937, H. P. Lovecraft had attained the pinnacle of his creative power. Born in and a lifelong resident of Providence, Rhode Island, he was an antiquarian by taste and a recluse by preference. His wide reading, supplemented by field explorations and genealogical quests, gave him a scholar's authority on the history and colonization of New England. This same firsthand knowledge provided him the realistic detail and visual vitality that impart conviction to his tales of supernatural horror. His narratives begin in the locale and terrain that he loved and then transport the reader into stupefying cosmic vistas beyond known space and conjectured time.

During his lifetime Lovecraft's stories received popular acclaim through publication in magazines such as *Weird Tales* and *Astounding Stories*. In 1939 the first collection of his tales, *The Outsider and Others*, brought even wider recognition of his literary powers. Today his fiction has been collected into three omnibus volumes—*The Dunwich Horror and Others*, *At the Mountains of Madness and Other Novels*, *Dagon and Other Macabre Tales*—and has achieved translation and publication in many foreign countries, including England, France, Germany, Italy, Spain, Brazil, Czechoslovakia, and the Netherlands.

No American writer of our century has so captivated the imagination of readers devoted to the macabre as Lovecraft, and nowhere has this author's stature been more solidly certified than in the collectors' mart of rare books: *The Outsider and Others* has become a much-sought-after American classic, bringing \$600 and more. The decades since his death have secured the position of H. P. Lovecraft as the greatest modern master of terror, fantastic strangeness, and horror beyond the mind's range, a prose stylist without peer since Poe.
